Re: Supplemental Request for Information Pursuant to Section 104 of  
CERCLA in relation to the former Whitney Barrel Company at the  
Wells G&H Superfund Site in Woburn, Massachusetts

Dear Ms. Bosworth:

On behalf of Olin Corporation, I am pleased to enclose Olin's response to EPA's 104(e) Supplemental Request for Information dated August 16, 2005, pertaining to Whitney Barrel Company. Olin submits this supplemental response in accordance with Section 104(e) of CERCLA, 42 U.S.C. § 9604(e), as amended, and Section 3007 of RCRA, 42 U.S.C. § 6927, and in accordance with the extension of time as confirmed in a letter dated September 16, 2005, from Laurie Burt to Martha Bosworth (attached).

Please do not hesitate to call me if you have any questions.

Very truly yours,

Laurie Burt

cc: Curtis M. Richards (by mail, w/enclosure)

Re: Section 104(e) Supplemental Request for Information in relation to the former Whitney Barrel Company at the Wells G&H Superfund Site in Woburn, Massachusetts

Dear Martha:

This is to confirm that, pursuant to our telephone conversation yesterday, you have agreed to a thirty day extension of time within which Olin Corporation may respond to the above-referenced Supplemental Request for Information, from September 21, 2005, to October 21, 2005. As I explained, the questions posed in the Supplemental Request require Olin to review a substantial amount of material recalled from storage in order to determine if any of the materials are responsive.

If you have any questions, please contact me or my associate, Karen Crocker, at 617-832-3081. Again, thank you for your cooperation in this matter.

Very truly yours,

  
Laurie Burt

**RESPONSE TO SUPPLEMENTAL 104(e) INFORMATION REQUEST  
WHITNEY BARREL**

**PRELIMINARY STATEMENT**

In a Request for Information (the "Request") attached to a letter dated December 15, 2003, the Environmental Protection Agency, EPA New England ("EPA"), asked Olin Corporation ("Olin") to provide certain information and documents in connection with EPA's investigation of releases or threatened releases at the Whitney Barrel Company, 256 Salem Street, Woburn, Massachusetts, ("Whitney Barrel") situated within the Wells G&H Superfund Site in Woburn, Massachusetts, hereinafter referred to as the "Site." Specifically, EPA requested information and documents explaining Olin's relationship to Whitney Barrel. On March 15, 2004, Olin responded to EPA's information request (the "2004 Response").

In a letter dated August 16, 2005, the EPA asked Olin to provide additional information regarding certain matters included in the 2004 Response (the "Supplemental Request"), and information regarding some additional matters not raised in the Request. Olin submits this supplemental response in accordance with Section 104(e) of CERCLA, 42 U.S.C. § 9604(e), as amended, and Section 3007 of RCRA, 42 U.S.C. § 6927, and in accordance with the extension of time as confirmed in a letter dated September 16, 2005, from Laurie Burt to Martha Bosworth.

Upon receipt of EPA's Supplemental Request, Olin undertook a diligent investigation (the "investigation") to identify information or documents responsive to the Supplemental Request. In accordance with the instructions set forth in the Supplemental Request, the investigation was limited to the facility located at 51 Eames Street in Wilmington, Massachusetts (the "Wilmington facility"), which is the only Olin facility located during the relevant period within a 25 mile radius of the Whitney Barrel facility of which Olin is presently aware.

In preparing this response, Olin reviewed the indexes of some 900 boxes of documents related to operations at this location. Boxes of material identified as potentially containing responsive information were reviewed for responsive documents. Olin also contacted employees believed to have relevant information. Olin reserves the right to supplement its response to the Supplemental Request, as appropriate, if such information is made available.

US EPA ARCHIVE DOCUMENT

During this investigation, Olin located additional documents responsive to its 2004 Response. These documents are not responsive to the Supplemental Request. Olin provides these documents, attached hereto as **Exhibit L**, as a supplement to its 2004 Response.

