<b>Total Boom Deployed</b>	NA			
<b>Activity</b>	<b><u>START SOTF Team #1Activity:</u></b>  SOTF # 1 conducted oversight of Enbridge's Team A poling re-assessment activities. Team A attended field group Ring Test training for overbank locations according to SOP.  Team A recorded 2 points at 25.41LDB 1 with light sheen and few globules documented as flecks, and 1 point with no visible contamination. Multiple teams attended the training session and were given the opportunity to practice the process. Training was lead by Mr. Dave Richardson of Tetra Tech.			
<b>Health and Safety Issues</b>	None			
<b>Comments</b>	For the ring test, leader explain to group that a minimum of 6 inches of water is required or reach that minimum as close as possible due to the possibility of water leaking out. Areas where there is heavy contamination need to be delineated.
