Re: Vapor Intrusion Characterization Report
Former Chamberlain Manufacturing Corporation
550 Esther Street
Waterloo, Iowa
EPA Docket Nos. RCRA-07-2010-002 and CERCLA-07-2010-0005

Dear Mr. Morrison:

Terracon Consultants, Inc. (Terracon) is pleased to submit this revised Vapor Intrusion Characterization Report (VIC Report) for activities in conjunction with the site referenced above. The VIC Report presents results of activities related to the installation of sub-slab vapor sampling points and the collection and analysis of sub-slab vapor, indoor air, and ambient air samples.

Should you have any questions or require additional information, please do not hesitate to contact our office.

Sincerely,
Terracon Consultants, Inc.

**VAPOR INTRUSION CHARACTERIZATION REPORT
FORMER CHAMBERLAIN MANUFACTURING CORPORATION
550 ESTHER STREET
WATERLOO, IOWA**

**Project No. 07107020
July 5, 2011**

1.0 INTRODUCTION

Terracon has prepared this VIC Report to evaluate the results of vapor intrusion characterization activities conducted in accordance with VIC Work Plan dated May 20, 2010 and revised October 14, 2010. The VIC Work Plan was approved with modifications by the USEPA on January 6, 2011¹. The intent of the VIC Work Plan was to evaluate the potential existence of a vapor pathway in off-site areas related to shallow groundwater contamination from the former Chamberlain Manufacturing facility. This VIC Report is submitted in accordance with the requirements of the UAO, Docket Nos. RCRA 07-2010-002 and CERCLA 07-2010-005 dated April 20, 2010 and Task I of the SOW attached to the UAO. Capitalized terms not defined herein have the definitions set for the in the UAO or the SOW.

The vapor intrusion characterization activities were completed in accordance with USEPA and other applicable guidance including, but not limited to:

- CalEPA (California Environmental Protection Agency). 2004. *Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air*. Interim Final. Department of Toxic Substances Control. Sacramento, CA. (Revised February 7, 2005) ("California Guidance")
- ITRC (The Interstate Technology & Regulatory Council). 2007. *Vapor Intrusion Pathway: A Practical Guideline*. Vapor Intrusion Team. Washington, DC. ("ITRC Guidance")
- U.S. EPA. 2002. *Draft Guidance for Evaluating the Vapor Intrusion to Indoor Air Pathway From Groundwater and Soils (Subsurface Vapor Intrusion Guidance)*. Office of Solid Waste and Emergency Response, Washington, DC.
- U.S. EPA. 2008: *US. EPA's Vapor Intrusion Database: Preliminary Evaluation of Attenuation Factors*. Draft. Office of Solid Waste, Washington, DC.
- U.S. EPA "Development of a Sub-Slab Gas Sampling Protocol to Support Assessment of Vapor Intrusion." (http://www.epa.gov/ahaazvuc/research/waste/research_40.pdf.)

¹ We understand that the USEPA is currently considering amendments to the VIC Work Plan. The activities described in this VIC Report were completed prior to amendments incorporated after January 6, 2011.

1.1 Site Conditions

The Property is an irregularly shaped parcel containing approximately 22.8 acres and located at 550 Esther Street in Waterloo, Iowa. A Topographic Map is included as Figure 1 in Appendix A. A Site Diagram is included as Figure 2.

Chamberlain Manufacturing produced metal washer wringers and projectile metal parts from approximately 1919 until 1996 when it was sold to Atlas Warehouse L.C. for use as a warehousing facility. The City acquired the Property from Atlas Warehouse L.C. in 2005 in an effort to facilitate redevelopment and has demolished the buildings on the Property.

The Property is zoned Heavy Industrial (M-2) by the City. The Property is adjoined by park land to the north and south, single family residential housing to the west, and Virden Creek followed by a golf course to the east. Virden Creek is within approximately 100 feet of the Property at its closest point. Gates Park adjoins the Property to the north across Louise Street, to the east across Virden Creek, and to the south across the railroad tracks. Single family residences are located across East 4th Street to the west of the Property. Single family residences are also located along the east side of East 4th between Anita and Louise Streets.

1.2 Previous Assessment Activities

Beginning in 2004, the City conducted an environmental assessment of the site using a USEPA Brownfields Grant. Results of assessment activities identified impacts to soil and groundwater at the site including a chlorinated solvent plume that extends to the south and west. Site assessment activities were not completed due to funding restrictions of the Brownfields Grant program.

Subsequently, environmental assessment activities of onsite soil and groundwater conditions and the offsite chlorinated solvent plume were completed by Chamberlain. The lateral extent of the chlorinated solvent plume has been determined to extend south and west from the Property into an area of residential development. USEPA's preliminary evaluation of the vapor intrusion to indoor air pathway resulting from the groundwater plume identified the potential for vapor intrusion into residential structures.

To further evaluate the vapor intrusion pathway, the USEPA conducted sub-slab vapor sampling of selected residences in November 2008. Due to problems with the sampling and analysis equipment, the sampling activities were repeated in April/May 2009. Sub-slab vapor samples were collected from ten homes located along and near East 4th Street and analyzed for VOCs. In addition, one indoor air sample was collected from one of the ten homes. The results of sampling activities identified PCE and TCE in excess of sub-slab vapor screening levels in seven of the ten residences sampled. The elevated concentrations were generally located within the 2200, 2300, and 2400 blocks of East 4th Street.

1.3 Project Objectives

The objective of the VIC Report is to evaluate the nature and extent of sub-slab soil gas impact in residential areas adjoining the Property to the south and west. Results of sub-slab vapor sampling will be used to evaluate the need for vapor intrusion interim measures and corrective actions.

2.0 SCOPE OF SERVICES

The VIC Report for the area south and west of the Property evaluates the potential vapor intrusion pathway. Activities included the installation of sub-slab vapor sampling ports and the collection of sub-slab vapor samples. In addition, indoor air samples and corresponding ambient air samples were collected at representative locations.

2.1 Study Area

Sub-slab soil gas sampling and analysis began with those homes within the limits identified in the SOW, Exhibit 2, included as Figure 3, Appendix A. The area identified includes approximately 72 Residences. The ten homes sampled by the USEPA in April/May 2009 are included in the study area and were offered the opportunity to be resampled for a consistent baseline.

2.2 Sampling Activities

2.2.1 Site Access

Prior to site mobilization, the names and addresses for those Residences within the limits identified on Figure 3 were obtained from a review of City of Waterloo directory and the Blackhawk County Real Estate Mapping website. Based on a review of the city directory and county website records, it was determined that 29 of the 72 Residences were rental properties. Each identified property owner and resident was sent a certified letter explaining the availability of the vapor sampling program, details concerning the procedures to be followed, schedule of proposed activities, and availability of results. A Sampling Request Form and a standard Terracon Access Agreement were included with the letters. Copies of the letter, Sampling Request Form, and Terracon Access Agreement for owner-occupied Residences and for renter-occupied Residences are included as Appendix C. A spreadsheet identifying the 72 Residences and the owners and occupants of each was provided to the USEPA on March 30, 2011. A copy of the spreadsheet is also included in Appendix C.

Terracon received responses from 21 owner-occupied Residences and 12 renter-occupied Residences. Each owner and renter submitting a response was contacted in an attempt to

schedule site visits for vapor characterization activities or to obtain fully completed Sampling Request Forms and Access Agreements from both the property owner and the renter. Sampling activities were completed at 17 owner-occupied Residences and 6 renter-occupied Residences. Sampling activities were not completed at responding Residences due to the following reasons:

- Fully completed Sampling Request Forms and Access Agreements not received from both the property owner and the renter (4 renter-occupied Residences)
- Residence was withdrawn from the program either voluntarily or due to conditional requests (2 owner-occupied Residences and 1 renter-occupied Residence)
- Occupants could not be reached to schedule sampling activities (2 owner-occupied Residences)
- Occupants were not available at the scheduled sampling time (1 renter-occupied Residence)

2.2.2 Sampling Questionnaire and Site Observations

Upon arrival at the Residence, Terracon conducted an interview with the occupant to allow for completion of the Occupied Dwelling Questionnaire, intended to document the presence/absence and use of household products containing VOCs. Observations were made to document the location of features including, but not limited to furnaces, water heaters, chimneys, and floor drains and the physical characteristics of the home being sampled including, but not limited to the type of foundation and its integrity.

An Arrival Checklist was completed by Terracon and signed by the occupant following each visit to the Residence. The purpose of the Arrival Checklist was to document proper completion of procedural activities including presentation of Terracon identification, confirmation of occupant's identity, explanation of purpose of the site visit, and discussion of follow-up activities.

2.2.3 Sub-slab Soil Gas, Indoor Air, and Ambient Air Sampling

Sub-slab soil gas sampling was conducted at each of the 23 Residences included in the sampling program. Indoor air sampling and ambient air sampling were conducted at randomly selected Residences included in the sampling program and at each of the Residences included in the sampling program in which the detected concentration of TCE or PCE exceeded the screening level in the April/May 2009 sampling event. Duplicate sample locations were also collected.

Terracon sampling teams arrived at the Residences at the appointed time. After introductions, one member of the sampling team completed the Occupied Dwelling Questionnaire with the occupant. The remaining member of the sampling team proceeded with the installation of the sub-slab sampling port. A Sampling Port Installation Checklist was completed by Terracon and signed by the occupant following completion of sample port installation. The purpose of the Sampling Port Installation Checklist was to document proper completion of procedural activities,

including identification of sample port location with the concurrence of the occupant, sample port installation in accordance with VIC Work Plan procedures, clean-up of work area, and observation of completed port installation by occupant.

After allowing the sub-slab sampling port to cure for at least 48-hours, Terracon returned to the Residence to conduct sampling activities. If the Residence was not scheduled for indoor air sampling, sub-slab soil gas sampling was completed. If the Residence was scheduled for indoor air sampling, indoor air sampling equipment was placed in the designated sampling location and sampling was initiated and a follow-up site visit was scheduled for the following day. After allowing indoor air sampling to proceed for at least 24-hours, Terracon returned to the Residence to collect indoor air sampling equipment and to complete sub-slab soil gas sampling. Ambient air sampling, if scheduled, was conducted concurrently with indoor air sampling to document outdoor levels of VOCs during sampling activities.

An Indoor Air Sampling Canister Installation Checklist was completed by Terracon and signed by the occupant following completion of canister placement. The purpose of the Indoor Air Sampling Canister Installation Checklist was to document proper completion of procedural activities including verification that doors and windows had not been opened for a 24-hour period prior to sampling, identification of sample canister placement with the concurrence of the occupant, explanation of precautions to be taken during sample collection, and arranging for the follow-up visit.

Meteorological conditions were documented during sampling activities.

Copies of the completed Occupied Dwelling Questionnaire are included as Appendix D. Copies of completed field forms including the Soil Vapor/Indoor Air Sampling Information Form and field checklists are included as Appendix E.

2.3 Health and Safety

Terracon prepared a HASP for the sampling activities. Personnel installing sampling ports wore a USEPA Level D work uniform consisting of safety glasses and protective gloves.

2.4 Site Access Protocol

Terracon notified the Occupants at least 48 hours in advance of the start of assessment activities. City staff were notified of pending activities to give them an opportunity to prepare for possible inquiries from residents and to observe sampling activities. Issues regarding access to assessment locations were not encountered during sampling activities.

3.0 METHODOLOGIES

Project activities were completed in accordance with the USEPA-approved QAPP, Revision 1 dated August 18, 2006, QAPP Addendum dated August 2, 2010, and relevant TSOPs. The following TSOPs were used during the assessment.

Table 3-1 Terracon Standard Operating Procedures

REFERENCE NO.	TITLE OF PROCEDURE
E.10	Project Mobilization
E.20	Standard Safe Operating Procedures for Hazardous Waste Operations
E.30	Chain of Custody Documentation
E.50	Sampling – Environmental Representativeness
E.554	Field Screening – Air / Photoionization Detector
E.2210	General
E.2220	Disposal of Spent Supplies
E.2230	Handling and Storage of Drill Cuttings (Non-Hazardous)
E.2240	Site Security Procedures
E.2405	Cleaning - General
E.2410	Cleaning - Manual Washing

As described in Section 1.5.3 of the QAPP, specific work scopes may require variation of TSOP procedures following relevant state and federal guidance, technical standards, or manufacturer specifications not outlined under a specific TSOP. Accordingly, the following non-TSOPs were incorporated into the VIC Work Plan and were used as a part of characterization activities.

3.1 Sampling Port Installation

Sub-slab soil gas samples were collected via a hollow steel sleeve installed through the concrete floor slab. The sub-slab inserts were constructed from a 1-inch outer diameter by 4-inches long cylindrical blank. The steel blanks were hollowed out to allow for the passage of sub-slab soil gas from beneath the floor slab into the sampling apparatus. The top of the sub-slab insert consisted of a threaded set-screw style cap and rubber O-ring that allows for a flush mounted installation and sealing of insert. Sub-slab inserts also had a one-eighth inch diameter rod welded vertically on their exterior to prevent the insert from spinning loose after the installation process.

Upon arrival at the Residence, Terracon observed the basement area to identify a location for installation of the sampling port. Terracon attempted to identify an unobtrusive location in an interior portion of the basement that was not near possible migration pathways such as floor drains, separated floor cracks, unsealed pipe penetrations, or sump pump pits. Pertinent observations were documented on a Soil Vapor/Indoor Air Sampling Information Form and photographs of the port location, before and after installation, were taken. Photographs of installed sample ports are provided in Appendix F.

