1.0 Introduction

This monthly progress report for the period of December 1 through and including December 31, 2012 is submitted to the United States Environmental Protection Agency (U.S. EPA) and to the Michigan Department of Environmental Quality (MDEQ) to satisfy reporting requirements for each agency as defined below describing activities completed during the prior month.

Paragraph 18 of the U.S. EPA *Removal Administrative Order Under Section 311(c) of the Clean Water Act* (CWA), issued on July 27, 2010 to Enbridge Energy Partners, L.P., Docket Number: CWA 1321-5-10-001 (U.S. EPA Order) as modified by Paragraph 6 of the Supplement to Order for Compliance Under Section 311(c) of the CWA, issued by U.S. EPA Region 5 on September 23, 2010 to Enbridge Energy Partners, L.P. *et al*., Respondents, Docket No: CWA 1321-5-10-001 (Supplemental Order) (U.S. EPA, 2010) requires monthly progress reports to be submitted to the U.S. EPA commencing on December 27, 2010 and continuing monthly thereafter (Supplemental Order, Paragraph 6(o)).

Paragraph 7.9 of the Administrative Consent Order and Partial Settlement Agreement entered *In the Matter of Enbridge Energy Partners, L.P., and Enbridge Energy, Limited Partnership,* proceedings under the Michigan Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, MCL 324.101 et seq. signed on November 1, 2010 (MDEQ, 2010) (MDEQ Order) requires Enbridge Energy, Limited Partnership (Enbridge) to submit to the MDEQ, formerly Michigan Department of Natural Resources and Environment, written progress reports on the 27th day of each month.

Following this introduction, *Section 2* of this report is arranged by activity, for example 'Surface Water and Sediment Monitoring Activities'. In each subsection, the subject area work is introduced and an update of progress made in the previous month is described, including field activities performed, analyses completed, and reports submitted. Each section also summarizes future work planned. Conclusions are presented in *Section 3* and references are provided for each section in *Section 4.* Planning resources, including daily summaries of completed work referred to as *Incident Command System* (ICS) *214, Incident Action Plans* (IAPs), and work orders are provided as *Appendix A.*

Laboratory analytical reports of samples that were collected and received in December 2012 can be found in *Appendix B*. Laboratory analytical reports received in December 2012 for samples collected prior to December 2012 (but not previously submitted in the monthly report) can be found in *Appendix C*. All laboratory analytical results received for samples collected in December 2012 and received in January 2013 will be submitted with the January 2013 monthly progress report.

During December 2012, no work plans or procedures were approved.

Level 1 reviews of laboratory analytical results are included in *Appendix D*.

Waste manifests and bills of lading received in December 2012 are included in *Appendix E*.

2a.0 Surface Water and Sediment Monitoring Activities

2a.1 Introduction

In December 2012, monthly surface water and quarterly sediment monitoring activities were conducted per the *Addendum to the Sampling and Analysis Plan (SAP): Attachment C - Surface Water and Sediment Monitoring Supplement to the Sampling and Analysis Plan,* approved by MDEQ on May 18, 2012 (Enbridge, 2012). Surface water sampling activities were completed at 18 routine monitoring locations to assess the quality of the surface water in the Kalamazoo River and Morrow Lake. In addition, sediment samples were collected at three routine monitoring locations to assess the quality of the sediment in the Kalamazoo River and Morrow Lake.

2a.2 Work Completed

2a.2.1 Surface Water Monitoring

In December 2012, 18 surface water samples were collected from 9 locations in the Kalamazoo River (between the Talmadge Creek confluence and Morrow Lake), 8 locations within Morrow Lake, and 1 location in the Kalamazoo River immediately downstream of the Morrow Lake Dam. The results of the laboratory analyses of the 18 samples (plus 1 duplicate) were compared to Michigan *Rule 57 Water Quality Standards* (MDEQ, 2011). There were no analytical results that exceeded these standards.

Sample locations are shown in *Figure 2a-1*. Surface water sample location identification number, location description, and latitude and longitude coordinates in decimal degrees for the surface water monitoring locations are provided in *Table 2a-1*.

Location ID	Location Description	Latitude	Longitude
ML-1	Morrow Lake	42.279011	-85.458466
SW-935	Morrow Lake	42.278255	-85.472069
ML-7	Morrow Lake	42.281063	-85.480469
ML-10	Morrow Lake	42.276375	-85.478920
SWKR3840C02	Morrow Lake	42.274991	-85.464724
SW-936	Morrow Lake	42.276611	-85.453972
SW-937	Morrow Lake	42.281200	-85.486115
SW-112	Downstream of Morrow Lake Dam	42.283659	-85.498262
SWKR3980C01	Morrow Lake Dam	42.282665	-85.491508
SW-105	15 Mile Bridge	42.258250	-84.998184
SW-115	Fort Custer State Park	42.324341	-85.358049

SWKR1948C01	MP 19.4	42.343617	-85.243147
SW-110	35th Street Bridge, Galesburg	42.280206	-85.429028

Table 2a-1. Surface Water Monitoring Locations-Kalamazoo River and Morrow Lake

2a.2.2 Sediment Monitoring

Sediment sampling consisted of collecting samples from two locations in the Kalamazoo River (between the Talmadge Creek confluence and Morrow Lake) and one location within Morrow Lake. The sample location identification, location description, and latitude and longitude coordinates in decimal degrees for these sediment monitoring locations are provided in *Table 2a-2*. *Figure 2a*-2 showsthese sample locations and any exceedances of U.S. EPA Region 5 Ecological Screening Levels (ESLs) 2003 (U.S. EPA, 2003) or Threshold Effects Concentration (TEC) Guidelines (MacDonald et al., 2000), both of which are included as appendices to the Remediation and Redevelopment Division (RRD) *Operational Memorandum No. 4, Attachment* (MDEQ, 2006.

Location ID	Location Description	Latitude	Longitude
SWKR0600C01	MP 6.0, Operations and Maintenance (O&M) Control Point	42.270887	-85.063948
SWKR1565C01	MP 15.5, O&M Control Point	42.312748	-85.184869
SW-937	Morrow Lake	42.281200	-85.486115

Table 2a-2. Sediment Monitoring Locations

A total of three sediment samples (plus one duplicate) were collected from three monitoring locations during December 2012 and compared to U.S. EPA Region 5 ESL 2003 (U.S. EPA, 2003), and to TEC Guidelines (MacDonald et al., 2000). The sediment samples collected from two monitoring locations (SWKR1565C01 and SW-937) had laboratory analytical results that exceeded criteria.

The following constituents were detected above the ESL in the sediment sample collected from monitoring location SWKR1565C01:

- Benzo(a)anthracene,
- Benzo(a)pyrene,
- Benzo(g,h,i)perylene,
- Chrysene,
- Fluoranthene,
- Indeno(1,2,3-c,d)pyrene, and
- Pyrene.

Also, the following constituents were detected above the TEC in the above sediment sample:

- Benzo(a)anthracene,
- Benzo(a)pyrene,
- Benzo(b)flouranthene,
- Benzo(g,h,i)perylene,
- Chrysene,
- Fluoranthene,
- Indeno(1,2,3-c,d)pyrene, and
- Pyrene.

The following constituents were detected above the ESL in the sediment sample collected from monitoring location SW-937:

- Benzo(a)pyrene,
- Benzo(k)fluoranthene,
- Chrysene,
- Fluoranthene, and
- Pyrene.

Also, the following constituents were detected above the TEC in the above sediment sample:

- Benzo(a)pyrene,
- Benzo(b)flouranthene,
- Benzo(k)flouranthene,
- Chrysene,
- Fluoranthene, and
- Pyrene.

The following constituents were detected above the ESL in the duplicate sample collected from monitoring location SW-937:

- Benzo(a)pyrene,
- Chrysene,
- Fluoranthene, and
- Pyrene.

Also, the following constituents were detected above the TEC in the duplicate sample:

- Benzo(a)pyrene,
- Benzo(b)flouranthene,
- Chrysene,
- Fluoranthene, and
- Pyrene.

2a.3 Work Planned

2a.3.1 Surface Water Monitoring

The next monthly surface water monitoring event for the Kalamazoo River and Morrow Lake is scheduled for the week of January 14, 2013 per the *Addendum to the Sampling and Analysis Plan (SAP): Attachment C - Surface Water and Sediment Monitoring Supplement to the Sampling and Analysis Plan*, approved by MDEQ on May 18, 2012 (Enbridge, 2012).

2a.3.2 Sediment Monitoring

Sediment monitoring for the Kalamazoo River and Morrow Lake is conducted quarterly according to the *Addendum to the Sampling and Analysis Plan (SAP): Attachment C - Surface Water and Sediment Monitoring Supplement to the Sampling and Analysis Plan*, approved by MDEQ on May 18, 2012 (Enbridge, 2012). The next sampling event is tentatively scheduled for the week of March 11, 2013.

2b.0 Water Quality Monitoring Activities

2b.1 Introduction

The Water Quality Monitoring Program was initiated in July 2011 in response to concerns about the potential risk to fish populations related to low dissolved oxygen levels. This monitoring program was implemented in accordance with the *Water Quality Measurement Standard Operating Procedure* (Enbridge, 2011), approved by MDEQ on September 22, 2011.

2b.2 Work Completed

No water quality monitoring was conducted in December 2012.

2b.3 Work Planned

No water quality monitoring is planned for January 2013. Water quality monitoring requirements will be evaluated and water quality monitoring will be continued as appropriate.

2c.0 Potable Water Monitoring Activities

2c.1 Introduction

In December 2012, there were 79 potable well samples collected. Potable water monitoring activities are conducted in accordance with the *Addendum to the Sampling Analysis Plan (SAP): Attachment B Drinking Water Well Supplement to the Sampling and Analysis Plan*, approved by MDEQ on May 18, 2012 (Enbridge, 2012(1)). An amended sampling plan for wells not sampled on a quarterly basis, the *Request for Reduction of the Drinking Water Monitoring Program* submitted to the MDEQ October 10, 2012 (Enbridge 2012(2)), is currently under review by the MDEQ.

Groundwater samples were collected and analyzed in December 2012 from five monitoring wells at the Village of Augusta and five monitoring wells at the City of Kalamazoo Wellfield #39. Samples were collected in accordance with the *Augusta Monitoring Well Installation Work Plan* (Enbridge, 2011(1)) and the *Kalamazoo Monitoring Well Installation Work Plan* (Enbridge, 2011(2)).

2c.2 Work Completed

2c.2.1 Residential Potable Drinking Water Wells

During December 2012, there were 79 potable well samples collected.

Wells eligible for sampling fall into four categories: winterized, not accessible, refused permission, and yes. 'Yes' denotes the wells are being sampled at the quarterly frequency. Wells designated as 'winterized', 'not accessible', or 'refused permission' are eligible under the program but they are not currently being sampled.

The eligibility status of two wells was changed from 'yes' to 'winterized' during December 2012.

Multiple sampling events have been completed at the 167 residential wells included in the Drinking Water Monitoring Program. The results and eligibility status for all eligible wells through January 4, 2013 are summarized on *Tables 2c-1* through *2c-4* (See Attached)) and *Figure 2c-1*. Tables include updates on well locations, access status, sampling data, and

landowner letters. The potable well locations, eligibility status, and constituent detections are also summarized on *Figure 2c-1*.

2c.2.2 Groundwater Monitoring

Groundwater sampling from the five monitoring wells at the Village of Augusta Municipal Wellfield and the five monitoring wells at the City of Kalamazoo Wellfield #39 was conducted during December 2012.

2c.3 Work Planned

2c.3.1 Residential Drinking Water Wells

Residential drinking water sampling is planned to be conducted during March 2013 per the *Addendum to the Sampling Analysis Plan (SAP): Attachment B Drinking Water Well Supplement to the Sampling and Analysis Plan*, approved by MDEQ on May 18, 2012 (Enbridge, 2012).

2c.3.2 Groundwater Monitoring

A letter report for the December 2012 monitoring well sampling at the Village of Augusta Wellfield, will be prepared and submitted to the Village of Augusta, the Village of Augusta Chief of Police Jeff Heppler, and a courtesy copy will also be provided to MDEQ in January 2013.

A letter report for the December 2012 monitoring well sampling at the City of Kalamazoo Wellfield #39, will be prepared and submitted to the City of Kalamazoo and a courtesy copy will also be provided to MDEQ in January 2013.

The next groundwater sampling event for the five monitoring wells at the City of Kalamazoo Wellfield #39 is tentatively scheduled to be conducted during the week of March 18, 2013. There is currently no plan to continue groundwater monitoring at the five monitoring wells at the Village of Augusta Municipal Wellfield.

2d.0 Air Sampling and Monitoring Activities

2d.1 Introduction

Air sampling and monitoring activities are performed in 'community' and 'work areas' in accordance with the *Air Monitoring and Sampling Addendum to the Sampling and Analysis Plan* (Enbridge, 2012(1)). The term 'community' includes all individuals living or working near areas potentially impacted by the Enbridge Line 6B crude oil release or from subsequent release response actions. 'Work areas' are those sites where workers are engaged in oil recovery activities. During December 2012, there were no air monitoring or sampling activities conducted.

The purpose of air monitoring and sampling activities is to assess community exposures to target analytes and worker exposure to chemicals of potential concern (COPCs). Target analytes are those volatile organic compounds (VOCs) associated with the Line 6B crude oil release and measured by modified U.S. EPA Method TO-15 laboratory analysis. All other VOCs reported from the TO-15 method are referred to as non-target analytes. COPCs are a subset of the 'target analytes' that include:

- Benzene,
- Toluene,
- Ethylbenzene,
- Xylenes, and
- N-hexane.

2d.2 Work Completed

During December 2012, there were no submittals presented to the U.S. EPA for review. No air monitoring or sampling activities were conducted in December 2012.

2d.2.1 Community Air Monitoring

No community air monitoring was conducted during December 2012.

2d.2.2 Community Air Sampling

No community air sampling was conducted during December 2012.

2d.2.3 Work Area Air Monitoring

No work area air monitoring was conducted during December 2012.

Air monitoring activities were suspended on September 5, 2012 based on verbal approval of *Request for Modification of the Air Monitoring and Sampling Addendum to the Sampling and Analysis Plan* (Enbridge, 2012(2)), followed by a formal approval by U.S. EPA on September 10, 2012 as documented by *Approval of Temporary Suspension of Air Monitoring and Odor Response Activities* (U.S. EPA, 2012).

2d.2.4 Odor Response

In response to the release, Enbridge established a hotline number that remains available throughout the response activities for the public to communicate their concerns to Enbridge. As work activities were initiated, the public was encouraged to use the hotline to report any perceived odor issues related to these activities. The most recent odor complaint received on this hotline was in October 2011. There were no calls regarding odor issues that required air sampling or monitoring efforts in December 2012.

2d.3 Work Planned

As documented in *Section 2d.2.3*, air monitoring and sampling activities have been suspended per the approved *Request for Modification of the Air Monitoring and Sampling Addendum to the Sampling and Analysis Plan* (Enbridge, 2012(2)). Specifically, air monitoring and odor response activities are suspended; however, upon resumption of any active oil recovery activities and/or at any other time as directed by the U.S. EPA, air monitoring will be resumed as outlined in *Approval of Temporary Suspension of Air Monitoring and Odor Response Activities* (U.S. EPA, 2012).

2e.0 Submerged Oil Assessment and Recovery Activities

2e.1 Introduction

During December 2012, submerged oil assessment activities included bathymetry measurements along the former E 4.0 boom and curtain locations, poling monitoring on Morrow Lake, Morrow Lake Delta, and downstream of the Morrow Lake Dam, and logging and sampling of cores from the agitation evaluation study.

No submerged oil recovery field activities were conducted during December 2012.

2e.2 Work Completed

2e.2.1 Poling

Poling activities were conducted at fixed locations on Morrow Lake including the Sediment Fan and Morrow Lake Delta from December 3 through and including December 6, 2012. Beginning with this round of poling, 5 of the locations were shifted and 4 new locations were added for a total of 69 poling locations. One round of poling (Round 27) was completed at 68 of the 69 pre-determined poling locations on Morrow Lake including the Sediment Fan. The poling category results were classified as 4 'moderate', 34 'light', and 30 'none' locations. There were no 'heavy' locations identified. The four 'moderate' locations were identified in the eastern portion of the lake. The poling locations and associated results are shown on *Figure 2e-1*.

One round (Round 11) of poling was conducted during December 2012 on the Morrow Lake Delta including the neck between the Morrow Lake Delta and Morrow Lake. A total of 67 pre-selected locations were poled. The results of poling conducted during this round showed 10 'moderate', 34 'light', and 23 'none' locations. There were no 'heavy' locations identified. The poling locations and associated results are shown on *Figure 2e-2.*

In addition, poling was conducted downstream of Morrow Lake Dam from December 10 through and including December 13, 2012. Poling data was collected from a total of 96 locations. Due to regulations set forth by the Federal Energy Regulatory Commission, which states that public access is not permitted within 300 feet on the upstream or downstream side of any dam, poling activities

were not permitted within the area between Morrow Lake Dam and the first downstream island at approximately MP 39.95. The results of the 96 poling locations were all classified as “none’. The poling locations and results are shown in *Figure 2e-3*.

2e.2.2 E 4.0 Boom Bathymetry

Bathymetry measurements were collected at the same locations as the November 2012 post-removal bathymetry measurements along the former location of the E 4.0 boom. Bathymetry measurements were collected from December 14 through and including December 20, 2012, except on Sunday December 16, 2012. The bathymetry data for the former E 4.0 boom locations are shown on *Figure 2e-4*.

2e.2.3 Quantification Evaluation Study

Logging and sampling of the remaining quantification cores that had been frozen occurred on December 7 and December 10, 2012. Logging and sampling of four quantification evaluation cores and one core for the method detection limit portion of the quantification evaluation study were completed.

2e.2.4 Agitation Evaluation Study

Logging and sampling of agitation cores that had been frozen began on December 5 and continued through and including December 7, 2012. Logging and sampling of 30 cores were completed.

2e.3 Work Planned

2e.3.1 Poling

Poling at fixed locations on Morrow Lake including the Sediment Fan and Morrow Lake Delta is planned for January 2013, unless ice buildup in the survey area prevents field activities from occurring.

2e.3.2 E 4.0 Boom Bathymetry

The collection of bathymetry measurements along the former location of the E 4.0 boom is planned for January 2013, unless ice buildup in the survey area prevents field activities from occurring.

2e.3.3 Quantification Evaluation Study

Data compilation, review, and quality control will continue in January 2013.

2e.3.4 Agitation Evaluation Study

Data compilation, review, and quality control will continue in January 2013.

2f.0 Remedial Investigation Activities

2f.1 Introduction

Remedial investigation (RI) activities conducted in December 2012 were in support of the Kalamazoo River RI Program. Activities for the RI were conducted in accordance with the following work plans:

- *Remedial Investigation Work Plan for Kalamazoo River (MP 5.80 to MP 11.00)* approved by MDEQ on February 10, 2012 (Enbridge, 2012(1)), and
- *Remedial Investigation Work Plan for Kalamazoo River (MP 11.00 to Morrow Lake Dam)* approved by MDEQ on March 8, 2012 (Enbridge, 2012(2)).

RI field activities were suspended from December 5 through and including December 7, 2012 to allow for activities associated with the agitation study and submerged oil quantification study core logging (See *Section 2e.0*). All RI activities were suspended from December 22, 2012 through and including January 6, 2013 for the Enbridge field work shutdown over the Christmas and New Year holiday period.

