# CHECKLIST MASTER SUMMARY

CHECKLIST NUMBER	TITLE	FILE NAME
CHECKLIST 1.	Reserved for Survey Check Sheet	
CHECKLIST 2.	Permitted Facility	CL2.doc
CHECKLIST 3.	Air Emissions/Equipment Leak	CL3.doc
CHECKLIST 3.A.	Condenser	CL3A.doc
CHECKLIST 3.B.	Thermal Vapor Incinerator	CL3B.doc
CHECKLIST 3.C.	Catalytic Vapor Incinerator	CL3C.doc
CHECKLIST 3.D.	Boiler/Process Heater	CL3D.doc
CHECKLIST 3.E.	Flares	CL3E.doc
CHECKLIST 3.F.	Carbon Adsorbers – Regenerative	CL3F.doc
CHECKLIST 3.G.	Carbon Adsorbers - Non-Regenerative	CL3G.doc
CHECKLIST 4.	Containers	CL4.doc
CHECKLIST 5.	Generator	CL5.doc
CHECKLIST 5.A. 着	Small Quantity Generator	CL5A.doc
CHECKLIST 6.	Ground-Water Monitoring	CL6.doc
CHECKLIST 7.	Health & Safety	CL7.doc
CHECKLIST 7.A.	Incinerator Health & Safety	CL7A.doc
CHECKLIST 8	Incinerator	CL8.doc
CHECKLIST 9.B.	LDR – TSD Requirements	CL9B.doc
CHECKLIST 9.C.	LDR - Transporter	CL9C.doc
CHECKLIST 10.	Landfills	CL10.doc
CHECKLIST 11.	Land Treatment	CL11.doc
CHECKLIST 12.	Surface Impoundment	CL12.doc
CHECKLIST 13.	Thermal Treatment	CL13.doc
CHECKLIST 14.	Transporter	CL14.doc
CHECKLIST 15.	New Incinerator	CL15.doc
CHECKLIST 16.	Waste Piles	CL18.doc
CHECKLIST 17.	RCRA Waste Minimization	CL17.doc
CHECKLIST 18.	Tanks	CL18.doc
CHECKLIST 18.A.	Tanks - Small Quantity Generator	CL18A.doc

NOTE: Includes checklists revised in January 2000.

# DEPARTMENT OF ENVIRONMENTAL QUALITY WASTE DIVISION

# SURVEY SHEET FOR INSPECTION OF HAZARDOUS WASTE FACILITIES

NAME of FACILITY:		
ADDRESS:		
EPA ID NUMBER:		
FACILITY REPRESENTATIVE:		
TITLE:		
TELEPHONE NUMBER:	()	
INSPECTOR'S NAME:		
TITLE:		
DATE of INSPECTION:		
1. What is the busines metal plating, recyc	s activity of the firm? (i.e., furniture mfg., ling,etc.)	
	otion of the waste stream(s) [by chemical name, ardous waste code(s) generated by the firm.	

1

3. List the highest amounts of hazardous waste ever generated in any month of the calendar year and the greatest amount ever accumulated at the site of each type of waste generated.

Waste Code	Amount Generated	Amount Accu	mulated
	·		
	ever generate greater that toxic waste (P listed was 7026-F027)?		YES
or F020-F023 an	up from a spill of P listo d F026-F027 waste? facility is a large quantit		YE
	e presently being handled rters and facilities, or on		
	······································		
	generate any hazardous		YE
that is excluded	generate any hazardous from regulation? If yes d the basis for exclusion	•	YE
that is excluded	from regulation? If yes,	•	YE.
that is excluded	from regulation? If yes, d the basis for exclusion	•	YE:
that is excluded list the waste an	from regulation? If yes, d the basis for exclusion	•	YE:

that is excluded list the waste an Does the facility: Generate used oil that is l all that are appl	from regulation? If yes d the basis for exclusion Market	Burn ery? Underline or c markets or burns	

**US EPA ARCHIVE DOCUMENT** 

2

the Used Oil Checklist.

Does the facility generate any hazardous waste that is reclaimed YES NO that is reclaimed to recover economically feasible amounts of gold, silver, platinum, palladium, iridium, osmium, rhodium, ruthenium, or any combination of these?

If Yes, list the waste, where it is sent, and complete the Metals Recovery Checklist.

9.

8.

Does the facility generate, transport, store, collect or reclaim YE spent lead-acid batteries? If yes, <u>Underline</u> or circle all that are applicable. If the facility stores batteries before reclaiming them, complete the Metals Recovery Checklist.

YES NO

- 10. Based on the above, the facility is a:
  - a. conditionally exempt small quantity generator
  - b. small quantity generator
  - c. generator
  - d. permitted or interim status TSD
  - e. unpermitted TSD (explain in comments section)
  - f. transporter
  - g. other: please explain

[Underline or Circle All That Are Applicable]

11. Check accumulation times and quantities for the three types of generators. If the times or quantities are exceeded, then the facility is moved up to the next category. Complete the appropriate checklist(s).

A conditionally exempt small quantity generator can accumulate for an indefinite period of time until he has accumulated 1000 kg (approx. 5-55-gallon drums) of non-acute hazardous waste, at which time the accumulation time (180 days or 270 days) for small quantity generators begin.

