Dan Capone		Operations Section Chief			
Joe Victory		Operations Section Chief			
Rex Johnson		Director			
Dan Zahner		Field Team Lead / CBM Team #3			
8. Activity Log					
Activity Area	Ceresco			LAT	LAT
				Various	Various
				(DD.MMMM)	(DD.MMMM)
<u>OIL OBSERVED</u>	<u>EXTENT OF OIL IMPACTED AREA</u>				
	<u>DENSITY OF OIL /SHEEN</u>				
Total Collection Points	NA				
Total Boom Deployed	None				
Activity	<p><u>Weston/START Containment Branch Monitoring Group (CBM-3) Team Activity:</u></p> <p>Ceresco Dam</p> <ul style="list-style-type: none"> • Heavy sheen observed across the width of the channel by the dam in the morning prior to any boat activity. • Installed 800 ft of hard boom from the north shore on an Enbridge property to the corner of Ceresco Dam on the south side. • After installation heavy sheen was observed downstream of the boom at the corner near the Dam. After approximately 45 minutes the amount has lessened to about half of what it was prior. It appeared that water being forced beneath the boom was scouring the bottom sediments causing oil and sheen to rise to the surface. It was determined that no additional measures would be put in but the situation would be monitored. 				
Health and Safety Issues					
Comments	Work activity is logged in logbook CBM3.
