1. Incident Name	2. Date Prepared	3. Time Prepared	UNIT LOG ICS 214	
Kalamazoo River/Enbridge Spill	9/07/2012	1835		
4. Unit Name/Designators	5. Unit Leader		6. Operational Period :	
Containment Branch Recovery Team 1	Name:	Dan Capone & Joe Victory (START/US EPA)	From:	9/07/2012 0700
	Position:	Operations Section Chief	To:	9/07/2012 1835
7. Personnel Roster Assigned				
<u>Name</u>		<u>ICS Position</u>	<u>DUTY CELL</u>	
Dan Capone		Operations Section Chief		
Joe Victory		Operations Section Chief		
Rex Johnson		Containment Branch Director		
Dan Zahner		Field Team Lead		
Marc Wahrer		CBR-1		
8. Activity Log				
Activity Area	Potential sediment trap area at MP 33.00A		LAT	LAT
			Various	Various
			(DD.MMMM)	(DD.MMMM)
<u>OIL OBSERVED</u>	EXTENT OF OIL IMPACTED AREA			
	DENSITY OF OIL /SHEEN			
Total Collection Points				
Total Boom Deployed				
Activity	<p><u>Weston/START CBR 1 Team Activity:</u></p> <ul style="list-style-type: none"> Oversaw Enbridge Field Team including Eric Celebreeze (AECOM), Ted Reckers (AECOM), Adam, Zack and Jeremy (boat drivers) for poling at potential new sediment trap locations. They used a Yuma for the gps and used a OMEGA HH41 temperature probe. <p>MP 33.00A sediment trap</p> <ul style="list-style-type: none"> Completed poling along 8 transects at this sediment trap location. They poled at approximately 25 foot intervals on the long transects and at approximately 10 foot intervals on the shorter transects. Two additional transects were not completed as they were in the area where the sediment had water just at the surface or jut below and was basically soup. They did not conduct poling along those two short transects (across the backchannel). All temperatures were above 60 except at one location the sediment was 59.77 (possible upwelling of spring water). They completed the poling activities at this sediment trap. The results for today from the poling were 22 none, 47 light, 2 moderate, 0 heavy. 			

Health and Safety Issues	
Comments	Field notes are in CBR-1 Logbook