Small quantity generators can accumulate hazardous waste for up to 180 days or 270 days if the disposal site is over 200 miles away (in containers and tanks <u>only</u>). However, if at any time over 6000 kgs of waste is accumulated, then the small quantity generator becomes a generator, or an unauthorized facility, as applicable. 12. List each container and tank accumulation area. Specify the number and capacity of each tank and container. [Note: Include any satellite accumulation areas. Verify that only 55 gallons of any particular hazardous waste code (or one quart of acutely toxic waste) is at that area.]

Location	Number of Containers	Number of Tanks	Capacity

14. Waste Management Flow Diagram:

(On this page sketch a brief, but detailed, flow diagram that includes how and where the waste is generated, the steps through a treatment system (if any), the steps through storage including satellite accumulation areas. Do this for each waste stream including excluded hazardous waste. Include any wastewater treatment facilities at the company, and verify the type of units included in the system, and any hazardous waste streams going to WWT.)

13.

PERMITTED FACILITY CHECKLIST INSPECTION DATE

## 2. PERMITTED FACILITY CHECKLIST

40 CFR CITATION	REGULATION	YES	NO	NA	NC
264/5 SUBPART B	SECTION A - GENERAL FACILITY STANDARDS		<b>.</b>	· · · · ·	
264/5.12	1. Has facility received hazardous waste from a foreign source? If yes, has it filed a notice with the Regional Administrator?				
264/5.13	WASTE ANALYSIS	·			
	2. Does facility maintain a copy of the waste analysis plan on-site?				
	a. If yes, does it include:				
264/5.13(b)(1)	1. Parameters for which each waste will be analyzed?				
264/5.13(b)(2)	2. Test methods used to test for these parameters?				
264/5.13(b)(3)	3. Sampling method used to obtain sample?				
264/5.13(b)(4)	4. Frequency with which the initial analyses will be reviewed or repeated?				
264/5.13(b)(5)	5. (For off-site facilities) waste analyses that generators have agreed to supply?				
264/5.13(c)	6. (For off-site facilities) procedures which are used to inspect and analyze each movement of hazardous waste, including:				
	a. Procedures to be used to determine the identity of each movement of waste				
	b. Sampling method to be used to obtain representative sample of the waste to be identified.				
264/5.14	3. Does the facility provide adequate security through:	1	·		·
	a. 24-hour surveillance system (e.g., television monitoring or guards)?				
264/5.14(b)	OR b. 1. Artificial or natural confining barrier around facility (e.g., fence or fence and cliff)? DESCRIBE:				
264/5.14 (b)(2)(ii)	AND 2. Means to control entry through entrances (e.g., attendant, television monitors, locked entrance, controlled roadway access)?				

40 CFR CITATION	REGULATION	YES	NO	NA	NC
40 CFR 264/5 Subpart E	SECTION B - MANIFEST SYSTEM, RECORDKEEPING, AND REPORTING				<b></b>
264/5.71(a)	4. Does facility receive waste from off-site?				
204/5./1( <b>a</b> )	a. If yes, does the owner/operator retain	<u> </u>	· · · ·		
	copies of all manifests?				
	1. Are the manifests signed and	<u> </u>			
	dated and returned to the				
	generator?				
· · · · · · · · · · · · · · · · · · ·	2. Is a signed copy given to the				
	transporter?				
264/5.71(b)	5. Does the facility receive any waste from a rail or				
	water (bulk shipment) transporter?				
· · · ·	a. If yes, is it accompanied by a shipping				
	paper?		l	ļ	
	1. Does the owner/operator sign and	•			
	date the shipping paper and return				.
	a copy to the generator?				
	2. Is a signed copy given to the				
	transporter?				
264/5.72	6. Has the owner/operator received any shipments of				
	waste that were inconsistent with the manifest				
	(manifest discrepancies)?				
	a. If yes, has he attempted to reconcile the				
	discrepancy with the generator and				
· · · · · · · · · · · · · · · · · · ·	transporter?	<u> </u>		l	
	1. If no, has Regional Administrator				
	been notified?		ļ		<u> </u>
264/5.73(a)	7. Does the owner/operator keep a written operating		[		
	record at the facility?	<b> </b> -	[	L	
264/5.73(b)	a. If yes, does it include:		·····	<u></u> _	
	1. Description and quantity of each				
	hazardous waste received?				
	2. Methods and dates of treatment,				· ·
	storage, and disposal?	<u> </u>	<u>↓</u>	+	
	3. Location and quantity of each	1	1	1	ł
	hazardous waste at each location?		<u> </u>		
	4. Cross-references to				
	manifests/shipping papers?   5. Records and results of waste		+		+
	analyses?			1 -	1
				+	+
	6. Report of incidents involving implementation of the				
	contingency plan?	1	1		
	7. Records and results of required		1	+	
	inspections?				
(De-+ 264)	8. Monitoring or testing analytical	<u> </u>		+	
(Part 264)	data?				
(Dent 264)	9. Closure cost estimates and, for	+	<del> </del>	+	
(Part 264)	disposal facilities, post-closure		<b>.</b>		
					4 .