This response is not made on the basis of personal knowledge unless otherwise indicated and was prepared by or with the assistance of agents, representatives and employees of Olin Corporation or others believed to have relevant information, and on the advice of counsel, which advice was relied upon herein. The answers set forth herein, subject to inadvertent or undiscovered errors or omissions, are based on and therefore necessarily limited by the records and information still in existence, currently recollected, thus far discovered in the course of the preparation of this response, and currently available to the undersigned.

If, upon review of this response to the Supplemental Request, EPA requires additional information and documents, please contact Curtis M. Richards of Olin at the address listed in the letterhead. Based on its investigation and subject to the foregoing understandings and reservations, Olin makes the following response to the Supplemental Request.

### **SPECIFIC RESPONSES TO SUPPLEMENTAL INFORMATION REQUEST**

#### **Information Concerning Olin's Waste Disposal and Facility Closure Activities**

- 1. In your 104(e) response you stated that Olin disposed of 193 barrels of material between 1981 and 1982 which were left at the Wilmington facility by the prior owner. Please identify all of the waste carriers, companies, and/or facilities used to dispose of these barrels.*

Response to Question 1: On information and belief, the "193 barrels" to which Olin referred in the 2004 Response were sent for disposal to CECOS International, Inc. and Rollins Environmental Services (NJ) Inc.

CECOS International, Inc.  
56<sup>th</sup> & Pine Avenue  
Niagara Falls, New York 14303

Rollins Environmental Services (NJ) Inc.  
Route 322 West  
P.O. Box 221  
Bridgeport, NJ 08014

2. For each company, please provide:
- The dates of each pickup and delivery;
  - The number of containers;
  - The type(s) of containers;
  - The size(s) of the containers;
  - The condition of each container;

Response to Question 2(a-e): Olin refers to the documents previously provided in the 2004 Response at **Exhibit I**, and the additional documents provided herein at **Exhibit AA** and **BB**.

- The original and any subsequently added contents (i.e., bulk raw material storage, finished product packaging, and/or waste storage), including but not limited to empty barrel residues, of each container including:
  - The name of each material;
  - The chemical composition of each material;
  - The physical state of each material (e.g., solid, sludge, liquid);
  - The volume of each material; and

Response to Question 2(f)(i - iv): Olin refers to the documents contained in **Exhibit BB** attached hereto.

- All documentation or additional information related to these transactions.

Response to Question 2(g): Documents regarding these transactions were included in the 2004 Response at **Exhibit I**. For additional documents regarding the disposition of these barrels, please see **Exhibits AA** and **BB** attached hereto.

3. According to facility closure plan documents provided with your 104(e) response, Respondent hired a contractor to provide disposal of four process tanks to a scrap dealer in 1986. According to the agreement between Olin and the Contractor, "all of the methods of disposal and disposal sites [were] subject to Olin's approval." For each of these tanks, please identify the contractor(s), scrap dealer(s), and disposal location(s) used.

Response to Question 3: On information and belief, the "four process tanks" referred to in the facility closure plan documents were not disposed of in 1986. They were disposed of in 1987 or 1988, after the period being investigated.

## Information Concerning Respondent's Association with E. C. Whitney & Son

1. *In your 104(e) response, you provided invoices documenting transactions with E. C. Whitney that reference "empty drums," "triple-rinsed empty drums," "mixed empty drums," "triple wash empty steel drum[s]," and "regular empty steel drums." Please describe the difference between each of these types of drums, including the processes used for each drum type.*

Response to Question 1: With the exception of the documents at **Exhibit CC** attached hereto, Olin has been unable to locate any specific information on the types of drums and processes to which this item of the Supplemental Request refers.

2. *In your 104(e) response you stated that, pursuant to RCRA regulations, all drums were required to be "thoroughly clean before being transported off-site." Please describe the procedures you employed to "thoroughly clean" all the drums you sold or otherwise sent/delivered off-site for recycling and/or disposal. Please describe how you disposed of any emptied materials and/or rinse water from these drums.*

Response to Question 2: Olin refers to its response to Question 1. Based on the current information known to Olin, it appears that rinse water from drum cleaning was likely discharged to the on-site waste water treatment facility. Treated waste water was likely discharged to the MDC sewer system pursuant to an Industrial Wastewater permit.

