

US EPA ARCHIVE DOCUMENT

A horizontal number line representing distance in feet. It has tick marks at 0, 150, 300, and 600. The word "Feet" is written below the line.

## — Roads

**Lyman Mill Surface (0-1 ft ) Borings**  
**Dioxin TEQ Concentration (NG/KG)**

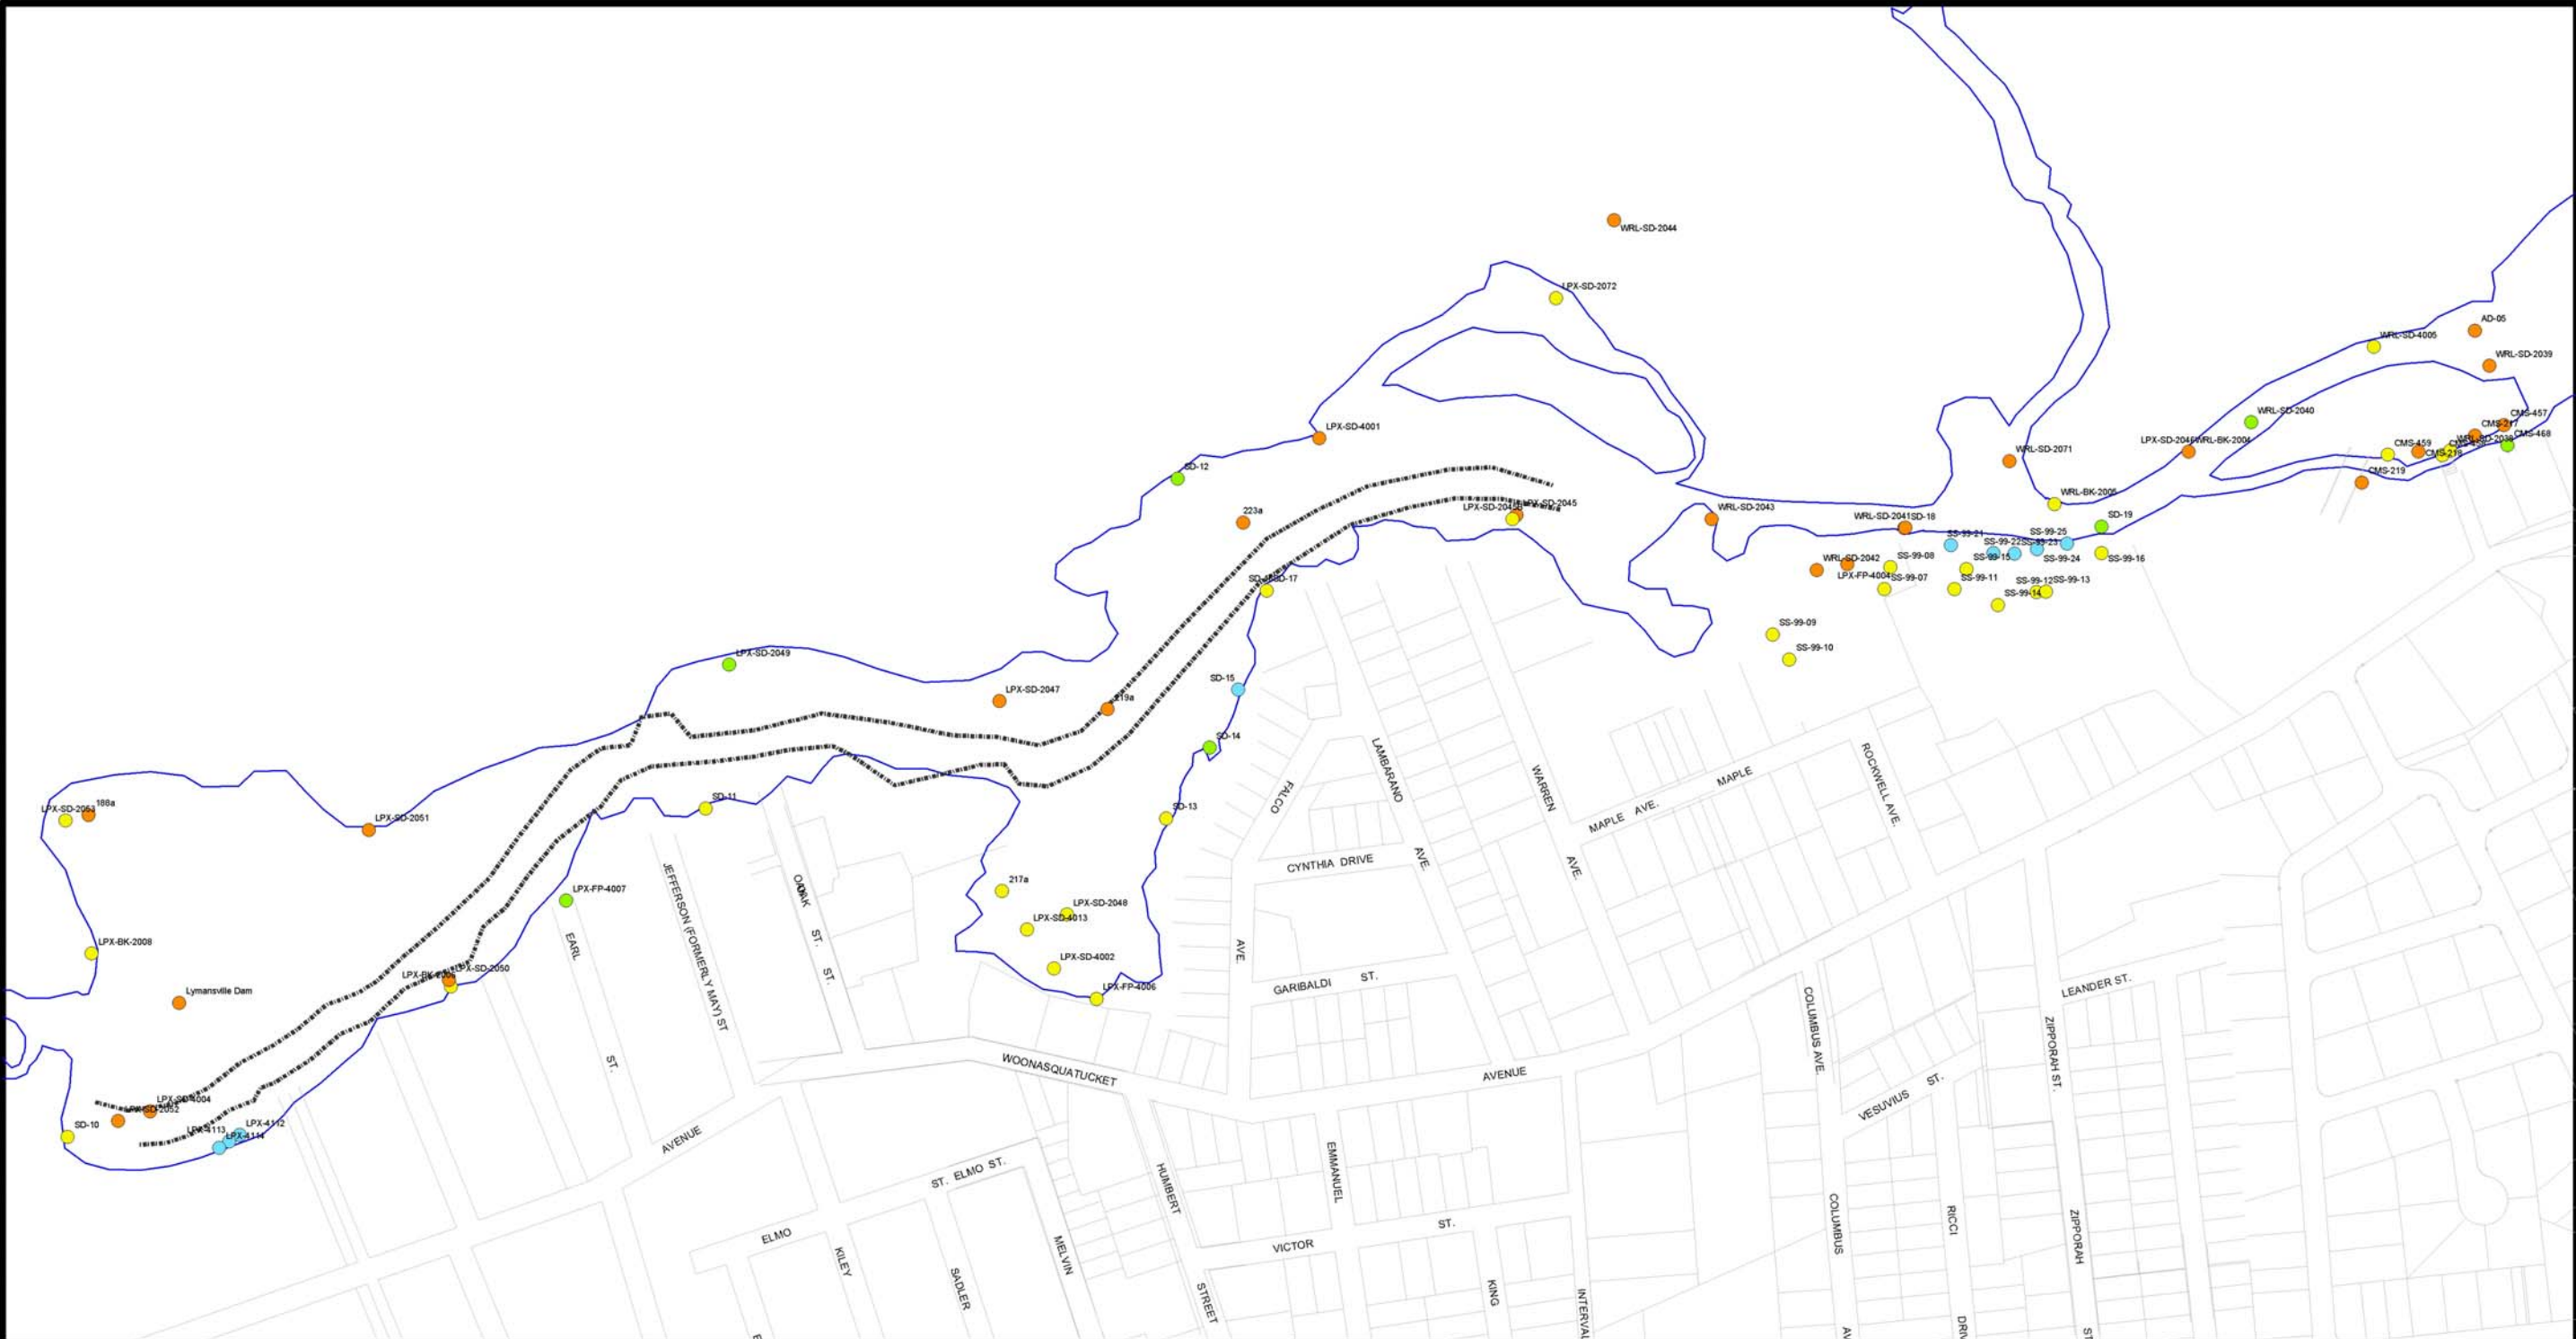

- Note: Average concentration reported when more than one sample included in depth interval

Projection: Rhode Island State Plane (NAD 83 Feet)

**Figure 6. Lyman Mill surface (0-1 ft) borings**

|  |  |                                                                                   |                                                                                                                                                                                                                                                                    |  |                                                                                                                                          |
