						Various		Various
						(DD.MMMM)		(DD.MMMM)
<u>OIL OBSERVED</u>		EXTENT OF OIL IMPACTED AREA		NA				
		DENSITY OF OIL /SHEEN		NA				
Total Collection Points		NA						
Total Boom Deployed		NA						
Activity		<p><u>START SOTF Team #1Activity:</u></p> <p>SOS # 1 conducted oversight of Water Velocity Profile Team. Team utilized a YUMA/GPS instrument to navigate to specific points; utilizing a digital hand held flow meter with a propeller as speed indicator to record water velocity at the specified point. Team then proceeds to measure the river channel's width and record only the water depth at 10ft. intervals. According to team leader Mr. Luke Hodges the instructions given were to identify water depth at the specified point, multiply the measure by 0.6 and utilize the resulting depth from bottom to top and record the water velocity and remain at the point for 40 seconds. These steps were followed at each transect a/o point; the readings were recorded in the YUMA instrument data collector.</p>
