**Notes:**

Yellow highlighting indicates those soil criteria that were exceeded by the maximum detected site-wide soil concentration.

- = Screening criterion not available.

Data set consists of all sampling events for the monitoring wells presented in Appendix B.

The following 112 wells are representative of the J-3 site: 90MP0059B, 90MW0004, 90MW0010, 90MW0011, 90MW0014, 90MW0022, 90MW0054, 90MW0063, 90MW0101A, 90MW0102A, 90PZ0201, 90PZ0204, 90PZ0208, 90PZ0211, 90WT0004, 90WT0005, J3-MW-1-B, J3-MW-1-C, MW-125M1, MW-125S, MW-132M1, MW-132S, MW-13D, MW-13S, MW-142M1, MW-142M2, MW-142S, MW-143M1, MW-143M2, MW-143M3, MW-144M1, MW-144M2, MW-144S, MW-145M1, MW-145S, MW-152M1, MW-152M2, MW-155M1, MW-155M2, MW-157D, MW-157M1, MW-157M2, MW-157M3, MW-163S, MW-169M1, MW-169M2, MW-171 M2, MW-171 M3, MW-171M1, MW-181S, MW-190M1, MW-190M2, MW-193M1, MW-193S, MW-194M1, MW-195S, MW-196M1, MW-196S, MW-197M1, MW-197M2, MW-197M3, MW-198M1, MW-198M2, MW-198M3, MW-198M4, MW-217M1, MW-217M2, MW-217M3, MW-217M4, MW-218M1, MW-218M2, MW-218M3, MW-227M1, MW-227M2, MW-227M3, MW-232M1, MW-232M2, MW-237M1, MW-237S, MW-243M1, MW-243M2, MW-243M3, MW-247M1, MW-247M2, MW-247M3, MW-250M1, MW-250M2, MW-250M3, MW-251M1, MW-251M2, MW-295M1, MW-295M2, MW-30, MW-329M1, MW-329M2, MW-343M1, MW-343M2, MW-343M3, MW-347D, MW-347M1, MW-347M2, MW-347S, MW-356M1, MW-356M2, MW-356S, MW-359M1, MW-359M2, MW-361M1, MW-361M2, MW-361M3, MW-364D, and MW-364M1.

Laboratory data validation qualifier codes used for the "Maximum Concentration" are as follows:

J = Detected Concentration

NJ = Estimated Concentration

"-" = No listed value.

(a) Federal Maximum Contaminant Level

The MCL for perchlorate is 15 ug/L. The MCP GW-1 Standard for perchlorate is also the Massachusetts MCL.

The MCL for total trihalomethanes is used for bromodichloromethane, bromoform, chloroform and dibromochloromethane.

The MCL for nitrate is 10,000 ug/L. Value shown is for nitrite which was conservatively chosen for screening purposes. (http://www.epa.gov/ogwdw000/pdfs/factsheets/ioc/tech/nitrates.pdf)

(b) HA is the Federal EPA Lifetime Health Advisory value (http://water.epa.gov/action/advisories/drinking/upload/dwstandards2012.pdf).

The HA shown is the Lifetime value. If no Lifetime value was available, the lower of the Drinking Water Equivalent Level (DWEL) or the $1x10^{-6}$ Cancer Risk level. If neither of these values was available, then the 10-Day acute concentration is shown.

MCPA used as a surrogate for the HA value for MCPP.

The HA shown is the 10-day HA for nitrate + nitrite.

(c) The USEPA Regional Screening Level (RSL), May, 2014. (http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm)

Tapwater RSL for Chromium VI used as a surrogate for Chromium, Total.

Tapwater RSL for Endrin is used for Endrin Aldhyde.

Tapwater RSL for Endosulfan used as a surrogate for Endosulfan Sulfate.

The Tapwater RSL for nitrate is 32,000 ug/L. Value shown is for nitrite which was conservatively chosen for screening purposes.

