Subject: Kennecott Eagle Minerals Company Section 106 Assessment

Dear Ms. Martin:

EPA Region 5's Underground Injection Control (UIC) Branch recently received a report entitled "National Historic Preservation Act Section 106 Assessment for the Kennecott Eagle Mine Project Underground Injection Control Permit, Marquette County, Michigan" from Kennecott Eagle Minerals Company. We are sending you a copy of this document, including the appendices, on a compact disk for your use. If you have any comments on this report which you would like us to consider, we would appreciate receiving them within 30 days of receiving this letter.

We anticipate placing this report in the administrative record of the decision on the Kennecott UIC permit application for the Treated Water Infiltration System along with all documents previously submitted by the Tribes. If there is any information in this report which you believe should not be made available to the public because it would involve the disclosure of religious or cultural practices which the Tribe maintains as confidential, please let us know so that we can discuss how to handle such information.

If you have questions about this document, please contact Ross Micham of my staff by phone at (312) 886-4237 or by email to micham.ross@epa.gov.

Sincerely,

A handwritten signature in cursive script, appearing to read "Rebecca Harvey".

Rebecca Harvey, Chief
Underground Injection Control Branch.