2f.2 Work Completed

2f.2.1 Kalamazoo River Remedial Investigation

Field activities related to the Kalamazoo River RI were conducted between MP 10.50 and MP 10.75 and from MP 11.25 to MP 13.00. Field activities included the following:

- Soil and sediment core collection via manual techniques,
- Logging of collected cores,
- Evaluation of soil and sediment cores using ultraviolet light,
- Soil and sediment sampling from the collected cores,
- Installation of temporary monitoring wells in select soil borings, and
- Global positioning system collection of horizontal (X, Y) coordinates for each boring.

Soil and sediment samples were collected and analyzed for:

- Polynuclear aromatic hydrocarbons,
- Four select metals (beryllium, vanadium, nickel, and molybdenum), and
- Total petroleum hydrocarbons as diesel range organics and oil range organics.

Per the approved work plans, all soil samples collected at locations upstream of MP 14.00 were analyzed for VOCs.

The locations of soil borings installed during the Kalamazoo River RI are presented in *Figure2f-1*.

Compilation of Kalamazoo River RI data for Parcel Primer development (See *Section 2f.2.2*) and the development of several documents for submittal to the MDEQ were also performed in December 2012.

The following document was submitted in December 2012:

- *Work Plan for Monitoring Well Abandonment* (Enbridge, 2012(3)) submitted to MDEQ on December 3, 2012.

The following documents remain in development through December 2012:

- *Presentation of Data for Kalamazoo River Parcels ROW - Michigan Avenue Bridge and ROW – Railroad 1, Augusta, Michigan (MP 28.75 to MP 29.00),*
- *Presentation of Data for Kalamazoo River Parcel ROW - Michigan Avenue Bridge 1, Galesburg, Michigan (MP 34.00 to MP 34.25),*
- *Hydrocarbon Fingerprint Evaluation,*
- *Overbank Soil Background Metals Evaluation,* and
- *Tier 1 LNAPL Conceptual Site Model for Line 6B Crude Oil.*

2f.2.2 Parcel Primers and Presentations

Parcel Primer and presentation procedure development was initiated in June 2012. The purpose of the Parcel Primer is to provide the parcel owner with documentation of Enbridge and MDEQ

concurrence that further operations and maintenance and/or RI activities are not required on the subject parcel. This process is currently under review and subject to modification.

Each parcel is categorized into one of three color code designations:

- "No Color" – Parcel does not require investigation, data compilation, or review,
- "Green Hatched" – Limited data compilation and a "Live GIS" presentation to show lack of historical issues, and
- "Orange" – Parcel requires RI activities and a full Primer package.

The final templates for the primer package and concurrence form remain under review by MDEQ.

No Parcel Primers were submitted for MDEQ review and concurrence in December 2012. Parcel Primer development and presentation activities were curtailed starting on December 5, 2012 and remained suspended through and including December 31, 2012.

2f.2.3 Additional Investigations

No additional investigation activities were conducted in December 2012.

2f.3 Work Planned

Planned RI activities for January 2013 consist of the following:

- Continue RI data compilation,
- Continue Parcel Primer generation (with presentations),
- Continue preparation of RI documents,
- Continue implementation of field activities for the Kalamazoo River RI (MP 2.25 to MP 3.14) in accordance with *Remedial Investigation Work Plan for Kalamazoo River (MP 2.25 to MP 3.14)* approved by MDEQ on November 18, 2011 (Enbridge, 2011),

- Continue implementation of field activities for the Kalamazoo River RI (MP 3.14 to Ceresco Dam (MP 5.80)) in accordance with *Remedial Investigation Work Plan for Kalamazoo River (MP 3.14 to Ceresco Dam (MP 5.80))* approved by MDEQ on January 13, 2012 (Enbridge, 2012(4)),
- Continue implementation of the Kalamazoo River RI (MP 5.80 to MP 11.00) in accordance with *Remedial Investigation Work Plan for Kalamazoo River (MP 5.80 to MP 11.00)* approved by MDEQ on February 10, 2012 (Enbridge, 2012(1)), and
- Continue implementation of the Kalamazoo River RI (MP 11.00 to Morrow Lake Dam) in accordance with the *Remedial Investigation Work Plan for Kalamazoo River (MP 11.00 to Morrow Lake Dam)* approved by MDEQ on March 8, 2012 (Enbridge, 2012(2)).

2g.0 Temporary Facility Restoration and Demobilization Activities

2g.1 Introduction

Approximately 95 work sites have been used for release response activities to provide river access, staging of equipment and materials, decontamination, waste staging, and similar activities. As response and remediation work was completed, site decommissioning and closure activities including removal of equipment and consumables, implementation of soil erosion and sediment control measures, restoration of the site to pre-response conditions, and inspections were performed. To evaluate if response activities had an adverse environmental impact at these sites, verification soil samples were collected for laboratory analysis in accordance with MDEQ requirements outlined in *RRD Operational Memorandum No. 2* (MDEQ, 2004) for comparison to applicable Part 201 of Michigan's Act 451 of 1994, as amended, and Generic Soil Residential Criteria in accordance with the *Soil Staging, Decontamination & River Access Site Closure Plan* (Enbridge, 2011), currently under review by MDEQ and U.S. EPA. The MDEQ is notified of each sampling event.

2g.2 Work Completed

2g.2.1 River Access Sites and Other Work Sites

No soil samples were collected at river access sites or other work sites during December 2012.

2g.2.2 Soil Staging and Decontamination Areas

No site decommissioning samples were collected at soil staging and decontamination areas in December 2012.

2g.3 Work Planned

Sampling activities are tentatively planned for multiple temporary facilities and River Access Sites during January 2013.

2h.0 River Bank Erosion Control and Restoration Activities

2h.1 Introduction

In December 2012, no restoration or erosion control activities were completed at Kalamazoo River Bank Erosion Assessment sites. No additional sites requiring erosion control or restoration activities were identified during December 2012.

2h.2 Work Completed

During December 2012, no restoration activities were completed along either Talmadge Creek or the Kalamazoo River. Assistance with supporting documents for Kalamazoo River RI sites continued through the month.

2h.3 Work Planned

No river bank erosion control or restoration activities are planned for January 2013. The need for future activities will be determined subsequent to receipt of MDEQ comments and approval of the *Kalamazoo River Bank Erosion Assessment and Action Plan Summary Report – Monitoring Trip No. 9*, submitted to MDEQ on September 13, 2012 (Enbridge, 2012).

2i.0 Sediment Traps and Cylindrical Sampling Devices

2i.1 Introduction

2i.1.1 Phase I Sediment Traps

During December 2012, sediment trap and cylindrical sampling device (CSD) activities included monitoring and measuring bathymetry at the six Phase I sediment traps and monitoring data compilation in accordance with the *Sediment Trap Monitoring and Maintenance Plan*, approved by the U.S. EPA on July 10, 2012 (Enbridge, 2012). During monitoring Round 10, no poling activities were conducted because water and sediment temperatures were below 60 degrees Fahrenheit (°F).

Phase I sediment traps are installed at the following locations:

- MP 10.75 left descending bank (LDB),
- MP 14.75 right descending bank (RDB),
- MP 19.25 LDB,
- MP 21.50 RDB,
- MP 28.25 RDB, and
- MP 36.10 NW.

Bathymetry measurements will be collected at sediment trap MP 36.10 NW when property access has been obtained.

2i.1.2 Phase II Sediment Traps

During December 2012, Phase II sediment trap and CSD activities included conducting Round 10 monitoring and measuring bathymetry at the 11 Phase II sediment trap locations in accordance with the *Sediment Trap Monitoring and Maintenance Plan,* approved by the U.S. EPA on July 10, 2012 (Enbridge, 2012). Round 10 activities included monitoring and monitoring data compilation. No poling activities were conducted during Round 10 because water and sediment temperatures were below 60 °F.

The 11 Phase II sediment traps are installed at the following locations:

- Ceresco/MP 5.75,
- MP 10.40 N,
- MP 10.50 L2,
- OB 11.79 LDB,
- MP 26.00 RDB,
- MP 30.80 LDB,
- MP 33.00 A,
- MP 33.00 B,
- Delta A/MP 36.75,
- Delta Z/MP 37.50, and
- MP 37.75 Islands.

2i.2 Work Completed

During December 2012, data compilation and evaluation included calculating the rate of sedimentation within the CSD sample jars. The sedimentation rates were determined through review and evaluation of the data collected during Round 10 monitoring conducted at the Phase I and Phase II sediment traps. The results for the sedimentation rates within the CSD sample jars collected during monitoring Round 1 through and including Round 10 are shown graphically in *Figure 2i-1* and are summarized in *Table 2i-1* (See Attached). Issues with the CSDs were observed and documented. The resulting evaluation indicated that the accumulation of sediment within the CSDs is not necessarily indicative of sedimentation within the sediment traps. The observed issues include scour and/or settling of the CSDs into the soft sediment, which tilted the CSDs. The observed issues are summarized in *Table 2i-1*.

2i.2.1 Sediment Trap Installation

During December 2012, no sediment traps were installed.

2i.2.2 Sediment Trap Monitoring

During December 2012, monitoring was conducted at all five of the six Phase I sediment trap locations and the 11 Phase II sediment trap locations in accordance with the *Sediment Trap*

Monitoring and Maintenance Plan, approved by the U.S. EPA on July 10, 2012 (Enbridge, 2012). Monitoring activities included measurement and sampling of the sediment collected in the CSD samplers.

In December 2012, no poling activities were conducted during Round 10 monitoring because water and sediment temperatures were below 60 °F.

In December 2012, sediment samples were collected, composited, and submitted for analysis from 62 CSD locations. The CSD sampling locations are summarized in *Table 2i-1* and shown in *Figure 2i-2*.

2i.2.3 Baseline Bathymetry Survey

During December 2012, quarterly bathymetry data was collected at 11 of the 17 Phase I and Phase II sediment trap locations along predetermined transects. The bathymetry data will be used to construct a cross sectional profile along each predetermined transect and will then be compared to future bathymetry data to determine sedimentation rates within the sediment traps. The bathymetry data collected at the 11 Phase I and Phase II sediment traps is shown on *Figure 2i-3*.

2i.3 Work Planned

During January 2013, monitoring of five of the six Phase I sediment traps and the 11 Phase II sediment traps is planned for the week of January 14, 2013, depending on winter weather conditions. Bathymetry data collection is planned to continue at the six remaining Phase I and Phase II sediment traps. In addition, the amount of sediment within the CSD sample jars will also be recorded.

2j.0 Waste Management Activities

2j.1 Introduction

In December 2012, waste management activities were conducted in accordance with the *Waste Treatment, Transportation, and Disposal (WTTD) Plan* (WTTD Plan), approved by the U.S. EPA on May 20, 2011 (Enbridge, 2011(1)), the *Addendum to the Revised Waste Treatment, Transportation and Disposal Plan*, approved by the U.S. EPA on June 20, 2011 (Enbridge, 2011(2)), and the *Operation and Maintenance Excavation Work Plan titled Waste Best Management Practices*, approved by the U.S. EPA on June 29, 2011 (Enbridge, 2011(3)). In addition, the *Winter Water Management Work Plan Frac Tank City 2012* (Enbridge, 2012) was submitted to the U.S. EPA for approval on December 20, 2012.

Generated waste streams included, but were not limited to:

- Crude oil impacted debris,
- Non-impacted debris - municipal solid waste (MSW),
- Crude oil impacted soil,
- Miscellaneous other small volume materials,
- Crude oil impacted water, and
- Non-impacted precipitation.

Table 2j-1 provides a list of transporters and disposal facilities used for management of each waste stream.

Waste Stream	Disposal Company	U.S. EPA ID Number	Treatment Option	Transporter
Wastewater (Non-Hazardous)	Dynecol, Inc.	MID 074 259 565	Wastewater Treatment	PVS Transportation, HM Environmental, SET Environmental, Inc., and sub-contractors
Wastewater (Non-Hazardous)	Liquid Industrial Waste Services (LIWS)	MID 006 546 121	Wastewater Treatment	LIWS
Wastewater (Non-Hazardous)	Plummer's Environmental Services	MIK 111 229 563	Wastewater Treatment	Plummer's Environmental Services
Non-Hazardous Waste Solid	Republic Services C&C Landfill	MID 985 618 420	Landfill	SET Environmental, Inc. and sub-contractors
Non-Hazardous Soil	Republic Services C&C Landfill	MID 985 618 420	Landfill	SET Environmental, Inc. and sub-contractors

Table 2j-1. Waste Transporters and Disposal Facilities December 2012

2j.2 Work Completed

Table 2j-2 is a summary of the active waste streams and any shipments that occurred during December 2012. The cumulative amount of each waste type generated during response is the total shipped as of December 31, 2012. The processes that generate each waste stream are described further in the following sections. Waste manifests and bills of lading received in December 2012 are included in *Appendix E.*

Waste Stream	Shipped to	Quantity Shipped in December 2012	Cumulative Total Shipped as of December 31, 2012	Unit of Measure
Non-Hazardous Soil	C&C Landfill Marshall, MI	0.0	78,109	Cubic Yards
Non-Hazardous Debris (oily debris)	C&C Landfill Marshall, MI	6.09	7,153	Tons
Non-Hazardous Debris (MSW, non-impacted)	C&C Landfill Marshall, MI	0.83	1,802	Tons
Non-Hazardous Water (precipitation)	Battle Creek Publically Owned Treatment Works, MI	0.0	1,143,280	Gallons
Non-Hazardous Water	Dynecol Detroit, MI	0.0	981,792	Gallons
Non-Hazardous Water	LIWS, Inc.	0.0	1,376,757	Gallons
Non-Hazardous Water	Plummer's Environmental Services	45,000	521,726	Gallons

Table 2j-2. Waste Shipment Summary through December 31, 2012

2j.2.1 Oily Debris

Oily debris was segregated from non-oily debris and stored in lined 20-cubic yard roll off boxes and transported to Republic Services' C&C Landfill in Marshall, Michigan for disposal. Handling procedures for oily debris were conducted in accordance with procedures outlined in the approved WTTD Plan (Enbridge, 2011(1)). Based on how the waste was generated (e.g., control points), sampling and required analyses were performed in accordance with the WTTD Plan (Enbridge, 2011(1)).

2j.2.2 Non-Impacted Debris

Non-impacted (non-oily) debris or MSW generated at field locations was transported to Republic Services' C&C Landfill in Marshall, Michigan using lined 20-cubic yard roll off boxes. Non-impacted debris was not sampled and was not included in the recovered oil calculations. The non-hazardous designation for the debris was based on generator knowledge.

2j.2.3 Soil

Disposal requirements for oil impacted soil are based on an evaluation of analytical data. Handling and sampling procedures for non-hazardous oil impacted soil were conducted in accordance with the WTTD Plan (Enbridge, 2011(1)). Sampling frequency and required analyses were also performed in accordance with the WTTD Plan (Enbridge, 2011(1)).

Hazardous soil was not generated during December 2012.

2j.2.4 Miscellaneous Small Quantity Waste Streams

Miscellaneous small quantity waste streams have been generated throughout the project. These wastes have primarily been stored in drums and include, but are not limited to: used oil, batteries, small quantities of medical waste, and lab samples. These waste streams have been characterized individually and disposed at approved facilities as required.

2j.2.5 Decontamination and Precipitation Wastewater

Accumulated water from decontamination and precipitation at Frac Tank City (FTC) soil staging cell containment was transported to Plummer's Environmental Services for disposal. A total of 45,000 gallons were disposed in December 2012.

2j.2.6 Recovered Oil Calculations

The quantity of oil contained in waste materials has been calculated since the beginning of the release response. Oil and grease analytical results for oily solids and oily liquids are used to calculate recovered oil volumes. The oil quantity calculation is based on the concentration of oil (analytical results) in the waste and the total amount of waste shipped. Recovered oil values are determined for each waste stream and a recovered oil summary is reported weekly to the U.S. EPA. A summary of this report through January 7, 2013 is provided in *Table 2j-3*.

Waste Stream	Weekly Oil Recovery Estimates (gallons)					Cumulative Oil Recovery Estimate (gallons)
	12/3/2012	12/10/2012	12/17/2012	12/21/2012	1/07/2013	
Soil (Non-Haz) (Impacted Soil & Debris) C&C Landfill	0.0	0.0	0.0	0.0	0.0	**14,032**
Soil (Haz) (Impacted Soil & Debris) Envirosafe/Westside Recycling & Disposal Facility (RDF)	--	--	--	--	--	**278,665**
Geotube Sediment (Impacted Sediment) Westside RDF	--	--	--	--	--	**1,298**
Debris (Non-Haz) (Roll off boxes with Impacted Sorbents, boom, pads, plastic, Personal Protective Equipment, vegetation, and biomass)	1.7	3.1	0.0	8.8	0.0	**34,493**
Wastewater (Haz) FTC - Influent to Carbon Filtration System	--	--	--	--	--	**8,109**
Wastewater (Non-Haz) FTC - Water to Dynecol/ LIWS/Plummer's/City of Battle Creek	0.0	0.1	0.0	0.1	0.0	**46,176**
Wastewater (Non-Haz) Battle Creek - Non-Hazardous rain water Ceresco Dredge and C05 Inactive Decon Pad	--	--	--	--	--	**--**
Wildlife Center Wastewater (Non-Haz) Water to Plummer's	--	--	--	--	--	**--**
Ceresco Pretreatment System	--	--	--	--	--	**90**
A-1 Pretreatment System (Haz)	--	--	--	--	--	**9**
Oily Water (Non-Haz) Recoverable Petroleum Product to Griffith	--	--	--	--	--	**766,288**
						Total: 1,149,160

Table 2j-3. Weekly and Project Cumulative Recovered Oil through January 7, 2013

2j.3 Work Planned

During January 2013, waste management activities are planned to continue in accordance with the plans referenced in *Section 2j.1*. Soils with no free liquids will either be transported to FTC and stockpiled using a bill of lading or transported directly to a landfill using a manifest in

accordance with the approved *Addendum to the Revised Waste Treatment, Transportation, and Disposal Plan* (Enbridge, 2011(2)). Each soil stockpile will have a representative sample (one 4-point composite sample collected and homogenized for oil and grease analysis) collected for every 200 cubic yards of waste soil. Each load transported directly to the landfill will have one scoop (single point aliquot) of soil collected for oil and grease analysis prior to leaving the site per the approved *Operation and Maintenance Excavation Work Plan titled Waste Best Management Practices* (Enbridge, 2011(3)).

2k.0 Overbank Excavation Activities

2k.1 Introduction

During December 2012, no overbank (OB) excavation activities were performed.

2k.2 Work Completed

During December 2012, no OB excavation activities were performed.

2k.3 Work Planned

No OB excavation activities are scheduled to be conducted during January 2013.

2l.0 Overbank Oil Recovery Activities

2l.1 Introduction

During December 2012, no OB oil recovery activities were conducted.

2l.2 Work Completed

No OB oil recovery activities were conducted during December 2012.

2l.3 Work Planned

No OB oil recovery activities are scheduled to be conducted during January 2013.

2m.0 Hydrodynamic Assessment and Model Activities

2m.1 Introduction

Hydrodynamic assessment data has been used to develop an understanding of the riverine and floodplain system by identifying physical patterns and migration rates of sediment caused by various river conditions.