Tapwater RSLs for radionuclides calculated using default residential values at http://epa-prgs.ornl.gov/cgi-bin/radionuclides/rprg_search. For U-238 the "+D" option was selected to include contribution from decay chain.

(d) MCP Method 1 GW-1 Standards, May 2014 (http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).

MCP GW-1 Standard for Endosulfan used as a surrogate for Endosulfan Sulfate.

**Notes:**
Yellow highlighting indicates those soil criteria that were exceeded by the maximum detected site-wide soil concentration.
- = Screening criterion not available.
Laboratory data validation qualifier codes used for the "Maximum Concentration" are as follows:
J = Detected Concentration
NJ = Estimated Concentration
"-" = No listed value.
(a) MCP Method 1 S-1/GW-1 Standards, May 2014 (http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).
MCP S-1/GW-1 standard for Tungsten is an Interim Risk-Based Soil Concentration developed by the MassDEP Office of Research and Standards (MassDEP, 2012).
MCP standards for Chromium VI conservatively used as a surrogate for Chromium, Total.
(b) The USEPA Regional Screening Level (RSL), May, 2014. (http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm)
EPA MCL-Based SSL for Chromium used as the Risk-Based SSLs are specific to either Chromium III or Chromium VI.
EPA MCL-Based SSL for Lead used as there is no Risk-Based SSL for this compound.
EPA Risk-Based SSL for Nickel, soluable Salts used as a surrogate for Nickel.
EPA Risk-Based SSL for Thallium, Soluable Salts used as a surrogate for Thallium.
EPA Risk-Based SSLs for radionuclides calculated using default residential values at http://epa-prgs.ornl.gov/cgi-bin/radionuclides/rprg_search. For U-235 and U-238 the "+D" option was selected to include contribution from decay chain.
(c) MassDEP Leaching-Based Soil Concentrations (GW-1) were not used as screening criteria, but for comparison purposes only. MCP Numerical Standards Development Spreadsheets, May 2014 (http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).
(d) J-3 Range is situated within the Buzzard's Bay Outwash. The outwash background values included the maximum of the 0-2 ft depth interval and were not used as screening criteria, but for comparison purposes only. Values listed for PAHs were obtained from MassDEP's Technical Update: Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil (MassDEP, 2002).

*mg/Kg = milligram per Kilogram*

**Notes:**

Yellow highlighting indicates those soil criteria that were exceeded by the maximum detected site-wide soil concentration.

- = Screening criterion not available.

Laboratory data validation qualifier codes used for the "Maximum Concentration" are as follows:

J = Detected Concentration

NJ = Estimated Concentration

"-" = No listed value.

(a) MCP Method 1 S-1/GW-1 Standards, May 2014 (http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).
The value shown for MCP S-1/GW-1 standard for nitroglycerin is a calculated value using the provisional oral reference dose (1E-4 mg/kg-day) and the default exposure parameters of the S-1 direct contact standards.
MCP S-1/GW-1 standard for Tungsten is an Interim Risk-Based Soil Concentration developed by the MassDEP Office of Research and Standards (MassDEP, 2012)
MCP standards for Chromium VI conservatively used as a surrogate for Chromium, Total.
MCP standards for total-1,2-dichloroethyene based on the lower of cis-1,2-DCE or trans-1,2-DCE values.
MCP standards for Endosulfan used as a surrogate for alpha Endosulfan.
MCP standards for Endrin used as a surrogate for Endrin Ketone.
MCP standards for Chlordane used as a surrogate for alpha Chlordane.

