<u>OIL OBSERVED</u>	EXTENT OF OIL IMPACTED AREA	NA		
	DENSITY OF OIL /SHEEN	NA		
Total Collection Points	NA			
Total Boom Deployed	NA			
Activity	<p><u>START SOTF Team 4 Activity:</u></p> <p>SOTF#4 Kristen Hendrix (START), Enbridge Team Lead Dave Richardson, Enbridge Team Lead Kelly Lemke, and Leica operator Matt Stebbins performed a poling reconnaissance of 10 focus areas from MP 18.15 to 18.95. A total of 18 locations were surveyed for sediment temperature, above sediment temperature, and surface water temperature. Three locations were checked twice, once in the morning and once in the afternoon to document temperature change.</p> <p>In the first round of temperature monitoring, 1 location of the 18 met the temperature requirements of above 60 degrees F at all three temperature locations. Subsequent locations in that focus area did not meet the temperature requirements, therefore no poling occurred.</p> <p>2 of the 3 locations that were checked twice met the temperature requirements. Sediment temperatures at these locations showed an average increase of 1.87 degrees from morning to afternoon.</p>
