<u>OIL OBSERVED</u>	EXTENT OF OIL IMPACTED AREA	NA		
	DENSITY OF OIL /SHEEN	NA		
Total Collection Points	NA			
Total Boom Deployed	NA			
Activity	<p><u>START SOTF Team 4 Activity:</u></p> <p>SOTF#6 Kevin Johnson (START), Enbridge Team Lead Mike Reed, and Leica operator Amber McDougal performed poling at 57 locations in focus areas 4.15, 4.25, 4.90, 5.25 and 5.35. A total of 2 locations had an overall submerged oil category of heavy, 14 locations had an overall submerged oil category of moderate, and 41 locations had an overall submerged oil category of light. Generally, more moderate and light oil sheen was observed and less globs in the majority of locations reassessed.</p> <p>All but one location SOTF #6 visited registered above the temperature requirement of 60 degrees F. Location 4.15S-F-09A indicated a sediment temperature of 59.9 degrees F and was not reassessed. The remainder of observed temperatures ranged from 60.2 to 71.4 degrees F.</p> <p>Poling operations were not significantly impacted by weather or vegetation within focus areas. Shallow river conditions and vegetation did however impede boat navigation in focus area MP 4.15. SOTF#6 was unable to navigate to 3 locations (4.15S-F-09B, 4.15S-F-09C, and 4.15S-F-09D) due to shallow water river conditions and were not reassessed.</p>			

Health and Safety Issues	None