(b) The USEPA Regional Screening Level (RSL), May, 2014. (http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm)
EPA MCL-Based SSL for Chromium used as the Risk-Based SSLs are specific to either Chromium III or Chromium VI.
EPA MCL-Based SSL for Lead used as there is no Risk-Based SSL for this compound.
EPA Risk-Based SSL for Nickel, soluable Salts used as a surrogate for Nickel.
EPA Risk-Based SSL for Thallium, Soluable Salts used as a surrogate for Thallium.
EPA Risk-Based SSL for Endosulfan used as a surrogate for alpha Endosulfan.
EPA Risk-based SSL for Endrin used as a surrogate for Endrin Ketone.
EPA Risk-based SSL for Chlordane used as a surrogate for alpha Chlordane.
EPA Risk-based SSL for cis-1,2-dichloroethylene used as a surrogate for Total Dichloroethylene.

(c) MassDEP Leaching-Based Soil Concentrations (GW-1) were not used as screening criteria, but for comparison purposes only. MCP Numerical Standards Development Spreadsheets, May 2014 (http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).

(d) J-3 Range is situated within the Buzzard's Bay Outwash. The outwash background values included the maximum of the 0-2 ft depth interval and were not used as screening criteria, but for comparison purposes only. Values listed for PAHs were obtained from MassDEP's Technical Update: Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil (MassDEP, 2002).

**Notes:**

Yellow highlighting indicates those soil criteria that were exceeded by the maximum detected site-wide soil concentration.

- = Screening criterion not available.

Laboratory data validation qualifier codes used for the "Maximum Concentration" are as follows:

J = Detected Concentration

NJ = Estimated Concentration

"-" = No listed value.

(a) MCP Method 1 S-1/GW-1 Standards, May 2014 (http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).
The value shown for MCP S-1/GW-1 standard for nitroglycerin is a calculated value using the provisional oral reference dose (1E-4 mg/kg-day) and the default exposure parameters of the S-1 direct contact standards.
The value shown for MCP S-1/GW-1 standard for 2,4,6-trinitrotoluene is a calculated value using the oral reference dose (5E-4 mg/kg-day) and the default exposure parameters of the S-1 direct contact standards.
MCP standards for Chromium VI conservatively used as a surrogate for Chromium, Total.
MCP standards for Endosulfan used as a surrogate for alpha Endosulfan.
MCP standards for Endrin used as a surrogate for Endrin Aldehyde and Endrin Ketone.
MCP standards for Chlordane used as a surrogate for gamma Chlordane.

(b) The USEPA Regional Screening Level (RSL), May, 2014. (http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm)
EPA MCL-Based SSL for Chromium used as the Risk-Based SSLs are specific to either Chromium III or Chromium VI.
EPA MCL-Based SSL for Lead used as there is no Risk-Based SSL for this compound.
EPA Risk-Based SSL for Nickel, soluable Salts used as a surrogate for Nickel.
EPA Risk-Based SSL for Thallium, Soluable Salts used as a surrogate for Thallium.
EPA Risk-Based SSL for Endosulfan used as a surrogate for alpha Endosulfan.
EPA Risk-based SSL for Endrin used as a surrogate for Endrin Aldehyde and Endrin Ketone.
EPA Risk-based SSL for Chlordane used as a surrogate for gamma Chlordane.
(http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).

(d) J-3 Range is situated within the Buzzard's Bay Outwash. The outwash background values included the maximum of the 0-2 ft depth interval and were not used as screening criteria, but for comparison purposes only. Values listed for PAHs were obtained from MassDEP's Technical Update: Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil (MassDEP, 2002).