• •

40 CFR CITATION	REGULATION	YES	NO	NA	NC
264.12(b)	10. Notices of generators as specified?		-		
264.73(b)(9)	11. Certification of permittee waste minimization program?				
	12. Land disposal restriction records				
	required by §268.5, §268.6,				
	§268.7(a), and §268.8, as				
	applicable? (§264.73(b)(10)-(16))	1	]		
264/5.75	8. Does the facility submit a biennial report by March				
	1 every even-numbered year?				
	a. If yes, do reports contain the following				
	information:				
264/5.75(a)	1. EPA I.D. number?				
264/5.75(b)	2. Date and year covered by report?				
264/5.75(d)	3. Description/quantity of hazardous				
	waste?				
264/5.75(e)	4. Treatment, storage, and disposal				
	methods?				
265.75(f)	5. Monitoring data under		•		
	§265.94(a)(2) and (b)(2)?				
264/5.75(g)	6. Most recent closure and post-				
	closure cost estimates?				
264/5.75(h)	7. For TSD generators, description				
	of efforts to reduce				
1. <sup>1</sup> 2.	volume/toxicity of waste				
	generated, and actual				
	comparisons with previous year?			<u> </u>	
264/5.75(j)	8. Certification signed by	1			ļ
<u> </u>	owner/operator?	ļ			
264/5.76	9. Has the facility received any waste (that does not				}
	come under the small generator exclusion) not				
	accompanied by a manifest?			ļ	
	a. If yes, has he submitted an unmanifested				
	waste report to the Regional				
· · · · · · · · · · · · · · · · · · ·	Administrator?	ļ		ļ	
264/5.77	10. Does the facility submit to the Regional				
	Administrator reports on releases, fires, and				
	explosions; contamination and monitoring data; and				
	facility closure?				

#### COMMENTS:

# 3. AIR EMISSIONS CHECKLIST

40 CFR CITATION	REGULATION	YES	NO	NA	NC
264/5.1030	SECTION A - APPLICABILITY				A
	1. Does the facility have units permitted under Part				
	270 or is it permitted under Part 270?				
	a. What is the effective date for this facility?				L
	b. For interim status facilities, have these				
	requirements been incorporated into Part B				
	application submittal?				
	2. Are there any of the following separation processes				
	at the facility:				
	a. Distillation?				
	b. Fractionation?				
	c. Thin-film evaporation?				
	d. Solvent extraction?				
	e. Air stripping?				
	f. Steam stripping?				
	SECTION B - WASTE STREAMS				
264/5.1032(a)	3. Are there waste streams associated with any				
	separation processes that contain 10 ppmw or				
	greater organic concentration?				
264/5.1034	a. If they claim waste streams below 10				
(d)(1 or 2)	ppmw, did they use proper means to		1		-
	determine concentration?				
264/5.1034	b. Was date of initial determination before		}		
(e)	their effective date?	_			
264/5.1034	c. Were other analyses performed annually or				
(e)(2 or 3)	upon changes in waste streams?				
	SECTION C - FACILITY EMISSIONS RATES		-		
264/5.1032	4. Is the hourly process vent organic emission rate	[ .	-		
(a)	greater than or equal to 3 lb/hr?				·
264/5.1032	Is the yearly process vent organic emission rate				
(a)	greater than or equal to 3.1 tons/yr?				
	a. If performance tests were made, were they				
	done according to §§ 264/5.1034(c)?				
	b. If engineering calculations were used,				
	were they done according to				
	264/5.1035(b)(2)(ii)?				
264/5.1035	c. Has the owner/operator signed a statement				
(b)(4)(iv)	that test conditions portray peak capacity	· ·			
	operating conditions?				
	d. Were the facility emissions rates		1		
	determined by the effective date?				
	SECTION D - FACILITY EMISSION RATES AFTER				
	CONTROL DEVICES OR CHANGE IN OPERATIONS	<u> </u>			

40 CFR CITATION	REGULATION	YES	NO	NA	NC
264/5.1032 (a)	5. a. Are the process vent organic emission rates for the facility less than or equal to 3				
	lb/hr and less than or equal to 3.1 tons/year or are they reduced by 95%?			÷	
	b. If performance tests were used, were they done in accordance with §§264/5.1034(c)				
	and was the test plan in accordance with $\S$ 264/5.1035(b)(3)?				
· .	c. If engineering calculations were used, were they in accordance with				
	§§264/5.1035(b)(4)?	· .	{		
264/5.1033	d. For facilities without the control devices				
(a)(2) and 264/5.1035	installed, do they have an installation plan?				
(b)(1)					
264/5.1033	e. Will the control devices be installed by 18 months after the effective date?				•
264.1036	SECTION E - REPORTING	Γ	<u> </u>	<b>.</b>	-
	6. For facilities with final permits incorporating this	-			{
	rule, have they sent in semi-annual reports of		[ .		
*	exceedances lasting longer than 24 hours?				

.

