Team A conducted Target Bathymetry Location data collection; 34 points were recorded in the GPS/Leica instrument including water level at those locations. Data is downloaded into the hydrodynamic model.</p> <p>Team A conducted poling sediment agitation at several focus areas: 10.5L2 3 points recorded, 2 with light sheen, 1 point with no visible contamination.</p> <p>10.50N 3 points recorded 2 with light sheen, 1 point with no visible contamination.</p> <p>10.65T 5 points recorded, 1 point with moderate sheen, 1 point with light and 3 points with no visible contamination.</p> <p>10.89T 9 points recorded, 1 point with moderate sheen, 6 with light sheen and 2 with no visible contamination including delineation point Oil drops still visible in this area.</p> <p>11.20S 3 points recorded, 3 points with no visible contamination.</p> <p>11.25L1 7 points recorded, 2 points with moderate sheen, 1 with light sheen and 4 with no visible contamination.</p>