Sub-slab inserts were thoroughly cleaned before installation to remove any residues and contaminants left over from the fabrication processes. The inserts were installed in holes drilled through the concrete floor slab using a 1½-inch diameter carbide masonry bit and a rotary hammer drill. The hole was advanced completely through the concrete floor slab. Silica sand was used to backfill the hole and obtain the proper level for the insert to be flush mounted. A small piece of wire mesh screen was placed between the silica sand and insert to prevent silica sand from entering the insert interior. Additional silica sand was placed around the insert to stabilize the insert in the hole for the remaining installation process. The remaining annular space around the insert was filled to the concrete surface using neat Portland cement. The Portland cement was mixed with water until a paste consistency was obtained. The Portland cement was then placed into the annular space and finished as a flush mounted unit.

The sampling port installation was completed in accordance with the USEPA-approved QAPP Addendum dated August 2, 2010 and consistent with the USEPA guidance.

3.2 Sub-Slab Vapor Sampling

Sub-slab vapor sampling was conducted in accordance with the ITRC Guidance. The set screw of the flush mounted insert was removed using an Allen wrench. A threaded nipple with Teflon tubing was screwed into the flush mounted sub-slab insert. A syringe was connected to the Teflon tubing and used to purge approximately two volumes of soil gas from the sub-slab soil gas sampling point.

The sample was collected by attaching the top end of the tubing to a six-liter Summa canister equipped with a 200 cubic centimeter per minute flow control and vacuum gauge. The vacuum in the Summa canister before and after sampling was recorded on the information form. The valve of the Summa canister was opened and the sub-slab soil gas allowed to flow into the Summa canister for a period of 30-minutes. The vacuum gauge was monitored to check progress of the canister filling. The Summa canister valve was then closed and the Summa canister was submitted for laboratory analysis. Sample collection was completed prior to the full dissipation of vacuum on the summa canisters.

Based on a review of port installation and sampling procedures, it was determined in the field that excessive moisture or dust was not anticipated during sampling activities. As such, an in-line paper filter/moisture trap was not used.

After the soil gas sample was collected, a photo-ionization detector was connected to the tubing to measure the organic vapor concentration. A Soil Vapor/Indoor Air Sampling Information Form indicating project information, equipment identifiers, sample location, sample time, etc. was completed for each soil gas sample. A COC was also filled out indicating the sample identification, sampling time, equipment identifiers, and soil organic vapor reading. The canisters were then transported to the laboratory.

Sub-slab vapor samples were collected from each Residence that granted access, responded to Terracon's request to schedule sampling activities, and was available at the scheduled time within the limits of the area identified.

3.3 Indoor Air Sampling

Indoor air sampling was conducted in accordance with the ITRC Guidance. Indoor air samples were collected using laboratory prepared six-liter Summa canisters and flow controllers. The flow controllers were pre-set by the laboratory to collect samples over a 24-hour period. Terracon requested that occupants close doors and windows and operate the heating, ventilating, and air conditioning (HVAC) system for the period beginning 24-hours prior to the start of sample collection to the end of sample collection.

In accordance with the USEPA approval letter dated January 6, 2011, indoor air sampling was conducted in the basement and in the lowest occupied living area of each Residence. For Residences with finished family rooms and/or bedrooms in the basement, the basement was determined to be the lowest occupied level. Upon arrival at the Residence, Terracon observed the basement and first floor areas to determine the number of samples required, per the USEPA approval letter, and the sample locations. Terracon attempted to identify unobtrusive locations in interior portions of the basement and first floor that were not near possible migration pathways such as exterior doors or windows, floor drains, separated floor cracks, unsealed pipe penetrations, or sump pump pits. Pertinent observations were documented on a Soil Vapor/Indoor Air Sampling Information Form and photographs of the sample location were taken.

Terracon field personnel connected the flow controller to the Summa canister by removing the brass cap on the canister and tightening the stainless steel Swagelock fitting on the flow controller to the threads on the canister. A wrench was used to firmly tighten the fitting.

Once sampling locations were selected, Terracon air sampling forms (project information, equipment identifiers, sample location, and start time) were filled out and attached to the canisters. A Soil Vapor/Indoor Air Sampling Information Form indicating project information, equipment identifiers, sample location, sample time, initial and final vacuum readings, etc. was completed for each indoor air sample. A COC was completed indicating the start time for the samples.

To open the canister, the valve was rotated counter-clockwise at least one full turn or otherwise opened. After the 24-hours, Terracon personnel returned to the Residence, closed the valve on the canister and recorded the time and vacuum remaining in the Summa canister on the Terracon sampling forms and on the COC. The canisters and flow controllers were then transported to the laboratory.

Indoor air sampling was conducted in one Residence for every ten Residences at which sub-slab vapor samples collected from those Residences granting access. Residences identified for indoor

air sampling were randomly determined using the Random function of Microsoft Excel®, except that efforts were made to uniformly distribute selected locations across the study area. If application of the Random function resulted in multiple indoor air samples distributed across a small portion of the study area, the Random function was reran to produce a more uniform distribution across the entire area.

Indoor air sampling was also conducted at those Residences included in the sampling program in which the detected concentration of TCE or PCE exceeded the screening level in the April/May 2009 sampling event. The Residences selected for resampling were in addition to the one Residence for every 10 homes as noted previously.

3.4 Ambient Air

Ambient (outdoor) air samples were collected simultaneously with the indoor air samples over a 24-hour period. The sample locations for ambient air sampling were randomly determined from the group of indoor air sample locations using the Random function of Microsoft Excel®. Ambient air samples were not collected near buildings or large trees. Following set-up of indoor air samples, Terracon observed exterior areas at the Residence to identify locations for collecting the ambient air sample.

A Soil Vapor/Indoor Air Sampling Information Form indicating project information, equipment identifiers, sample location, sample time, initial and final vacuum readings, etc. was completed for each ambient air sample. A COC was completed indicating the start time for the samples.

The samples were collected using individually-certified 6-liter Summa canisters with 24-hour flow controllers. Once a sampling location was selected, a Terracon air sampling form (project information, equipment identifiers, sample location, and start time) was filled out and attached to the canister. The inlet to the flow controllers were positioned between 3 and 5 feet above the ground surface. Raincaps were positioned over the canisters and flow controller inlets to protect them from weather conditions and the canisters were secured in place.

To open the canister, the valve was rotated counter-clockwise at least one full turn or otherwise opened. After 24 hours, Terracon personnel returned to the Residence, closed the valve on the canister and recorded the time and vacuum remaining in the Summa canister on the Terracon sampling forms and on the COC. The canisters and flow controllers were then transported to the laboratory.

Three ambient air samples were collected in conjunction with sub-slab vapor and indoor air sampling activities.

4.0 ANALYTICAL RESULTS

Sub-slab vapor, indoor air, and ambient air samples were collected using six-liter Summa canisters. The Summa canisters were submitted for analysis of PCE, TCE, vinyl chloride, trans-1,2-dichloroethene (trans-DCE), cis-1,2-dichloroethene (cis-DCE), 1,1-dichloroethene, 1,1-dichloroethane, 1,1,1-trichloroethane (TCA), and 1,1,2-trichloroethane, using EPA Method TO-15.

Laboratory procedures were performed by TestAmerica, Knoxville, Tennessee. TestAmerica is NELAC accredited for the laboratory methods referenced above. The laboratory QAM is on file with the USEPA. A copy of the SOPs for the specified method was included as Appendix F of the VIC Work Plan. The TestAmerica data is reported in accordance with the QAM and SOP. Copies of the laboratory analytical reports are included in Appendix G

4.1 Field Screening

Terracon conducted field screening of sub-slab soil gas and ambient air in conjunction with sub-slab soil gas sampling using a PID. This device provides a direct reading in ppm. The PID is a nonspecific total vapor detector and cannot be used to identify unknown substances; it can only roughly quantify for total volatiles present in the air. Terracon gas-calibrated the PID in accordance with the manufacturer's recommendations before the field activities. After connecting the Summa canister to the sub-slab sample port and allowing the instrument to stabilize, Terracon screened the ambient air in the basement using the PID equipped with a 10.2 eV ultraviolet lamp source. Following completion of sub-slab sampling, Terracon disconnected the Summa canister from the sample tubing and connected the PID to screen sub-slab soil gas for organic vapors. The field screening results for each sub-slab sample are included on the Soil Vapor/Indoor Air Sampling Information Form and are summarized on Table 1, Appendix B.

4.2 Laboratory Analysis

4.2.1 Screening Levels

Table 1A1 of the Statement of Work from the Unilateral Administrative Order for the Chamberlain Manufacturing Site (Docket No. RCRA-07-2010-002 and CERCLA-07-2010-005) identifies applicable screening levels for comparison of sub-slab and analytical results. These screening levels are presented in Table 4-1 below.

Table 4-1 Interim Measures Screening Levels

Contaminant	Indoor Air Screening Level ($\mu\text{g}/\text{m}^3$) ¹	Sub-Slab Vapor Screening Level ($\mu\text{g}/\text{m}^3$) ²	Analytical Detection Limit ($\mu\text{g}/\text{m}^3$)
Perchloroethene	0.41 c ³	4.1	0.540
Trichloroethene	1.2 c	12	0.215

Contaminant	Indoor Air Screening Level ($\mu\text{g}/\text{m}^3$) ¹	Sub-Slab Vapor Screening Level ($\mu\text{g}/\text{m}^3$) ²	Analytical Detection Limit ($\mu\text{g}/\text{m}^3$)
Vinyl Chloride	0.16	1.6	0.204
Trans-1,2-Dichloroethene	63 n ⁴	630	0.317
Cis-1,2-Dichloroethene ⁵	63 n	630	0.317
1,1-Dichloroethene	210 n	2,100	0.317
1,1-Dichloroethane	1.5 c	15	0.324
1,1,1-Trichloroethane	5,200 n	52,000	0.436
1,1,2-Trichloroethane	0.15 c	1.5	0.360

¹ – Residential Indoor Screening Levels obtained from Regional Screening Table (USEPA 2009).

² – Sub-slab vapor screening level = (Residential Indoor Screening Levels)/ α .

³ – c – based on 10^{-6} carcinogenic health effects.

⁴ – n – based on non-carcinogenic health effects.

⁵ – Trans-1,2-Dichloroethene is used as a surrogate compound for cis-1,2-Dichloroethene.

4.2.2 Laboratory Reporting Limits and Non-Detect Values

Laboratory technology cannot detect to concentrations of zero. As acknowledged by the USEPA, analytical methods dictate Analytical Detection Limits as the lower limit to which the procedures can accurately and repeatedly "see" a designated compound. The Analytical Detection Limit is a minimum concentration of a substance that can be measured and reported with 99% confidence that the compound concentration is greater than zero. The Analytical Detection Limit is determined from analysis within the given matrix of the sample and affected by matrix materials and/or other compounds within the matrix. The Indoor Air Screening Level for PCE, 1,1,2-trichloroethane, and vinyl chloride are less than the Analytical Detection Limit for these compounds. The USEPA has approved the use of the Analytical Detection Limit as the screening level for this site due to the technical inability to accurately quantify the detection of these compounds at the current USEPA screening level.

4.3 Sampling Program

Terracon collected sub-slab soil gas, indoor air, and ambient air samples for laboratory analysis in accordance with procedures established in the VIC Work Plan. Residences included in the sampling program are identified on Figure 3, Appendix A. Table 4-2 summarizes the sampling and analysis completed for each Residence.

4.4 Analytical Results

4.4.1 Sub-Slab Soil Gas Sampling

Sub-slab soil gas samples were collected in 23 Residences. The reported concentrations of PCE and TCE exceeded the sub-slab screening level in samples collected from eight of the Residences. The reported concentration of PCE exceeded the sub-slab screening level in samples collected from three additional Residences. The maximum reported PCE and TCE concentrations were 140 µg/m³ and 6,000 µg/m³, respectively.

The reported concentrations of the remaining contaminants of concern did not exceed sub-slab screening levels in the 11 Residences exhibiting PCE or TCE exceedences. The reported concentrations of the contaminants of concern did not exceed sub-slab screening levels in the remaining 12 Residences.

The screening levels are based on a health risk of 10⁻⁶ for carcinogenic compounds and a hazard quotient of 1 for non-carcinogenic compounds. Dividing the reported concentration of a

compound by the screening level and multiplying by 10^{-6} results in a health risk for that compound. The reported concentration of TCE in sub-slab samples collected at 322 East Arlington, 302 Boston Avenue, and 2413 East 4th Street resulted in a health risk of greater than 10^{-4} . The reported concentration of PCE in sub-slab samples collected at these three Residences resulted in a health risk of greater than 10^{-6} but less than 10^{-4} . The reported concentration of PCE and/or TCE in sub-slab samples collected at 236 Boston Avenue, 240 Boston Avenue, 326 Boston Avenue, 2221 East 4th Street, 2227 East 4th Street, 2237 East 4th Street, 2417 East 4th Street, and 2427 East 4th Street resulted in a health risk of greater than 10^{-6} but less than 10^{-4} . Health risk calculations are summarized in Table 4-3.

Table 4-3 Health Risk Summary

Residence	PCE Concentration (mg/m ³)	Health Risk	TCE Concentration (mg/m ³)	Health Risk
322 E. Arlington St.	41	1.00E-04	1300	1.08E-03
236 Boston Ave.	4.5	1.10E-05	8.3	6.92E-06

Sub-Slab Screening Level	4.1		12	

Results of sub-slab soil gas sampling are depicted on Figure 4, Appendix A. Analytical results are presented in Table 1, Appendix B. Copies of laboratory analytical reports are provided in Appendix G.