*mg/Kg = milligram per Kilogram*

**TABLE 7-5**

**Notes:**
Yellow highlighting indicates those soil criteria that were exceeded by the maximum detected site-wide soil concentration.
- = Screening criterion not available.
Laboratory data validation qualifier codes used for the "Maximum Concentration" are as follows:
J = Detected Concentration
NJ = Estimated Concentration
"-" = No listed value.
(a) MCP Method 1 S-1/GW-1 Standards, May 2014 (http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).
MCP standards for Chromium VI conservatively used as a surrogate for Chromium, Total.
(b) The USEPA Regional Screening Level (RSL), May, 2014. (http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm)
EPA MCL-Based SSL for Chromium used as the Risk-Based SSLs are specific to either Chromium III or Chromium VI.
EPA MCL-Based SSL for Lead used as there is no Risk-Based SSL for this compound.
EPA Risk-Based SSL for Nickel, soluable Salts used as a surrogate for Nickel.
EPA Risk-Based SSL for Thallium, Soluable Salts used as a surrogate for Thallium.
(c) MassDEP Leaching-Based Soil Concentrations (GW-1) were not used as screening criteria, but for comparison purposes only. MCP Numerical Standards Development Spreadsheets, May 2014
(d) J-3 Range is situated within the Buzzard's Bay Outwash. The outwash background values included the maximum of the 0-2 ft depth interval and were not used as screening criteria, but for comparison purposes only. Values listed for PAHs were obtained from MassDEP's Technical Update: Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil (MassDEP, 2002).

**Notes:**

Yellow highlighting indicates those soil criteria that were exceeded by the maximum detected site-wide soil concentration.

- = Screening criterion not available.

Laboratory data validation qualifier codes used for the "Maximum Concentration" are as follows:

J = Detected Concentration

NJ = Estimated Concentration

"-" = No listed value.

(a) MCP Method 1 S-1/GW-1 Standards, May 2014 (http://www.mass.gov/eea/agencies/massdep/cleanup/regulations/site-cleanup-regulations-and-standards.html).
The value shown for MCP S-1/GW-1 standard for nitroglycerin is a calculated value using the provisional oral reference dose (1E-4 mg/kg-day) and the default exposure parameters of the S-1 direct contact standards.
The value shown for MCP S-1/GW-1 standard for 2,4,6-trinitrotoluene is a calculated value using the oral reference dose (5E-4 mg/kg-day) and the default exposure parameters of the S-1 direct contact standards.
MCP standards for Chromium VI conservatively used as a surrogate for Chromium, Total.

(b) The USEPA Regional Screening Level (RSL), May, 2014. (http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm)
EPA MCL-Based SSL for Chromium used as the Risk-Based SSLs are specific to either Chromium III or Chromium VI.
EPA MCL-Based SSL for Lead used as there is no Risk-Based SSL for this compound.
EPA Risk-Based SSL for Nickel, soluable Salts used as a surrogate for Nickel.
EPA Risk-Based SSL for Thallium, Soluable Salts used as a surrogate for Thallium.
EPA Risk-Based SSL for 2-Chloronaphthalene (beta-chloronaphthalene) use for Total Chloronaphthalene.

(c) MassDEP Leaching-Based Soil Concentrations (GW-1) were not used as screening criteria, but for comparison purposes only. MCP Numerical Standards Development Spreadsheets, May 2014

(d) J-3 Range is situated within the Buzzard's Bay Outwash. The outwash background values included the maximum of the 0-2 ft depth interval and were not used as screening criteria, but for comparison purposes only. Values listed for PAHs were obtained from MassDEP's Technical Update: Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil (MassDEP, 2002).