2m.2 Work Completed

During December 2012, the *Addendum to the Response Plan for Downstream Impacted Areas, August 2, 2010 (Revised August 17, 2010 per U.S. EPA August 17, 2010 letter), Supplement to Source Area Response Plan, and Supplement to Response Plan for Downstream Impacted Areas, Referred to as Operations and Maintenance Work Plan, Commonly referred to as "Consolidated Work Plan from Fall 2011 through Fall 2012"* (CWP) (Enbridge, 2011) approved by the U.S. EPA on December 21, 2011 was reviewed to determine the status of the hydrodynamic model in relation to the requirements of the CWP.

2m.3 Work Planned

No hydrodynamic assessment and model activities are scheduled to be conducted during January 2013.

3.0 Conclusion

As described in this monthly progress report for December 2012, Enbridge continued to conduct activities required under the U.S. EPA Order and Supplemental Order and to conduct activities pursuant to the MDEQ Order. The work conducted and data received during January 2013 will be included in the monthly report to be submitted in February 2013.

8. Activity Log

Activity Areas	Safety & Security, Air Operations, Waste Management, Overbank, Submerged Oil, Containment, Talmadge Creek, Kalamazoo River

Health and Safety Issues

Safety & Security (Dale Gross)

General Safety Message:

11-27-12: Safe Lighting

This time of the year is when the days have become shorter. Today sunrise is at 07:46 and sunset is at 17:09. Work after dusk (with the exception of security) generally is not permitted and, if necessary, will only be allowed if the following conditions are met:

- Prior approval.
- A minimum of two workers, or communications exist to outside areas to request assistance, if required.
- Adequate lighting is provided to illuminate the work area.

Safety Items for November 27th, 2012: No issues to report.

11-28-12: Black Ice

Winter driving isn't just about dealing with snow; ice on the road is a real threat. Black ice, in particular, is dangerous because it's invisible (the term "black ice" being somewhat of a misnomer, as the ice is transparent). Tips for driving safely in icy conditions include:

- Decrease your speed and leave yourself plenty of room to stop. You should allow at least three times more space than usual between you and the car in front of you.
- Brake gently to avoid skidding.
- Use low gears to keep traction, especially on hills.
- Don't use cruise control on icy roads.
- Be especially careful on bridges, overpasses and infrequently traveled roads, which will freeze first. Even at temperatures above freezing, if the conditions are wet, you might encounter ice in shady areas or on exposed roadways like bridges.

Don't pass snow plow trucks. The drivers have limited visibility, and you're likely to find the road in front of them worse than the road behind.

Safety Items for November 28th, 2012: No issues to report.

11-29-12: Walking in Icy/Slippery Conditions

Wintery conditions such as snow, ice, wind and other factors such as poor lighting can contribute to risk of slips,

Health and Safety Issues (Cont.)	trips, and falls. The following are some tips aimed at helping prevent slips, trips and falls: ➢ Wear proper footwear with good traction that is kept in good repair. Take a look at the soles of shoes regularly to check for excessive wear. ➢ Use handrails when available ➢ Take short steps and reduce walking speed to help maintain stability. ➢ Make sure all areas have adequate lighting to illuminate any potential hazards. **Safety Items for November 29th, 2012:** No issues to report. **11-30-12 and 12-01-12: Housekeeping before Snow** ➢ Organize a "sweep" of work areas and pick up any materials that could get covered by snow and could become a trip hazard. ➢ Prepare by having snow shovels, brooms, and ice melt on hand for use to clear steps and paths. ➢ Identify entrances, exits, curbs, as well as drop offs. ➢ Repair any loose steps and install non-skid tape where the need has been identified. **Safety Items for November 30th and December 1st:** No issues to report. **12-02-12: Life Saving Rule #3 – Confined Space Entry** Always follow procedures for Confined Space Entry; ➢ Always complete the required permit ➢ Receive proper authorization and ensure personnel are in place to perform the rescue plan before entering a confined space ***Remember: It is up to us to keep unsafe behavior out of the workplace*** **Safety Items for December 2nd:** No issues to report. **12-03-12: Jon Boat Winter Safety** During winter operations on the Kalamazoo River, jon boat operations may be suspended when border ice has formed or once there is free floating ice. Water/ice conditions will be monitored daily as part of the daily safe work permit/hazard assessment. **Safety Items for December 3rd, 2012:** No issues to report. **12-04-12: Vehicles and Carbon Monoxide** Carbon Monoxide poisoning can happen at any time of the year, but the danger is greater during the winter. Hundreds of people die from carbon monoxide poisoning every year, and thousands of others suffer dizziness, nausea, and convulsions. The gas is frightening because it's odorless and colorless. One of the most dangerous wintertime sources of carbon monoxide is vehicle exhaust. If you are in your vehicle and you keep the engine on in order to run your heater, make sure the exhaust pipe is clear. If the pipe is clogged with snow or other materials, the exhaust could back up into your vehicle. Signs of carbon monoxide poisoning include headache, mental confusion, and extreme tiredness. Get to fresh air and call for help immediately. **Safety Items for December 4th, 2012:** No issues to report. **12-05-12: Snow and Ice Removal** Snow removal contractors have been hired to remove snow from work sites. Sand and/or salt shall not be used on any boat ramp or watercraft. These products can cause additional slipping hazards on the ramps. Accumulated ice and snow may be removed by shoveling and scraping. **Safety Items for December 5th, 2012:** No issues to report. **12-06-12: Hunting Reminder – Muzzle loading Deer Season** Today is the beginning of muzzle loading deer season in the State of Michigan and the season will continue until December 23. Hunting activity for deer is expected to increase from last year as the river is now open to the

Health and Safety Issues (Cont.)	public. While we cannot prevent hunting activities from occurring, there are a number of best practices we can utilize to work safely during hunting season. ➢ Be alert for hunters in your work area. ➢ Do not work alone. ➢ Wear high visibility orange hard hat covers and safety vests. Remember: If you feel threatened by any hunting activities, leave the area, call 911 and report the incident to the Enbridge Safety Office 269-753-9347. NOTE: No one is to hunt on Enbridge properties unless they are the tenant to that specific property and have approval from Enbridge Incident Commander. **Safety Items for December 6th, 2012:** No issues to report. **12-07-12 and 12-08-12: Cold and Flu Prevention** Always wash your hands before: ➢ Preparing Food/ Eating/Treating Wounds/Giving Medicine/Touching a Sick or Injured Person Always wash your hands after: ➢ Preparing Food/Utilizing the Toilet/Touching Animals/Blowing Nose/Coughing or Sneezing in Hands/ Treating Wounds/Touching a Sick or Injured Person/ Handling Garbage, Etc. Proper Hand Washing: ➢ Wet hands with running water, add soap and lather well ➢ Rub hands vigorously for at least 20 seconds. Remember to scrub all surfaces; o Wrists/Between Fingers/Under Nails/Thumbs/Finger Tips/ Back of Hands ➢ Rinse hands off under running water ➢ Dry hands with a clean or disposable towel or air dryer ➢ If possible, use your towel or the back of your hand to turn off the faucet Alcohol Based Sanitizer: ➢ Apply enough of the product to the palm of your hand to wet completely ➢ Rub hands together, covering all surfaces up to 25 seconds or until dry **Safety Items for December 7th and December 8th:** No issues to report. **12-09-12: Life Saving Rule #4 – Ground Disturbance** Dig Safely. Always follow procedures for locating, positively identifying and excavating buried facilities. Protect yourself, your community and the environment by protecting our pipelines – ensure that all buried facilities are identified and marked prior to excavation. By building a strong foundation of safe practices we can protect our most valuable resource – our people. ***Make certain you know and obey the Enbridge 10-2-1 Rule.*** **Safety Items for December 9th:** No issues to report.
Activities / Comments	**Waste Management (John Wallace):** **11-27-12:** Decon: No activities. T&D: No activities. Waste Management Characterization: Continuing waste management characterization, documentation and coordination. **11-28-12:** Decon: Multiple buoys were deconed and placed into storage in connex box behind metal barn in FTC. T&D: No activities.

Activities / Comments (Cont.)	Waste Management Characterization: Continuing waste management characterization, documentation and coordination. **11-29-12:** Decon: Crew deconed buoys and anchors from the E4 removal. T&D: No activities. Waste Management Characterization: Continuing waste management characterization, documentation and coordination. **11-30-12:** Decon: Crew deconed various items such as hard boom and anchors. T&D: No activities. Waste Management Characterization: Continuing waste management characterization, documentation and coordination. **12-01-12 and 12-02-12:** Decon: No activities. T&D: No activities. Waste Management Characterization: No activities. **12-03-12:** Decon: Crew deconed hard boom and buoys in their daily progress. T&D: A roll off of oily debris was hauled from E4 to C&C landfill for disposal. Waste Management Characterization: Continuing waste management characterization, documentation and coordination. **12-04-12:** Decon: Multiple can buoys were deconed along with ball buoys on 12-4-12. T&D: No activities. Waste Management Characterization: Continuing waste management characterization, documentation and coordination. **12-05-12:** Decon: Hard boom, concrete anchors and ball buoys were deconed. T&D: No activities. Waste Management Characterization: Continuing waste management characterization, documentation and coordination. **12-06-12:** Decon: Vinyl sheet pile and ball buoys were deconed in the operational period. T&D: A roll off of MSW was hauled to C&C landfill as well as an oily debris roll off. Waste Management Characterization: Continuing waste management characterization, documentation and coordination.

Activities / Comments (Cont.)	**12-07-12:** Decon: Can buoys and anchors were deconed. T&D: Water was hauled out from the cell A/B sump by Valley city and taken to Plummer's Environmental for disposal. Waste Management Characterization: Continuing waste management characterization, documentation and coordination. Collected on (1) waste water sample from the FTC sump. **12-08-12 and 12-09-12:** Decon: No activities. T&D: No activities. Waste Management Characterization: No activities. **Submerged Oil (David Bareham):** **11-27-12:** Science: Logged remaining quantification cores. Compliance: Collected Bathymetry data at Ceresco Impoundment. **11-28-12:** Science: Logged remaining quantification cores. Collected eight (8) sediment samples (4held, 4analyzed) from MP 04.25. Collected five (5) sediment samples (1held, 4analyzed) from MP 05.00. Collected six (6) sediment samples (6analyzed) from MP 05.25. Collected six (6) sediment samples (6analyed) from MP 05.50. Collected five (5) sediment samples (2held, 3analyzed) from MP 10.75. Collected six (6) sediment samples (6analyzed) from MP 15.50. Collected five (5) sediment samples (2held, 3analyzed) from MP 15.75. Collected six (6) sediment samples (3held, 3Analyzed) from MP 28.75. Collected thirteen (13) sediment samples (4held, 9analyzed) from MP 37.25. Collected nineteen (19) sediment samples (5held, 14analyzed) from MP 37.50.Collected six (6) sediment samples (6analyzed) from MP 37.75. Compliance: Collected Bathymetry data at Ceresco Impoundment. **11-29-12:** Science: Logged remaining quantification cores. Collected three (3) sediment samples (3analyzed) from MP 05.00. Collected six (6) sediment samples (6analyzed) from MP 05.50. Collected four (4) sediment samples (4analyzed) from MP 09.00. Collected four (4) sediment samples (2held, 2analyzed) from MP 11.00. Collected three (3) sediment samples (3analyzed) from MP 21.50. Collected four (4) sediment samples (1held, 3analyzed) from MP 21.75. Collected three (3) sediment samples (3analyzed) from MP 25.25. Collected six (6) sediment samples (5analyzed) from MP 26.25. Collected four (4) sediment samples (4analyzed) from MP 27.50. Collected four (4) sediment samples (4analyzed) from MP 32.50. Collected eleven (11) sediment samples (5held, 6analyzed) from MP 37.25. Collected fifteen (15) sediment samples (2held, 13analyzed) from MP 37.50. Compliance: Collected Bathymetry data at Ceresco Impoundment. **11-30-12:** Science: Logged remaining quantification cores. Collected thirty-two (32) sediment samples (22analyzed, 10on hold) for submerged oil quantification study. Compliance: Collected Bathymetry data at Ceresco Impoundment. **12-01-12 and 12-02-12:** Science: No activities. Compliance: No activities. **12-03-12 and 12-04-12:** Science: No activities.

	Compliance: Collected Bathymetry data at Ceresco Impoundment. Morrow Lake monitoring. **12-05-12:** Science: Collected two (2) sediment samples from Agitation Study. Compliance: Collected Bathymetry data at Ceresco Impoundment. Morrow Lake monitoring. **12-06-12:** Science: Collected five (5) sediment samples from Agitation Study. Collected two (2) globule samples for the Agitation Study. Compliance: Collected Bathymetry data at multiple locations. Morrow Lake monitoring. **12-07-12:** Science: Collected four (4) sediment samples from Agitation Study. Collected two (2) globule samples for the Agitation Study. Collected eighteen (18) sediment samples for the Quantification Study. Compliance: Collected Bathymetry data at multiple locations. **12-08-12:** Science: No activities. Compliance: Collected Bathymetry data at multiple locations. **12-09-12:** Science: No activities. Compliance: No activities.
Activities / Comments (Cont.)	**Containment (Dean Sahara) :** **11-27-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for Survey Crew. Provided 4 Boats for Bathymetry. E4 Configuration Removal: Nothing to Report. Boom: Nothing to report. Buoys: Nothing to report. Survey Crew: Installed 1 monument at MP 19.25, MP 28.25, MP 26 and MP 10.25. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 36.5 to MP 37.75: 25' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Ceresco: 50' of snare used. Total Footage Snare used: 149'. Debris Recovered: Ceresco: Recovered 51 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **11-28-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for Survey Crew. Provided 4 Boats for Bathymetry. E4 Configuration Removal: Removed 7 pipe anchors. Boom: Nothing to report. Buoys: Nothing to report. Survey Crew: 35th Street Bridge, installed 1 monument. MP 33 installed 1 monument. MP 11.79 installed 1 monument. Sheen Sweep: E4 to MP 38.75: 25' of snare used. MP 36.5 to MP 37.75: 25' of snare used. MP 21.25 to MP 33.1: 50' of snare used. Total Footage Snare used: 100'. Debris Recovered: Ceresco: Recovered 22 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **11-29-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for Survey Crew. Provided 4 Boats for Bathymetry. E4 Configuration Removal: Removed 16 pipe anchors. Boom: Nothing to report. Buoys: Nothing to report. Survey Crew: MP 21.5 installed 2 monuments. Sheen Sweep: E4 to MP 38.75: 25' of snare used. MP 36.5 to MP 37.75: 25' of snare used. MP 21.25 to MP 33.1: 25' of snare used. Total Footage Snare used: 75'. Debris Recovered: Ceresco: Recovered 11 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required.

Activities / Comments (Cont.)	**11-30-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for Survey Crew. Provided 4 Boats for Bathymetry. E4 Configuration Removal: Removed final pipe anchors. Boom: Nothing to report. Buoys: Nothing to report. Survey Crew: MP 10.75 installed 3 monuments. MP 21.5 installed 1 monument. Sheen Sweep: E4 to MP 38.75: 100' of snare used. MP 36.5 to MP 37.75: 24' of snare used. MP 21.25 to MP 33.1: 25' of snare used. Total Footage Snare used: 149'. Debris Recovered: Ceresco: Recovered 22 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-01-12:** Completed River Inspections: Provided 1 Boat for Situational Awareness. Provided 1 Boat for Safety. Provided 2 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 36.5 to MP 37.75: 25' of snare used. Total Footage Snare used: 75'. Debris Recovered: Ceresco: Recovered 10 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-02-12:** No activities. **12-03-12:** Completed River Inspections: Provided 1 Boat for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 1 Boat for MLD Poling. Provided 8 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 36.5 to MP 37.75: 50' of snare used. MP 21.25 to MP 33.1: 25' of snare used. Total Footage Snare used: 125'. Debris Recovered: Ceresco: Recovered 0 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-04-12:** Completed River Inspections: Provided 1 Boat for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 1 Boat for MLD Poling. Provided 8 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 36.5 to MP 37.75: 50' of snare used. MP 21.25 to MP 33.1: 50' of snare used. Ceresco: 50' of snare used. Total Footage Snare used: 200'. Debris Recovered: Ceresco: Recovered 8 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-05-12:** Completed River Inspections: Provided 1 Boat for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 1 Boat for MLD Poling. Provided 8 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 36.5 to MP 37.75: 50' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Ceresco: 50' of snare used. Total Footage Snare used: 174'. Debris Recovered: Ceresco: Recovered 8 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-06-12:** Completed River Inspections: Provided 1 Boat for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for MLD Poling. Provided 8 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 36.5 to MP 37.75: 50' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Total Footage Snare used: 124'. Debris Recovered: Ceresco: Recovered 7 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-07-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Health and Safety Issues

Safety & Security (Dale Gross)

General Safety Message:

12-10-12: Poison Ivy Winter Precautions

Dormant poison ivy plants can still cause reactions during winter months. Every part of the plant contains the allergen that causes rash.

- Know what dormant poison ivy looks like.
- Wear appropriate PPE (gloves, long sleeves, etc.)
- If contact occurs:
  - Immediately clean skin with rubbing alcohol, poison plant wash, or degreasing soap (such as dishwashing soap) or detergent, and lots of water.
  - Use over the counter medications such as Cortisone, Calamine lotion, or Benadryl, etc. for relief
  - If severe symptoms persist, see a medical professional
- Wash work clothing frequently.

Safety Items for December 10th: No issues to report.

12-11-12: Housekeeping

Housekeeping is an important part of working safely.

- Keep trash and loose objects picked up and dispose of them.
- Place materials, tools, and equipment where they belong.
- If you see a housekeeping hazard, take care of it.
- Make sure walkways, stairs, and other paths of travel are kept safe and clear of loose objects.

Safety Items for December 11th, 2012: No issues to report.

12-12-12: Slips, Trips, and Falls

There are many situations that may cause slips, trips, and falls, such as ice, wet spots, grease, polished floors, loose flooring or carpeting, uneven walking surfaces, clutter, electrical cords, open desk drawers and filing cabinets, and damaged ladder steps.

The controls needed to prevent these hazards are usually obvious, but too often ignored, such as keeping walkways and stairs clear of scrap and debris; coiling up extension cords, lines, and hoses when not in use; keeping electrical and other wires out of the way; wearing lug soles in icy weather; clearing parking lots, stairs, and walkways in snowy weather; and using salt/sand as needed.

Safety Items for December 12th, 2012: No issues to report.

Health and Safety Issues (Cont.)

12-13-12: First Aid Kits

The Contractor shall ensure that all First Aid supplies as required in the applicable regulations are available and maintained. First aid supplies are required to be easily accessible. First aid kits shall be located on site or in each crew vehicle.

The contents of each first aid kit shall be checked by the Contractor before being sent out on each job site and on a regular basis to ensure they are properly stocked and contents have not expired.

Safety Items for December 13th, 2012: No issues to report.

12-14-12 and 12-15-12: Driving/Traffic Safety

- Always Wear Seatbelt
- Follow all Traffic Signals/ Signs/ Speed Limits
- Adjust Speed for Road/ Weather Conditions
- Maintain Safe Following Distance
- Secure Loads (Boats/ Waste/ Equipment, etc.)
- Avoid Distractions
    - Cell Phone/ Radio/ Electronic Devices
- Pedestrians/ Cyclists/ Children/ Wildlife
- Adequate Clearance - Fixed Objects/ Vehicles/ Equipment
- Parking:
    - Car Pooling
    - Designated Areas
    - Pulling Through
    - Back-In/ Honk Horn
- Vehicle Inspection – Brakes/ Horn/ Wipers/ Tire Pressure/ Windshield/ Lights/ Operating Controls

Safety Items for December 14th and December 15th: No issues to report.