4.4.2 Indoor Air Sampling

Indoor air samples were collected in seven Residences including two Residences based on 10% of sub-slab sampling and five Residences based on previous screening level exceedances. The reported concentrations of PCE exceeded the indoor air screening level in samples collected from three of the Residences and the reported concentration of TCE exceeded the sub-slab screening level in samples collected from one of the Residences. The maximum reported PCE and TCE concentrations were 2.5 µg/m³ and 2.1 µg/m³, respectively.

The reported concentrations of the remaining contaminants of concern did not exceed indoor air screening levels in these four Residences. The reported concentrations of the each contaminant of concern did not exceed sub-slab screening levels in the remaining three Residences.

Results of indoor air sampling are depicted on Figure 4, Appendix A. Analytical results are presented in Table 2, Appendix B. Copies of laboratory analytical reports are provided in Appendix G.

4.4.3 Ambient Air Sampling

Ambient air samples were collected at three Residences. PCE and TCE were detected in one of the samples collected at concentrations of $0.19 \mu\text{g}/\text{m}^3$ and $0.088 \mu\text{g}/\text{m}^3$, respectively. The reported concentrations of PCE and TCE in this sample were J-flagged indicating that the results were greater than the MDL, but lower than the laboratory reporting limit. As a result, the reported concentrations were estimated. PCE and TCE were not detected in the remaining samples collected. The remaining contaminants of concern were not detected in the samples collected.

Analytical results are presented in Table 3, Appendix B. Copies of laboratory analytical reports are provided in Appendix G.

4.5 Comparison to Interim Measures Decision Matrix

A summary of analytical results compared to screening levels is provided in Table 1 and Table 2 of Appendix B. A summary of sampling results compared to Table 2-1 of the Vapor Intrusion Interim Measures Work Plan dated October 14, 2010 and approved by the USEPA on January 6, 2010 is presented in Table 4-4 below.

Table 4-4 Interim Measures Decision Matrix

Generic Screening Levels		Indoor Air Concentrations ($\mu\text{g}/\text{m}^3$)		
		<Indoor Air Screening Level	No Indoor Air Sample	>Indoor Air Screening Level
Sub-Slab Soil Gas Concentration ($\mu\text{g}/\text{m}^3$)	< Sub-Slab Vapor Screening Level Risk $\leq 10^{-6}$ and Hazard Quotient ≤ 1	0	12	0
	> Sub-Slab Vapor Screening Level $10^{-6} < \text{Risk} < 10^{-4}$ and Hazard Quotient > 1	2	4	3
	> Sub-Slab Vapor Screening Level Risk $> 10^{-4}$ or Hazard Quotient > 1	1	0	1

5.0 QUALITY ASSURANCE/QUALITY CONTROL

5.1 Field Documentation

Sample quality assurance and quality control was maintained during the collection of samples in the field and during transport to the laboratory as documented through the completion of field forms and COCs. The transfer of sample custody was limited between Terracon personnel, laboratory couriers, and fixed base laboratory personnel. The primary objective of custody requirements for this project was to track that samples were handled by authorized personnel and document that handling occurred within the parameters of the approved VIC Work Plan.

Following collection, samples were maintained in the custody of the field team at the site until they were delivered to the TestAmerica laboratory in Cedar Falls, Iowa at the end of each day. The samples were received at the laboratory and logged in accordance with standard laboratory protocols. Analysis of the samples was completed by the TestAmerica laboratory in Knoxville, Tennessee. Samples were transferred by overnight courier from Cedar Falls to Knoxville under standard laboratory and COC procedures. COC documentation is maintained by Terracon.

COC protocols were followed during each phase of the sample collection, storage, shipment, and analysis procedures. Maintaining the COC in the field was the responsibility of the Terracon project professional. COCs were completed for each sample immediately following completion of sample collection and before removing the samples from the Residence.

Samples collected in the field were labeled and then stored in secure locations from the time of collection through transfer to the fixed base laboratory. Soil gas and air samples were collected using laboratory prepared Summa canisters and were kept at ambient temperature. In accordance with the QAPP, samples were not required to be preserved.

Soil gas and air samples were submitted for analysis of select VOCs by EPA Method TO-15. Terracon has reviewed analytical reports and has confirmed that each sample was analyzed within the designated 14-day holding time.

A COC record accompanied each set of samples during collection and shipment. Each COC record was filled out and signed in permanent ink by a Terracon field team member conducting the sampling. The COC records include the following information: project name and number, sample designation, date and time of collection, samplers name, number of sample containers, type of matrix, analysis to be performed, signature of laboratory person(s) receiving samples, and inclusive dates / times of possession. A carbon copy or photocopy was made of the COC record at the time of delivery to the laboratory.

5.2 QA/QC Sampling

In accordance with the VIC Work Plan, duplicate samples and equipment blanks were used to monitor the quality assurance and control of the field sampling activities. The duplicate samples and equipment blanks were analyzed for VOCs. As required, at least one duplicate sample was collected per each 20 sub-slab vapor samples, each 20 indoor air samples, and each 20 ambient air samples. In addition, one equipment blank was required per 20 samples collected. A summary of QA/QC samples collected is provided in Table 5-1.

Table 5-1 QA/QC Samples

Sample Type	No. of Samples	QA/QC Type	No. of QA/QC Samples
Sub-Slab	23	Duplicate	3
Indoor Air	14	Duplicate	1
Ambient Air	3	Duplicate	1
Total Samples	40	Equipment Blank	3

5.3 Quality Control Parameters

To assess whether quality assurance objectives for this project have been achieved, the following QC parameters were considered: precision, accuracy, representativeness, comparability, completeness, and sensitivity.

5.3.1 Precision and Accuracy

As described in the QAPP, precision is evaluated using the RPD between an actual sample and a duplicate sample. Accuracy is evaluated using a percent recovery measured in spiked and unspiked samples. Accuracy is a function of the laboratory method, and parameters regarding accuracy are included in the lab report provided by the laboratory.

Duplicate samples were collected for samples SS-17, SS-38, SS-67, IA-48, and AA-40. For each compound that was detected in both samples (e.g., SS-17 and its duplicate SSD-17), Terracon compared the reported concentrations. The absolute values of the RPDs for air generally ranged from 7.4% to 38.1%; however the RPD for TCE in samples SS-38 and SSD-38 was 146.7%. Generally, an RPD of less than 50% for air samples is considered acceptable. Regarding the elevated RPD between SS-38 and SSD-38, Terracon notes that the reported TCE concentrations were $0.08 \mu\text{g}/\text{m}^3$ and $0.52 \mu\text{g}/\text{m}^3$, respectively. The MDL for TCE is reported as $0.075 \mu\text{g}/\text{m}^3$. At relatively low concentrations, such as those reported for TCE in samples SS-38 and SSD-38, variations in reported sample and duplicate sample concentrations can significantly impact the RPD. Terracon has evaluated the effects of the elevated RPD and does not consider it to be indicative of a data failure, particularly considering that the RPD for PCE and 1,1,1-trichloroethane were determined to be 8.0% or less in the same samples.

Laboratory accuracy controls were documented in accordance with the laboratory's internal QA Manual. The laboratory followed USEPA procedures.

5.3.2 Representativeness

Terracon has evaluated the representativeness of the VIC activities to document the degree to which the sample data accurately and precisely represents a characteristic of a population, parameter variations at a sampling point, or an environmental condition. Review of field methods and procedures indicated that sample collection, handling, and transportation were conducted in accordance with the QAPP and VIC Work Plan. Review of analytical results indicates that the analytical data is generally uniform and consistent between sampling points and with previous sampling and analysis activities.

5.3.3 Completeness

Laboratory analysis was completed on each of the samples collected in the field and submitted for analysis. Laboratory completeness was determined to be 100%.

5.3.4 Comparability

To produce comparable data, the units specified for analytical results obtained during the field activities are consistent throughout this project and standardized analytical methods have been used for each parameter.

5.3.5 Sensitivity

The Analytical Detection Limits were not sufficient to report concentrations below the indoor air screening levels for PCE, 1,1,2-trichloroethane, and vinyl chloride. For this reason, the USEPA has approved the use of the Analytical Detection Limit as the screening level for this site.

6.0 RECOMMENDATIONS

Terracon has evaluated the results of the sampling activities in consideration of the USEPA-approved screening levels. Based on a comparison of reported sub-slab and indoor air results to their respective screening levels, supplemental actions and interim measures have been identified, consistent with the VIIM Work Plan and subject to USEPA's review and approval. Proposed actions are depicted on Figure 5, Appendix A. Follow-up activities include the following:

- No Action – Sub-slab concentrations and indoor air concentrations are less than screening levels.

- Monitor – Sub-slab concentrations are greater than screening levels and indoor air concentrations are less than screening levels
- Conduct Indoor Air Sampling - Sub-slab concentrations are greater than screening levels and indoor air samples were not collected
- Install Mitigation Systems - Sub-slab concentrations and indoor air concentrations are greater than screening levels.

6.1 No Action

The reported concentrations of sub-slab samples in 12 Residences are less than the sub-slab screening level and indoor air samples were not collected. Comparison of sub-slab sample results to indoor air sample results in Residences where both were collected demonstrates that the actual attenuation factor is on the order of 100, significantly larger than the anticipated attenuation factor of 10. Further sampling and analysis and implementation of interim measures is not warranted.

Terracon will return to these 12 residences no earlier than July 20, 2011 to remove the sub-slab sampling ports. Using hand tools, Terracon will loosen the neat Portland cement placed in the annulus of the hole to allow for removal of the insert. After removal, the hole will be augered out using a 1¼-inch diameter carbide masonry bit and a rotary hammer drill. The hole will be filled to the concrete surface using neat Portland cement and finished flush with the concrete surface.

6.2 Monitor

The reported concentrations of sub-slab samples in three Residences are greater than the sub-slab screening level and the indoor air concentrations are less than the indoor air screening level. In accordance with the approved VIIM Work Plan, Terracon proposes to monitor indoor air to demonstrate that indoor air concentrations remain below indoor air screening levels in accordance with the schedule contained in Table 7-1. If monitoring activities identify an exceedance of indoor air screening levels during any indoor air sampling event, Terracon will use the interim measures decision matrix to propose further actions.

6.3 Sample Indoor Air

The reported concentrations of sub-slab samples in four Residences are greater than the sub-slab screening level and indoor air samples were not collected. In accordance with the interim measures decision matrix, Terracon proposes to collect indoor air samples from these Residences.

Terracon proposes to return to the Residence to conduct indoor air sampling in accordance with the approved VIC Work Plan. Based on the results of sample analysis, Terracon will use the interim measures decision matrix to propose further actions.

6.4 Mitigation Systems

The reported concentrations of sub-slab samples in four Residences are greater than the sub-slab screening level and the indoor air concentrations are greater than the indoor air screening level.

Based on a review of the completed Occupied Dwelling Questionnaire, site conditions, and other factors, these residences were offered a mitigation system, even though the VIIM Work Plan allowed the parties to conduct additional sampling to confirm the initial results.

6.5 Expand Study Area

The proposed study area was developed based on a review of groundwater plume maps and was intended to complete indoor air sampling in those areas where elevated TCE impact in groundwater was observed. Terracon has reviewed the results of sub-slab and indoor air sampling activities and has confirmed that the reported exceedances of screening levels generally occurred within an area that corresponded with groundwater TCE concentrations of greater than 100 µg/L.

The area of sub-slab and indoor air exceedances are generally defined as the 2200 and 2400 blocks of East 4th Street and the east side of the 200 and 300 blocks of Boston Avenue. Terracon observes that screening levels are not exceeded on the south side of the 300 block of East Arlington Street, the west side of the 200 block of Boston Avenue or the 2600 block of East 4th Street.

Screening level exceedances are observed on the east side of the 300 block of Boston Avenue; however, sub-slab and indoor air sampling were not conducted on the west side of the block. In addition, Residences in the 2500 block of East 4th Street did not accept the sampling offer and sampling was not completed in this area. As such, the lateral extent of sub-slab soil gas contamination has not been characterized in these areas. Terracon proposes to prepare a supplement to the VIC Work Plan to conduct sampling of additional Residences immediately adjoining the defined area on the east side of the 300 block of Boston Avenue and the west side of the 400 block of Boston Avenue. The area identified includes approximately 14 Residences. A listing of the Residences included in the expanded study area is provided in Appendix H. The limits of the expanded study area are depicted on Figure 6, Appendix A.

7.0 SCHEDULE

Based upon currently available information and previously, the proposed schedule is as follows:

Table 7-1 Schedule

Activity	Completion Date/Days to Complete ¹
Complete Indoor Air Sampling per Section 6.3	July 5, 2011
Remove Sampling Ports per Section 6.1	No earlier than July 20, 2011
Receive Analytical Results	August 4, 2011
Receive USEPA Comments on Draft VIC Report	August 4, 2011
Submit Validated Analytical Results to USEPA	August 19, 2011
Submit Supplemental VIC Work Plan per Section 6.5 ²	September 3, 2011
Submit Final VIC Report to USEPA	September 3, 2011 ³
Conduct Indoor Air Monitoring per Section 6.2	Semiannually during 1 st and 3 rd calendar quarters beginning after approval of VIC Report for 2 years, then annually for 3 years

¹ – Completion date based on VIC Work Plan approval date of January 6, 2011.

² – Supplemental VIC Work Plan will include schedule for proposed sampling activities.

³ – If the USEPA does not provide comments on the Draft VIC Report by August 4, 2011, the Final VIC Report shall be submitted to USEPA 30 days after all USEPA comments on the Draft VIC Report are received by Terracon.

Appendix C

Letter to Residences Regarding Sampling and Access

February 4, 2011

Certified Mail/Return Receipt Requested

Re: Residential Sampling Request

As you may know, the United States Environmental Protection Agency ("EPA") recently asked Chamberlain Manufacturing Corporation to do environmental testing of soil vapors beneath certain homes in your neighborhood near the 550 Esther Street property, once owned and operated by Chamberlain Manufacturing and currently owned by the City of Waterloo. As we understand you are the owner(s) and resident(s) of the residence at [REDACTED], we are writing to describe the process and timing for the sampling, should you choose to have us conduct it.

