<u>OIL OBSERVED</u>	EXTENT OF OIL IMPACTED AREA	NA		
	DENSITY OF OIL /SHEEN	NA		
Total Collection Points	NA			
Total Boom Deployed	NA			
Activity	<p><u>START SOTF Team #1Activity:</u> SOTF # 1 conducted oversight of Enbridge’s Team A poling re-assessment activities. Team A members Mike Neal Poling leader, Ted Reckers GPS/Leica operator. Team A conducted Target Bathymetry Location data collection; 27 points were recorded in the GPS/Leica instrument including water level at those locations. Data is downloaded into the hydrodynamic model.</p> <p>Team A conducted poling sediment agitation at several focus areas: 13.25N 7 point recorded, 2 with moderate sheen, 4 with light 1 point inaccessible due to deep muck. 13.38T 1 point recorded with no visible contamination. 13.45T 1 point recorded with light sheen. 13.52T 6 points recorded, 2 points with moderate sheen, 1 with light sheen and 2 with no visible contamination including delineation point Oil drops still visible in this area. 13.60N 5 points recorded, 3 points with light sheen, 2 points with no visible contamination. 13.62T 2 points recorded, no visible contamination. 13.60S 3 points recorded, 1 with light sheen, 2 with no visible contamination. 13.59T 1 point recorded with no visible contamination. 13.50L1 18 points recorded, 6 points with moderate sheen, 4 points with light sheen, 7 points with no visible contamination and 1 point located in exposed mud flat no agitation.</p>			

	Temperature readings in the sediment and at water level were above 60 degrees Fahrenheit. Areas poled today consisted mostly of sand and gravel with relatively fast flow; however areas with the most visible oil sheen and globules had soft sediment accumulation.
Health and Safety Issues	None
