<u>OIL OBSERVED</u>	EXTENT OF OIL IMPACTED AREA	NA		
	DENSITY OF OIL /SHEEN	NA		
Total Collection Points	NA			
Total Boom Deployed	NA			
Activity	<p><u>START SOTF Team 6 Activity:</u></p> <p>SOTF#6 Kevin Johnson (START), Enbridge Team Lead Mike Reed, and Leica operator Amber McDougal performed poling at 74 locations within focus area 37.75 (west end of river delta). A total of 12 locations had an overall submerged oil category of heavy, 16 locations had an overall submerged oil category of moderate, and 42 locations had an overall submerged oil category of light. Four locations indicated no signs of submerged oil.</p> <p>Generally, more light oil sheen was observed along areas of sand substrate with more moderate and heavy oil sheen, with corresponding globs up to 1cm, identified in locations having soft and silt based substrate.</p> <p>All locations SOTF #6 visited registered above the minimum temperature requirement of 60 degrees F. Observed temperatures ranged from 63.7 to 71.8 degrees F.</p> <p>Poling operations were not significantly impacted by weather or vegetation within focus areas. Shallow river conditions and vegetation did however impede boat navigation to a limited degree. SOTF#6 was able to successfully navigate to all tasked poling reassessment locations.</p>			

Health and Safety Issues	None