In the next few months, Terracon Consultants, Inc., a licensed and experienced environmental consulting and engineering company, will be in your neighborhood conducting this sampling. The sampling will provide data to help determine if action may be needed to reduce the potential of certain chemicals entering your home. We are requesting your permission to do this sampling in your home.

The sampling, which is completely voluntary, involves two initial visits of about an hour or less each by courteous and experienced professionals who will display proper identification and respect you and your home.

Here's how it works:

Initial Visit: Sampling Port Installation and Questionnaire

On the first visit, we will install a small sample "port" in your home. The port is installed after wet drilling a 1-inch opening in the concrete floor of your basement or the lowest level of your home such as a crawl-space or slab. After installing the port, the voids are then backfilled with sand and concrete, which will set for at least 48 hours. We will clean-up the work area.

We will also ask for your assistance as our field personnel complete a questionnaire about your home. The questionnaire seeks information regarding your home and the presence of chemicals containing volatile organic compounds, such as paints, glues, stored fuels and dry-cleaned clothes. According to EPA, these household products can contribute to indoor air quality problems.

Additional Visit(s): Sample Collection

About two days after the first visit, we will return for about 45 minutes to collect a sample from the port. In some instances, we will also take indoor and outdoor air samples. These indoor and outdoor air samples are collected by small canisters that we would leave at your home for 24-hours and would then return to collect.

Residential Sampling Request

February 4, 2011 ■ Terracon Project No. 07107020

Depending on the results of the sampling, one or more additional sampling events may be needed to confirm the results of the previous event. If necessary, we will contact you and make arrangements for any additional sampling events.

Once EPA agrees that sampling in the area is complete, we will remove the sampling port and seal the area where the port was installed at your request.

The results of this sampling will be reviewed by EPA. Following EPA review, a copy of the results will be provided for your records. If the sampling identifies any vapors beneath your home that warrant attention, we will contact you and offer you an EPA-approved system, usually located in your basement, that is designed to reduce any vapors. The system would be installed at no cost to you.

It is important to know that this sampling is a precautionary step. The information we obtain will help us gain a fuller understanding of the conditions in your neighborhood and whether any additional action is needed.

If you would like to have the sampling performed in your home, please complete the enclosed request form and access agreement and mail it to:

Terracon Consultants, Inc.
870 40th Avenue
Bettendorf, Iowa 52722

In order to facilitate scheduling, we ask that you return the sampling request form no later than March 11, 2011. After we receive the form, we will call you to schedule a mutually convenient time for us to meet at your home to begin the sampling process.

We appreciate your cooperation in this process. Please contact John Brimeyer at (563) 355-4852 if you have any questions.

Sincerely,
Terracon Consultants, Inc.

ACCESS AGREEMENT

Date: 2/4/11

DEFINITIONS

The property to which access is granted is: [REDACTED] ("Property").

The Legal Owner(s) of the Property or person/entity with legal authority to grant access to the Property is: [REDACTED] ("Grantor(s)").

The services to be conducted on the Property are generally described as follows: Collection of samples as outlined in the Resident Sampling Request letter dated February 4, 2011. ("Services").

The entity granted access for the purposes of performing the Services is Terracon Consultants, Inc., which shall include its employees, agents, and subcontractors ("Grantee").

The Services are performed for the benefit of Chamberlain ("Client"), pursuant to the Agreement for Services between Terracon and Client, dated September 23, 2010.

AGREEMENTS

By its signature below, Grantor represents it has authority to, and does, grant access to the Property to Grantee for the purpose of performing the Services. Grantor agrees that:

- Grantee may bring sampling equipment on the Property to recover and collect soil, water, and other samples, and perform other actions related to the exploration of surface or subsurface conditions on the Property, as necessary to perform the Services. Grantee may also photograph portions of the Property and ask Grantor to assist in completing a questionnaire regarding activities at the property.
- Grantee will make reasonable efforts to restore the property and leave it in a condition suitable for its previous use.
- Grantor will not interfere with any of the activities of Grantee or undertake any actions regarding the use of Property that would endanger the health, safety, or welfare of the Grantee employees, agents, or subcontractors, or damage their equipment, materials, or property.
- Grantor will indemnify and hold Grantee harmless with respect to activities of Grantee.

By its signature below, Grantee agrees:

- That upon completion of Services and activities authorized by this Access Agreement, Grantee will remove all material and equipment utilized by Grantee from the Property, with the exception of ground markers that may be placed on the premises to designate sampling areas,
- Grantee will remove boring spoils that accumulate around the bore holes.
- Grantee will make reasonable efforts to restore the property and leave it in a condition suitable for its previous use.

The Services and field activities authorized under this Access Agreement may begin after signature of Grantor. Access is granted until Services are completed.

OCCUPIED DWELLING QUESTIONNAIRE

Indoor Air Assessment Survey

Date: 4/26/2011

1. Name: [Redacted]

Address: 322 E Arlington

Home Phone: [Redacted] Work Phone:

2. What is the best time to call to speak with you? a.m. At: Work [] or Home [X]?

3. Are you the Owner [X], Renter [], Other [] (please specify) of this Home/Structure?

4. Total number of occupants/persons at this location? 1. Number of children? Ages?

5. How long have you lived at this location? 30

General Home Description

6. Type of Home/Structure (check only one): Single Family Home [X], Duplex [], Condominium [], Townhouse [], Other []

7. Home/Structure Description: number of floors 1

Basement? Yes [X] No []

Crawl Space? Yes [X] No []

If Yes, under how much of the house's area? 100 %

8. Age of Home/Structure: ~1940 years, Not sure/Unknown []

9. General Above-Ground Home/Structure construction (check all that apply): Wood [], Brick [], Concrete [], Cement block [X], Other []

10. Foundation Construction (check all that apply):

Concrete slab [X]

Fieldstone []

Concrete block []

- Elevated above ground/grade
- Other _____
11. What is the source of your drinking water (check all that apply)?
 Public water supply
 Private well
 Bottled water
 Other, please specify _____
12. Do you have a private well for purposes other than drinking?
 Yes No
 If yes, please describe what you use the well
 for: _____
13. Do you have a septic system? Yes No Not used Unknown
14. Do you have standing water outside your home (pond, ditch, swale)? Yes No
puddles when constant rain

Basement Description, please check appropriate boxes.

If you do not have a basement go to question 23.

15. Is the basement finished or unfinished ?
16. If finished, how many rooms are in the basement? _____
 How many are used for more than 2 hours/day? _____
17. Is the basement floor (check all that apply) concrete , tile , carpeted , dirt ,
 other (describe) _____?
18. Are the basement walls poured concrete , cement block , stone , wood , brick ,
 other _____?
19. Does the basement have a moisture problem (check one only)?
 Yes, frequently (3 or more times/yr) *w/ heavy rain*
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
20. Does the basement ever flood (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
21. Does the basement have any of the following? (check all that apply) Floor cracks ,
 Wall cracks , Sump , Floor drain , Other hole/opening in floor
 (describe) _____

22. Are any of the following used or stored in the basement (check all that apply)
 Paint Paint stripper/remover Paint thinner
 Metal degreaser/cleaner Gasoline Diesel fuel Solvents Glue
 Laundry spot removers Drain cleaners Pesticides
23. Have you recently (within the last six months) done any painting or remodeling in your home? Yes No
 If yes, please specify what was done, where in the home, and what month:
~~Waterproofed~~ _____

24. Have you installed new carpeting in your home within the last year? Yes No
 If yes, when and where? _____
25. Do you regularly use or work in a dry cleaning service (check only one box)?
 Yes, use dry-cleaning regularly (at least weekly)
 Yes, use dry-cleaning infrequently (monthly or less)
 Yes, work at a dry cleaning service
 No
26. Does anyone in your home use solvents at work?
 Yes If yes, how many persons _____
 No If no, go to question 28
27. If yes for question 26 above, are the work clothes washed at home? Yes No
28. Where is the washer/dryer located?
 Basement
 Upstairs utility room
 Kitchen
 Garage
 Use a Laundromat
 Other, please specify _____
29. If you have a dryer, is it vented to the outdoors? Yes No
30. What type(s) of home heating do you have (check all that apply)
 Fuel type: Gas , Oil , Electric , Wood , Coal , Other _____
 Heat conveyance system: Forced hot air
 Forced hot water
 Steam
 Radiant floor heat
 Wood stove
 Coal furnace
 Fireplace
 Other _____

31. Do you have air conditioning? Yes No . If yes, please check the appropriate type(s)
 Central air conditioning
 Window air conditioning unit(s)
 Other , please specify _____
32. Do you use any of the following? Room fans , Ceiling fans , Attic fan
 Do you ventilate using the fan-only mode of your central air conditioning or forced air heating system? Yes No
33. Has your home had termite or other pesticide treatment: Yes No Unknown
 If yes, please specify type of pest controlled, termites
 and approximate date of service ~5 yrs ago
34. Water Heater Type: Gas , Electric , By furnace , Other
 Water heater location: Basement , Upstairs utility room , Garage , Other (please describe) _____
35. What type of cooking appliance do you have? Electric , Gas , Other
36. Is there a stove exhaust hood present? Yes No
 Does it vent to the outdoors? Yes No
37. Smoking in Home:
 None , Rare (only guests) , Moderate (residents light smokers) ,
 Heavy (at least one heavy smoker in household)
38. If yes to above, what do they smoke?
 Cigarettes Cigars
 Pipe Other
39. Do you regularly use air fresheners? Yes No
40. Does anyone in the home have indoor home hobbies of crafts involving: None
 Heating , soldering , welding , model glues , paint , spray paint,
 wood finishing , Other Please specify what type of hobby: _____
41. General family/home use of consumer products (please circle appropriate): Assume that
Never = never used, **Hardly ever** = less than once/month, **Occasionally** = about
 once/month, **Regularly** = about once/week, and **Often** = more than once/week.

Product	Frequency of Use				
Spray-on deodorant	Never	Hardly ever	Occasionally	Regularly	Often

Aerosol deodorizers	Never	Hardly ever	Occasionally	Regularly	Often	
Insecticides	Never	Hardly ever	Occasionally	Regularly	Often	
Disinfectants	Never	Hardly ever	Occasionally	Regularly	Often	- Bleach

(Question 41, continued)

Product	Frequency of Use				
Window cleaners	Never	Hardly ever	Occasionally	Regularly	Often
Spray-on oven cleaners	Never	Hardly ever	Occasionally	Regularly	Often
Nail polish remover	Never	Hardly ever	Occasionally	Regularly	Often
Hair sprays	Never	Hardly ever	Occasionally	Regularly	Often

42. Please check weekly household cleaning practices:

- Dusting
- Dry sweeping
- Vacuuming
- Polishing (furniture, etc) - *ledge*
- Washing/waxing floors
- Other _____

43. Other comments: _____

appt time @ 1:30p.

E	→ No response @ 1:30
	" " @ 2:00
	" " @ 2:30

2. What is the best time to call to speak with you? Evening At: Work or Home

3. Are you the Owner , Renter , Other (please specify) _____ of this Home/Structure?

4. Total number of occupants/persons at this location? 1
Number of children? _____ Ages? _____

5. How long have you lived at this location? 20

General Home Description

6. Type of Home/Structure (check only one): Single Family Home , Duplex , Condominium , Townhouse , Other _____

7. Home/Structure Description: number of floors 1
Basement? Yes No
Crawl Space? Yes No
If Yes, under how much of the house's area? 20 %

8. Age of Home/Structure: _____ years, Not sure/Unknown

9. General Above-Ground Home/Structure construction (check all that apply): unknown
Wood , Brick , Concrete , Cement block , Other _____

10. Foundation Construction (check all that apply):
Concrete slab
Fieldstone
Concrete block

- Elevated above ground/grade
- Other _____
11. What is the source of your drinking water (check all that apply)?
 Public water supply
 Private well
 Bottled water
 Other, please specify _____
12. Do you have a private well for purposes other than drinking?
 Yes No *not known*
 If yes, please describe what you use the well for:

13. Do you have a septic system? Yes No Not used Unknown
14. Do you have standing water outside your home (pond, ditch, swale)? Yes No

Basement Description, please check appropriate boxes.
 If you do not have a basement go to question 23.