12-16-12: Hunting Reminder - Late Antlerless Firearm Deer Season

Today is the beginning of the late antlerless firearm deer season in the State of Michigan and the season will continue until January 1st.

While we cannot prevent hunting activities from occurring, there are a number of best practices we can utilize to work safely during hunting season.

- Be alert for hunters in your work area.
- Do not work alone.
- Wear high visibility orange hard hat covers and safety vests.

Remember: If you feel threatened by any hunting activities, leave the area, call 911 and report the incident to the Enbridge Safety Office 269-753-9347.

NOTE: No one is to hunt on Enbridge properties unless they are the tenant to that specific property and have approval from Enbridge Incident Commander.

Safety Items for December 16th: No issues to report.

12-17-12: Life Saving Rule #5 – Isolate Energized Systems

Always follow procedures for lockout/ tag-out. Equipment, facilities and piping systems could have stored or residual energy that poses a danger.

Each and every one of us must do everything in our power to protect ourselves, and to protect those around us.

You are the power behind lifesaving rules.

Safety Items for December 17th, 2012: No issues to report.

12-18-12: Situational Awareness

Each of us is responsible in understanding what is happening in our environment.
One must understand how information, events, and their own actions will impact goals and objectives.

Health and Safety Issues (Cont.)	Before starting work; ➢ What potential hazards are present? ➢ What tools do you need to successfully complete the task? ➢ What resources may you require from your supervisor? ➢ Are your co-workers aware of their responsibilities? ➢ What hazards are present in order to complete the task safely? Being aware and staying focused before and during the task completion will greatly reduce the risk of potential injuries on the job. Complete an effective toolbox meeting, communicate with co-workers and stay conscious of the hazards associated with your task. **Safety Items for December 18th, 2012:** No issues to report. **12-19-12: Using Cleaning Products Safely** Many workers use cleaning products every day as part of their job responsibilities. Common cleaning products may seem harmless, but they can lead to serious health problems if mishandled. To avoid injury or illness while using cleaning products: ➢ Always read and follow warning labels, as well as Safety Data Sheets. ➢ Wear eye protection when using caustic cleaners. ➢ Wear gloves. Skin contact with cleaners can sometimes cause allergies. ➢ Never mix cleaners, as poisonous fumes may result. ➢ Be mindful of small rooms with poor ventilation. Leave windows and doors open or use a fan to better circulate air. ➢ Be aware that dust masks will not prevent you from breathing in fumes. ➢ Use less-toxic cleaners, if possible. **Safety Items for December 19th, 2012:** No issues to report. **12-20-12 Traveling Tips** Airline Travel: ➢ Be sure to contact your airline to make certain your flight is scheduled and on time ➢ Arrive to airport at least two (2) hours before your departure time ➢ Do not pack anything that may be used as a weapon, such as pocket knives, scissors or tools ➢ Leave all gifts unwrapped for proper inspection ➢ Do not wear clothing/accessories with lots of metal which will set off alarms at check points Vehicle Travel: ➢ Have your trip planned out and inform others of your departures and arrival times ➢ Avoid driver fatigue by getting proper rest prior to your departure ➢ Check the road and weather conditions before leaving ➢ Be sure to inspect your tires, oil levels, etc. **Safety Items for December 20th, 2012:** No issues to report.

Provided 1 Boat for Sediment Monitoring. Provided 1 Boat for MLD Poling. Provided 10 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 36.5 to MP 37.75: 50' of snare used. MP 21.25 to MP 33.1: 25' of snare used. Ceresco: 50' of snare used. Total Footage Snare used: 175'. Debris Recovered: Nothing to Report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-11-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 2 Boats for Sediment Monitoring. Provided 1 Boat for MLD Poling. Provided 10 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 21.25 to MP 33.1: 25' of snare used. Total Footage Snare used: 75'. Debris Recovered: Ceresco: Recovered 9 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-12-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 2 Boats for Sediment Monitoring. Provided 1 Boat for MLD Poling. Provided 8 Boats

Activities / Comments (Cont.)	for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Total Footage Snare used: 74'. Debris Recovered: Ceresco: Recovered 6 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-13-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 2 Boats for Sediment Monitoring. Provided 2 Boats for MLD Poling. Provided 10 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 21.25 to MP 33.1: 74' of snare used. Total Footage Snare used: 124'. Debris Recovered: Nothing to report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-14-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 1 Boat for Sediment Monitoring. Provided 8 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Total Footage Snare used: 74'. Debris Recovered: Nothing to Report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-15-12:** Completed River Inspections: Provided 1 Boat for Situational Awareness. Provided 1 Boat for Safety. Provided 6 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 25' of snare used. Total Footage Snare used: 25'. Debris Recovered: Nothing to Report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-16-12:** No activities. **12-17-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 10 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Ceresco: 50' of snare used. Total Footage Snare used: 124'. Debris Recovered: Nothing to Report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-18-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 10 Boats for Bathymetry. Boom: Nothing to report. Buoys: Inspected Buoys. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Ceresco: 50' of snare used. Total Footage Snare used: 124'. Debris Recovered: Nothing to Report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-19-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for Water Monitoring. Provided 1 Boat for RI. Provided 10 Boats for Bathymetry. Boom: Nothing to report. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Total Footage Snare used: 74'. Debris Recovered: Nothing to Report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-20-12:** Completed River Inspections: Provided 2 Boats for Situational Awareness. Provided 1 Boat for Safety. Provided 1 Boat for RI. Provided 10 Boats for Bathymetry. Boom: Ceresco: Removed 800' of hard boom. Buoys: Nothing to report. Sheen Sweep: E4 to MP 38.75: 50' of snare used. MP 21.25 to MP 33.1: 24' of snare used. Total Footage Snare used: 74'. Debris Recovered: Ceresco: Recovered 11 bags of debris. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off

Activities / Comments (Cont.)	for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-21-12:** Completed River Inspections: Boat Operations cancelled due to weather. Boom: Nothing to Report. Buoys: Nothing to report. Sheen Sweep: Total Footage Snare used: 0'. Debris Recovered: Nothing to Report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-22-12:** Completed River Inspections: Provided 1 Boat for Situation/Sheen Response. Boom: Nothing to Report. Buoys: Nothing to report. Sheen Sweep: Total Footage Snare used: 0'. Debris Recovered: Nothing to Report. All vegetation debris taken to C 0.4 for temporary storage; oily waste taken to Frac Tank City, stored in the oily waste roll off for disposal at a later date. Inspected all containment on the river, completed adjustments as required. **12-23-12:** No activity.

Activity Areas	**Safety & Security, Air Operations, Waste Management, Overbank, Submerged Oil, Containment, Talmadge Creek, Kalamazoo River**
Health and Safety Issues	**Safety & Security (Dale Gross)** **General Safety Message:** **12-24-12, 12-25-12, 12-26-12, 12-27-12, 12-28-12, 12-29-12, 12-30-12, 12-31-12, 1-01-13, 1-02-13, 1-03-13, 1-04-13, 1-05-13 and 1-06-13:** No Activity. **Safety Items for December 24th, 2012, December 25th, 2012, December 26th, 2012, December 27th, 2012, December 28th, 2012, December 29th, 2012, December 30th, 2012, December 31st, 2012, January 1st, 2013, January 2nd, 2013, January 3rd, 2013, January 4th, 2013, January 5th, 2013, and January 6th, 2013:** No issues to report. **1-07-13: Unsafe Acts** Many incidents are a result of unsafe acts, or things we do when we know better. This is kind of strange if you think about it. We have more to fear from our own actions than from any other job hazards around us. What is the reasoning for exposing ourselves to potential injury? **It Won't Happen To Me** Basically, when we are thinking about getting the job done, we tend to rationalize the risk of getting injured. We think to ourselves that we have done this job many times this way and nothing bad has happened. Therefore, nothing bad will happen to us today. Because we have not been injured so far, we actually think of ourselves as being very safety conscious. We know the right way to do it, we realize that it is hazardous to do it this way, but what we are really thinking to ourselves is "it won't happen to me." **We Take Short Cuts** Often when a job "will only take a minute" we may use an unsafe method or tool. For example, not putting on our safety glasses because the job will only take a minute, or not locking out a machine because an adjustment will only take a second. Usually we think about it just before we do something a little unsafe, or maybe quite a bit unsafe. We know better, we know the safe way to do it, but we take that little chance. In effect we are saying, "I know that this could result in an injury, but "it can't happen to me Why take a chance in the first place? Only you can decide to take the time to do your job safely and correctly the first time. **Safety Items for January 7th, 2013:** River operations suspended due to ice on river.

Health and Safety Issues (Cont.)

1-08-13: Chocking Vehicles and Equipment

Effective chocking practices are important to operator and public safety, and for avoiding unnecessary costs due to damages. A vehicle, trailer, or other mobile equipment moving uncontrollably can have devastating consequences. Chocks prevent the mobile equipment from inadvertently moving. Chocks slide tightly underneath and behind the wheels.

Guidelines for Effective Chocking:

- Attempt to park the equipment on the flattest surface whenever possible.
- Use chocking in addition to other methods, including the use of the parking brake, parking in gear or turning the wheels into a curb or berm.
- The height, width and length of the chock should be large enough to prevent the mobile equipment from rolling over it. Lay the chocks side-by-side if necessary to cover the width of the tire.
- Do not unhook trailers or equipment without chocking first.

Remember: The heavier the mobile equipment, the lesser the slope required for it to begin to roll.
Safety Items for January 8th, 2013: River operations suspended due to ice on river.

1-09-13: Cold Weather Recommendations

Workers should avoid exposure to extremely cold temperatures when possible. When cold environments or temperatures cannot be avoided, workers should follow these recommendations to protect themselves from cold stress:

- Wear appropriate clothing.
  - Wear several layers of loose clothing. Layering provides better insulation.
  - Tight clothing reduces blood circulation. Warm blood needs to be circulated to the extremities.
  - When choosing clothing, be aware that some clothing may restrict movement resulting in a hazardous situation.
- Make sure to protect the ears, face, hands and feet in extremely cold weather.
  - Boots should be waterproof and insulated.
  - Wear a hat; it will keep your whole body warmer. (Hats reduce the amount of body heat that escapes from your head.)
- Move into warm locations during work breaks; limit the amount of time outside on extremely cold days.
- Carry cold weather gear, such as extra socks, gloves, hats, jacket, blankets, a change of clothes and a thermos of hot liquid.
- Avoid touching cold metal surfaces with bare skin.
- Monitor your physical condition and that of your coworkers.

Safety Items for January 9th, 2013: River operations suspended due to ice on river. River operations scheduled to resume on 1/10/13.

1-10-13: Slips, Trips, and Falls - Contributing Factors and Behaviors

Contributing Factors

Proper housekeeping in work and walking areas can contribute to safety and the prevention of falls. Not only is it important to maintain a safe working environment and walking surface, these areas must also be kept free of obstacles which can cause slips and trips.

Adequate lighting to ensure proper vision is also important in the prevention of slips and falls. Moving from light to dark areas, or vice versa, can cause temporary vision problems that might enough to cause a person to slip on a wet floor or trip over a misplaced object.

Carrying an oversized object can also obstruct one's vision and result in a slip or a trip. This is a particularly

Health and Safety Issues (Cont.)	serious problem on stairs. **<u>Behaviors that Lead to Falls</u>** There are specific behaviors which can lead to slips, trips, and falls. Walking too fast or running can cause major problems. In normal walking, the most force is exerted when the heel strikes the ground, but in fast walking or running, one lands harder on the heel of the front foot and pushes harder off the sole of the rear foot; thus, greater traction is required to prevent slips and falls. Rapid changes in direction create a similar problem. Other problems that can lead to slips, trips, and falls are: distractions; not watching where one is going; carrying materials which obstruct view; wearing sunglasses in low-light areas; and failure to use handrails. These and other behaviors, caused by lack of knowledge, impatience, or bad habits developed from past experiences, can lead to falls, injuries, or even death. **Safety Items for January 10th, 2013:** No issues. **1-11-13: Hypothermia** Hypothermia occurs when the body loses more heat than it produces. Symptoms include change in mental status, uncontrollable shivering, cool abdomen and a low core body temperature. Severe hypothermia may cause rigid muscles, dark and puffy skin, irregular heartbeat and respiration, and unconsciousness. Treat hypothermia by protecting the victim from further heat loss and seeking immediate medical attention. Get the victim out of the cold. Add insulation such as blankets, pillows, towels or newspapers beneath and around the victim. Be sure to cover the victim's head. Replace wet clothing with dry clothing. Handle the victim gently because rough handling can cause cardiac arrest. Keep the victim in a horizontal (flat) position. **Safety Items for January 11th:** No issues to report. **1-12-13 and 1-13-13: Life Saving Rule #1 – Hazard Management** ➢ Always ensure an analysis has been performed for any potential hazards that may arise. ➢ Proper authorization must be received prior to starting any work. ➢ Follow the guidance that is provided in the hazard identification documentation to ensure the safety and security of the workers and the work site. ***Remember:* When we use our heads and follow the rules, we can all get home safe.** **Safety Items for January 12th, 2013 and January 13th, 2013:** No issues to report.
Activities / Comments	**<u>Waste Management (John Wallace):</u>** **12-24-12, 12-25-12, 12-26-12, 12-27-12, 12-28-12, 12-29-12, 12-30-12, 12-31-12, 1-01-13, 1-02-13, 1-03-13, 1-04-13, 1-05-13 and 1-06-13:** <u>Decon:</u> No activities. <u>T&D</u>: No activities. <u>Waste Management Characterization</u>: No activities. **1-07-13, 1-08-13, 1-09-13, 1-10-13 and 1-11-13:** <u>Decon:</u> No activities. <u>T&D</u>: No activities. <u>Waste Management Characterization</u>: Continuing waste management characterization, documentation and coordination. **1-12-13 and 1-13-13:** <u>Decon:</u> No activities. <u>T&D</u>: No activities. <u>Waste Management Characterization</u>: No activities.

Planning Resources

IAP's

Prepared for U.S. EPA and MDEQ

Enbridge Energy, Limited Partnership

Submitted: January 23, 2013

1. Incident Name	2. Operational Period (Date/Time)	IAP
Kalamazoo River/Enbridge Spill	Starting: **November 27, 2012, 0700** End: **December 10, 2012, 0700**	**Cover Sheet**

3. Approved by Incident Commander(s):

M. DeLong Michelle DeLong, Michigan Department Environmental Quality

for Ralph Dollhopf, U.S. EPA

John Sobojinski, Enbridge

INCIDENT ACTION PLAN

The items below are included in this Incident Action Plan:

- ICS 202 (Response Objectives) 1
- ICS 207 (Organizational Chart & OPS Chart) 2
- ICS 204 (Assignment List) 5
- Communications List 11
- Project Schedule 13
- Meeting Locations and Traffic Plans 14
- Medical Plan and hospital maps 23
- Meetings Schedule 28

4. Prepared By:	Date/Time
Brad Nelson, Avery/Enbridge	11/16/2012

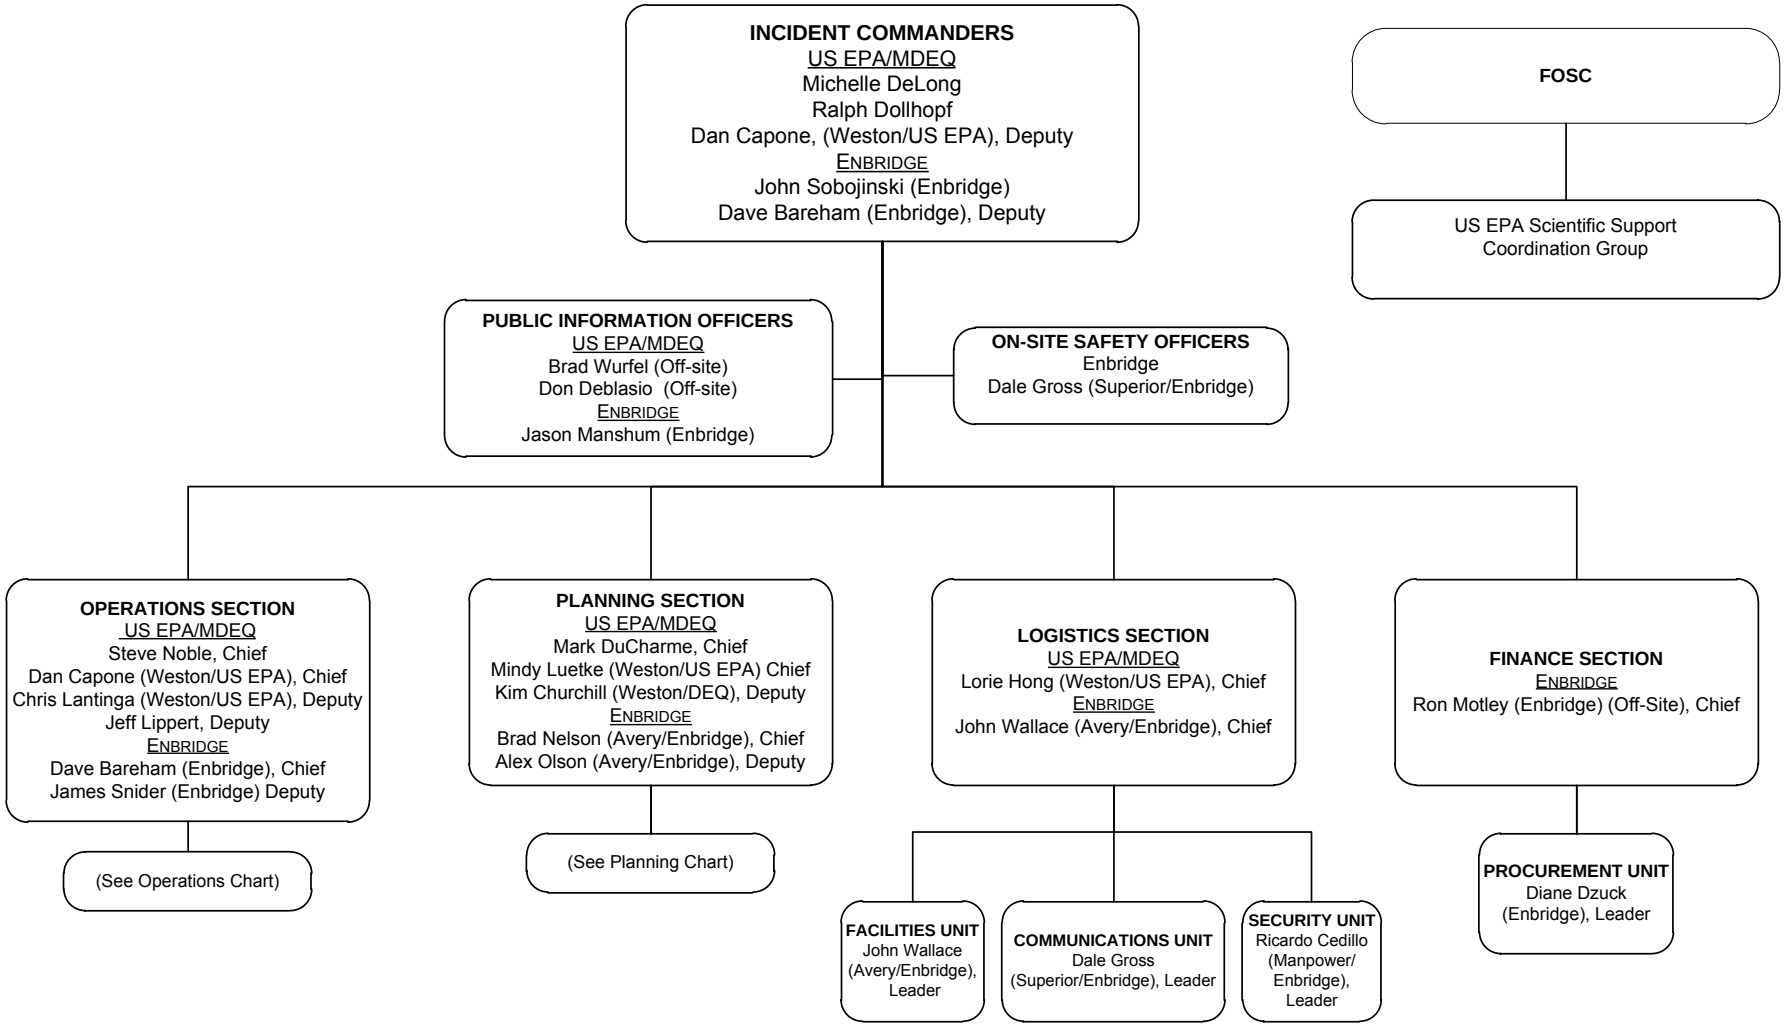
THIS PAGE INTENTIONALY LEFT BLANK

1. Incident Name	2. Operational Period (Date/Time)	INCIDENT OBJECTIVES
Kalamazoo River/Enbridge Spill	From: November 27, 2012 @ 0700 To: December 10, 2012 @ 0700	**ICS 202-EPA**

