Date 8/3/04

Management Action Committee (MAC) Meeting
August 3, 2004
Centredale Manor Restoration Project
North Providence, Rhode Island

Attendees:

- Angela Bonarrigo, USEPA
- Lou Maccarone, RIDEM
- Eugenia Marks, Audubon Society of Rhode Island
- Jenny Pereira, Woonasquatucket River Watershed Council
- Jane Sherman, Woonasquatucket River Watershed Council
- David Scotti, LEA

Agenda

- Technical Update
- Community Outreach
- Other Items

Note: Angela Bonarrigo, USEPA, chaired the meeting. The prior meeting was held on June 1, 2004. No MAC meeting was held in July 2004.

Technical Update

David Scotti provided general information on the planned grouting work to be performed on Allendale Dam in the coming weeks. A discussion ensued regarding the operation of the stop logs and gate structure and the elevation of Allendale Pond. The potential for sediment entrainment and downstream transport during the release of water from upstream reservoirs was also discussed along with the protocol that RIDEM has established with regard to notifications for the release of water from upstream reservoirs. The need to reaffirm this protocol and to remind everyone of the notification requirements was also discussed.

Outreach

Angela Bonarrigo noted that the CSTAG had submitted a draft memo to Anna Krasko. Angela further noted that Anna had some comments for CSTAG to address in the final

report. It was noted that the CSTAG memo and EPA's responses to the memo will be made available to the public.

Angela informed the committee that the Human Health Risk Assessment (HHRA) will soon be in the Site repositories. Angela told the group that she would have Anna Krasko scan the document onto CD ROMs for the MAC members. EPA is still working on the HHRA Fact Sheet.

It was requested that EPA provide an updated schedule for the RI/FS activities at the September MAC meeting.

Other Items

Angela Bonarrigo mentioned that an informational flyer was being distributed after the meeting to notify abutting property owners of the release of water from Allendale Pond to allow the planned work to be performed on Allendale Dam. It was noted that a press release would follow.

The next MAC meeting is tentatively scheduled for Tuesday, September 7, 2004, and the following meeting is tentatively scheduled for Tuesday, October 5, 2004.
