Diana-

Thanks for your consideration of my comments over the years and I have nothing more to add as you move forward with the Proposed Plan.

Dave

David-

Following your review of the TI Evaluation Report and Addendum and comments on the extent of the TI zone we have had the PRP's consultant revise the TI zone per the figure below. I believe the expansion of the TI zone is consistent with the input you provided Bill Pedicino. Bill and I determined that the description for the justification of the TI zone did not need to be modified. We will amend the 2012 Amendment to the May 2006 TI Evaluation Report with this new figure.

An email I sent you on May 22, 2012, includes the 2001 TI Eval Rpt. and the 2012 Amendment if you need to refer to those documents.

If there is anything else we need to do before moving forward with the Propose Plan for this site please let me know what it is. Thanks for your help.

 Subject: PNG Revised TI Zone

Diana,

As we discussed, attached is the revised TI Zone figure (Figure 17) for the PNG site. I will also mail two hard copies to you. Please let me know if you have any questions or comments.

Thanks,
Kevin