3. Incident Objective(s)

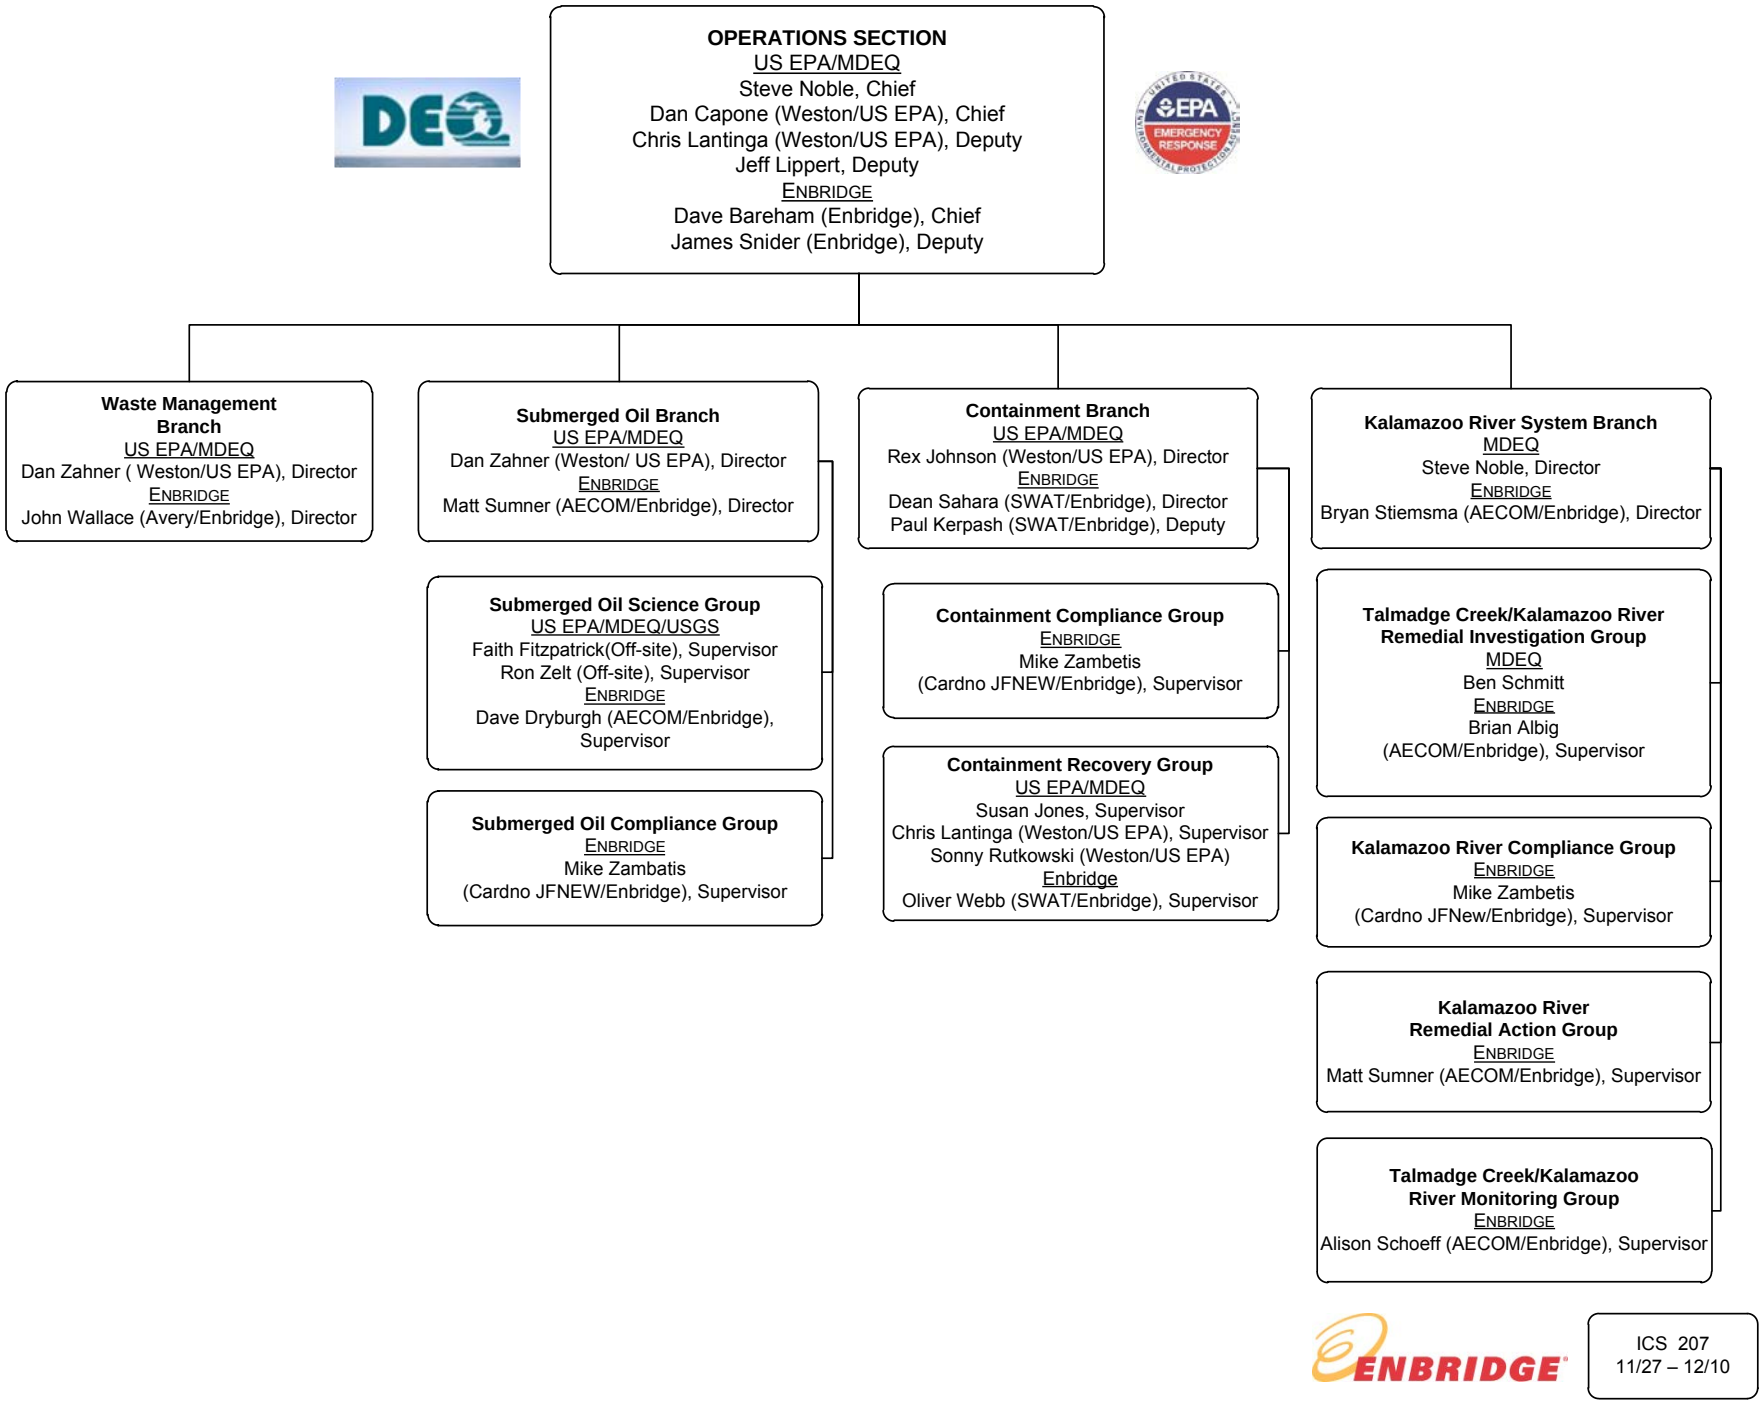
1. Ensure health and safety of the public and response and recovery personnel.
2. Ensure absolute containment of submerged oil and oil-containing sediments within the Delta and the Fan of Morrow Lake.
3. Ensure effective transition of regulatory oversight from EPA to Michigan DEQ jurisdiction as appropriate.
4. Perform recovery and containment of oil from affected public and private areas of river and river system.
5. Perform remediation and restoration of affected public and private areas of river and river system.
6. Maintain effective communications with cooperating and assisting agencies, the public, including regular coordination with the Multi-Agency Coordination Group (MAC).
7. Provide protection of environmentally and culturally sensitive areas including wildlife and historic properties.
8. Collect, coordinate, manage and communicate environmental and public health data including maintenance of Joint Information Center function.

4. Operational Period Command Emphasis



1. Respond to and document emerging oil throughout the Kalamazoo River system.
2. Implement path forward for submerged oil quantification cores.
3. Complete safe and efficient removal of the E4.0 containment system.

5. Safety Objectives for the Operational Period



1. Focus on travel hazards as temperatures decrease.
2. Ensure the safe interaction between workers and the public, including hunters.

6. Prepared by Planning Section Chief (Enbridge):	**Date/Time:**	
Brad Nelson	11/16/2012	1145

7. Work Assignments

1. Field decon operations for: personnel, hand equipment, and boats for preparation of transport shall be installed prior to work beginning at boat launches / staging areas for individual work sites.
2. Haul contaminated soil, water, media and debris to staging areas for waste characterization and oil recovery sampling prior to offsite disposal.
3. Waste shall be collected as needed for direct haul to the landfill or transported to Frac Tank City (FTC) for consolidation with similar waste streams as necessary.
4. Waste management characterization, manifesting, and coordination of transportation and disposal.

For US EPA/MDEQ/Weston:

1. Provide oversight of all waste management activities.
2. Ensure appropriate sampling, tracking and disposal is performed on oil impacted debris, water and soil.
3. Review manifests, weight tickets and bills of lading for correlation to waste stream analytical data.
4. Review weekly oil recovery and waste disposal report.

8. Special Instructions

Ensure all Best Management Practices (BMPs) are in place and utilized.

In accordance with the Fatigue Management Plan, all work permit activities will be completed no later than 1900.

SAFETY INSTRUCTIONS:

For vacuum truck operation guidelines, please refer the HASP.

At Frac Tank City:

- The following procedure shall be used for initial opening of hatch or rear doors of liquid vacuum trucks and hatches of vacuum excavation units:
  - Approach the hatch to be opened with a calibrated five gas monitor and a benzene monitor.
  - Personnel performing this task must wear a full face respirator with organic vapor cartridge.
  - Slightly open the hatch and take VOC, H2S, LEL, Oxygen, CO and benzene readings.
  - If readings are greater than 10 ppm H2S, 10% LEL, 25 ppm CO or 25 ppm benzene then personnel shall close the hatch and utilize SCBA prior to opening the hatch.
- Operations - Respiratory protection may be required depending on periodic monitoring results. Wear a half-mask respirator equipped with an organic vapor cartridge when 0.5 ppm benzene is detected. Wear a full-face respirator equipped with an organic vapor/acid gas cartridge when benzene is at 5 ppm to 25 ppm.

9. Communications (radio and/or phone contact numbers needed for this assignment)

7. Work Assignments

Submerged Oil Science

1. Conduct bathymetry on the E4 Containment System. (1-2 Team)
2. Conduct phase I &II sediment trap sampling and bathymetry. (1-2 Team)
3. Survey monuments around the E4 containment system and sediment traps. (1 Team)
4. Complete core logging activities on the remaining quantification of oil cores (1 Team)

For US EPA/MDEQ/Weston:

1. Oversee and document Submerged Oil Science work activities.

Submerged Oil Compliance

1. Track previously submitted MDEQ permit applications for toolbox methods.

8. Special Instructions

Rowe Island, MP 38.50 to MP 38.75, is a No Go Zone – Environmental Sensitive Area.

SAFETY INSTRUCTIONS:

All in water activities of workers in water depths over fifty percent (50%) of thigh height will require tethering. Please refer to the HASP for further instructions.

7. Work Assignments

Containment Compliance

1. Provide support as necessary.

Containment Recovery

1. Perform containment strategies along the Kalamazoo River including the following tasks:
   a. Deploy and maintain shoreline containment boom as required.
   b. Complete sheen management as required.
2. Complete removal of E4.0 containment system per the Approved Removal Plan.
3. Maintain Kalamazoo River Sediment Traps, including any cylindrical sampling devices.

For US EPA/MDEQ/Weston:

1. Oversee and document Containment Recovery activities.

8. Special Instructions

Rowe Island, MP 38.50-MP 38.75, is a No Go Zone – Environmental Sensitive Area.

Talmadge Creek/Kalamazoo River Monitoring	Alison Schoeff (AECOM/Enbridge)		1 Contractor

7. Work Assignments

Talmadge Creek/Kalamazoo River Remedial Investigation

1. Continue Kalamazoo River remedial investigation field work. (1 Team)

For DEQ:

1. Observe and document RI activities with emphasis on conformance with approved work plans and standard operating procedures.
2. Collect RI split samples at approved frequency for soil, sediment and groundwater.

Kalamazoo River Compliance

1. Provide support as necessary.
2. Conduct decommissioning activities as needed.

Talmadge Creek/Kalamazoo River Remedial Action

1. Execute tasks assigned by ERO as requested.

Talmadge Creek/Kalamazoo River Monitoring

1. Conduct daily monitoring of river conditions.
2. Conduct Quarterly and Semi Annual Drinking Water Sampling Event.

8. Special Instructions

Rowe Island, MP 38.50 to MP 38.75, is a No Go Zone – Environmental Sensitive Area.

SAFETY INSTRUCTIONS:

When operating or working in the vicinity of ultra violet testing equipment, wear approved safety glasses that provide protection from UV A rays and never look directly into the illuminator.

All in water activities of workers in water depths over fifty percent (50%) of thigh height will require tethering. Please refer to the HASP for further instructions.

9. Communications (radio and/or phone contact numbers needed for this assignment)

Division Identifier	Leader	Contact Info. #	# of Persons
Situation Unit	Matt Haak (Weston/ US EPA) Larry Rader (Weston/ US EPA) Mark Fuller (AECOM/Enbridge)	[redacted]	1 Weston/EPA 1 Contractor
Resource Unit	Lorie Hong (Weston/US EPA) Alex Olson (Avery/Enbridge), Assistant		1 Contractor
Environmental Unit	Mike Alexander (Off-site) Kim Churchill (Weston/MDEQ) Isaac Aboulafia (Weston/US EPA) Elizabeth Wessling (Weston/US EPA)(Off-site) Faith Fitzpatrick (USGS) Ron Zelt (Off-site) (USGS), Assistant Rex Johnson (Weston/US EPA), Assistant Tom Graan (Weston/US EPA) , Assistant John Bohrmann (Enbridge)		1 Weston/MDEQ 2 MDEQ 2 Contractors
Documentation Unit	Crystal Laskey Carolyn Giles-Smith (Weston/MDEQ) Paul Moisan (Weston/US EPA)		1 Contractors

7. Work Assignments

Situation Unit:

1. Record and document sheen observations in main channel and overbank areas, and conduct sheen testing, if necessary. Report sheen observations back to operations section chiefs for monitoring and response.
2. Conduct weekly overflights; photo-document areas of sheen from source area to Morrow Lake dam and report observations back to operations section chiefs for monitoring and response. Additional flights will be scheduled as needed.
3. Organize field metrics, prepare for and facilitate presentations, and monitor action tracking. Maintain situational awareness around operational activities and plan for operational needs.

For US EPA/MDEQ/Weston:

1. Maintain situational awareness around operational activities.
2. Communicate observations to the Operations Section Chief.
3. Provide daily situational photo log summaries.
4. Conduct daily monitoring of river conditions, recording observations of sheen and/or oil.
5. Record and document sheen observations in main channel and overbank areas, and conduct sheen testing, if necessary. Report sheen observations back to operations section chiefs for monitoring and response.

Resource Unit:

1. Produce an Incident Action Plan as required by the Incident Commanders.
2. Support the planning efforts of operations and provide information to Logistics in order to properly prepare and order resources.

Environmental Unit:

1. Conduct strategic assessment, modeling, and environmental monitoring.
2. Review sheen tracking information from the field.
3. Continue submerged oil quantification for Spring 2012 with emphasis on implementing the path forward for submerged oil quantification cores.
4. Refine subsurface containment strategies throughout the Kalamazoo River system to prevent recontamination of the Morrow Lake fan.
5. Review and track RI progress.
6. Continue discussions on NAPL.
7. Review of property parcels for MDEQ end points.

For US EPA/MDEQ/Weston:

1. Continue to coordinate efforts to calculate the quantity of submerged oil remaining as of Spring 2012.
2. Continue supporting the evaluation of the hydrogeomorphology of the Kalamazoo River, the Morrow Lake Delta, and Morrow Lake.
3. Interface with Enbridge and assist with the refinement of surface and subsurface containment strategies throughout the Kalamazoo River system to prevent the continued migration of oil, oil sheen, submerged oil, and oil-containing sediments into Morrow Lake.
4. Review and comment on RI progress submittals
5. Support development of NAPL CSM.
6. Review Enbridge submittals with emphasis on compliance with state endpoints.

Documentation Unit:

1. Maintain accurate, up-to-date incident files.
2. Store files for post-incident use.

8. Special Instructions

In accordance with the Fatigue Management Plan, all work permit activities will be completed no later than 1900.

SAFETY INSTRUCTIONS:

Hexane is flammable and may be harmful in contact with skin. When handling hexane and sheen test samples containing hexane, wear approved safety glasses, disposable nitrile gloves and keep away from ignition sources. Properly dispose of sheen test samples containing hexane.