***mg/Kg = milligram per Kilogram***

**TABLE 10-1**
**J-3 Range Remedial Investigation/Feasability Study**
**Summary of Regulatory Considerations***

| AUTHORITY/TYPE | PROVISION | SYNOPSIS |
|---|---|---|
| Federal/Chemical Specific | SDWA MCLs, 40 CFR 141.61 – 141.63 | The EPA has promulgated SDWA MCLs (40 CFR 141-143) that are enforceable standards for public drinking water supplies. The standards protect drinking water quality by limiting the levels of specific contaminants that can adversely affect public health. |
| State/Chemical Specific | MA Drinking Water Regulations, 310 CMR 22.00 | These standards establish Massachusetts MCLs (MMCLs) for public drinking water systems (310 CMR 22.00 et seq.). |
| Federal/Action Specific | SDWA 47 FR 30282 Sole Source Aquifer | Pursuant to Section 1424(e) of the Safe Drinking Water Act, the EPA has determined that the Cape Cod aquifer is the sole or principal source of drinking water for Cape Cod, Massachusetts, and that the Cape Cod aquifer, if contaminated, would create a significant hazard to public health. |
| Federal/Chemical Specific | Drinking Water Health Advisories, published at http://www.epa.gov/ waterscience/criteria/drinking/ | These are exposure concentrations protective of adverse non-cancer effects for a given exposure period. The 1-day and 10-day HA are designed to protect a child; the lifetime HA is designed to protect an adult. |
| Federal/Chemical Specific | Drinking Water Equivalent Levels (DWELs), published at http://www.epa.gov/ waterscience/criteria/drinking/ | DWELs set forth lifetime exposure concentration values protective of adverse, non-cancer health effects, assuming that all of the exposure to a contaminant is from drinking water. |
| Federal/Chemical Specific | Human Health Reference Doses (RfDs), Reference Concentrations (RfCs), Cancer Slope Factors (CSFs), and $10^{-6}$ excess lifetime cancer risk level | These risk-based concentrations are considered together with site-specific exposure information to develop concentrations of residual contamination that will not endanger human health. |
| State/Chemical Specific | Massachusetts Contingency Plan, Method 1, GW-1 Groundwater Standards, 310 CMR 40.0974(2) Table 1 | These cleanup standards were developed by MassDEP considering a defined set of exposures considered to be a conservative estimate of the potential exposures at most sites. Groundwater at MMR is classified as GW-1. |
| State/Chemical Specific | Massachusetts Drinking Water Guidelines, in Standards and Guidelines for Chemicals in Massachusetts Drinking Waters (Spring 2009), available at http://www.mass.gov/dep/water/dwstand.pdf. | This document lists both promulgated Massachusetts MCLs and also MassDEP Office of Research and Standards guidelines for chemicals that do not have Massachusetts MCLs. Standards promulgated by EPA but not yet effective may be included on the Guidelines list. These values are derived based on a review and evaluation of all available data for the chemical of interest. |

**TABLE 10-1**
**J-3 Range Remedial Investigation/Feasability Study**
**Summary of Regulatory Considerations***

| AUTHORITY/TYPE | PROVISION | SYNOPSIS |
|---|---|---|
| State/Action Specific | Massachusetts Surface Water Quality Standards, 314 CMR 4.00 | These MassDEP standards prescribe the minimum water quality criteria required to sustain the designated uses of Massachusetts waters. The levels are designed to prevent all adverse health effects from ingestion, inhalation or dermal contact. |
| Federal/Action Specific | Subtitle C Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities, 40 CFR Part 264 | These requirements establish minimum national standards that define the acceptable management of hazardous waste. |
| State/Action Specific | MA Hazardous Waste Management Regulations (310 CMR 30.0000) | These requirements specify how a generator of solid waste must determine whether that waste is hazardous. If waste is determined to be hazardous, it must be managed in accordance with these requirements. |
| Federal/Action Specific | EPA Guidance on "Use of Monitored Natural Attenuation at Superfund, RCRA Corrective Action, and Underground Storage Tank Sites" (9200.4-17P) (Apr. 21, 1999) | This guidance describes EPA's policy regarding the use of monitored natural attenuation (MNA) for the cleanup of contaminated soil and groundwater. It provides guidance regarding necessary site-specific characterization data and analysis, a methodology for determining a reasonable timeframe for remediation, a preference for remediation of sources, appropriate performance monitoring and evaluation, and a preference for contingency remedies. |
| Federal/Action Specific | Resource Conservation and Recovery Act (RCRA) [40 CFR 261-262] | These regulations govern the identification and listing of hazardous waste under RCRA, and the requirements on generators of hazardous waste. |
| Federal/Action Specific | RCRA Land Disposal Restrictions [40 CFR 268] | These regulations restrict the disposal of any treatment wastes classified as hazardous waste. |
| State/Action Specific | Solid Waste Management Regulations (RCRA Subtitle D), 310 CMR 19.000 et seq. | If a waste is determined to be a solid waste, it must be managed in accordance with the state regulations at 310 CMR 19.000 et seq. |
| Federal/Action Specific | Hazardous Waste Operations and Emergency Response, 29 CFR 1910.120 | These regulations describe training, monitoring, planning, and other activities to protect the health of workers performing hazardous waste operations. |