3. *Documentation regarding shipment of drums to E. C. Whitney was included in your 104(e) response. For each transaction, please provide:*
  - a. *The dates of each pickup and delivery;*
  - b. *The type(s) of containers;*
  - c. *The size(s) of the containers;*
  - d. *The condition of each container;*
  - e. *The original and any subsequently added contents (i.e., bulk raw material storage, finished product packaging, and/or waste storage), including but not limited to empty barrel residues, of each container including:*
    - i. *the name of each material;*
    - ii. *the chemical composition of each material;*
    - iii. *the physical state of each material (e.g., solid, sludge, liquid);*
    - iv. *the volume of each material;*

Response to Question 3(a-e): Olin refers to the documents contained in the 2004 Response at **Exhibit I**, and **Exhibit DD** attached hereto.

- f. *A description of the process Respondent used to empty, rinse, and/or clean the containers prior to pickup/delivery;*

Response to Question 3(f): Olin refers to its responses to Questions 1 and 2.

- g. *A description of how Respondent disposed of any emptied materials and/or rinse water; and*

Response to Question 3(g): Olin refers to its response to Question 2.

- h. *Any documentation or additional information regarding these transactions.*

Response to Question 3(h): Documents regarding the shipment of drums to E. C. Whitney were included in the 2004 Response at **Exhibit I**. For additional documents regarding the shipment of these drums, please see **Exhibit DD** attached hereto.

**Information Concerning Respondent's Association with any other Drum Reconditioning and/or Recycling Companies**

1. *State whether you sent/delivered containers to any other drum reconditioning/recycling company, including but not limited to, Kingston Steel Drum/Great Lakes Container Corporation (now known as Mallinckrodt, Inc.), Kingsland Drum Company, Roche Brothers Barrel & Drum Co., Roy Brothers, Inc., Ryan Barrel Company, Inc., and Woburn Barrel.*

Response to Question 1: Olin has not located information indicating that it sent or delivered containers from its Wilmington facility to any other drum reconditioning/recycling company, including but not limited to, Kingston Steel Drum/Great Lakes Container Corporation (now known as Mallinckrodt, Inc.), Kingsland Drum Company, Roche Brothers Barrel & Drum Co., Roy Brothers, Inc., Ryan Barrel Company, Inc., and Woburn Barrel.

2. *For each company identified above, please provide:*
- a. *The full name of each company or individual;*
  - b. *The full address for each company or individual;*
  - c. *How frequently you sent/delivered tanks to each company;*
  - d. *The time period during which tanks were sent/delivered;*
  - e. *The original and any subsequently added contents (i.e., bulk raw material storage, finished product packaging, and/or waste storage), including but not limited to empty barrel residues, of each container including:*
    - i. *the name of each material;*
    - ii. *the chemical composition of each material;*
    - iii. *the physical state of each material (e.g., solid, sludge, liquid);*
    - iv. *the volume of each material;*
  - f. *A description of the process Respondent used to empty, rinse, and/or clean the containers prior to pickup/delivery;*
  - g. *A description of how Respondent disposed of any emptied materials and/or rinse water; and*
  - h. *Any documentation or additional information regarding these transactions.*

Response to Question 2: Not applicable.

### **Compliance with this Request**

Note: All questions in this section refer to the present time unless otherwise indicated.

1. *Describe all sources reviewed or consulted in responding to this request and all individuals who have any knowledge of, or information about, the subject matter of any of the foregoing questions, including but not limited to:*
  - a. *the name of each individual;*
  - b. *the current job title and job description of each individual;*
  - c. *the job title and job description during the period being investigated of each individual;*
  - d. *whether each individual is a current or past employee of Respondent;*
  - e. *a description of the types of information the individual possesses (i.e., specific information on company operations, wastes generated, and/or waste disposal practices);*

Response to Question 1(a-e): Individuals consulted in responding to this request and individuals who have any knowledge of, or information about, the subject matter of any of the foregoing questions include but are not limited to