15. Is the basement finished or unfinished ?
16. If finished, how many rooms are in the basement? 1
 How many are used for more than 2 hours/day? no
17. Is the basement floor (check all that apply) concrete tile , carpeted , dirt , other (describe) _____?
18. Are the basement walls poured concrete , cement block , stone , wood , brick , other appear to be cement block?
19. Does the basement have a moisture problem (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr) *whenever you get a good rain through walls*
 No
20. Does the basement ever flood (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
21. Does the basement have any of the following? (check all that apply) Floor cracks , Wall cracks , Sump , Floor drain , Other hole/opening in floor (describe) _____

22. Are any of the following used or stored in the basement (check all that apply)
 Paint Paint stripper/remover Paint thinner
 Metal degreaser/cleaner Gasoline Diesel fuel Solvents Glue
 Laundry spot removers Drain cleaners Pesticides
23. Have you recently (within the last six months) done any painting or remodeling in your home? Yes No
Hand spray
 If yes, please specify what was done, where in the home, and what month:

24. Have you installed new carpeting in your home within the last year? Yes No
 If yes, when and where? _____
25. Do you regularly use or work in a dry cleaning service (check only one box)?
 Yes, use dry-cleaning regularly (at least weekly)
 Yes, use dry-cleaning infrequently (monthly or less)
 Yes, work at a dry cleaning service
 No
26. Does anyone in your home use solvents at work?
 Yes If yes, how many persons _____
 No If no, go to question 28
- ~~27. If yes for question 26 above, are the work clothes washed at home? Yes No~~
28. Where is the washer/dryer located?
 Basement
 Upstairs utility room
 Kitchen
 Garage
 Use a Laundromat
 Other, please specify _____
29. If you have a dryer, is it vented to the outdoors? Yes No
30. What type(s) of home heating do you have (check all that apply)
 Fuel type: Gas , Oil , Electric , Wood , Coal , Other _____
 Heat conveyance system: Forced hot air
 Forced hot water
 Steam
 Radiant floor heat
 Wood stove
 Coal furnace
 Fireplace
 Other _____

31. Do you have air conditioning? Yes No . If yes, please check the appropriate type(s)
 Central air conditioning
 Window air conditioning unit(s)
 Other , please specify _____
32. Do you use any of the following? Room fans , Ceiling fans , Attic fan
 Do you ventilate using the fan-only mode of your central air conditioning or forced air heating system? Yes No
33. Has your home had termites or other pesticide treatment: Yes No Unknown
 If yes, please specify type of pest controlled, _____
 and approximate date of service termites ~ 15 years ago
34. Water Heater Type: Gas , Electric , By furnace , Other 2 years old

 Water heater location: Basement , Upstairs utility room , Garage , Other (please describe) _____
35. What type of cooking appliance do you have? Electric , Gas , Other
36. Is there a stove exhaust hood present? Yes No
 Does it vent to the outdoors? Yes No
37. Smoking in Home:
 None , Rare (only guests) , Moderate (residents light smokers)
 Heavy (at least one heavy smoker in household)
38. If yes to above, what do they smoke?
 Cigarettes Cigars
 Pipe Other
39. Do you regularly use air fresheners? Yes No *every now and then occasionally*
40. Does anyone in the home have indoor home hobbies of crafts involving: None
 Heating , soldering , welding , model glues , paint , spray paint,
 wood finishing , Other Please specify what type of hobby: _____
41. General family/home use of consumer products (please circle appropriate): Assume that
Never = never used, **Hardly ever** = less than once/month, **Occasionally** = about once/month, **Regularly** = about once/week, and **Often** = more than once/week.

Product	Frequency of Use
Spray-on deodorant	<input checked="" type="radio"/> Never <input type="radio"/> Hardly ever <input type="radio"/> Occasionally <input type="radio"/> Regularly <input type="radio"/> Often

Aerosol deodorizers	Never	Hardly ever	Occasionally	Regularly	Often
Insecticides	Never	Hardly ever	Occasionally	Regularly	Often
Disinfectants	Never	Hardly ever	Occasionally	Regularly	Often

(Question 41, continued)

Product	Frequency of Use				
Window cleaners	Never	Hardly ever	Occasionally	Regularly	Often
Spray-on oven cleaners	Never	Hardly ever	Occasionally	Regularly	Often
Nail polish remover	Never	Hardly ever	Occasionally	Regularly	Often
Hair sprays	Never	Hardly ever	Occasionally	Regularly	Often

42. Please check weekly household cleaning practices:

- Dusting
- Dry sweeping
- Vacuuming
- Polishing (furniture, etc)

OCCUPIED DWELLING QUESTIONNAIRE

Indoor Air Assessment Survey

Date: 4/26/2011

1. Name: [Redacted]

Address: 216 Boston Ave

Home Phone: [Redacted] Work Phone:

2. What is the best time to call to speak with you? evening At: Work [] or Home []?

3. Are you the Owner [], Renter [x], Other [] (please specify) of this Home/Structure?

4. Total number of occupants/persons at this location? 5
Number of children? 4 Ages? 11, 15, 13, 5

5. How long have you lived at this location? ~6 mos

General Home Description

6. Type of Home/Structure (check only one): Single Family Home [x], Duplex [], Condominium [], Townhouse [], Other []

7. Home/Structure Description: number of floors 1
Basement? Yes [x] No []
Crawl Space? Yes [] No [] unknown
If Yes, under how much of the house's area? %

8. Age of Home/Structure: _____ years, Not sure/Unknown [x]

9. General Above-Ground Home/Structure construction (check all that apply):
Wood [], Brick [x], Concrete [], Cement block [], Other []

10. Foundation Construction (check all that apply):
Concrete slab [x]
Fieldstone []
Concrete block []

Elevated above ground/grade

Other _____

11. What is the source of your drinking water (check all that apply)?

Public water supply

Private well

Bottled water

Other, please specify _____

12. Do you have a private well for purposes other than drinking?

Yes No

If yes, please describe what you use the well
for: _____

13. Do you have a septic system? Yes No Not used Unknown

14. Do you have standing water outside your home (pond, ditch, swale)? Yes No

Basement Description, please check appropriate boxes.

If you do not have a basement go to question 23.

15. Is the basement finished or unfinished ?

16. If finished, how many rooms are in the basement? 4 - 1 family rm, 2 storage rm, 1 utility rm

How many are used for more than 2 hours/day? 0

17. Is the basement floor (check all that apply) concrete tile carpeted dirt other (describe) _____?

18. Are the basement walls poured concrete cement block stone wood brick other _____?

19. Does the basement have a moisture problem (check one only)?

Yes, frequently (3 or more times/yr)

Yes, occasionally (1-2 times/yr)

Yes, rarely (less than 1 time/yr)

No

20. Does the basement ever flood (check one only)?

Yes, frequently (3 or more times/yr)

Yes, occasionally (1-2 times/yr)

Yes, rarely (less than 1 time/yr)

No

21. Does the basement have any of the following? (check all that apply) Floor cracks

Wall cracks Sump Floor drain Other hole/opening in floor

(describe) _____

22. Are any of the following used or stored in the basement (check all that apply)
 Paint Paint stripper/remover Paint thinner
 Metal degreaser/cleaner Gasoline Diesel fuel Solvents Glue
 Laundry spot removers Drain cleaners Pesticides
23. Have you recently (within the last six months) done any painting or remodeling in your home? Yes No
 If yes, please specify what was done, where in the home, and what month:
Painted prior to moving in - remodel
24. Have you installed new carpeting in your home within the last year? Yes No
 If yes, when and where? _____
25. Do you regularly use or work in a dry cleaning service (check only one box)?
 Yes, use dry-cleaning regularly (at least weekly)
 Yes, use dry-cleaning infrequently (monthly or less)
 Yes, work at a dry cleaning service
 No
26. Does anyone in your home use solvents at work?
 Yes If yes, how many persons _____
 No If no, go to question 28
27. If yes for question 26 above, are the work clothes washed at home? Yes No
28. Where is the washer/dryer located?
 Basement
 Upstairs utility room
 Kitchen
 Garage
 Use a Laundromat
 Other, please specify _____
29. If you have a dryer, is it vented to the outdoors? Yes No
30. What type(s) of home heating do you have (check all that apply)
 Fuel type: Gas , Oil , Electric , Wood , Coal , Other _____
 Heat conveyance system: Forced hot air
 Forced hot water
 Steam
 Radiant floor heat
 Wood stove
 Coal furnace
 Fireplace
 Other _____

31. Do you have air conditioning? Yes No . If yes, please check the appropriate type(s)
 Central air conditioning *there is central but not using*
 Window air conditioning unit(s)
 Other , please specify _____
32. Do you use any of the following? Room fans , Ceiling fans , Attic fan
 Do you ventilate using the fan-only mode of your central air conditioning or forced air heating system? Yes No
33. Has your home had termite or other pesticide treatment: Yes No Unknown
 If yes, please specify type of pest controlled, unknown - landlord said he sprayed
 and approximate date of service but she doesn't know for when
34. Water Heater Type: Gas Electric , By furnace , Other

 Water heater location: Basement , Upstairs utility room , Garage , Other (please describe) _____
35. What type of cooking appliance do you have? Electric , Gas , Other

36. Is there a stove exhaust hood present? Yes No
 Does it vent to the outdoors? Yes No
37. Smoking in Home:
 None , Rare (only guests) , Moderate (residents light smokers) , Heavy (at least one heavy smoker in household) *- in basement or outside*
38. If yes to above, what do they smoke?
 Cigarettes Cigars
 Pipe Other
39. Do you regularly use air fresheners? Yes No
40. Does anyone in the home have indoor home hobbies of crafts involving: None
 Heating , soldering , welding , model glues , paint , spray paint,
 wood finishing , Other Please specify what type of hobby: _____
41. General family/home use of consumer products (please circle appropriate): Assume that
Never = never used, **Hardly ever** = less than once/month, **Occasionally** = about
 once/month, **Regularly** = about once/week, and **Often** = more than once/week.

Product	Frequency of Use
Spray-on deodorant	<u>Never</u> Hardly ever Occasionally Regularly Often

Aerosol deodorizers	Never	Hardly ever	Occasionally	Regularly	Often
Insecticides	Never	Hardly ever	Occasionally	Regularly	Often
Disinfectants	Never	Hardly ever	Occasionally	Regularly	Often

(Question 41, continued)

Product	Frequency of Use				
Window cleaners	Never	Hardly ever	Occasionally	Regularly	Often
Spray-on oven cleaners	Never	Hardly ever	Occasionally	Regularly	Often

7. Home/Structure Description: number of floors 2 Basement? Yes [X] No [] Crawl Space? Yes [] No [X] If Yes, under how much of the house's area? 100%

8. Age of Home/Structure: _____ years, Not sure/Unknown [X]

9. General Above-Ground Home/Structure construction (check all that apply): Wood [], Brick [], Concrete [], Cement block [], Other []

10. Foundation Construction (check all that apply): Concrete slab [X] Fieldstone [] Concrete block [] not sure

- Elevated above ground/grade
- Other _____
11. What is the source of your drinking water (check all that apply)?
 Public water supply
 Private well
 Bottled water
 Other, please specify _____
12. Do you have a private well for purposes other than drinking?
 Yes No
 If yes, please describe what you use the well
 for: _____
13. Do you have a septic system? Yes No Not used Unknown
14. Do you have standing water outside your home (pond, ditch, swale)? Yes No

Basement Description, please check appropriate boxes.

If you do not have a basement go to question 23.

15. Is the basement finished or unfinished ?
16. If finished, how many rooms are in the basement? 1
 How many are used for more than 2 hours/day? maybe for washing
17. Is the basement floor (check all that apply) concrete , tile , carpeted , dirt ,
 other (describe) _____?
18. Are the basement walls poured concrete , cement block , stone , wood , brick ,
 other _____?
19. Does the basement have a moisture problem (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
20. Does the basement ever flood (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
21. Does the basement have any of the following? (check all that apply) Floor cracks ,
 Wall cracks , Sump , Floor drain , Other hole/opening in floor
 (describe) _____
sewer clean-out check/dont

22. Are any of the following used or stored in the basement (check all that apply)
 Paint Paint stripper/remover Paint thinner
 Metal degreaser/cleaner Gasoline Diesel fuel Solvents Glue
 Laundry spot removers Drain cleaners Pesticides
23. Have you recently (within the last six months) done any painting or remodeling in your home? Yes No
spray bottles
 If yes, please specify what was done, where in the home, and what month:

24. Have you installed new carpeting in your home within the last year? Yes No
 If yes, when and where? _____
25. Do you regularly use or work in a dry cleaning service (check only one box)?
 Yes, use dry-cleaning regularly (at least weekly)
 Yes, use dry-cleaning infrequently (monthly or less)
 Yes, work at a dry cleaning service
 No
26. Does anyone in your home use solvents at work?
 Yes If yes, how many persons _____
 No If no, go to question 28
27. ~~If yes for question 26 above, are the work clothes washed at home? Yes No~~
28. Where is the washer/dryer located?
 Basement
 Upstairs utility room
 Kitchen
 Garage
 Use a Laundromat
 Other, please specify _____
29. If you have a dryer, is it vented to the outdoors? Yes No
30. What type(s) of home heating do you have (check all that apply)
 Fuel type: Gas Oil Electric Wood Coal Other _____
 Heat conveyance system: Forced hot air
 Forced hot water
 Steam
 Radiant floor heat
 Wood stove
 Coal furnace
 Fireplace
 Other _____
- just got new furnace*

31. Do you have air conditioning? Yes No . If yes, please check the appropriate type(s)
 Central air conditioning
 Window air conditioning unit(s)
 Other , please specify _____
32. Do you use any of the following? Room fans , Ceiling fans , Attic fan
 Do you ventilate using the fan-only mode of your central air conditioning or forced air heating system? Yes No
33. Has your home had termite or other pesticide treatment: Yes No Unknown
 If yes, please specify type of pest controlled, termites
 and approximate date of service ~ 5 years
34. Water Heater Type: Gas , Electric , By furnace , Other
 Water heater location: Basement , Upstairs utility room , Garage , Other (please describe) _____
35. What type of cooking appliance do you have? Electric , Gas , Other _____
36. Is there a stove exhaust hood present? Yes No
 Does it vent to the outdoors? Yes No
37. Smoking in Home:
 None Rare (only guests) , Moderate (residents light smokers) ,
 Heavy (at least one heavy smoker in household)
38. ~~If yes to above, what do they smoke?
 Cigarettes Cigars
 Pipe Other~~
39. Do you regularly use air fresheners? Yes No Sometimes
40. Does anyone in the home have indoor home hobbies of crafts involving: None
 Heating , soldering , welding , model glues , paint , spray paint,
 wood finishing , Other Please specify what type of hobby: _____
41. General family/home use of consumer products (please circle appropriate): Assume that
 Never = never used, Hardly ever = less than once/month, Occasionally = about
 once/month, Regularly = about once/week, and Often = more than once/week.