9. Communications (radio and/or phone contact numbers needed for this assignment)

Medical Emergency Procedures

1. Dial 9-1-1 for all emergencies. Give 9-1-1 operators as much information as possible. Stay on the line and answer all questions – information may be radioed to responders. On-site personnel trained and certified in first aid should attempt to stabilize victim until fire department/EMS personnel arrive.
2. Report all incidents to the Project Safety Officer. Keep a log of events. Secure the area. Identify witnesses for later investigation.

NOTE: Suspend all operations during an actual emergency situation!

INCIDENT ACTION PLAN

The items below are included in this Incident Action Plan:

- ICS 202 (Response Objectives).....1
- ICS 207 (Organizational Chart & OPS Chart).....2
- ICS 204 (Assignment List) 5
- Communications List.....11
- Project Schedule 13
- Meeting Locations and Traffic Plans.....14
- Medical Plan and hospital maps 23
- Meetings Schedule.....28

4. Prepared By: Date/Time

Brad Nelson, Avery/Enbridge 12/6/2012

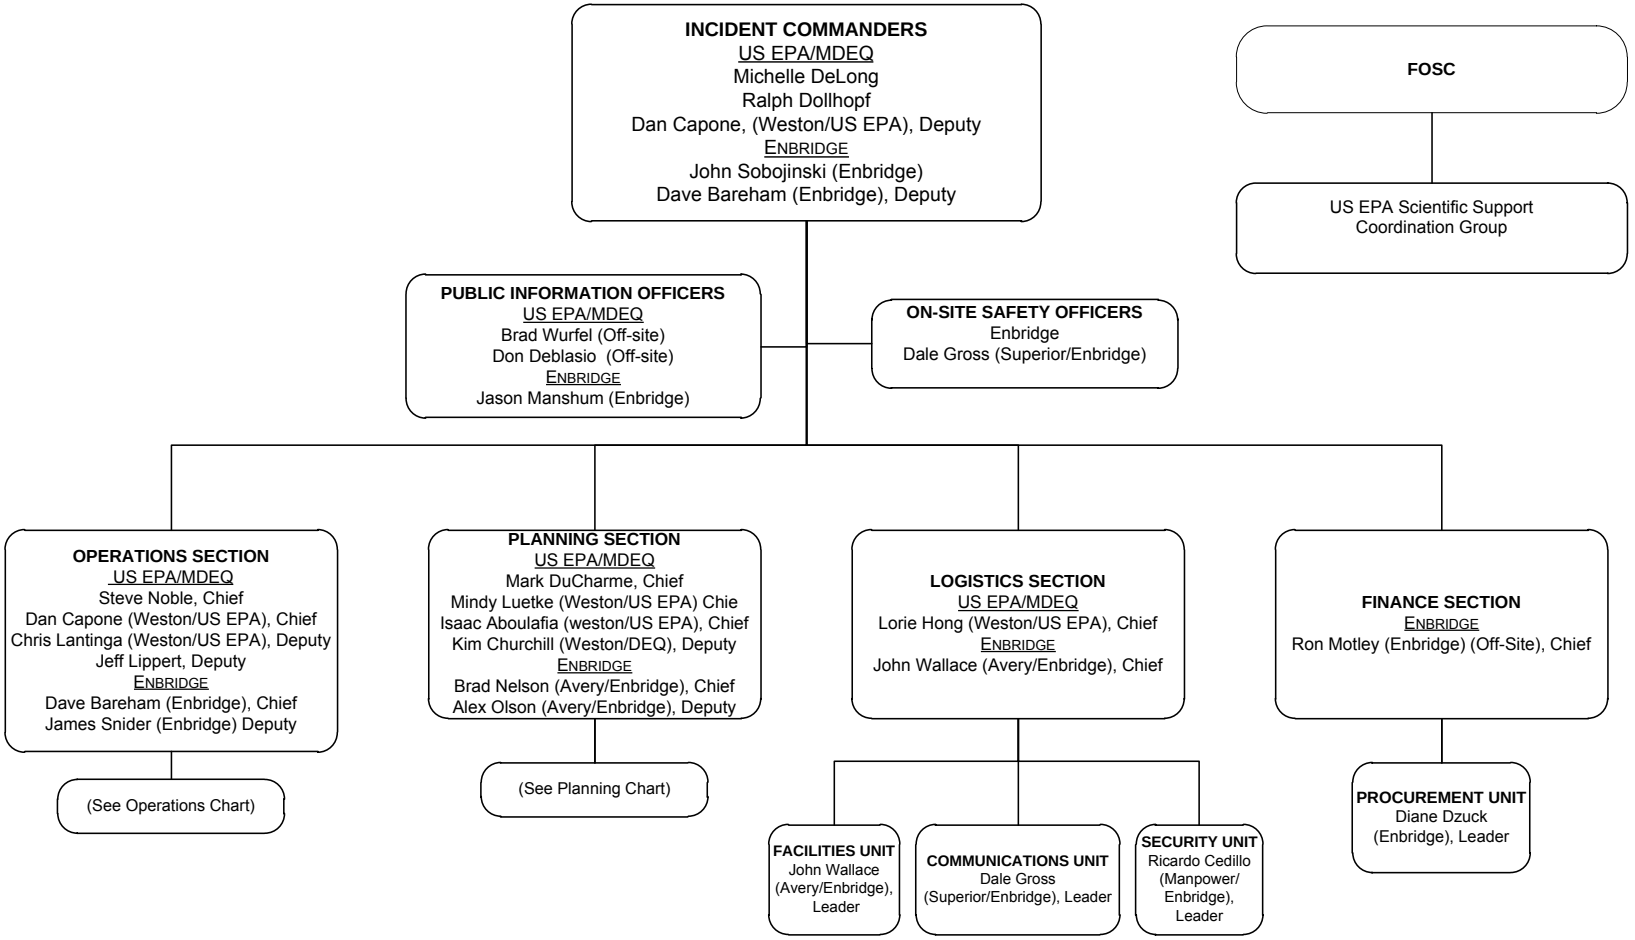
THIS PAGE INTENTIONALY LEFT BLANK

1. Incident Name	2. Operational Period (Date/Time)	INCIDENT OBJECTIVES
Kalamazoo River/Enbridge Spill	From: December 10, 2012 @ 0700 To: December 24, 2012 @ 0700	**ICS 202-EPA**

3. Incident Objective(s)

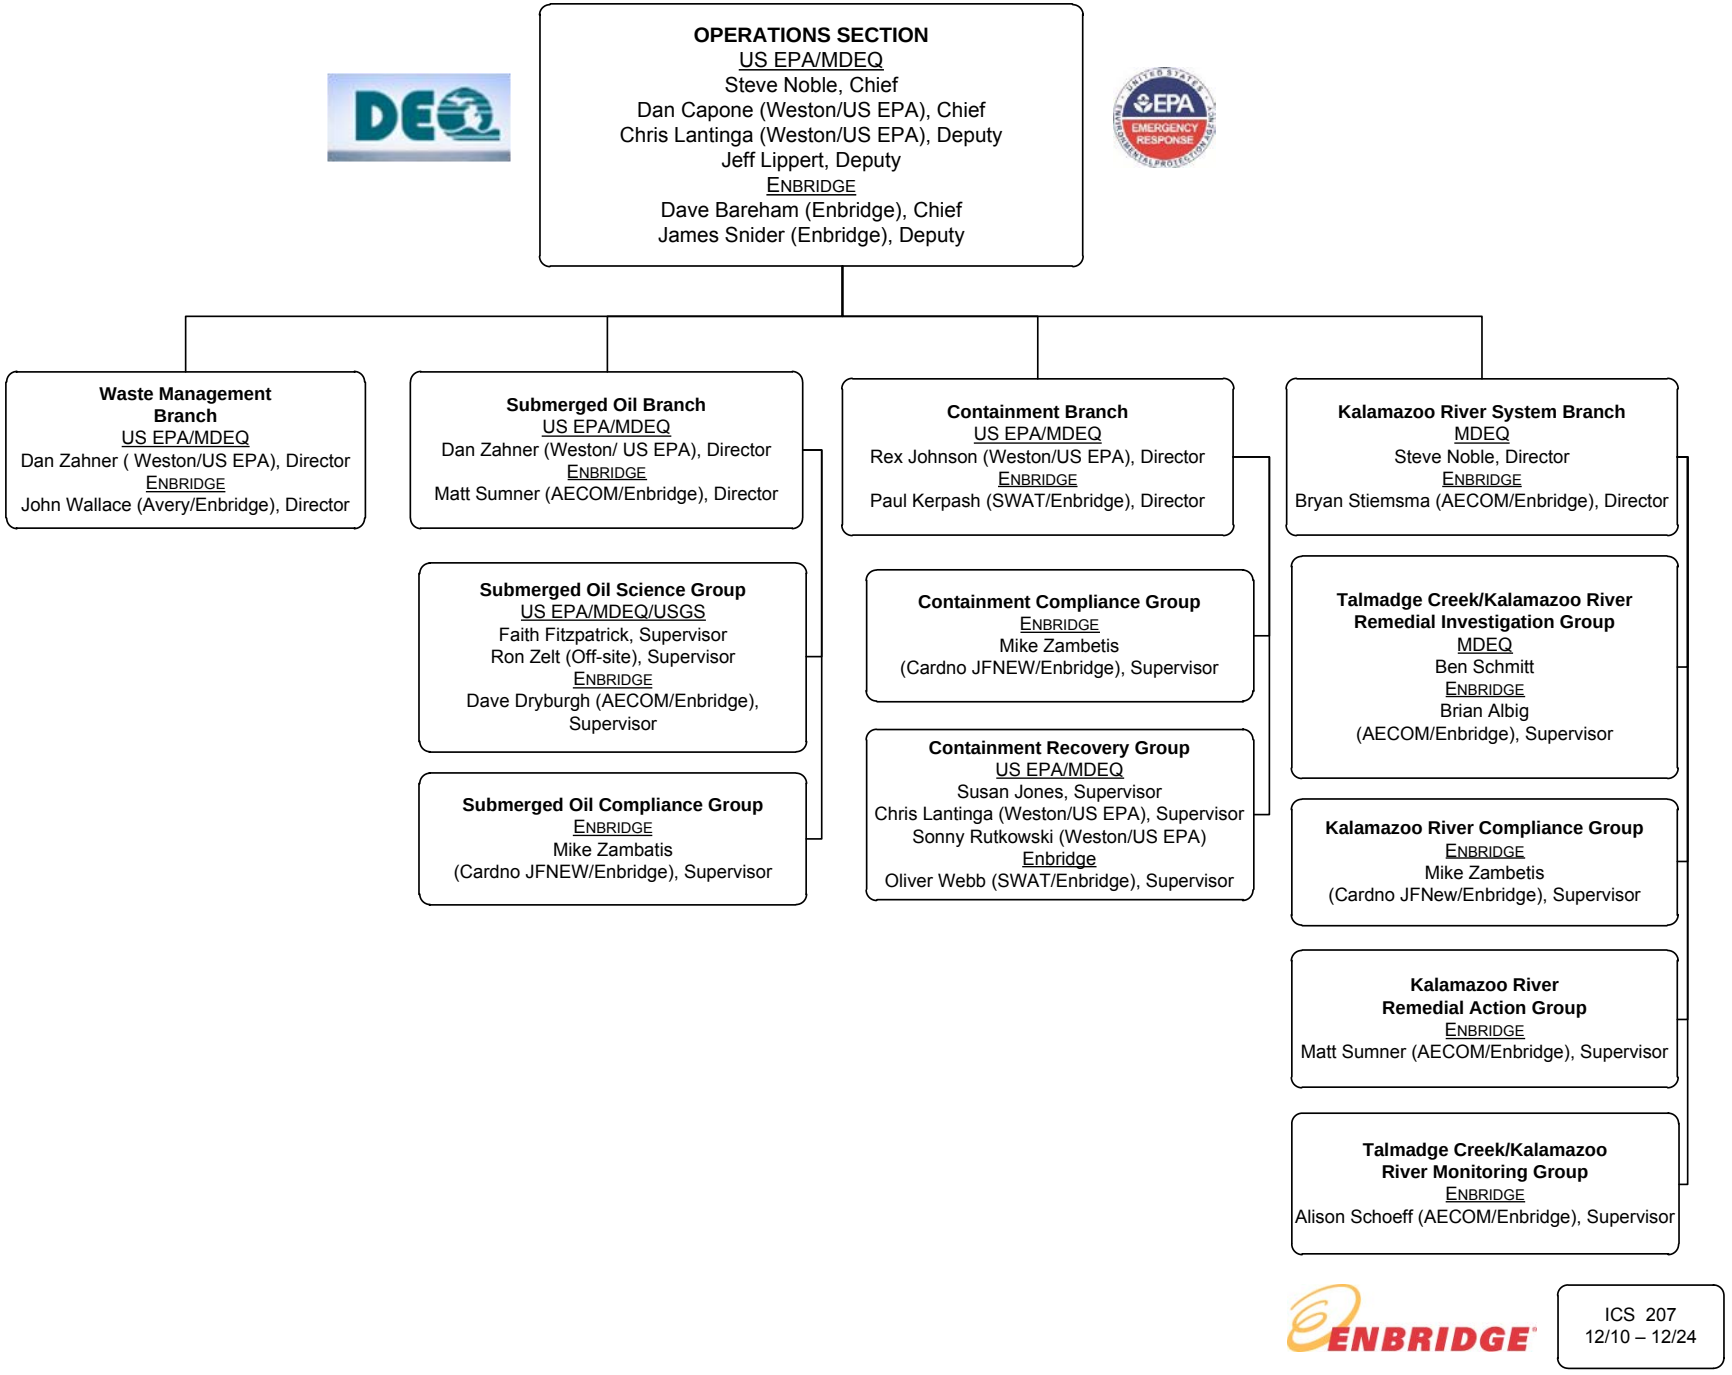
1. Ensure health and safety of the public and response and recovery personnel.
2. Ensure absolute containment of submerged oil and oil-containing sediments within the Delta and the Fan of Morrow Lake.
3. Ensure effective transition of regulatory oversight from EPA to Michigan DEQ jurisdiction as appropriate.
4. Perform recovery and containment of oil from affected public and private areas of river and river system.
5. Perform remediation and restoration of affected public and private areas of river and river system.
6. Maintain effective communications with cooperating and assisting agencies, the public, including regular coordination with the Multi-Agency Coordination Group (MAC).
7. Provide protection of environmentally and culturally sensitive areas including wildlife and historic properties.
8. Collect, coordinate, manage and communicate environmental and public health data including maintenance of Joint Information Center function.

4. Operational Period Command Emphasis



1. Respond to and document emerging oil throughout the Kalamazoo River system.

5. Safety Objectives for the Operational Period



1. Emphasize safety awareness of changing work site conditions because of colder temperatures.
2. Ensure the safe interaction between workers and the public, including hunters.

6. Prepared by Planning Section Chief (Enbridge):	Date/Time:
Brad Nelson	12/6/2012
7. Approved by Incident Commander (DEQ):	**Date/Time:**
Michelle DeLong	12/6/2012
8. Approved by Incident Commander (US EPA):	**Date/Time:**
Ralph Dollhopf	12/6/2012
10. Approved by Incident Commander (Enbridge):	**Date/Time:**
John Sobojinski	12/6/2012

ICS 207
12/10 – 12/24

1. Incident Name	2. Operational Period (Date/Time)	Assignment List ICS 204- EPA
Kalamazoo River/Enbridge Spill Response	From: December 10, 2012, 0700 To: December 24, 2012, 0700	
3. Branch	**4. Division/Group/Staging**	
Waste Management		

5. Operations Personnel

	Name	Affiliation	Contact # (s)
Operations Section Chief:	Steve Noble	MDEQ	[redacted]
	Dan Capone	Weston/US EPA	
	Chris Lantinga, Deputy	Weston/US EPA	
	Jeff Lippert, Deputy	EPA	
	Dave Bareham	Enbridge	
	James Snider, Deputy	Enbridge	
Branch Director:	Dan Zahner	Weston/US EPA	
	John Wallace	Avery/Enbridge	

6. Resources Assigned

See Branch Directors			

7. Work Assignments

1. Field decon operations for: personnel, hand equipment, and boats for preparation of transport shall be installed prior to work beginning at boat launches / staging areas for individual work sites.
2. Haul contaminated soil, water, media and debris to staging areas for waste characterization and oil recovery sampling prior to offsite disposal.
3. Waste shall be collected as needed for direct haul to the landfill or transported to Frac Tank City (FTC) for consolidation with similar waste streams as necessary.
4. Waste management characterization, manifesting, and coordination of transportation and disposal.

For US EPA/MDEQ/Weston:

1. Provide oversight of all waste management activities.
2. Ensure appropriate sampling, tracking and disposal is performed on oil impacted debris, water and soil.
3. Review manifests, weight tickets and bills of lading for correlation to waste stream analytical data.
4. Review weekly oil recovery and waste disposal report.

8. Special Instructions

The Winter Stand Down will begin Friday, December 21, at 1900. Report back to work Monday, January 7, 2013 or as directed by your supervisor. This stand down does not apply to the Sheen Management activities and 1 Situation Unit team. Sheen Management activities will continue during the Winter Stand Down. These activities include:

- Control Point Monitoring, Management and Cleaning;
- Sheen Sweep Crews will remain on standby and ready for rapid response.
- Operations Section Chiefs will be on call and available to direct sheen response activities as needed.

Ensure all Best Management Practices (BMPs) are in place and utilized.

In accordance with the Fatigue Management Plan, all work permit activities will be completed no later than 1900.

SAFETY INSTRUCTIONS:
For vacuum truck operation guidelines, please refer the HASP.

At Frac Tank City:

- The following procedure shall be used for initial opening of hatch or rear doors of liquid vacuum trucks and hatches of vacuum excavation units:
  - Approach the hatch to be opened with a calibrated five gas monitor and a benzene monitor.
  - Personnel performing this task must wear a full face respirator with organic vapor cartridge.
  - Slightly open the hatch and take VOC, H2S, LEL, Oxygen, CO and benzene readings.
  - If readings are greater than 10 ppm H2S, 10% LEL, 25 ppm CO or 25 ppm benzene then personnel shall close the hatch and utilize SCBA prior to opening the hatch.
- Operations - Respiratory protection may be required depending on periodic monitoring results. Wear a half-mask respirator equipped with an organic vapor cartridge when 0.5 ppm benzene is detected. Wear a full-face respirator equipped with an organic vapor/acid gas cartridge when benzene is at 5 ppm to 25 ppm.

9. Communications (radio and/or phone contact numbers needed for this assignment)

Incident Command Safety Office: 269-753-9347

Emergency Communications: Use IAP Medical Plan/IAP Phone list. Dial 911 for Medical Emergency.

7. Work Assignments

Submerged Oil Science

1. Conduct bathymetry on Phase I&II sediment traps and former E4 containment system. (6 Teams)
2. Conduct phase I &II sediment trap sampling. (1 Team)
3. Conduct poling activities downstream of Morrow Lake dam (1 Team)

For US EPA/MDEQ/Weston:

1. Oversee and document Submerged Oil Science work activities.

Submerged Oil Compliance

1. Provide support as necessary.

8. Special Instructions

The Winter Stand Down will begin Friday, December 21, at 1900. Report back to work Monday, January 7, 2013 or as directed by your supervisor. This stand down does not apply to the Sheen Management activities and 1 Situation Unit team. Sheen Management activities will continue during the Winter Stand Down. These activities include:

- Control Point Monitoring, Management and Cleaning;
- Sheen Sweep Crews will remain on standby and ready for rapid response.
- Operations Section Chiefs will be on call and available to direct sheen response activities as needed.

