This message has been forwarded.

Dear Anna Krasko,

I enjoyed the meeting. Plans look promising. I writing to you not in comments yet but to inform you of a possible tunnel that I heard of when I was about 6 years old at school. I don't know if it's just a story that was told. I called a neighbor today to ask if he'd head of a tunnel. He said no. The tunnel if there is one should be running from the river bank toward what was St. Lawrence Church currently Grace Community Church. The " tunnel " could have ran from George Street, Redfirn Street or Groover Street or in the area. Please remember it could be just a story that was told. Just passing it to you.

It's hard to believe EPA truly has to plans better the this area.

Please do not forget the residence living also the future life of the people in both communities that live near the river. Living under guide lines of an OLD INDUSTRIAL ZONING is a menace. I truly feel we have lost our freedom to enjoy life and The American Dream livng here. My family members awaken every day hoping the wind blows in our favor. If not, the Johnston Asphalt Company will not gas us all day, part of the day or on and off all day. We did count on Sundays as a day free of odors but that has change due to Johnston Landfill burying.

Sincerely,

Nancy Bolduc
