Activity Area		HBP, MP 27.02, 27.12, 27.20, 27.28, 27.30, 27.43, 27.50, 27.55, 27.56		LAT	LAT
				Various	Various
				(DD.MMMM)	(DD.MMMM)
<u>OIL OBSERVED</u>		<u>EXTENT OF OIL IMPACTED AREA</u>			
		<u>DENSITY OF OIL /SHEEN</u>			
Total Collection Points		N/A			
Total Boom Deployed		N/A			
Activity		<p><u>Weston/START Submerged Oil Branch Task Force Group (SOTF) Team Activity:</u></p> <p>Weather conditions: Overcast 52 degrees F, light to moderate rain. SOTF-10=Team J consist of Timothy Laquerre (USEPA START), Carl Schultz (Tetra Tech Lead), Chad Khodl (Superior).</p> <p>The objective was to poll areas in locations ranging from MP 27.00 to MP 29.50.</p> <p>Average water temperature: 57 degrees F Average sediment temperature: 59 degrees F</p> <p>Light sheen was identified in areas 27.02T, 27.50SE, 27.50NW and 27.30N. Heavy and moderate sheen and globs (5-20) were identified in area 27.55 and 27.50SE. No sheen or globs were identified in areas 27.30S and 27.50SE.</p>			
Health and Safety Issues		<p>Note: Due to the low water conditions, team members are required to leave the boat to access polling areas and to assist boats around obstacles. The water conditions when walking through the river becomes murky, limiting the visual inspection of the walkers line of sight. Slip, Trip and Fall hazards are constant in these situations from debris, fallen trees, tires and the changing soil matrix of the river bed. In addition the velocity of current changes depending on area of the river. This reference is in regards to walking in water at mid thigh to waist level deep.</p>