**TABLE 10-1**
**J-3 Range Remedial Investigation/Feasability Study**
**Summary of Regulatory Considerations***

| AUTHORITY/TYPE | PROVISION | SYNOPSIS |
|---|---|---|
| Federal/Action Specific | Underground Injection Control Program [40 CFR 114, 144, 146, 147, 148, 1000] | Underground Injection Control Program regulations outline minimum program and performance standards for underground injection wells and prohibit any injection that may cause a violation of any primary drinking water regulation in the aquifer. Infiltration galleries and wells fall within the broad definition of Class V wells. These regulations are administered by the State. |
| State/Action Specific | MassDEP Stormwater Management Program Policy (Nov. 18, 1996) | Provides policies and guidance on complying with the state's stormwater discharge requirements. |
| Federal/Action Specific | National Environmental Policy Act, 42 U.S.C. 4321-4370f | "EPA believes that NGB is not required to follow NEPA procedures, as long as the NGB's actions are conducted in accordance with the administrative order, because of the provision in the CEQ regulations exempting enforcement actions from NEPA." (USEPA, 1 March 01) |
| Federal/Action Specific | CWA NDPES Stormwater Discharge Requirements, 40 CFR 122.26 | Establishes requirements for stormwater discharges associated with construction activities that result in a land disturbance of equal to or greater than one acre of land. The requirements include good construction management techniques; phasing of construction projects; minimal clearing; and sediment, erosion, structural, and vegetative controls to mitigate stormwater run-on and runoff. |
| State/Action Specific | Stormwater Discharge Requirements, 314 CMR 3.04 and 314 CMR 3.19 | Requires that stormwater discharges associated with construction activities be managed in accordance with the general permit conditions of 314 CMR 3.19 so as not to cause a violation of Massachusetts surface water quality standards in the receiving surface water body (including wetlands). |
| State/Chemical Specific | Massachusetts Air Pollution Control Regulations [310 CMR 6.00 – 7.00] | Construction activities could trigger Massachusetts Air Pollution Control Regulations (310 CMR 6.00 – 7.00). These regulations set emission limits necessary to attain ambient air quality standards for fugitive emissions, dust and particulates. |
| State/Action Specific, Chemical Specific | 310 CMR 40.0040 Construction and operation of a groundwater treatment plant | Regulations establish management procedures for remedial wastewater as well as the construction, installation, change, operation and maintenance of treatment works for Remedial Wastewater. Treatment works shall be inspected and the inspections documented. Treatment works shall be protected from vandalism and measures shall be taken to prevent system failure, contaminant pass through, interference, by-pass, upset, and other events likely to result in a discharge of oil and/or hazardous material to the environment. |

