<b>8. Activity Log</b>					
<b>Activity Area</b>	HBP, MP 27.58RDB-H-10			<b>LAT</b>	<b>LAT</b>
				<b>Various</b>	<b>Various</b>
				(DD.MMMM)	(DD.MMMM)
<b><u>OIL OBSERVED</u></b>	<b>EXTENT OF OIL IMPACTED AREA</b>				
	<b>DENSITY OF OIL /SHEEN</b>				
<b>Total Collection Points</b>	N/A				
<b>Total Boom Deployed</b>	N/A				
<b>Activity</b>	<p><b><u>Weston/START Submerged Oil Branch Task Force Group (SOTF) Team Activity:</u></b></p> <p><b>Weather conditions: Overcast 82 degrees F, Clear, Sunny</b>  <b>SOTF-08=Team H consist of Timothy Laquerre (USEPA START), Roy Wagner (Tetra Tech Lead), Russel Johnson (AECOM), Steve Pilcher (Tetra Tech) and Tom Levis (SET).</b></p> <p><b>The objective was to be trained on a “ring” test in the dry “strike” areas to determine the potential for the presence of oil. Post training, the strike teams were to continue their normal efforts.</b></p> <p><b>Average water temperature: 70.3 degrees F</b>  <b>Average sediment temperature: 66 degrees F</b></p> <p><b>Moderate sheen and globs (1-20) were identified in areas 27.58RDB-H-10.</b></p>				
<b>Health and Safety Issues</b>	<p>PFD’s were required by the group leader on the ring testing. As teams were entering into the areas to perform the ring test, many persons complained of the heat caused by the exertion of the walk through the heavy vegetated areas carrying multiple odd shaped equipment. Enbridge safety arrived to the site and clarified the wearing of the PFD’s to the group leader and those wearing the devices.</p>