Product	Frequency of Use				
Spray-on deodorant	Never	Hardly ever	Occasionally	Regularly	Often

Aerosol deodorizers	Never	Hardly ever	Occasionally	Regularly	Often
Insecticides	Never	Hardly ever	Occasionally	Regularly	Often
Disinfectants	Never	Hardly ever	Occasionally	Regularly	Often

(Question 41, continued)

 Laundry spot removers Drain cleaners Pesticides
23. Have you recently (within the last six months) done any painting or remodeling in your home? Yes No
 If yes, please specify what was done, where in the home, and what month:

24. Have you installed new carpeting in your home within the last year? Yes No
 If yes, when and where? _____
25. Do you regularly use or work in a dry cleaning service (check only one box)?
 Yes, use dry-cleaning regularly (at least weekly)
 Yes, use dry-cleaning infrequently (monthly or less)
 Yes, work at a dry cleaning service
 No
26. Does anyone in your home use solvents at work?
 Yes If yes, how many persons _____
 No If no, go to question 28
27. If yes for question 26 above, are the work clothes washed at home? Yes No
28. Where is the washer/dryer located?
 Basement
 Upstairs utility room
 Kitchen
 Garage
 Use a Laundromat
 Other, please specify _____
29. If you have a dryer, is it vented to the outdoors? Yes No
30. What type(s) of home heating do you have (check all that apply)
 Fuel type: Gas , Oil , Electric , Wood , Coal , Other _____
 Heat conveyance system: Forced hot air
 Forced hot water
 Steam
 Radiant floor heat
 Wood stove
 Coal furnace
 Fireplace
 Other _____

31. Do you have air conditioning? Yes No . If yes, please check the appropriate type(s)
 Central air conditioning
 Window air conditioning unit(s)
 Other , please specify radiant
32. Do you use any of the following? Room fans , Ceiling fans , Attic fan
 Do you ventilate using the fan-only mode of your central air conditioning or forced air heating system? Yes No
33. Has your home had termite or other pesticide treatment: Yes No Unknown
 If yes, please specify type of pest controlled, termites
 and approximate date of service ~1993; partial treatment 2 yrs ago
34. Water Heater Type: Gas , Electric , By furnace , Other
 Water heater location: Basement , Upstairs utility room , Garage , Other (please describe)
35. What type of cooking appliance do you have? Electric , Gas , Other
36. Is there a stove exhaust hood present? Yes No
 Does it vent to the outdoors? Yes No
37. Smoking in Home:
 None , Rare (only guests) , Moderate (residents light smokers) ,
 Heavy (at least one heavy smoker in household)
38. If yes to above, what do they smoke?
 Cigarettes Cigars
 Pipe Other only in bathroom
39. Do you regularly use air fresheners? Yes No
40. Does anyone in the home have indoor home hobbies of crafts involving: None
 Heating , soldering , welding , model glues , paint , spray paint,
 wood finishing , Other Please specify what type of hobby: _____
41. General family/home use of consumer products (please circle appropriate): Assume that
 Never = never used, **Hardly ever** = less than once/month, **Occasionally** = about
 once/month, **Regularly** = about once/week, and **Often** = more than once/week.

Product	Frequency of Use
Spray-on deodorant	<input checked="" type="radio"/> Never <input type="radio"/> Hardly ever <input type="radio"/> Occasionally <input type="radio"/> Regularly <input type="radio"/> Often

Aerosol deodorizers	Never	Hardly ever	Occasionally	Regularly	Often
Insecticides	Never	Hardly ever	Occasionally	Regularly	Often
Disinfectants	Never	Hardly ever	Occasionally	Regularly	Often

(Question 41, continued)

Product	Frequency of Use				
Window cleaners	Never	Hardly ever	Occasionally	Regularly	Often
Spray-on oven cleaners	Never	Hardly ever	Occasionally	Regularly	Often
Nail polish remover	Never	Hardly ever	Occasionally	Regularly	Often
Hair sprays	Never	Hardly ever	Occasionally	Regularly	Often

42. Please check weekly household cleaning practices:

- Dusting
- Dry sweeping
- Vacuuming
- Polishing (furniture, etc)
- Washing/waxing floors
- Other _____

43. Other comments: _____

Date: 4-27-11

1. Name: [Redacted]

Address: 2417 E. 4th St.

Home Phone: [Redacted] Work Phone:

2. What is the best time to call to speak with you? morning At: Work [] or Home [X]?

3. Are you the Owner [], Renter [X], Other [] (please specify) Rent to own of this Home/Structure?

4. Total number of occupants/persons at this location? 1 Number of children? 0 Ages?

5. How long have you lived at this location? 10 years

General Home Description

6. Type of Home/Structure (check only one): Single Family Home [X], Duplex [], Condominium [], Townhouse [], Other []

7. Home/Structure Description: number of floors 2 Basement? Yes [X] No [] Crawl Space? Yes [] No [X] If Yes, under how much of the house's area? 100%

8. Age of Home/Structure: _____ years, Not sure/Unknown [X]

9. General Above-Ground Home/Structure construction (check all that apply): Wood [X], Brick [], Concrete [], Cement block [], Other []

10. Foundation Construction (check all that apply): Concrete slab [X], Fieldstone [], Concrete block []

- Elevated above ground/grade
- Other _____
11. What is the source of your drinking water (check all that apply)?
 Public water supply
 Private well
 Bottled water
 Other, please specify _____

12. Do you have a private well for purposes other than drinking?
 Yes No
 If yes, please describe what you use the well
 for: _____

13. Do you have a septic system? Yes No Not used Unknown *not aware of*
14. Do you have standing water outside your home (pond, ditch, swale)? Yes No *not more than one*

Basement Description, please check appropriate boxes.
 If you do not have a basement go to question 23.

15. Is the basement finished or unfinished ?
16. If finished, how many rooms are in the basement? 1
 How many are used for more than 2 hours/day? No
17. Is the basement floor (check all that apply) concrete , tile , carpeted , dirt ,
 other (describe) _____?
18. Are the basement walls poured concrete , cement block , stone , wood , brick ,
 other _____?
19. Does the basement have a moisture problem (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
20. Does the basement ever flood (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
21. Does the basement have any of the following? (check all that apply) Floor cracks
 Wall cracks , Sump , Floor drain , Other hole/opening in floor *Surface cracking*
 (describe) _____

22. Are any of the following used or stored in the basement (check all that apply)
Paint Paint stripper/remover Paint thinner
Metal degreaser/cleaner Gasoline Diesel fuel Solvents Glue
Laundry spot removers Drain cleaners Pesticides *none*

23. Have you recently (within the last six months) done any painting or remodeling in your home? Yes No
If yes, please specify what was done, where in the home, and what month:

24. Have you installed new carpeting in your home within the last year? Yes No
If yes, when and where? _____

25. Do you regularly use or work in a dry cleaning service (check only one box)?
Yes, use dry-cleaning regularly (at least weekly)
Yes, use dry-cleaning infrequently (monthly or less)
Yes, work at a dry cleaning service
No

26. Does anyone in your home use solvents at work?
Yes If yes, how many persons _____
No If no, go to question 28

~~27. If yes for question 26 above, are the work clothes washed at home? Yes No~~

28. Where is the washer/dryer located?
Basement *washer in basement*
Upstairs utility room
Kitchen
Garage
Use a Laundromat
Other, please specify _____

29. If you have a dryer, is it vented to the outdoors? Yes No
no dryer

30. What type(s) of home heating do you have (check all that apply)
Fuel type: Gas Oil Electric Wood Coal Other _____
Heat conveyance system: Forced hot air
Forced hot water
Steam
Radiant floor heat *not sure*
Wood stove
Coal furnace
Fireplace
Other _____

*Thinks it is
natural gas
~ 1 year old*

31. Do you have air conditioning? Yes No . If yes, please check the appropriate type(s)
 Central air conditioning
 Window air conditioning unit(s)
 Other please specify _____ *upstairs, not used*
32. Do you use any of the following? Room fans , Ceiling fans , Attic fan
 Do you ventilate using the fan-only mode of your central air conditioning or forced air heating system? Yes No
33. Has your home had termite or other pesticide treatment: Yes No Unknown
 If yes, please specify type of pest controlled, _____
 and approximate date of service _____
34. Water Heater Type: Gas Electric By furnace Other
 Water heater location: Basement Upstairs utility room Garage Other (please describe) _____ *not sure*
35. What type of cooking appliance do you have? Electric , Gas , Other
36. Is there a stove exhaust hood present? Yes No *fan to exhaust*
 Does it vent to the outdoors? Yes No
37. Smoking in Home:
 None Rare (only guests) , Moderate (residents light smokers) ,
 Heavy (at least one heavy smoker in household)
38. ~~If yes to above, what do they smoke?
 Cigarettes Cigars
 Pipe Other~~
39. Do you regularly use air fresheners? Yes No *Sometimes*
40. Does anyone in the home have indoor home hobbies of crafts involving: None
 Heating , soldering , welding , model glues , paint , spray paint,
 wood finishing , Other Please specify what type of hobby: _____

If Yes, under how much of the house's area? 100%

8. Age of Home/Structure: _____ years, Not sure/Unknown

9. General Above-Ground Home/Structure construction (check all that apply):
Wood , Brick , Concrete , Cement block , Other _____

10. Foundation Construction (check all that apply):

Concrete slab

Fieldstone

Concrete block

- Elevated above ground/grade
- Other _____
11. What is the source of your drinking water (check all that apply)?
 Public water supply
 Private well
 Bottled water
 Other, please specify _____
12. Do you have a private well for purposes other than drinking?
 Yes No
 If yes, please describe what you use the well
 for: _____
13. Do you have a septic system? Yes No Not used Unknown
14. Do you have standing water outside your home (pond, ditch, swale)? Yes No

Basement Description, please check appropriate boxes.
 If you do not have a basement go to question 23.

15. Is the basement finished or unfinished ?
16. If finished, how many rooms are in the basement? _____
 How many are used for more than 2 hours/day? _____
17. Is the basement floor (check all that apply) concrete , tile , carpeted , dirt ,
 other (describe) _____?
18. Are the basement walls poured concrete , cement block , stone , wood , brick ,
 other _____?
19. Does the basement have a moisture problem (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
20. Does the basement ever flood (check one only)?
 Yes, frequently (3 or more times/yr)
 Yes, occasionally (1-2 times/yr)
 Yes, rarely (less than 1 time/yr)
 No
21. Does the basement have any of the following? (check all that apply) Floor cracks ,
 Wall cracks , Sump , Floor drain , Other hole/opening in floor
 (describe) _____

22. Are any of the following used or stored in the basement (check all that apply)
 Paint Paint stripper/remover Paint thinner
 Metal degreaser/cleaner Gasoline Diesel fuel Solvents Glue
 Laundry spot removers Drain cleaners Pesticides
23. Have you recently (within the last six months) done any painting or remodeling in your home? Yes No
 If yes, please specify what was done, where in the home, and what month:

24. Have you installed new carpeting in your home within the last year? Yes No
 If yes, when and where? _____
25. Do you regularly use or work in a dry cleaning service (check only one box)?
 Yes, use dry-cleaning regularly (at least weekly)
 Yes, use dry-cleaning infrequently (monthly or less)
 Yes, work at a dry cleaning service
 No
26. Does anyone in your home use solvents at work?
 Yes If yes, how many persons _____
 No If no, go to question 28
27. If yes for question 26 above, are the work clothes washed at home? Yes No
28. Where is the washer/dryer located?
 Basement
 Upstairs utility room
 Kitchen
 Garage
 Use a Laundromat
 Other, please specify _____
29. If you have a dryer, is it vented to the outdoors? Yes No
30. What type(s) of home heating do you have (check all that apply)
 Fuel type: Gas , Oil , Electric , Wood , Coal , Other _____
 Heat conveyance system: Forced hot air
 Forced hot water
 Steam
 Radiant floor heat
 Wood stove
 Coal furnace
 Fireplace
 Other _____

31. Do you have air conditioning? Yes No . If yes, please check the appropriate type(s)
 Central air conditioning
 Window air conditioning unit(s)
 Other , please specify _____
32. Do you use any of the following? Room fans , Ceiling fans , Attic fan
 Do you ventilate using the fan-only mode of your central air conditioning or forced air heating system? Yes No
33. Has your home had termite or other pesticide treatment: Yes No Unknown
 If yes, please specify type of pest controlled, _____
 and approximate date of service _____
34. Water Heater Type: Gas , Electric , By furnace , Other

 Water heater location: Basement , Upstairs utility room , Garage , Other (please describe) _____
35. What type of cooking appliance do you have? Electric , Gas , Other

36. Is there a stove exhaust hood present? Yes No
 Does it vent to the outdoors? Yes No
37. Smoking in Home:
 None , Rare (only guests) , Moderate (residents light smokers) ,
 Heavy (at least one heavy smoker in household)
38. If yes to above, what do they smoke?
 Cigarettes Cigars
 Pipe Other
39. Do you regularly use air fresheners? Yes No
40. Does anyone in the home have indoor home hobbies of crafts involving: None
 Heating , soldering , welding , model glues , paint , spray paint,
 wood finishing , Other Please specify what type of hobby: _____

41. General family/home use of consumer products (please circle appropriate): Assume that
Never = never used, **Hardly ever** = less than once/month, **Occasionally** = about
 once/month, **Regularly** = about once/week, and **Often** = more than once/week.