- Steve Morrow, Principal Environmental Specialist (1986-present), Olin Corporation, Charleston TN, general information concerning generation and disposal of wastes and environmental compliance;
- Allan Peirce, On-Site Manager (1996-present), Olin Corporation (51 Eames Street Facility), general information concerning generation and disposal of wastes and environmental compliance from 1996 to present;
- Don Cameron (former employee), maintenance (1980-86), On-Site Manager (1986-2000), Olin Corporation (51 Eames Street facility), general facility operations, maintenance and environmental compliance from 1980 to 1986;
- Don Knight (former employee), Treatment Plant Operator during period being investigated, Olin Corporation (51 Eames Street facility), operation of wastewater treatment plant and drum washing;
- June Plumer (former employee), Purchasing Agent during period being investigated, Olin Corporation (51 Eames Street facility), purchasing, contracts with vendors;
- Terry Printich (former employee), Administrative Assistant during period being investigated, Olin Corporation (51 Eames Street facility), purchasing, contracts with vendors;
- Lorraine Miller, Principal Environmental Specialist (present, employed as a chemist by Olin between 1973 and 1986), Olin Corporation, Charleston TN, 423/336-4500, corporate records retention;

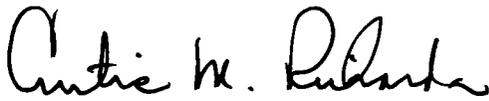

- David R. Vaughn (former employee), Associate Environmental Affairs Specialist and Regional Manager during period being investigated, Olin Corporation, Charleston TN, facility environmental compliance;
- Carl Nelson (former employee), Environmental Specialist during period being investigated, Olin Corporation, Charleston TN, facility environmental compliance;
- James C. Brown, Director of Environmental Remediation (2004-present), Process Engineer and Manager of Environmental Technology during period being investigated, Olin Corporation, Charleston TN, facility environmental compliance;
- Jack W. O'Grady, II (former employee), Senior Environmental Affairs Specialist during period being investigated, Olin Corporation, Charleston TN, facility environmental compliance;
- Ronald J. McBrien (former employee), Plant Manager during period being investigated, Olin Corporation (51 Eames Street facility), general facility operations;
- James F. Martucci (former employee), Production Engineer, Production Area Supervisor and Production Manager during period being investigated, Olin Corporation (51 Eames Street facility), general information on manufacturing processes; and
- M. D. Townley (former employee), Production Manager during period being investigated, Olin Corporation (51 Eames Street facility), general information on manufacturing processes.

*[This space intentionally left blank]*

- f. the names of all divisions or offices of Respondent for which records were reviewed;*
- g. the nature of all documents reviewed;*
- h. the locations where those documents reviewed were kept prior to review;*  
*and*
- i. the location where those documents reviewed are currently kept.*

Response to Question 1(f-i): Olin reviewed documents and information concerning the 51 Eames Street site in Wilmington, Massachusetts. Sources reviewed or consulted in responding to this request include but are not limited to records in Olin's corporate records archives, its Law Department, and its Environmental Remediation Group records center. The nature of the documents reviewed includes but was not limited to contracts, waste disposal records, and facility documents. Prior to review, these documents were stored in commercial records storage facilities. The reviewed records are currently either in the custody of Olin Corporation or have been returned to commercial records storage.

Signed this 19th day of October, 2005

Curtis M. Richards  
Vice President, Environment, Health & Safety

FROM Jim Martucci  
SUBJECT Disposal of Empty Drums

AT Wilmington  
AT Wilmington

DATE October 14, 1983  
COPY TO R. McBrien, M. Townley  
D. Court

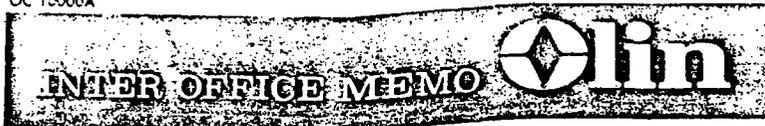

E.C. Whitney will be picking up our empty drums in the near future. These drums for the time being are to be crushed and then sold as scrap metal. It is imperative that no more than 1" of material be present in the drums when they leave the plant. It is preferred that the drums be completely empty if possible. All possible action should be taken to make sure that this procedure is followed.