**TABLE 10-1**
**J-3 Range Remedial Investigation/Feasability Study**
**Summary of Regulatory Considerations***

| AUTHORITY/TYPE | PROVISION | SYNOPSIS |
|---|---|---|
| State/Action Specific, Chemical Specific | Discharge of Groundwater 310 CMR 40.0045 | Regulations restrict remedial wastewater discharge to the ground surface or subsurface and/or groundwater. Such a discharge should not erode or impair the functioning of the surficial and subsurface soils, infiltrate underground utilities, building interiors or subsurface structures, result in groundwater mounding within two feet of the ground surface, or result in flooding or breakout to the ground surface. The concentrations of all pollutants discharged must be below the Massachusetts Groundwater Quality Standards established by 314 CMR 6.0. The concentrations must also be below the applicable Reportable Concentrations established by 310 CMR 40.0300 and 40.1600. |
| State/Action Specific | Discharge of Groundwater 310 CMR 40.0300 and 310 CMR 40.1600 | The MCP contains special provisions for the discharge of groundwater containing very low levels of oil or hazardous material. Groundwater containing oil and/or hazardous material in concentrations less than the applicable release notification threshold established by 310 CMR 40.0300 and 40.1600, can be discharged to the ground subsurface and/or groundwater only when following appropriate guidelines. |
| State/Action Specific | Groundwater Discharge Regulations [314 CMR 5.00] | Recharge of effluent from some treatment works requires a permit under Groundwater Discharge Regulations at 314 CMR 5.00 unless the exemption allowing for actions taken in compliance with MGL C. 21E and regulations at 40 CMR 40.00 applies. The effluent discharged must not exceed any Massachusetts Groundwater Quality Standards and effluent limitations in 314 CMR 5.10(3). For previous projects on MMR, the MassDEP has determined that effluent from any constructed treatment system is “conditionally exempt” from obtaining the permit provided that the applicable or relevant provisions of the MCP 310 CMR 40.0000 are complied with. |
| State/Action Specific | MassDEP Drinking Water Program, Private Well Guidelines (2008), available at http://www.mass.gov/dep/water/laws/prwellgd.pdf | These are guidelines concerning private well location, design, construction, development, water quality testing, operation, maintenance, and decommissioning. |
| State/Action Specific | Underground Injection Control [310 CMR 27.00] | These regulations prohibit injection of fluid containing any pollutant into underground sources of drinking water where such pollutant will, or is likely to, cause a violation of any state drinking water standard or adversely affect the health of persons. |

**TABLE 10-1**
**J-3 Range Remedial Investigation/Feasability Study**
**Summary of Regulatory Considerations***

| AUTHORITY/TYPE | PROVISION | SYNOPSIS |
|---|---|---|
| State/Action Specific | STATE - MA Erosion and Sediment Control Guidelines for Urban and Suburban Areas (May 2003), available at http://www.mass.gov/dep/water/essec1.pdf | Provides guidance and best management practices regarding erosion and sediment control. |
| Federal/Action Specific | Archaeological Resources Protection Act, 16 U.S.C. §§ 470aa-ll, 43 CFR Part 7; Native American Graves Protection and Repatriation Act, 25 U.S.C. §§ 3001-3013, 43 CFR Part 10, National Historic Preservation Act, 16 U.S.C. §§ 470 et seq., 36 CFR Part 800; Massachusetts Historic Preservation Act, MGL ch. 9 §§ 26-27C; MGL ch. 7, § 38A; MGL ch. 38, §§ 6B-6C; 950 CMR 70-71. | These statutes and regulations provide for the protection of historical, archaeological, and Native American burial sites, artifacts, and objects that might be lost as a result of a federal construction project. |
| State/Action Specific | Massachusetts Endangered Species Act. | The Massachusetts Endangered Species Act provides that impacts to state-listed endangered or threatened species, or species of special concern or their habitats from actions are to be avoided, minimized, and/or mitigated. |

*Regulations that EPA will either consider or require, as appropriate, in selecting and defining the remedial action as specified in the final decision document.

| | | New Well #3 | 40 | | | | | | | | | | | | | | | |

Year when complete cleanup occurs.

Year when cleanup other than low K areas occurs.

Notes
1. Cleanup timeframes based on contaminant transport modeling animations according to site achieving concentrations below: 2 ppb for Perchlorate; 0.6 ppb for RDX
2. Extraction well shut off year corresponds to first year when extraction well influent concentration decreases below method detection limit (perchlorate = 0.35 ug/L and RDX = 0.25 ug/L).
