Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.

Notes:

1. Qualifiers: U = the compound/element was not detected above this value. J = value is estimated due to limitations found in the data validation. UJ = the compound/element was not detected above this value and the value is estimated due to limitations identified in the data validation. R = data was rejected due to major problems identified in the data validation. NJ = The value is estimated to indicate presumptive evidence of a compound/element.