AIR EMISSIONS CHECKLIST - EQUIPMENT LEAK INSPECTION DATE

# **EQUIPMENT LEAK APPLICATIONS**

CITATION	REGULATION	YES	NO	NA	NC
264/5.1050	SECTION A - APPLICABILITY		•	· · · ·	<u>L</u>
	1. Is the facility permitted under Part 270 or does it have units permitted under Part 270?				
	a. Facility status: interim status or permitted?				
	b. What is the effective date for this facility?				
	2. Are any of these units exempt?				
264/5.1063(d)	SECTION B - WASTE STREAMS				
	3. Are there waste streams that contain at least 10% organics by weight?				
	a. Method of determination? Knowledge, ASTM Methods D2267-88, E169-87,				
	E168-88, E260-85 or Method 9060 or 				
<u>.</u>	b. If knowledge, is it documented?		L	<u></u>	
	c. Date of initial determination				
· ·	d. Dates of other analysis? Change, batch				
	4. For each waste stream that does qualify, determine fluid type (gas/vapor service, light-liquid service, heavy liquid service):				
	a. Method for determining light liquid service				•
	1. vapor pressures of constituents from standard texts, or				
	2. ASTM D-2879-86				
264/5.1064(g)	SECTION C - FACILITY OPERATING RECORD	<u> </u>	1		
204/3.1004( <u>B</u> )	5. Does the facility have a list of the equipment and identification numbers that are affected by this rule?				
•	<ul><li>6. Is there a list of the ID numbers of NDE pumps,</li></ul>	<u> </u>			
	valves, and compressors with signature of owner/operator?				
	7. Is there a list of all affected equipment by designation?	<u> </u>			
	8. Is there a list of pressure relief devices in gas/vapor service?				
-	9. Dates of test for no detection emission equipment?				
	Background level Maximum instrument reading				1
	10. Is there a list of ID numbers for equipment in vacuum service?				
	11. List of ID numbers of "unsafe-to-monitor" and "difficult-to-monitor" valves, with explanation for each and plan for monitoring or schedule.	-			

# AIR EMISSIONS CHECKLIST - EQUIPMENT LEAK INSPECTION DATE

цŝ

CITATION	REGULATION	YES	NO	NA	NC
	12. Is there a list of valves using the skip period alternative monitoring schedule, with schedule for monitoring and % leaking determined?				
	13. For dual mechanical seal pumps or compressors with barrier fluid systems with sensors, is the criteria and explanation of the criteria for determining sensor failure given?				
	14. Is there an analysis of design capacity, influent/effluent for each unit subject to these requirements, and an up-to-date analysis either by testing or knowledge to determine if the equipment is covered or not?

GENERATORS CHECKLIST INSPECTION DATE

\*

## 5. GENERATORS CHECKLIST

40 CFR CITATION	REGULATION	YES	NO	NA	NC
	SECTION A – MANIFEST				
262.20	1. Does generator ship waste off-site?		· · · · · · · · · · · · · · · · · · ·		
262.20	2. Does generator use manifest?				<u> </u>
	a. If no, is generator a small quantity generator (generating between 100 and 1000 kg/month?)		· · · · ·		
	NOTE: SQGs are only exempt if wastes are reclaimed. (See §262.20(e).)				
	1. If yes, does generator indicate this when sending waste to a TSD facility?				
Part 262 Appendix	b. If yes, does manifest include the following information?				•
	1. Manifest document no.		ŀ		
	2. Generator's name, mailing address, telephone no.				
	3. Generator EPA I.D. no.			<b> </b>	
	4. Transporter Name(s) and EPA I.D. no.(s)				
	5. Facility name, address, and EPA I.D. no.				
	6. Alternate facility name, address, and EPAI.D. no.				
	7. Instructions to return to generator if undeliverable				
	8. Waste information required by DOT – shipping name, quantity (weight or vol.), containers (type and number)				
· .	9. Emergency information (optional) (special handling instructions, telephone no.)				
	10. Is the following certification on each manifest form?				
	"This is to certify that the above named materials are properly classified, described, packaged, marked, and labeled and are in proper condition for transportation according to the applicable national and international regulations."				
262.40	11. Does generator retain copies of manifests? If yes, complete a through g. (§262.23)				
	a. Did generator sign and date all manifests?				

40 CFR CITATION	REGULATION	YES	NO	NA	NC
	b. Did generator obtain		<u> </u>	1	<b> </b>
	handwritten signature				
	and date of acceptance		)		
	from initial transporter?		1. A. A.		
262.40	c. Does generator retain	[			[
	one copy of manifest				
	signed by generator and				
	initial transporter?				ļ
262.40	d. Do returned copies of				
202.10	manifest include facility				
		l .			
	owner/operator signature				
A 44 14	and date of acceptance?				
262.42	12. Have manifests been received from the		1	1	
	TSD facility for any waste which was				
	shipped over 45 days ago?				
	a. If no, has the generator filed an			· ·	
	exception report?				
	b. Does the exception report	·	<b>.</b>		1
	include:				
	1. a legible copy of the	t	r	r	1
	manifest for which the				l
	generator does not				
	have confirmation of		[	ļ	ļ
	the delivery? and				<u> </u>
	2. a cover letter				
	explaining the efforts	ļ		l	l
	taken to locate the				
	shipment?				1