Rowe Island, MP 38.50 to MP 38.75, is a No Go Zone – Environmental Sensitive Area.

SAFETY INSTRUCTIONS:
All in water activities of workers in water depths over fifty percent (50%) of thigh height will require tethering. Please refer to the HASP for further instructions.

Containment Compliance

1. Provide support as necessary.

Containment Recovery

1. Perform containment strategies along the Kalamazoo River including the following tasks:
   a. Deploy and maintain shoreline containment boom as required.
   b. Complete sheen management as required.
2. Maintain Kalamazoo River Sediment Traps, including any cylindrical sampling devices.

For US EPA/MDEQ/Weston:

1. Oversee and document Containment Recovery activities.

Talmadge Creek/Kalamazoo River Monitoring	Alison Schoeff (AECOM/Enbridge)		2 Contractor

7. Work Assignments

Talmadge Creek/Kalamazoo River Remedial Investigation

1. Continue Kalamazoo River remedial investigation field work. (1 Team)

For DEQ:

1. Observe and document RI activities with emphasis on conformance with approved work plans and standard operating procedures.
2. Collect RI split samples at approved frequency for soil, sediment and groundwater.

Kalamazoo River Compliance

1. Provide support as necessary.
2. Conduct decommissioning activities as needed.

Talmadge Creek/Kalamazoo River Remedial Action

1. Execute tasks assigned by ERO as requested.

Talmadge Creek/Kalamazoo River Monitoring

1. Conduct daily monitoring of river conditions.
2. Conduct quarterly and semi-annual drinking water sampling event.
3. Conduct quarterly groundwater sampling at Village of Augusta and City Kalamazoo well field #39.
4. Conduct monthly surface water monitoring, river and weather conditions permitting.
5. Conduct quarterly sediment monitoring, river and weather conditions permitting.

8. Special Instructions

The Winter Stand Down will begin Friday, December 21, at 1900. Report back to work Monday, January 7, 2013 or as directed by your supervisor. This stand down does not apply to the Sheen Management activities and 1 Situation Unit team. Sheen Management activities will continue during the Winter Stand Down. These activities include:

Resource Unit	Lorie Hong (Weston/US EPA) Alex Olson (Avery/Enbridge), Assistant		1 Contractor
Environmental Unit	Mike Alexander (Off-site) Kim Churchill (Weston/MDEQ) Vinnie DelloRusso (Weston/MDEQ), Assistant Isaac Aboulafia (Weston/US EPA) Elizabeth Wessling (Weston/US EPA)(Off-site Faith Fitzpatrick (USGS) Ron Zelt (Off-site) (USGS), Assistant Rex Johnson (Weston/US EPA), Assistant Tom Graan (Weston/US EPA) , Assistant John Bohrmann (Enbridge)		2 MDEQ 2 Contractors
Documentation Unit	Brad Nelson (Avery/Enbridge) Crystal Laskey Carolyn Giles-Smith (Weston/MDEQ) Paul Mosian (Weston/EPA)		1 Contractors

7. Work Assignments

Situation Unit:

1. Record and document sheen observations in main channel and overbank areas, and conduct sheen testing, if necessary. Report sheen observations back to operations section chiefs for monitoring and response.
2. Conduct weekly overflights; photo-document areas of sheen from source area to Morrow Lake dam and report observations back to operations section chiefs for monitoring and response. Additional flights will be scheduled as needed.
3. Organize field metrics, prepare for and facilitate presentations, and monitor action tracking. Maintain situational awareness around operational activities and plan for operational needs.

For US EPA/MDEQ/Weston:

1. Maintain situational awareness around operational activities.
2. Communicate observations to the Operations Section Chief.
3. Provide daily situational photo log summaries.
4. Conduct daily monitoring of river conditions, recording observations of sheen and/or oil.
5. Record and document sheen observations in main channel and overbank areas, and conduct sheen testing, if necessary. Report sheen observations back to operations section chiefs for monitoring and response.

Resource Unit:

1. Produce an Incident Action Plan as required by the Incident Commanders.
2. Support the planning efforts of operations and provide information to Logistics in order to properly prepare and order resources.

Environmental Unit:

1. Conduct strategic assessment, modeling, and environmental monitoring.
2. Review sheen tracking information from the field.
3. Continue submerged oil quantification for Spring 2012.
4. Refine subsurface containment strategies throughout the Kalamazoo River system to prevent recontamination of the Morrow Lake fan.
5. Review and track RI progress.
6. Continue discussions on NAPL.
7. Review of property parcels for MDEQ end points.

For US EPA/MDEQ/Weston:

1. Continue to coordinate efforts to calculate the quantity of submerged oil remaining as of Spring 2012.
2. Continue supporting the evaluation of the hydrogeomorphology of the Kalamazoo River, the Morrow Lake Delta, and Morrow Lake.
3. Interface with Enbridge and assist with the refinement of surface and subsurface containment strategies throughout the Kalamazoo River system to prevent the continued migration of oil, oil sheen, submerged oil, and oil-containing sediments into Morrow Lake.
4. Review and comment on RI progress submittals
5. Support development of NAPL CSM.
6. Review Enbridge submittals with emphasis on compliance with state endpoints.

Documentation Unit:

1. Maintain accurate, up-to-date incident files.
2. Store files for post-incident use.

8. Special Instructions

The Winter Stand Down will begin Friday, December 21, at 1900. Report back to work Monday, January 7, 2013 or as directed by your supervisor. This stand down does not apply to the Sheen Management activities and 1 Situation Unit team. Sheen Management activities will continue during the Winter Stand Down. These activities include:

- Control Point Monitoring, Management and Cleaning;
- Sheen Sweep Crews will remain on standby and ready for rapid response.
- Operations Section Chiefs will be on call and available to direct sheen response activities as needed.

In accordance with the Fatigue Management Plan, all work permit activities will be completed no later than 1900.

SAFETY INSTRUCTIONS:

Hexane is flammable and may be harmful in contact with skin. When handling hexane and sheen test samples containing hexane, wear approved safety glasses, disposable nitrile gloves and keep away from ignition sources. Properly dispose of sheen test samples containing hexane.

9. Communications (radio and/or phone contact numbers needed for this assignment)

Incident Command Safety Office: 269-753-9347

Emergency Communications: Use IAP Medical Plan/IAP Phone list. Dial 911 for Medical Emergency.

Medical Emergency Procedures

1. Dial 9-1-1 for all emergencies. Give 9-1-1 operators as much information as possible. Stay on the line and answer all questions – information may be radioed to responders. On-site personnel trained and certified in first aid should attempt to stabilize victim until fire department/EMS personnel arrive.
2. Report all incidents to the Project Safety Officer. Keep a log of events. Secure the area. Identify witnesses for later investigation.

NOTE: Suspend all operations during an actual emergency situation!

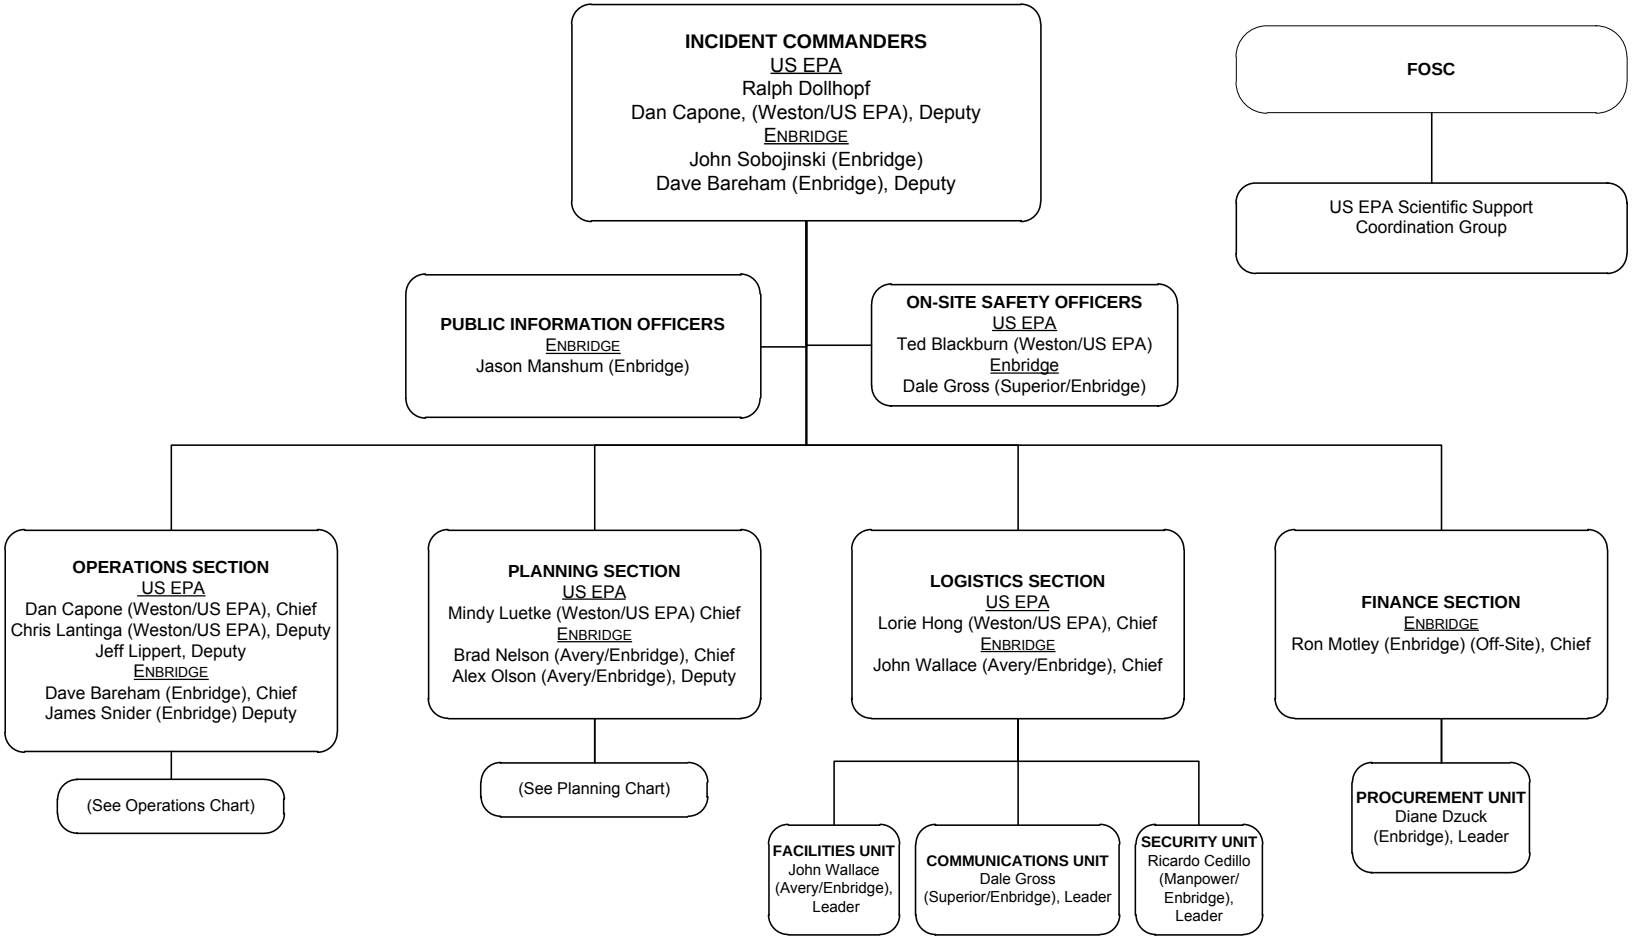
THIS PAGE INTENTIONALY LEFT BLANK

1. Incident Name	2. Operational Period (Date/Time)	INCIDENT OBJECTIVES
Kalamazoo River/Enbridge Spill	From: December 24, 2012 @ 0700 To: January 14, 2013 @ 0700	**ICS 202-EPA**

3. Incident Objective(s)

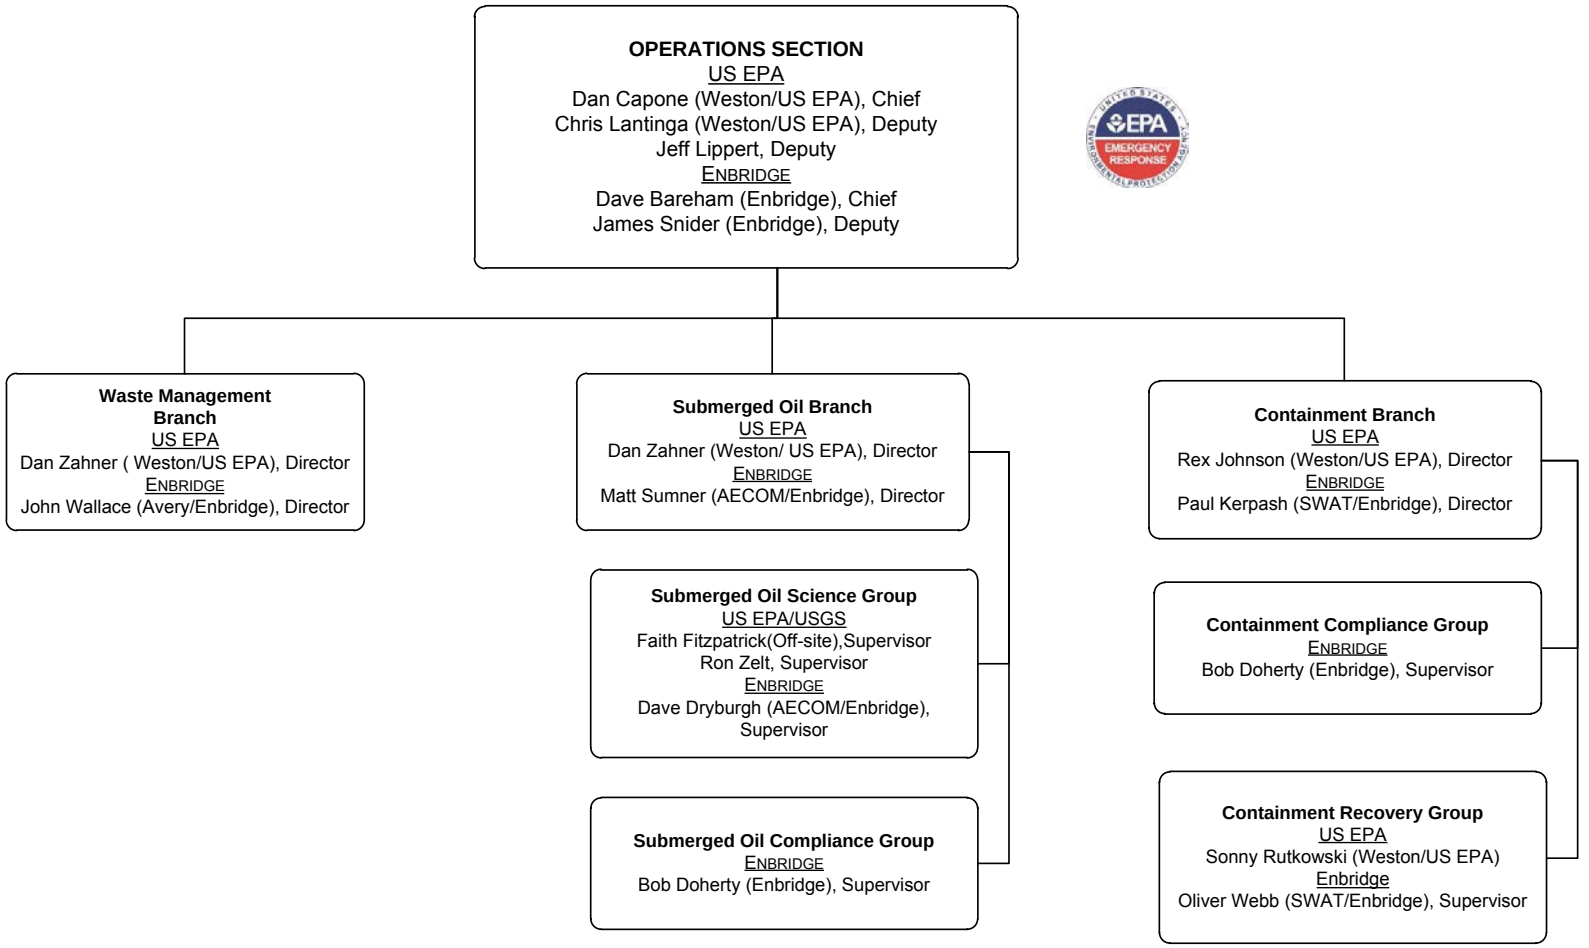
1. Ensure health and safety of the public and response and recovery personnel.
2. Ensure absolute containment of submerged oil and oil-containing sediments within the Delta and the Fan of Morrow Lake.
3. Ensure effective transition of regulatory oversight from EPA to Michigan DEQ jurisdiction as appropriate.
4. Perform recovery and containment of oil from affected public and private areas of river and river system.
5. Perform remediation and restoration of affected public and private areas of river and river system.
6. Maintain effective communications with cooperating and assisting agencies, the public, including regular coordination with the Multi-Agency Coordination Group (MAC).
7. Provide protection of environmentally and culturally sensitive areas including wildlife and historic properties.
8. Collect, coordinate, manage and communicate environmental and public health data including maintenance of Joint Information Center function.

4. Operational Period Command Emphasis



1. Respond to and document emerging oil throughout the Kalamazoo River system.

5. Safety Objectives for the Operational Period



1. Emphasize safety awareness of changing work site conditions because of colder temperatures.
2. Provide annual safety orientation training to onsite response personnel.

6. Prepared by Planning Section Chief (Enbridge):	**Date/Time:**

	Chris Lantinga, Deputy	Weston/US EPA	
	Jeff Lippert, Deputy	EPA	
	Dave Bareham	Enbridge	
	James Snider, Deputy	Enbridge	
Branch Director:	Dan Zahner	Weston/US EPA	
	John Wallace	Avery/Enbridge	

6. Resources Assigned

See Branch Directors			

7. Work Assignments

1. Field decon operations for: personnel, hand equipment, and boats for preparation of transport shall be installed prior to work beginning at boat launches / staging areas for individual work sites. *
2. Haul contaminated soil, water, media and debris to staging areas for waste characterization and oil recovery sampling prior to offsite disposal. *
3. Waste shall be collected as needed for direct haul to the landfill or transported to Frac Tank City (FTC) for consolidation with similar waste streams as necessary.*
4. Waste management characterization, manifesting, and coordination of transportation and disposal.*

*These activities are dependent on River and Weather safety conditions.

For US EPA/Weston:

1. Provide oversight of all waste management activities.
2. Ensure appropriate sampling, tracking and disposal is performed on oil impacted debris, water and soil.
3. Review manifests, weight tickets and bills of lading for correlation to waste stream analytical data.
4. Review weekly oil recovery.
5. Review biweekly waste disposal report.

8. Special Instructions

The Winter Stand Down will continue, report back to work Monday, January 7, 2013 or as directed by your supervisor. This stand down does not apply to the Sheen Management activities and 1 Situation Unit team. Sheen Management activities will continue during the Winter Stand Down. These activities include:

- Sheen Sweep Crews will remain on standby and ready for rapid response.
- Operations Section Chiefs will be on call and available to direct sheen response activities as needed.

