<u>OIL OBSERVED</u>	EXTENT OF OIL IMPACTED AREA	NA		
	DENSITY OF OIL /SHEEN	NA		
Total Collection Points	NA			
Total Boom Deployed	NA			
Activity	<u>START SOTF Team #1Activity:</u> SOS # 1 provided support to USGS representative Tim Hansen at various bridge access points. Mr. Hansen utilizes a Stream Probe mounted on floats equipped with GPS instrumentation and electronic data collector. Areas visited today included Main St., Beadle Lake Rd., Burnham St., Bedford Rd., Custer Rd., East Michigan Ave./Augusta, E. Michigan Ave. near MP34.0 bridges. Mr. Hansen utilizes a rope to guide the probe from bank to bank multiple times at the downstream side of the bridge and data logger electronically records information. Bedford Rd. and East Michigan Ave. bridges were not completed due to shallow water and bed rocks and unable to maneuver vessel around them. According to Mr. Hansen he usually utilizes a kayak in these types of conditions and team leaders were made aware of this option and will re-group tomorrow to assess the possibility of utilizing kayak.			
Health and Safety Issues	None