### SECTION B - VISUAL ASSESSMENT

#### 1. OBSERVATION OF EQUIPMENT/FUNCTION

EQUIPMENT OR FUNCTION	LEAKS & EMISSIONS	SEALS	STRUCTURAL INTEGRITY	PROPER FUNCTION	SAFE ISSUE
Waste unloading					
Waste storage/blending					
Waste handling/piping					
Waste feed/fuel systems					
Combustion chambers/burners					
Kiln drive system		•	,		
Combustion_air fans					
Pollution control devices					
Emergency vent stack					
Process instrumentation					
Ash handling system					
Scrubber effluent handling					

NOTES:

·\_\_\*

### 2. OBSERVED OPERATIONS

а.		the facility maintain records of permit parameters (complete and ssible)?	YES	NO	NA
b.	Does charts	the proper identification of date, time, and units appear on strip	YES	NO	NA
C.		the facility maintain records of waste acceptance, handling, and cterization?	YES	NO	NA
d.		the facility maintain a log of inspections, calibrations, and enance?	YES	NO	NA
е.		staff demonstrate knowledge of emergency procedures and opencies?	YES	NO	NA
<b>_f.</b>	How	does the facility handle the residuals from:			
	1.	Primary chamber ash?			
	2.	Scrubber effluent?	•		
	3.	Other? Specify:			

g. Describe the appearance of the stack emissions:

### 3. GENERAL QUALITY OF OPERATION

Provide a description of the following:

- a. Odors
- b. Housekeeping
  - 1. Storage areas
  - 2. Waste feed areas
  - 3. Control room
  - 4. General facility
  - 5. Laboratory
- C.

Other \_\_\_\_

### 4. OPERATION OF AUTOMATIC WASTE FEED CUTOFF SYSTEM

Observe the operation of the automatic waste feed cutoff system in response to simulated upset conditions for each automatic cutoff condition required in the permit. [NOTE: At least one test must involve an actual shutdown. \*S = Shutdown, A = Actual]

	PERMI	TLIMITS	OBSE	RVED		
AUTOMATIC CUTOFF CONDITIONS	Value	Time Lag	Value	Time Lag	S or A*	Adequate Function?
Minimum temperature						
Chamber (kiln)						
Chamber (2 <sup>nd</sup> )						,
Maximum CO						
Other CO limit						
Maximum flue gas flow (rate/velocity)						
Maximum feed rate (stream)						-
Pressure in primary combustion chamber						
Air pollution control:						
Quench water						
Comb Eff						
Stack O <sub>2</sub>						
Loss of fan						
Loss of power						

NOTES:

5.

#### CALIBRATION AND MONITORING INSTRUMENTATION

Review documentation of the most recent calibration of the monitoring instrumentation for all permit operating parameters specified in the permit. Discuss procedures sued with the facility staff.

# 10. LANDFILLS CHECKLIST

NA = Not Applicable, NC = Non-Compliance

40 CFR CITATION	REGULATION	YES	NO	NA	NC
264/5.301	SECTION A - DESIGN REQUIREMENTS				
264.301(c)	1. Does landfill have two or more liners and a leachate				
265.301(a)	collection system between the liners?				
265.301(b)	2. Did owner/operator notify Regional Administrator	··			
	60 days prior to receiving waste?				
264.301(d)	3. If landfill does not have two liners and a leachate				
265.301(a)	collection system, did owner/operator adequately				
	demonstrate to the Regional Administrator that				
	alternate design and operation prevents migration of				
	hazardous constituents?				
264.301(e)	4. If no double liner exists, does landfill fall into one				
265.301(d)	of the following exemption categories:				
	a. Monofill only holds wastes from foundry				
	furnace emission controls or metal casting				
	molding sand?				
	AND b. Monofill has at least one liner and there is				
	no evidence that liner is leaking; the				
	monofill is more than 14 miles from an				
	underground source of drinking water; and				
	has ground-water monitoring?				
	OR c. Owner/operator demonstrates that monofill				
	is located, designed, and operated to				
	prevent migration of hazardous				
	constituents?				
264.301(a)	5. If landfill does not have two liners and a leachate				
265.301(c)	collection system, does it have at least one liner for				
	all existing portions?				
	a. If yes, does this liner provide for the				
	following:				
Part 264	1. Prevent migration of wastes out				
	of landfill to subsurface soil,				
	ground water, and surface water?				
Part 264	2. A leachate collection and removal				
1	system immediately above the				
	liner constructed to be chemically				
	resistant to the waste and strong				
	enough not to collapse under				
	pressure?		1		
264.301(d)	6. If owner/operator does not comply with No. 5				
265.301(c)	above, is he exempt after demonstrating to the				]
200.001(0)	Regional Administrator that alternate design and				1
	operation prevents migration of hazardous				1
	constituents?