Product	Frequency of Use				
Spray-on deodorant	Never	Hardly ever	Occasionally	Regularly	Often

Aerosol deodorizers	Never	Hardly ever	<u>Occasionally</u>	Regularly	Often
Insecticides	<u>Never</u>	Hardly ever	Occasionally	Regularly	Often
Disinfectants	Never	Hardly ever	<u>Occasionally</u>	Regularly	Often

(Question 41, continued)

Product	Frequency of Use				
Window cleaners	Never	Hardly ever	Occasionally	<u>Regularly</u>	Often
Spray-on oven cleaners	Never	Hardly ever	<u>Occasionally</u>	Regularly	Often
Nail polish remover	<u>Never</u>	Hardly ever	Occasionally	Regularly	Often
Hair sprays	<u>Never</u>	Hardly ever	Occasionally	Regularly	Often

42. Please check weekly household cleaning practices:

- Dusting
- Dry sweeping
- Vacuuming
- Polishing (furniture, etc) 1/month
- Washing/waxing floors
- Other _____

43. Other comments: _____

PROJECT: _____ Page _____ of _____

JOB NO. _____ Date 4-27-11 Comp. By _____ CHECKED BY: _____

2620 E 4th ST.

Street Address: 21035 E 4th St
Name of Resident: [REDACTED]

Arrival Checklist

Date of Visit: 4/28/2011

Time of Arrival: 1:30 Time of Departure: 2:10

Names of Terracon Representatives: John Brimeyer
Jen Clancy

- Introduce Terracon Representatives and Show Terracon Identification
- Verify identity of resident; confirm authority to allow entry
- Explain purpose of visit (check as appropriate):
 - Sample Port Installation Sub-Slap Vapor Sampling
 - Completion of Questionnaire Indoor Air Sampling Canister Installation
 - Indoor Air Sampling Canister Removal Outdoor Air Sampling
 - Other [Explain: _____]

Explain if follow-up visits will occur and verify date/time of follow-up visits as appropriate.

Date of Follow-Up Visit: 5/3

Time of Follow-Up Visit: 1:00

Items Completed as Noted:

Jen Clancy
Terracon Representative Signature

[REDACTED]
Resident Signature

Street Address: 2636 E 4th St

Name of Resident: [REDACTED]

Date and Time of Visit: 4/28/2011

Sampling Port Installation Checklist

- Work with resident to identify mutually agreeable area to install port in lowest occupied level of home.

Precautions to be taken to protect floor coverings, if applicable:

- Install sampling port in accordance with work plan procedures.
- Clean up any debris.
- Invite homeowner to view installed port and explain necessary precautions to prevent disturbance of it while it cures.

Items Completed as Noted:

Jennifer McClancy
Terracon Representative Signature

[REDACTED]
Resident Signature

Street Address: 2635 E 4th St
Name of Resident: [REDACTED]

Arrival Checklist

Date of Visit: 5/4/2011

Time of Arrival: 1200

Time of Departure: 1315

Names of Terracon Representatives: Jen Clancy
Case Clancy

- Introduce Terracon Representatives and Show Terracon Identification
- Verify identity of resident; confirm authority to allow entry
- Explain purpose of visit (check as appropriate):
 - Sample Port Installation
 - Sub-Slab Vapor Sampling *x2*
 - Completion of Questionnaire
 - Indoor Air Sampling Canister Installation
 - Indoor Air Sampling Canister Removal
 - Outdoor Air Sampling
 - Other [Explain: _____]

Explain if follow-up visits will occur and verify date/time of follow-up visits as appropriate.

Date of Follow-Up Visit: _____

Time of Follow-Up Visit: _____

Items Completed as Noted:

ANALYTICAL METHODS SUMMARY

HLE030523

<u>PARAMETER</u>	<u>ANALYTICAL METHOD</u>
Volatile Organics by TO15	EPA-2 TO-15

References:

EPA-2 "Compendium of Methods for the Determination of Toxic Organic Compounds in Ambient Air", EPA-625/R-96/010b, January 1999.

SAMPLE SUMMARY

H1E030523

WO #	SAMPLE#	CLIENT SAMPLE ID	SAMPLED DATE	SAMP TIME
MHTR8	001	CUD1690-01	04/28/11	11:45
MHTTF	002	CUD1690-02	04/28/11	12:16
MHTTG	003	CUD1690-03	04/28/11	15:50
MHTTJ	004	CUD1690-04	04/28/11	17:15

NOTE (S) :

- The analytical results of the samples listed above are presented on the following pages.
- All calculations are performed before rounding to avoid round-off errors in calculated results.
- Results noted as "ND" were not detected at or above the stated limit.
- This report must not be reproduced, except in full, without the written approval of the laboratory.
- Results for the following parameters are never reported on a dry weight basis: color, corrosivity, density, flashpoint, ignitability, layers, odor, paint filter test, pH, porosity pressure, reactivity, redox potential, specific gravity, spot tests, solids, solubility, temperature, viscosity, and weight.

PROJECT NARRATIVE

H1E030523

The results reported herein are applicable to the samples submitted for analysis only. If you have any questions about this report, please call (865) 291-3000 to speak with the TestAmerica project manager listed on the cover page.

This report shall not be reproduced except in full, without the written approval of the laboratory.

The original chain of custody documentation is included with this report.

Sample Receipt

There were no problems with the condition of the samples received.

Quality Control and Data Interpretation

Unless otherwise noted, all holding times and QC criteria were met and the test results shown in this report meet all applicable NELAC requirements.

EPA methods TO-14A and TO-15 specify the use of humidified "zero air" as the blank reagent for canister cleaning, instrument calibration and sample analysis. Ultra-high purity humidified nitrogen from a cryogenic reservoir is used in place of "zero air" by TestAmerica Knoxville.

TestAmerica Knoxville maintains the following certifications, approvals and accreditations: Arkansas DEQ Lab #88-0688, California DHS ELAP Cert. #2423, Colorado DPHE, Connecticut DPH Lab #PH-0223, Florida DOH Lab #E87177, Georgia DNR Lab #906, Hawaii DOH, Illinois EPA Lab #200012, Indiana DOH Lab #C-TN-02, Iowa DNR Lab #375, Kansas DHE Cert. #E-10349, Kentucky DEP Lab #90101, Louisiana DEQ Cert. #03079, Louisiana DOHH, Maryland DOE Cert. #277, Michigan DEQ Lab #9933, Nevada DEP, New Jersey DEP Lab #TN001, New York DOH Lab #10781, North Carolina DPH Lab #21705, North Carolina DEHNR Cert. #64, Ohio EPA VAP Lab #CL0059, Oklahoma DEQ Lab #9415, Pennsylvania DEP Lab #68-00576, South Carolina DHEC Cert #84001001, Tennessee DOH Lab #02014, Texas CEQ, Utah DOH Lab # QUAN3, Virginia DGS Lab #00165, Washington DOE Lab #C1314, West Virginia DEP Cert. #345, West Virginia DHHR Cert #9955C, Wisconsin DNR Lab #998044300, Naval Facilities Engineering Service Center and USDA Soil Permit #S-46424. This list of approvals is subject to change and does not imply that laboratory certification is available for all parameters reported in this environmental sample data report.

Qualifier Definition/Glossary

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis.
EPA	United States Environmental Protection Agency
ND	Not Detected above the reporting level.
MDL	Method Detection Limit
RL	Reporting Limit
RE, RE1 (etc.)	Indicates a Re-extraction or Reanalysis of the sample.
%R	Percent Recovery
RPD	Relative Percent Difference, a measure of the relative difference between two points.

ANALYTICAL METHODS SUMMARY

HLE030527

<u>PARAMETER</u>	<u>ANALYTICAL METHOD</u>
Volatile Organics by TO15	EPA-2 TO-15

References:

EPA-2 "Compendium of Methods for the Determination of Toxic Organic Compounds in Ambient Air", EPA-625/R-96/010b, January 1999.

SAMPLE SUMMARY

H1E030527

WO #	SAMPLE#	CLIENT SAMPLE ID	SAMPLED DATE	SAMP TIME
MHTT0	001	CUD1698-01	04/28/11	09:00
MHTT7	002	CUD1698-02	04/28/11	09:57
MHTVC	003	CUD1698-03	04/28/11	10:57
MHTVE	004	CUD1698-04	04/28/11	11:52
MHTVF	005	CUD1698-05	04/28/11	18:28
MHTVL	006	CUD1698-06	04/28/11	18:48

NOTE (S) :

- The analytical results of the samples listed above are presented on the following pages.
- All calculations are performed before rounding to avoid round-off errors in calculated results.
- Results noted as "ND" were not detected at or above the stated limit.
- This report must not be reproduced, except in full, without the written approval of the laboratory.
- Results for the following parameters are never reported on a dry weight basis: color, corrosivity, density, flashpoint, ignitability, layers, odor, paint filter test, pH, porosity pressure, reactivity, redox potential, specific gravity, spot tests, solids, solubility, temperature, viscosity, and weight.

PROJECT NARRATIVE

H1E030527

The results reported herein are applicable to the samples submitted for analysis only. If you have any questions about this report, please call (865) 291-3000 to speak with the TestAmerica project manager listed on the cover page.

This report shall not be reproduced except in full, without the written approval of the laboratory.

The original chain of custody documentation is included with this report.

Sample Receipt

There were no problems with the condition of the samples received.

Quality Control and Data Interpretation

Unless otherwise noted, all holding times and QC criteria were met and the test results shown in this report meet all applicable NELAC requirements.

EPA methods TO-14A and TO-15 specify the use of humidified "zero air" as the blank reagent for canister cleaning, instrument calibration and sample analysis. Ultra-high purity humidified nitrogen from a cryogenic reservoir is used in place of "zero air" by TestAmerica Knoxville.

Sample CUD1698-06 was reported with elevated reporting limits for all analytes due to the presence of non-target compounds. A dilution was necessary prior to analysis, and the reporting limits were adjusted accordingly.

TestAmerica Knoxville maintains the following certifications, approvals and accreditations: Arkansas DEQ Lab #88-0688, California DHS ELAP Cert. #2423, Colorado DPHE, Connecticut DPH Lab #PH-0223, Florida DOH Lab #E87177, Georgia DNR Lab #906, Hawaii DOH, Illinois EPA Lab #200012, Indiana DOH Lab #C-TN-02, Iowa DNR Lab #375, Kansas DHE Cert. #E-10349, Kentucky DEP Lab #90101, Louisiana DEQ Cert. #03079, Louisiana DOHH, Maryland DOE Cert. #277, Michigan DEQ Lab #9933, Nevada DEP, New Jersey DEP Lab #TN001, New York DOH Lab #10781, North Carolina DPH Lab #21705, North Carolina DEHNR Cert. #64, Ohio EPA VAP Lab #CL0059, Oklahoma DEQ Lab #9415, Pennsylvania DEP Lab #68-00576, South Carolina DHEC Cert #84001001, Tennessee DOH Lab #02014, Texas CEQ, Utah DOH Lab # QUAN3, Virginia DGS Lab #00165, Washington DOE Lab #C1314, West Virginia DEP Cert. #345, West Virginia DHHR Cert #9955C, Wisconsin DNR Lab #998044300, Naval Facilities Engineering Service Center and USDA Soil Permit #S-46424. This list of approvals is subject to change and does not imply that laboratory certification is available for all parameters reported in this environmental sample data report.

Accreditation may not be offered or required for all methods and analytes reported in this package. Please contact your project manager for the laboratory's current list of certified methods and analytes.

Qualifier Definition/Glossary

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis.
EPA	United States Environmental Protection Agency
ND	Not Detected above the reporting level.
MDL	Method Detection Limit
RL	Reporting Limit
RE, RE1 (etc.)	Indicates a Re-extraction or Reanalysis of the sample.
%R	Percent Recovery
RPD	Relative Percent Difference, a measure of the relative difference between two points.

NOTE (S) :

- The analytical results of the samples listed above are presented on the following pages.
- All calculations are performed before rounding to avoid round-off errors in calculated results.
- Results noted as *ND* were not detected at or above the stated limit.
- This report must not be reproduced, except in full, without the written approval of the laboratory.
- Results for the following parameters are never reported on a dry weight basis: color, corrosivity, density, flashpoint, ignitability, layers, odor, paint filter test, pH, porosity pressure, reactivity, redox potential, specific gravity, spot tests, solids, solubility, temperature, viscosity, and weight.

PROJECT NARRATIVE H1E040525

The results reported herein are applicable to the samples submitted for analysis only. If you have any questions about this report, please call (865) 291-3000 to speak with the TestAmerica project manager listed on the cover page.

This report shall not be reproduced except in full, without the written approval of the laboratory.

The original chain of custody documentation is included with this report.

Sample Receipt

There were no problems with the condition of the samples received.

Quality Control and Data Interpretation

Unless otherwise noted, all holding times and QC criteria were met and the test results shown in this report meet all applicable NELAC requirements.

EPA methods TO-14A and TO-15 specify the use of humidified "zero air" as the blank reagent for canister cleaning, instrument calibration and sample analysis. Ultra-high purity humidified nitrogen from a cryogenic reservoir is used in place of "zero air" by TestAmerica Knoxville.

Sample CUE0002-03 was reported with elevated reporting limits for all analytes due to the presence of non-target compounds. A dilution was necessary prior to analysis, and the reporting limits were adjusted accordingly.

The concentration of trichloroethene in samples CUE0002-07, CUE0002-10, and tetrachloroethene in samples CUE0002-14, CUE0002-15 exceeded the calibration level of the instrument. The samples were analyzed at a dilution to bring the concentration of the compound into the instrument calibration range. The results for both analyses are reported in order to provide the lowest possible reporting limits.