TO File AT DATE  
FROM M.D. Townley AT Wilmington COPY TO  
SUBJECT STANDARD OPERATING PROCEDURE - EMPTY PCl3 DRUMS WASHING

I. Preparation

1. The following personal protective equipment is required for washing empty PCl<sub>3</sub> drums, in addition to the normally required safety equipment (safety shoes, glasses, hard hat, escape respirator):
  - a. Full face respirator
  - b. Rubber boots
  - c. Rubber gloves
2. Other tools required are:
  - a. Bung wrench
  - b. Channel lock pliers
  - c. pH papers
3. The general purpose scrubber fan and pump should be on. The slide valve should be open to the hood. IF Plant A is not operating, the slide valve in the duct to Plant A should be closed. Check to see that there is an air flow into the hood. Also check the pH, which should be at least 8.
4. Drums to be washed should be brought up from behind Plant D. Every drum should be checked by "feel" to see if there is any liquid PCl<sub>3</sub>, or any PCl<sub>3</sub> sludge, remaining in the bottom of the drum, and visually inspected for holes or other unusual conditions. All drums with liquid or sludge left should be placed in the pile of PCl<sub>3</sub> drums to be emptied. No drum should be taken to the wash area unless it is obviously a standard PCl<sub>3</sub> drum and is empty. These special drums will be handled in the presence of a supervisor and are not covered by this SOP.
5. Place the drum washing warning signs in the door to Plant A and in the yard in front of the G P Scrubber.

II Washing Drums

1. Loosen and remove both the bungs on the drum before placing it under the hood. The full face respirator must be worn while removing bungs.  
Note: There is often some pressure in drum which will relieve when the first bung is loosened.
2. Place drum under the hood, with a block under one side to aid in tipping the drum. Insert the hose into the large bung. The full face respirator must be worn when inserting the hose.  
Note: There should be no water dripping from the hose when it is inserted into the drum small amounts of water may cause violent reaction in the drum.

WHY FILE THIS COPY? IF YOU MUST RETAIN IT, SPECIFY A DEFINITE RETENTION PERIOD: ONE YEAR \_\_\_\_\_ OTHER \_\_\_\_\_

Mr. David R. Vaughn  
Olin Chemicals Group  
120 Long Ridge Road  
Stamford, CT 06904

Dear Mr. Vaughn:

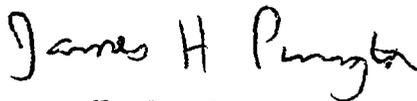

Enclosed is a carbon copy of our manifest MA 13994-1 dated March 5, 1981 listing Olin Chemical as the generator. The manifest is signed by our driver, Keith Russell, and receiver, Edward K. Parsons. We have retained our "Transportation" copy for our records.

According to our records, the "Generator State" copy was returned to the Massachusetts DEQE approximately March 9, 1981

Enclosed also is an unnumbered blank manifest for your information.

Very truly yours,

RECYCLING INDUSTRIES INC.

OLIN/WILMINGTON  
JUL 21 1982  
PURCHASING

TO OUR CUSTOMERS:

With the continuing pressure on the economy, every company must maximize their efforts to improve their performance. With this in mind, Recycling Industries would like to point out several areas where customers may realize significant savings in disposal of their hazardous wastes.

1. Solids and Sludges - While it is normally most cost effective to ship drums of pumpable liquids to our Braintree facility for recovery, treatment or incineration, drums of solids and sludges can often be handled most economically by segregating them for direct shipment to secure chemical landfills which SCA operates in Model City, NY and Pinewood, SC. A new cell - SLF#10 - will be operational at Model City in July 1982.