# 12. SURFACE IMPOUNDMENTS CHECKLIST

NA = Not Applicable, NC = Non-Compliance

40 CFR CITATION	REGULATION	YES	NO	NA	NC
264/5.221	SECTION A - DESIGN AND OPERATING REQUIREMENTS				
	1. Does the facility operate one or more surface impoundments?				
264.221(c) 265.221(a)	a. If yes, has owner/operator installed two or more liners and a leachate collection system for any new units, replacement of any existing units, or lateral expansion of units?				
264.221(d) 265.221(a)	<ul> <li>b. Is owner/operator exempt from double- liner leachate collection system requirements because Regional Administrator has determined that impoundments design will prevent the migration of hazardous constituents?</li> </ul>				
265.221(b)	c. Did owner/operator notify Regional Administrator 60 days prior to receiving waste?	•			
264.221(e) 264.221(d)	d. If impoundment does not have a double liner, is it exempt due to one of the following reasons?				
	1. Monofill contains only wastes from a foundry furnace emission controls or metal casting molding sand				
	2. Monofill has at least one liner for which there is no evidence of leaking				
	3. Monofill is located, designed, and operated to ensure that no migration of constituents into ground or surface water occurs				
264.221(g)	e. Does owner/operator take measures to prevent overtopping resulting from overfilling; wind and wave action; rainfall; run-on; malfunctions of level controllers, alarms, and other equipment; and human error?				
264.221(h)	f. Is impoundment surrounded by dikes?				
265.221	SECTION B - OPERATING REQUIREMENTS	L			
	2. Does owner/operator maintain at least 60 cm (2 ft) of freeboard (Part 265)?				
	a. If no, does owner/operator have certification by a qualified engineer?		 		
265.223	SECTION C – CONTAINMENT SYSTEM	<u> </u>	<u>.                                    </u>		1
	3. Do all earthen dikes have a protective cover (e.g., grass, gravel) to minimize erosion?				

-

FACILITY NAME EPA I.D. NUMBER

40 CFR CITATION	REGULATION	YES	NO	NA	NC
265.225	SECTION D – WASTE ANALYSIS AND TRIAL TESTS			<b>I</b>	L
	4. Are wastes treated in the surface impoundment? (if yes, explain in comment section.)				
	5. Has the owner/operator chemically treated a waste (or plans to) which is substantially different from previously treated wastes?				
	6. Has the owner/operator chemically treated a waste (or plans to) using a process that is substantially different from that previously used?				
	7. If yes to 2 or 3 above, have waste analyses and trial treatment tests been conducted?				
	a. If not, does owner/operator have written documentation on similar treatment of similar wastes?				
264/5.226	SECTION E - MONITORING AND INSPECTION				
Part 265	8. Does owner/operator check freeboard level daily?	]			
Part 265	9. Are the surface impoundment, dikes, and <sup>#</sup> surrounding vegetation inspected weekly for deterioration or failures?				
	10. If regulated under Part 264, does owner/operator:				
	a. Inspect liners for imperfections (tears and punctures for synthetic liners and cracks, root holes, etc., for soil-based liners) during construction and installations?				
	b. Inspect the operating impoundment weekly and after storms to detect evidence of deterioration, malfunction, and overtopping?				
	c. Have certification that the dike will withstand stresses from the amount and type of waste to be held and will not fail due to cleaning?				
264.227	SECTION F – EMERGENCY REPAIRS, CONTINGENCY PLANS				
264.227(c)	11. Does facility have a contingency plan?				
264.227(a)	a. If yes, does plan stipulate that impoundment be removed from service under the following conditions:				•
	1.         Sudden drop in liquid level?           2.         Leaking dike?				
264.227(b)	b. Does plan detail the steps to be followed when removing impoundment from service, including:		1	·	• T
	1. Shutting off flow into impoundment?	   			ļ
- 	2.         Containing any surface leakage?           3.         Stopping the leak?				<u> </u>
	4. Taking measures to prevent catastrophic failure?				

40 CFR CITATION	REGULATION	YES	NO	NA	NC
<u> </u>	5. Notifying Regional Administrator of problems in writing if leaks cannot be contained?				
264.227(d)	c. If impoundment was removed from service, did owner/operator take the necessary precautions to rectify problems and to obtain certification before restoring impoundment to service?				
264.227(e)	d. If impoundment was removed from service and was not restored to service, was impoundment closed in accordance with an approved closure plan?				
264/5.228	SECTION G - CLOSURE AND POST-CLOSURE		I	·	<u> </u>
	12. Is a closure plan retained at the facility?				
· · · · · · · · · · · · · · · · · · ·	13. At closure, did owner/operator:		·	L	L
265.228(a)	a. Remove standing liquid?				
265.228(a)(1)	b. Remove waste and waste residue?			1	
265.228(a)(1)	c. Remove liner?		<u> </u>		
264/5.228 (a)(1)	d. Remove underlying and surrounding contaminated soil?				
Part 265	e. If not, did owner/operator demonstrate to Regional Administrator that the above materials were nonhazardous?				
265.228(a)(2)	1. If no, has owner/operator closed the impoundment and provided post-closure care?				
	14. If regulated under Part 264, has owner/operator:			·	·
264.228(a)(1)	a. Removed or decontaminated waste residues, contaminated system components, subsoils, structures, and equipment, and managed them as hazardous waste?				
264.228 (a)(2)(i)	b. Eliminated free liquids by removing or solidifying remaining wastes or waste residues?				
264.228 (a)(2)(ii)	c. Stabilized remaining wastes to a bearing capacity sufficient to support final cover?				
264.228 (a)(2)(iii)	d. Covered the impoundment with final cover?				
264.228(b)	15. Did owner/operator leave any residuals in place at closure?				
264.228(b)(1)	16. In post-closure, does owner/operator maintain integrity of cover, maintain and monitor the leak detection system and ground-water monitoring system, and prevent run-on and runoff?