TestAmerica Knoxville maintains the following certifications, approvals and accreditations: Arkansas DEQ Lab #88-0688, California DHS ELAP Cert. #2423, Colorado DPHE, Connecticut DPH Lab #PH-0223, Florida DOH Lab #E87177, Georgia DNR Lab #906, Hawaii DOH, Illinois EPA Lab #200012, Indiana DOH Lab #C-TN-02, Iowa DNR Lab #375, Kansas DHE Cert. #E-10349, Kentucky DEP Lab #90101, Louisiana DEQ Cert. #03079, Louisiana DOHH, Maryland DOE Cert. #277, Michigan DEQ Lab #9933, Nevada DEP, New Jersey DEP Lab #TN001, New York DOH Lab #10781, North Carolina DPH Lab #21705, North Carolina DEHNR Cert. #64, Ohio EPA VAP Lab #CL0059, Oklahoma DEQ Lab #9415, Pennsylvania DEP Lab #68-00576, South Carolina DHEC Cert #84001001, Tennessee DOH Lab #02014, Texas CEQ, Utah DOH Lab # QUAN3, Virginia DGS Lab #00165, Washington DOE Lab #C1314, West Virginia DEP Cert. #345, West Virginia DHHR Cert #9955C, Wisconsin DNR Lab #998044300, Naval Facilities Engineering Service Center and USDA Soil Permit #S-46424. This list of approvals is subject to change and does not imply that laboratory certification is available for all parameters reported in this environmental sample data report.

TESTAMERICA KNOXVILLE SAMPLE RECEIPT/CONDITION UPON RECEIPT ANOMALY CHECKLIST

Lot Number: HFM0525

Review Items	Yes	No	NA	If No, what was the problem?	Comments/Actions Taken
1. Do sample container labels match COC? (IDs, Dates, Times)	X			<input type="checkbox"/> 1a Do not match COC <input type="checkbox"/> 1b Incomplete information <input type="checkbox"/> 1c Marking smeared <input type="checkbox"/> 1d Label torn <input type="checkbox"/> 1e No label <input type="checkbox"/> 1f COC not received <input type="checkbox"/> 1g Other:	
2. Is the cooler temperature within limits? (> freezing temp. of water to 6°C, VOST: 10°C)			X	<input type="checkbox"/> 2a Temp Blank = _____ <input type="checkbox"/> 2b Cooler Temp = _____ <input type="checkbox"/> 2c Cooling initiated for recently collected samples, ice present.	
3. Were samples received with correct chemical preservative (excluding Encore)?			X	<input type="checkbox"/> 3a Sample preservative = _____	
4. Were custody seals present/intact on cooler and/or containers?	X			<input type="checkbox"/> 4a Not present <input type="checkbox"/> 4b Not intact <input type="checkbox"/> 4c Other:	
5. Were all of the samples listed on the COC received?	X			<input type="checkbox"/> 5a Samples received-not on COC <input type="checkbox"/> 5b Samples not received-on COC	
6. Were all of the sample containers received intact?	X			<input type="checkbox"/> 6a Leaking <input type="checkbox"/> 6b Broken	
7. Were VOA samples received without headspace?			X	<input type="checkbox"/> 7a Headspace (VOA only)	
8. Were samples received in appropriate containers?	X			<input type="checkbox"/> 8a Improper container	
9. Did you check for residual chlorine, if necessary?			X	<input type="checkbox"/> 9a Could not be determined due to matrix interference	
10. Were samples received within holding time?	X			<input type="checkbox"/> 10a Holding time expired	
11. For rad samples, was sample activity info. provided?			X	<input type="checkbox"/> Incomplete information	
12. For 1613B water samples is pH<9?			X	If no, was pH adjusted to pH 7 - 9 with sulfuric acid? _____	
13. Are the shipping containers intact?	X			<input type="checkbox"/> 13a Leaking <input type="checkbox"/> 13b Other:	
14. Was COC relinquished? (Signed/Dated/Timed)	X			<input type="checkbox"/> 14a Not relinquished	
15. Are tests/parameters listed for each sample?	X			<input type="checkbox"/> 15a Incomplete information	
16. Is the matrix of the samples noted?	X			<input type="checkbox"/> 15a Incomplete information	
17. Is the date/time of sample collection noted?	X			<input type="checkbox"/> 15a Incomplete information	
18. Is the client and project name/# identified?	X			<input type="checkbox"/> 15a Incomplete information	
19. Was the sampler identified on the COC?		X

MH3QA	014	CUE0116-14	05/03/11	15:37
MH3QC	015	CUE0116-15	05/03/11	16:33
MH3QD	016	CUE0116-16	05/03/11	16:55

NOTE (S) :

- The analytical results of the samples listed above are presented on the following pages.
- All calculations are performed before rounding to avoid round-off errors in calculated results.
- Results noted as "ND" were not detected at or above the stated limit.
- This report must not be reproduced, except in full, without the written approval of the laboratory.
- Results for the following parameters are never reported on a dry weight basis: color, corrosivity, density, flashpoint, ignitability, layers, odor, paint filter test, pH, porosity pressure, reactivity, redox potential, specific gravity, spot tests, solids, solubility, temperature, viscosity, and weight.

PROJECT NARRATIVE H1E060660

The results reported herein are applicable to the samples submitted for analysis only. If you have any questions about this report, please call (865) 291-3000 to speak with the TestAmerica project manager listed on the cover page.

This report shall not be reproduced except in full, without the written approval of the laboratory.

The original chain of custody documentation is included with this report.

Sample Receipt

There were no problems with the condition of the samples received.

Quality Control and Data Interpretation

Unless otherwise noted, all holding times and QC criteria were met and the test results shown in this report meet all applicable NELAC requirements.

EPA methods TO-14A and TO-15 specify the use of humidified "zero air" as the blank reagent for canister cleaning, instrument calibration and sample analysis. Ultra-high purity humidified nitrogen from a cryogenic reservoir is used in place of "zero air" by TestAmerica Knoxville.

The concentration of trichloroethene in sample CUE0116-13 exceeded the calibration level of the instrument. The sample was analyzed at a dilution to bring the concentration of the compound into the instrument calibration range. The results for both analyses are reported in order to provide the lowest possible reporting limits.

TestAmerica Knoxville maintains the following certifications, approvals and accreditations: Arkansas DEQ Lab #88-0688, California DHS ELAP Cert. #2423, Colorado DPHE, Connecticut DPH Lab #PH-0223, Florida DOH Lab #E87177, Georgia DNR Lab #906, Hawaii DOH, Illinois EPA Lab #200012, Indiana DOH Lab #C-TN-02, Iowa DNR Lab #375, Kansas DHE Cert. #E-10349, Kentucky DEP Lab #90101, Louisiana DEQ Cert. #03079, Louisiana DOHH, Maryland DOE Cert. #277, Michigan DEQ Lab #9933, Nevada DEP, New Jersey DEP Lab #TN001, New York DOH Lab #10781, North Carolina DPH Lab #21705, North Carolina DEHNR Cert. #64, Ohio EPA VAP Lab #CL0059, Oklahoma DEQ Lab #9415, Pennsylvania DEP Lab #68-00576, South Carolina DHEC Cert #84001001, Tennessee DOH Lab #02014, Texas CEQ, Utah DOH Lab # QUAN3, Virginia DGS Lab #00165, Washington DOE Lab #C1314, West Virginia DEP Cert. #345, West Virginia DHHR Cert #9955C, Wisconsin DNR Lab #998044300, Naval Facilities Engineering Service Center and USDA Soil Permit #S-46424. This list of approvals is subject to change and does not imply that laboratory certification is available for all parameters reported in this environmental sample data report.

ANALYTICAL METHODS SUMMARY

H1E060641

<u>PARAMETER</u>	<u>ANALYTICAL METHOD</u>
Volatile Organics by TO15	EPA-2 TO-15

References:

EPA-2 "Compendium of Methods for the Determination of Toxic Organic Compounds in Ambient Air", EPA-625/R-96/010b, January 1999.

SAMPLE SUMMARY

H1E060641

WO #	SAMPLE#	CLIENT SAMPLE ID	SAMPLED DATE	SAMP TIME
MH3LH	001	CUE0188-01	05/04/11	13:05
MH3LN	002	CUE0188-02	05/04/11	13:05

NOTE (S) :

-
- The analytical results of the samples listed above are presented on the following pages.
 - All calculations are performed before rounding to avoid round-off errors in calculated results.
 - Results noted as "ND" were not detected at or above the stated limit.
 - This report must not be reproduced, except in full, without the written approval of the laboratory.
 - Results for the following parameters are never reported on a dry weight basis: color, corrosivity, density, flashpoint, ignitability, layers, odor, paint filter test, pH, porosity pressure, reactivity, redox potential, specific gravity, spot tests, solids, solubility, temperature, viscosity, and weight.

PROJECT NARRATIVE H1E060641

The results reported herein are applicable to the samples submitted for analysis only. If you have any questions about this report, please call (865) 291-3000 to speak with the TestAmerica project manager listed on the cover page.

This report shall not be reproduced except in full, without the written approval of the laboratory.

The original chain of custody documentation is included with this report.

Sample Receipt

There were no problems with the condition of the samples received.

Quality Control and Data Interpretation

Unless otherwise noted, all holding times and QC criteria were met and the test results shown in this report meet all applicable NELAC requirements.

EPA methods TO-14A and TO-15 specify the use of humidified "zero air" as the blank reagent for canister cleaning, instrument calibration and sample analysis. Ultra-high purity humidified nitrogen from a cryogenic reservoir is used in place of "zero air" by TestAmerica Knoxville.

TestAmerica Knoxville maintains the following certifications, approvals and accreditations: Arkansas DEQ Lab #88-0688, California DHS ELAP Cert. #2423, Colorado DPHE, Connecticut DPH Lab #PH-0223, Florida DOH Lab #E87177, Georgia DNR Lab #906, Hawaii DOH, Illinois EPA Lab #200012, Indiana DOH Lab #C-TN-02, Iowa DNR Lab #375, Kansas DHE Cert. #E-10349, Kentucky DEP Lab #90101, Louisiana DEQ Cert. #03079, Louisiana DOHH, Maryland DOE Cert. #277, Michigan DEQ Lab #9933, Nevada DEP, New Jersey DEP Lab #TN001, New York DOH Lab #10781, North Carolina DPH Lab #21705, North Carolina DEHNR Cert. #64, Ohio EPA VAP Lab #CL0059, Oklahoma DEQ Lab #9415, Pennsylvania DEP Lab #68-00576, South Carolina DHEC Cert #84001001, Tennessee DOH Lab #02014, Texas CEQ, Utah DOH Lab # QUAN3, Virginia DGS Lab #00165, Washington DOE Lab #C1314, West Virginia DEP Cert. #345, West Virginia DHHR Cert #9955C, Wisconsin DNR Lab #998044300, Naval Facilities Engineering Service Center and USDA Soil Permit #S-46424. This list of approvals is subject to change and does not imply that laboratory certification is available for all parameters reported in this environmental sample data report.

TESTAMERICA KNOXVILLE SAMPLE RECEIPT/CONDITION UPON RECEIPT ANOMALY CHECKLIST

Lot Number: 41F010141

Review Items	Yes	No	NA	If No, what was the problem?	Comments/Actions Taken
1. Do sample container labels match COC? (IDs, Dates, Times)	X			<input type="checkbox"/> 1a Do not match COC <input type="checkbox"/> 1b Incomplete information <input type="checkbox"/> 1c Marking smeared <input type="checkbox"/> 1d Label torn <input type="checkbox"/> 1e No label <input type="checkbox"/> 1f COC not received <input type="checkbox"/> 1g Other:	
2. Is the cooler temperature within limits? (> freezing temp. of water to 6 °C, VOST: 10°C)			X	<input type="checkbox"/> 2a Temp Blank = _____ <input type="checkbox"/> 2b Cooler Temp = _____ <input type="checkbox"/> 2c Cooling initiated for recently collected samples, ice present.	
3. Were samples received with correct chemical preservative (excluding Encore)?			X	<input type="checkbox"/> 3a Sample preservative = _____	
4. Were custody seals present/intact on cooler and/or containers?	X			<input type="checkbox"/> 4a Not present <input type="checkbox"/> 4b Not intact <input type="checkbox"/> 4c Other:	
5. Were all of the samples listed on the COC received?	X			<input type="checkbox"/> 5a Samples received-not on COC <input type="checkbox"/> 5b Samples not received-on COC	
6. Were all of the sample containers received intact?	X			<input type="checkbox"/> 6a Leaking <input type="checkbox"/> 6b Broken	
7. Were VOA samples received without headspace?			X	<input type="checkbox"/> 7a Headspace (VOA only)	
8. Were samples received in appropriate containers?	X			<input type="checkbox"/> 8a Improper container	
9. Did you check for residual chlorine, if necessary?			X	<input type="checkbox"/> 9a Could not be determined due to matrix interference	
10. Were samples received within holding time?	X			<input type="checkbox"/> 10a Holding time expired	
11. For rad samples, was sample activity info. provided?			X	<input type="checkbox"/> Incomplete information	
12. For 1613B water samples is pH<9?			X	If no, was pH adjusted to pH 7 - 9 with sulfuric acid? _____	
13. Are the shipping containers intact?	X			<input type="checkbox"/> 13a Leaking <input type="checkbox"/> 13b Other:	
14. Was COC relinquished? (Signed/Dated/Timed)	X			<input type="checkbox"/> 14a Not relinquished	
15. Are tests/parameters listed for each sample?	X			<input type="checkbox"/> 15a Incomplete information	
16. Is the matrix of the samples noted?	X			<input type="checkbox"/> 15a Incomplete information	
17. Is the date/time of sample collection noted?	X			<input type="checkbox"/> 15a Incomplete information	
18. Is the client and project name/# identified?	X			<input type="checkbox"/> 15a Incomplete information	
19. Was the sampler identified on the COC?	X
