

US EPA ARCHIVE DOCUMENT

1. Incident Name		2. Date Prepared		3. Time Prepared		UNIT LOG ICS 214		
Kalamazoo River/Enbridge Spill		06/08/2012		1800				
4. Unit Name/Designators			5. Unit Leader			6. Operational Period :		
SOTF Team #1			Name: Dan Capone & Joe Victory (START/US EPA)			From:		06/08/2012 0800
			Position: Operations Section Chief			To:		06/08/2012 1800
7. Personnel Roster Assigned								
<u>Name</u>			<u>ICS Position</u>			<u>DUTY CELL</u>		
Dan Capone			Operations Section Chief					
Joe Victory			Operations Section Chief					
Dan Zahner			Field Team Lead					
Jose Aguilera			SOTF#1					
8. Activity Log								
Activity Area		MP20.60-26.80				LAT		LAT
						Various		Various
						(DD.MMMM)		(DD.MMMM)
<u>OIL OBSERVED</u>		EXTENT OF OIL IMPACTED AREA		NA				
		DENSITY OF OIL /SHEEN		NA				
Total Collection Points		NA						
Total Boom Deployed		NA						
Activity		<p><u>START SOTF Team #1Activity:</u> SOTF # 1 conducted oversight of Enbridge’s Team A poling re-assessment activities. Team A conducted poling sediment agitation at several focus areas: 22.40NA 7 points recorded 1 with moderate sheen, 4 with light and 2 with no visible contamination, 22.75N 12 points recorded, 2 with moderate sheen, 2 with light sheen and 8 with no visible contamination 22.88T 4 1 point recorded with no visible contamination. 22.15S 3 points recorded, 1 with light sheen and 2 with no visible contamination. 21.55S 2 points recorded, 1 with light sheen and 1with no visible contamination. 23.00S 3 points recorded with no visible contamination, points were collected at an offset due to original points located in exposed mudflats due to low water levels. 23.54T 1 point recorded with moderate sheen at a 40ft offset from original point. 23.69T 1 point recorded with no visible contamination. 23.97T 1 point recorded 1 with light sheen at a 40ft offset 24.65S 15 points recorded, 4 with moderate sheen, 5 with light sheen and 6 with no visible contamination, several points taken at an offset due to low water levels. 24.82T 4 points recorded, 2 with light sheen and 2 with no visible contamination. . 24.97T 3 points recorded, with no visible contamination. 25.05T 2 points recorded with light sheen. 25.18T 2 points recorded with no visible contamination.</p>						

	Temperature readings in the sediment and at water level were above 60 degrees Fahrenheit. Areas poled today consisted mostly of sand and gravel with relatively fast flow; however areas with the most visible oil sheen and globules had soft sediment accumulation.
Health and Safety Issues	None
Comments	Points taken at an offset are per instructions from poling team leaders and GIS personnel. If point is locate on dry land or inaccessible areas and water line is less than 25ft. teams are to replace point; if more than 25ft. teams are to add a new point to the next sequential number.