COMMENTS:

# 16. WASTE PILES CHECKLIST

40 CFR CITATION	REGULATION	YES	NO	NA	NC
264/5.250	SECTION A - DESIGN AND OPERATING REQUIREMENTS				
264.251(j) 265.251(j)	1. Is the pile containing hazardous waste protected from wind?				
264.251(a)	2. Does waste pile have a liner and leachate collection system?				
264.251(b)	a. If no, has facility proved to Regional Administrator that waste pile's design characteristics and location will prevent migration of hazardous constituents into ground water?				
264.251(g)	3. Is run-on diverted around active portion?				
264.250(h)	4. Is runoff collected and controlled?				
264.251(i)	5. Are collection and holding facilities emptied after storms?				
265.252	SECTION B - WASTE ANALYSIS	· ·			
	<ul> <li>6. Is a representative sample of waste from each incoming shipment analyzed before the waste is added to the pile to determine the compatibility of the wastes?</li> <li>7. Does the analysis include a visual comparison of</li> </ul>				
	color or texture?				
265.253	SECTION C - CONTAINMENT				
	8. Is the leachate or runoff from the pile considered a hazardous waste?				
265.253(a)	a. If yes, is the pile managed with the following:		······································		
·····	1. An impermeable base compatible with the waste?				
·	2. Run-on diversion?				
	3. Leachate and runoff collection?	<u> </u>		<u> </u>	
	4. Are collection and holding facilities periodically emptied?				
265.253(b)	OR 5. Is the pile protected from precipitation and run-on by some other means?				
264.254	SECTION D – MONITORING AND INSPECTION				
264.254(a)	9. Are liners and covers inspected for damage during construction?				
264.254(b)	10. Are waste piles inspected weekly and after storms for deterioration, run-on and runoff controls, wind dimensal control, and proper function of leachest				
	dispersal control, and proper function of leachate collection system?				
264/5.256	SECTION E - IGNITABLE OR REACTIVE WASTES	ļ			1
264/5.256(a)	11. Are ignitable or reactive wastes placed in the pile?			<u> </u>	
	a. If yes, is the waste treated, rendered, or mixed so that the addition of the resulting				
	waste results in the waste or mixture no	L	L	<u> </u>	1

40 CFR CITATION	REGULATION	YES	NO	NA	NC
	longer meeting the definition and complies				
	with §264.17(b)? (Describe procedure in				. •
	comments section.)				ļ
264.256(b)	OR b. Is the waste protected from sources of				
265.256(a)(2)	ignition or reaction?				
	1. If yes, use narrative explanation				
	sheet to describe separation and				
	confinement procedures.				1
	2. If no, use narrative explanation				
	sheet to describe sources of				
	ignition or reaction.				
264/5.257	SECTION F - INCOMPATIBLE WASTES		1		
	12. Are incompatible wastes placed together in the pile?	1	ř.	[	
264/5.257(b)	13. Are incompatible wastes separated from each other				
20 110120 (0)	by a dike, berm, or wall?			1	
	14. Is there evidence of fire, explosion, gaseous			<u> </u>	<u> </u>
	emissions, leaching, or other discharge? (Use				
	narrative explanation sheet.)				
264/5.258	SECTION G - CLOSURE AND POST-CLOSURE		L	1	
204/0.200	15. Is a closure plan retained at the facility?			r	T
264/5.258(a)	16. At closure, were all waste residues, contaminated		· · · · ·		1
204/3.230(a)	system components, contaminated subsoils, and				
	structures and equipment contaminated with waste				
	or leachate, removed or decontaminated?				
264/5.258(a)	17. Were all contaminated subsoils removed from the				
204/J.2J8( <i>a</i> )	site?				
	a. If no, did owner/operator close the facility				
	and perform closure and post-closure care				
	in accordance with §264.310 and 265.310?	·		L	ļ
264.258(b)	18. Is a plan for complying with No. 2 above included in closure plan?				
264.258	19. Is a contingency plan for complying with No. 3a				ľ
(c)(1)(i)	above included in the plan?		I		
264.258	20. Is a contingency post-closure plan included?				1
(c)(1)(ii)			· ·		
264.258(c)(2)	21. Are cost estimates for the contingent closure and		]	-	1
	post-closure plan included in closure plan?				
264.259	SECTION H - REQUIREMENTS FOR WASTE F020,	1	•	•	
	F021, F022, F023, F026, AND F027				
··· ···	22. Does facility place these F wastes in a waste pile?		Γ	,	1
	a. If yes, does facility have an approved			+	+
	management plan for these wastes?				1