Regulatory agencies in both states require approval of individual waste product records for each waste material from each customer. Drums must also be prepared by the customer to comply with landfill regulations regarding void space, free liquids, flash point, etc. However, savings can be dramatic - as much as 50% on full truckload (80 drum) quantities and even cost beneficial for direct shipments of 40 drum quantities or less (for generators with limited storage space). The enclosed price sheet will permit a comparison for individual products.

If you feel that this program may be of interest to you, our Technical Sales Representative would be pleased to discuss it with you and assist you in completing the waste product forms and obtaining approvals.

2. PCB Liquids and Capacitors - SCA has negotiated very favorable prices at all three EPA-licensed commercial incinerators for destruction of PCB liquids and/or capacitors. Recycling Industries is also completing installation of bulk storage tanks in our PCB storage area in Braintree, which will minimize storage, transportation and disposal costs for drums or less than full truckloads of bulk PCB liquids. We also are equipped to drain, flush and dispose of PCB transformers. Draining and flushing can be accomplished either at the customer's plant or at our facility, depending on available working space, shipping weights and other considerations.

Our Technical Sales Representative can provide you with additional details.

SLUDGES AND SOLIDS - COMPARATIVE PRICING SCHEDULE

JULY 1982

The following prices may be used to estimate savings available if direct shipments of solids and sludges are scheduled.

<u>MATERIAL</u>	<u>SPECIFICATIONS</u>	<u>SHIPPED TO BRAINTREE</u>	<u>SHIPPED TO LANDFILL DISPOSAL FACILITY</u>
Asbestos	Wetted and bagged inside fiber or steel drum.	\$60.00/drum plus \$5.00/drum transportation.	\$40.00/drum with transportation included.
Solids & Sludges approved at SCA Chemical Services, Model City, NY	Solid: non-pourable at ambient temperature. Less than 2" void space. Example: metal and solvent contaminated solids, paint waste, coating residues, resins.	\$80.00/drum plus \$5.00/drum transportation.	\$40.00/drum plus \$1,075.00/load.
Solids & Sludges approved at SCA Chemical Services, Pinewood, SC	Semi-Solids acceptable. Example: same as above.	\$94.00/drum plus \$5.00/drum transportation.	\$36.00-\$40.00/drum plus \$1,750.00/load.

## NOTES:

- "Braintree" transportation prices are approximate and subject to minimum charges of \$50.00 or more depending on distance from Braintree.
- "Landfill disposal facility" transportation prices assume shipment from eastern Massachusetts. Other rates may vary.
- All prices are subject to individual product evaluation and quotation.

EXAMPLE: An 80 drum shipment of solid metal hydroxide treatment sludge would incur the following costs:

	<u>TO BRAINTREE</u>	<u>TO MODEL CITY</u>
Disposal:	80 drums x \$80.00/drum = \$6,400.00	80 drums x \$40.00/drum = \$3,200.00
Transportation:	80 drums x \$5.00/drum = \$400.00	Per shipment \$1,075.00
Total	\$6,800.00	\$4,275.00
Savings		\$2,525.00 (37%)

Shipment of 40 drums to Model City would result in savings of \$725.00.

To take advantage of these savings, please contact your sales representative.

51 Eames Street  
Wilmington, MA 01887

RE: P.O. ECF 152259

Attention: Mr. Muhammad Ahsan

Gentlemen:

A drum of small PCB capacitors was shipped from Olin on February 25, 1981 on manifest MA-13901. The drum was stored at Braintree within a diked area for one day, and was shipped to the CECOS secure land-fill in Williamsburg, Ohio via Price Trucking on the same manifest. The CECOS work order was 27439.

A copy of manifest 13901 showing delivery at CECOS will be forwarded to you shortly.

Very truly yours,

RECYCLING INDUSTRIES, INC.

RE: P.O. ECF 152259

Attention: Mr. Muhammad Ahsan

Gentlemen:

Attached is a copy of manifest MA-13901 signed by Bob Kurt of CECOS in Williamsburg, Ohio on February 28, 1981.

We appreciate being of service to you.

Very truly yours,

RECYCLING INDUSTRIES, INC.

A handwritten signature in dark ink that reads "James H. Purington". The signature is written in a cursive style with a large initial "J".