## 17. RCRA WASTE MINIMIZATION CHECKLIST

NA = Not Applicable, NC = Non-Compliance

40 CFR CITATION	REGULATION	YES	NO	NA	NC
	SECTION A - STATUTORY/REGULATORY REQUIREMENTS				
262.20(a)	1. Has the manifest been certified by an authorized representative?				
262.20(a)	2. Has the waste minimization statement on the manifest been altered or deleted?				
262.20(a) 264/5.75	3. Does the facility have a written description of their waste minimization program?		~		
	If a written description is not provided, can the facility personnel provide a verbal description of the waste minimization program?				
	4. Is there any visual evidence of the facility's waste minimization efforts? If yes, describe the activities/program observed in the comment section.				
	5. Does the description in the biennial report and/or annual export reports include:		<u> </u>		L
262.41(a)(6) 262.56(a)(5)(i) 264/265.75(h)	a. A description of the efforts undertaken during the year to reduce the volume and toxicity of waste generated?				
262.41(a)(7) 262.56(a)(5)(ii) 264/265.75(i)	b. A description of the changes in volume and toxicity of waste actually achieved during the year in comparison to previous years?				
262.41(a)(8) 262.56(a)(6) 264/265.75(j)	c. Certification by the generator or authorized representative? (§262.56(a)(6) requires certification by primary exporter, §§264/5.75(j) requires certification by the owner/operator or authorized representative.)				
264.73(b)(9)	6. For permitted facilities, does the operating record contain a certification by permittee (at least annually) that the permittee has a program in place to reduce the volume and toxicity of the hazardous wastes?				
	SECTION B - PERMIT/ENFORCEMENT REQUIREMENTS	· ·			
	7. Does the facility's permit contain any waste minimization requirements? If yes, briefly describe in the comment section whether the requirements and indicate if they have been met.				
	SECTION C - PERMIT/REGULATORY REQUIREMENTS				
	8. Are there waste minimization requirements contained in enforcement orders or settlement agreements with the facility? If yes, briefly describe in the comment section whether the requirements and indicate if they have been met.

CONTAINERS CHECKLIST INSPECTION DATE

# 18. TANKS CHECKLIST

NA = Not Applicable, NC = Non-Compliance

40 CFR CITATATION	REGULATION	YES	NO	NA	NC
<u> ، ، ،</u> ،	1. Which of the following describes the tank(s) employed at this facility?				L
	<ul> <li>a. Indoor – not on permeable floor</li> <li>b. Indoor – on permeable floor</li> <li>c. Outdoor – above ground</li> <li>d. Outdoor – in ground</li> <li>e. Outdoor – underground</li> </ul>				2 •
265.191	2. Does the tank(s) appear to be in good condition? (If				
265.193	<ul> <li>no, describe in the Comments.)</li> <li>3. Is the tank(s) provided with an effective secondary containment system? (If yes, describe in Comments.)</li> </ul>				
265.191(a)	a. If no, does the facility have a written assessment reviewed and certified by an independent, qualified, registered professional engineer that attests to the tank(s)'s structural integrity?				
265.191(b)	4. Was a leak test performed on the tank(s)?				
265.194(b)	5. Is the tank(s) provided with adequate controls to prevent spills or overflows (i.e. automatic feed cutoff, by pass to another unit, high level alarms, etc.)				
265.194(b)	6. Is there sufficient freeboard (2 feet) in uncovered tank(s) to prevent overtopping by wave or wind action or precipitation?				
265.195(a)	7. Is tank(s) inspected each operating day?				
265.195(a)(1)	If yes, do inspections include: a. Overfill/spill control equipment?				
265.195(a)(2)	b. Above ground portions of the tank(s) for corrosion or releases?				
265.195(a)(3)	c. Data gathered from monitoring equipment and leak detection equipment?				
265.195(a)(4)	d. Area immediately surrounding the externally accessible portion of the tank(s) and secondary containment system for signs of erosion and releases?				
265.195(b)(4)	8. Does the facility perform annual inspections of the cathodic protection system, if present?				
265.195(c)	9. Does the facility properly document all of the results of its tank system inspections?				

Page 1

### CONTAINERS CHECKLIST INSPECTION DATE

FACILITY NAME EPA I.D. NUMBER

40 CFR CITATATION	REGULATION	YES	NO	NA	NC
265.196	10. Is there any indication that the facility did not properly respond to spills or leaks from a tank(s) (this would include failure to stop the spill/leak, failure to clean up spilled/leaked material, failure to minimize migration, failure to remove tank(s) from service immediately, failure to provide notification, etc.)? If yes, describe in Comments.				
	11. Does the facility store any ignitable or reactive waste in its tanks(s)? If yes, describe in Comments.				
265.198(a)(1)	a. Is the waste treated, rendered or mixed before or immediately after placement in the tank(s) so that it no longer meets the definition of ignitable or reactive waste?				
265.198(a)(2)	b. Is the waste stored in such a way that it is protected from any material or condition that may cause the waste to ignite or react?				
265.198(a)(3)	c. Is the tank(s) used solely for emergencies?				
265.198(b)	d. Does the tank(s) appear to be a safe distance from the facility's property line and public thoroughfares? If no, describe in the Comments.				
	12. Is there any indication that incompatible wastes are being stored in a tank(s)?				
265.199(a)	If yes: a. Is there any evidence of extreme heat or pressure, fire or toxic emissions occurred? If yes, describe in Comments.				
265.200	13. Are waste analysis conducted or written documentation obtained before placing a substantially different hazardous waste into a tank(s)?				

COMMENTS:

# 18.A. HAZARDOUS WASTE TANK SYSTEM CHECKLIST SMALL QUANTITY GENERATOR