Ensure all Best Management Practices (BMPs) are in place and utilized.

In accordance with the Fatigue Management Plan, all work permit activities will be completed no later than 1900.

SAFETY INSTRUCTIONS:
For vacuum truck operation guidelines, please refer the HASP.

At Frac Tank City:

- The following procedure shall be used for initial opening of hatch or rear doors of liquid vacuum trucks and hatches of vacuum excavation units:
  - Approach the hatch to be opened with a calibrated five gas monitor and a benzene monitor.
  - Personnel performing this task must wear a full face respirator with organic vapor cartridge.
  - Slightly open the hatch and take VOC, H2S, LEL, Oxygen, CO and benzene readings.
  - If readings are greater than 10 ppm H2S, 10% LEL, 25 ppm CO or 25 ppm benzene then personnel shall close the hatch and utilize SCBA prior to opening the hatch.
- Operations - Respiratory protection may be required depending on periodic monitoring results. Wear a half-mask respirator equipped with an organic vapor cartridge when 0.5 ppm benzene is detected. Wear a full-face respirator equipped with an organic vapor/acid gas cartridge when benzene is at 5 ppm to 25 ppm.

9. Communications (radio and/or phone contact numbers needed for this assignment)

Incident Command Safety Office: 269-753-9347

7. Work Assignments

Submerged Oil Science

1. Conduct bathymetry on Phase I&II sediment traps.* (4 Teams)

*These activities are dependent on River and Weather safety conditions.

For US EPA/Weston:

1. Oversee and document Submerged Oil Science work activities.

Submerged Oil Compliance

1. Provide support as necessary.

8. Special Instructions

The Winter Stand Down will continue, report back to work Monday, January 7, 2013 or as directed by your supervisor. This stand down does not apply to the Sheen Management activities and 1 Situation Unit team. Sheen Management activities will continue during the Winter Stand Down. These activities include:

- Sheen Sweep Crews will remain on standby and ready for rapid response.
- Operations Section Chiefs will be on call and available to direct sheen response activities as needed.

Rowe Island, MP 38.50 to MP 38.75, is a No Go Zone – Environmental Sensitive Area.

SAFETY INSTRUCTIONS:
All in water activities of workers in water depths over fifty percent (50%) of thigh height will require tethering. Please refer to the HASP for further instructions.

Containment Compliance

1. Provide support as necessary.

Containment Recovery

1. Perform containment strategies along the Kalamazoo River including the following tasks:
   a. Deploy and maintain shoreline containment boom as required.*
   b. Complete sheen management as required.*
2. Maintain Kalamazoo River Sediment Traps, including any cylindrical sampling devices.*

* These activities are dependent on River and Weather safety conditions.

For US EPA/Weston:

1. Oversee and document Containment Recovery activities.

8. Special Instructions

The Winter Stand Down will continue, report back to work Monday, January 7, 2013 or as directed by your supervisor. This stand down does not apply to the Sheen Management activities and 1 Situation Unit team. Sheen Management activities will continue during the Winter Stand Down. These activities include:

Situation Unit	Matt Haak (Weston/ US EPA) Larry Rader (Weston/ US EPA) Alex Olson (Avery/Enbridge)	[redacted]	1 Weston/EPA 1 Contractor
Resource Unit	Lorie Hong (Weston/US EPA) Alex Olson (Avery/Enbridge), Assistant		1 Contractor
Environmental Unit	Isaac Aboulafia (Weston/US EPA) (Off-site) Elizabeth Wessling (Weston/US EPA)(Off-site Faith Fitzpatrick (USGS) (Off-site) Ron Zelt (USGS), Assistant Rex Johnson (Weston/US EPA), Assistant Tom Graan (Weston/US EPA) , Assistant John Bohrmann (Enbridge)		2 Contractors
Documentation Unit	Lorie Hong (Weston/EPA) Brad Nelson (Avery/Enbridge)		1 Contractors

7. Work Assignments

Situation Unit:

1. Record and document sheen observations in main channel and overbank areas, and conduct sheen testing, if necessary. Report sheen observations back to operations section chiefs for monitoring and response.
2. Conduct weekly overflights; photo-document areas of sheen from source area to Morrow Lake dam and report observations back to operations section chiefs for monitoring and response. Additional flights will be scheduled as needed.
3. Organize field metrics, prepare for and facilitate presentations, and monitor action tracking. Maintain situational awareness around operational activities and plan for operational needs.

For US EPA/Weston:

1. Maintain situational awareness around operational activities.
2. Communicate observations to the Operations Section Chief.
3. Provide daily situational photo log summaries.
4. Conduct daily monitoring of river conditions, recording observations of sheen and/or oil.
5. Record and document sheen observations in main channel and overbank areas, and conduct sheen testing, if necessary. Report sheen observations back to operations section chiefs for monitoring and response.

Resource Unit:

1. Produce an Incident Action Plan as required by the Incident Commanders.
2. Support the planning efforts of operations and provide information to Logistics in order to properly prepare and order resources.

Environmental Unit:

1. Conduct strategic assessment, modeling, and environmental monitoring.
2. Review sheen tracking information from the field.
3. Continue submerged oil quantification for Spring 2012.

For US EPA/Weston:

1. Continue to coordinate efforts to calculate the quantity of submerged oil remaining as of Spring 2012.
2. Continue supporting the evaluation of the hydrogeomorphology of the Kalamazoo River, the Morrow Lake

Delta, and Morrow Lake.
3. Interface with Enbridge and assist with the refinement of surface and subsurface containment strategies throughout the Kalamazoo River system to prevent the continued migration of oil, oil sheen, submerged oil, and oil-containing sediments into Morrow Lake.

Documentation Unit:

1. Maintain accurate, up-to-date incident files.
2. Store files for post-incident use.

8. Special Instructions

The Winter Stand Down will continue, report back to work Monday, January 7, 2013 or as directed by your supervisor. This stand down does not apply to the Sheen Management activities and 1 Situation Unit team. Sheen Management activities will continue during the Winter Stand Down. These activities include:

- Sheen Sweep Crews will remain on standby and ready for rapid response.
- Operations Section Chiefs will be on call and available to direct sheen response activities as needed.

SAFETY INSTRUCTIONS:

Hexane is flammable and may be harmful in contact with skin. When handling hexane and sheen test samples containing hexane, wear approved safety glasses, disposable nitrile gloves and keep away from ignition sources. Properly dispose of sheen test samples containing hexane.

9. Communications (radio and/or phone contact numbers needed for this assignment)

Medical Emergency Procedures

1. Dial 9-1-1 for all emergencies. Give 9-1-1 operators as much information as possible. Stay on the line and answer all questions – information may be radioed to responders. On-site personnel trained and certified in first aid should attempt to stabilize victim until fire department/EMS personnel arrive.
2. Report all incidents to the Project Safety Officer. Keep a log of events. Secure the area. Identify witnesses for later investigation.

NOTE: Suspend all operations during an actual emergency situation!

Weekly Work Orders

Line6b Remediation - Marshall MI

Tuesday November 27, 2012
thru
Friday November 30, 2012

Submerged Oil Branch

Team 1	Survey Control Points around the Sediment Traps		
Meeting Location	0700 at C3.2 Building	**Starting Field Area**	TBD
Start Date	11/27/2012	**Field Work Start Time**	0700
End Date	11/30/2012	**Field Work Stop Time**	1900
Work Site Name	Marshall, Line 6B Response	**Field Team Lead**	Ted Reckers
Task Lead	Matt Sumner		

Description of Work:
The survey team will install control points and backsite control points around the Phase I & II Sediment Traps.

Submerged Oil Branch

Teams 2 & 3	Phase I & II Sediment Trap Bathymetry		
Meeting Location	0700 at C3.2 Building	**Starting Field Area**	TBD
Start Date	11/27/2012	**Field Work Start Time**	0700
End Date	11/30/2012	**Field Work Stop Time**	1900
Work Site Name	Marshall, Line 6B Response	**Field Team Lead**	Amber McDougle Eric Celebreeze
Task Lead	Matt Sumner		

Description of Work:
The team will collect bathymetry measurements at Phase I & II Sediment Traps.

Submerged Oil Branch

Teams 4 & 5	Quantification Logging and Sampling		
Meeting Location	0700 at C3.2 Building	**Starting Field Area**	C3.2 Building
Start Date	11/27/2012	**Field Work Start Time**	0700
End Date	11/30/2012	**Field Work Stop Time**	1900
Work Site Name	Marshall, Line 6B Response	**Field Team Lead**	Reed Rector Jerry Kraemer
Task Lead	Matt Sumner		

Description of Work:
Photograph, log and sample the remaining Quantification cores. There will be two logging and sampling teams.

Weekly Work Orders

Line6b Remediation - Marshall MI

Monday December 3, 2012
thru
Friday December 7, 2012

Submerged Oil Branch

Teams 1, 2, 3 & 4	Phase I & II Sediment Trap Bathymetry		
Meeting Location	0700 at C3.2 Building	**Starting Field Area**	TBD
Start Date	12/3/2012	**Field Work Start Time**	0700
End Date	12/7/2012	**Field Work Stop Time**	1900
Work Site Name	Marshall, Line 6B Response	**Field Team Leads**	Amber McDougle Eric Celebreeze Luke Hodges Chad Khodl
Task Lead	Matt Sumner		

Description of Work:
The team will collect bathymetry measurements at Phase I & II Sediment Traps.

Submerged Oil Branch

Teams 5	Morrow Lake Monitoring		
Meeting Location	0700 at C3.2 Building	**Starting Field Area**	E4 Boat Launch
Start Date	12/3/2012	**Field Work Start Time**	0700
End Date	12/7/2012	**Field Work Stop Time**	1900
Work Site Name	Marshall, Line 6B Response	**Field Team Leads**	Russell Platte
Task Lead	Matt Sumner		

Description of Work:
Collect poling data from the fixed locations in Morrow Lake Delta and Morrow Lake.

Kalamazoo River Branch System

Team 6	Remedial Investigation		
Meeting Location	0700 at C3.2 Building	**Starting Field Area**	C3.2 Building
Start Date	12/3/2012	**Field Work Start Time**	0700
End Date	12/7/2012	**Field Work Stop Time**	1900
Work Site Name	Marshall, Line 6B Response	**Field Team Lead**	Reed Rector
Task Lead	Matt Sumner		

Description of Work:
Photograph, log, and sample cores collected for the remedial investigation.

Kalamazoo River Branch System

Team 7	Potable Sampling		
Meeting Location	0800 at C3.2 Building	**Starting Field Area**	C3.2 Building
Start Date	12/3/2012	**Field Work Start Time**	0800
End Date	12/7/2012	**Field Work Stop Time**	1900
Work Site Name	Marshall, Line 6B Response	**Field Team Lead**	Jon Carveth
Task Lead	Alison Schoeff		

Description of Work:
Collect potable samples.

Re: **Marshall Potable Water 12/3/12** Work Order: **1212172**

Dear Alison,

ALS Environmental received 11 samples on 05-Dec-2012 08:00 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 32.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Potable Water 12/4/12** Work Order: **1212173**

Dear Alison,

ALS Environmental received 7 samples on 05-Dec-2012 08:00 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 21.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

Case Narrative

Batch 45283 MS/MSD data for Mercury is not related to this project's samples. No data requires qualification.

Batch R113652 MS/MSD data for Volatiles is not related to this project's samples. No data requires qualification.

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Potable Water 12/5/12** Work Order: **1212318**

Dear Alison,

ALS Environmental received 12 samples on 07-Dec-2012 03:35 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 24.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Potable Water 12/6/12** Work Order: **1212319**

Dear Alison,

ALS Environmental received 12 samples on 07-Dec-2012 03:35 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 32.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Potable Water 12/7/12** Work Order: **1212320**

Dear Alison,

ALS Environmental received 9 samples on 07-Dec-2012 03:35 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 23.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Potable Water 12/11/12** Work Order: **1212420**

Dear Alison,

ALS Environmental received 12 samples on 12-Dec-2012 08:10 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 27.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Potable Water 12/10/12** Work Order: **1212421**

Dear Alison,

ALS Environmental received 12 samples on 12-Dec-2012 08:10 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 32.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Potable Water 12/13/12** Work Order: **1212543**

Dear Alison,

ALS Environmental received 9 samples on 14-Dec-2012 03:45 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 27.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Potable Water 12/12/12** Work Order: **1212555**

Dear Alison,

ALS Environmental received 12 samples on 14-Dec-2012 03:45 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 26.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

Case Narrative

Batch 45461 samples 1212555-09 and 1212555-10 one PAH surrogate recovery for each sample was below the lower control limits. The samples' reporting limits for Phenanthrene may be biased low.

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Hydrogeo2 Kalamazoo 12/17/12** Work Order: **1212694**

Dear Mike,

ALS Environmental received 7 samples on 19-Dec-2012 08:00 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 20.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Hydrogeo2 Augusta 12/18/12** Work Order: **1212697**

Dear Mike,

ALS Environmental received 7 samples on 19-Dec-2012 08:00 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 24.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Marshall Quantification Study Sediment 7/27-8/7/12** Work Order: **1212055**

Dear Brian,

ALS Environmental received 12 samples on 04-Dec-2012 09:45 AM for the analyses presented in the following report.

The analytical data provided relates directly to the results received by ALS Environmental and for only the analyses requested. The report from the subcontract laboratory is included in its entirety.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 7.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

Re: **Marshall Quantification Study Sediment 12/7/12** Work Order: **1212327**

Dear Bryan,

ALS Environmental received 1 sample on 07-Dec-2012 for the analyses presented in the following report.

The analytical data provided relates directly to the results received by ALS Environmental and for only the analyses requested. The report from the subcontract laboratory is included in its entirety.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 8.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
cc	
g	grams
lbs/ft³	Pounds per Cubic Foot

Re: **Marshall KRRI 1025R,1125R SPLP Nov. 2012** Work Order: **1211711**

Dear Mike,

ALS Environmental received 6 samples on 23-Nov-2012 for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 20.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
mg/L	Milligrams per Liter

Re: **Marshall KRRI 1075L, 1150R 12/3/12** Work Order: **1212170**

Dear Bryan,

ALS Environmental received 6 samples on 05-Dec-2012 08:00 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 43.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

ALS Group USA, Corp

Date: 12-Dec-12

Client: AECOM Environment
Project: Marshall KRRI 1075L, 1150R 12/3/12
Work Order: 1212170

Case Narrative

The extraction procedure used to prepare the soil samples for DRO and PAH analyses in this work order was a modification of the standard 3541 procedure. At the request of the client, a 10 gram sample aliquot dried with hydromatrix is used for extraction as outlined in ALS SOP HN-EXT-003(EN)-R01. All samples extracted starting on 10/1/2011 were prepared using this modified SOP.

Batch 45280 sample SBKR1075L524S120312S004 MSD recovery for Vanadium was above control limits. Both the MS recovery and RPD met quality control criteria. No data requires qualification.

Batch 45273 LCS recovery for MTBE was above control limits, but all samples in this quality control batch were ND for this compound. No data requires qualification. Sample SBKR1075L525S120312S004 MS/MSD recoveries for Acetone, MTBE and THF were above control limits. The parent sample was ND for these compounds. No data requires qualification. The MSD recovery for Chloroethane was below control limits. Both the MS recovery and RPD met quality control criteria. No data requires qualification.

ALS Group USA, Corp

Date: 12-Dec-12

Client: AECOM Environment
Project: Marshall KRRI 1075L, 1150R 12/3/12
WorkOrder: **1212170**

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg-dry	Milligrams per Kilogram Dry Weight

Re: **Marshall KRRI 1125-1150R 12/4/12** Work Order: **1212171**

Dear Bryan,

ALS Environmental received 9 samples on 05-Dec-2012 08:00 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 56.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Client: AECOM Environment
Project: Marshall KRRI 1125-1150R 12/4/12
Work Order: 1212171

Case Narrative

Batch 45256 samples 1212171-01, 1212171-03 through 1212171-09 PAH internal standard recoveries were below the lower control limit, but >20%. Per the client's request, the results associated with the IS are being reported and should be considered as estimated for the analytes marked with an asterisk.

Batch 45256 samples 1212171-07, 1212171-08, and 1212171-09 each had a high PAH surrogate recovery. The sample were non-detect, therefore, no qualification is needed.

Batch 45273 LCS recovery for MTBE was outside of the upper control limit. All samples in this quality control batch were ND for MTBE. No qualification is necessary for this analyte. The MS/MSD data for Volatiles is not related to this project's samples. No data requires qualification.

Batch 45280 MS/MSD data for Metals is not related to this project's samples. No data requires qualification.

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg-dry	Milligrams per Kilogram Dry Weight

Re: **Marshall KRRI 2075R SPLP 4/30/12** Work Order: **1212205**

Dear Mike,

ALS Environmental received 1 sample on 06-Dec-2012 for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 10.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Hi Ann - The AECOM id is SBKR2075R515S043012S003 with a molybdenum result of 4.5 mg/Kg. The ALS id is 1205037-14.

Thanks

Mike

Lab Samp ID	Client Sample ID	Matrix	Tag Number	Collection Date	Date Received	Hold
1212321-01	SBKR1150R508S120512S007	Soil		12/5/2012 08:20	12/7/2012 15:35	☐
1212321-02	SBKR1150R508D120512S007	Soil		12/5/2012 08:20	12/7/2012 15:35	☐
1212321-03	SBKR1150R509S120512S006	Soil		12/5/2012 09:32	12/7/2012 15:35	☐
1212321-04	SBKR1150R510S120512S006	Soil		12/5/2012 10:39	12/7/2012 15:35	☐
1212321-05	SBKR1150R510T120512MX	Soil		12/5/2012	12/7/2012 15:35	☐

ALS Group USA, Corp

Date: 17-Dec-12

Client: AECOM Environment
Project: Marshall KRRI 1150R 12/5/12
Work Order: 1212321

Case Narrative

The extraction procedure used to prepare the soil samples for DRO and PAH analyses in this work order was a modification of the standard 3541 procedure. At the request of the client, a 10 gram sample aliquot dried with hydromatrix is used for extraction as outlined in ALS SOP HN-EXT-003(EN)-R01. All samples extracted starting on 10/1/2011 were prepared using this modified SOP.

Batch 45312B MS/MSD data for DRO/ORO is not related to this project's samples. No data requires qualification.

Batch 45353 sample SBKR1150R510S120512S006 MS recovery for Vanadium was above control limits. Both the MSD recovery and RPD met quality control criteria. No data requires qualification.

Batch 45356 LCS recoveries for Chloromethane, MTBE, and Vinyl Chloride were above control limits, but all samples in this quality control batch were ND for these compounds. No data requires qualification.

Batch 45311sample 1212321-01 through 1212321-04 PAH internal standard recoveries were below the lower control limit, but >20%. Per the client’s request, the results associated with the IS are being reported and should be considered as estimated for the PAH compounds marked with an asterisk.

WorkOrder: **1212321**

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg-dry	Milligrams per Kilogram Dry Weight

Re: **Marshall KRRI 1200I, 1200R 12/11/12** Work Order: **1212419**

Dear Bryan,

ALS Environmental received 10 samples on 12-Dec-2012 08:10 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 58.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

Work Order: 1212419

Case Narrative

The extraction procedure used to prepare the soil samples for DRO and PAH analyses in this work order was a modification of the standard 3541 procedure. At the request of the client, a 10 gram sample aliquot dried with hydromatrix is used for extraction as outlined in ALS SOP HN-EXT-003(EN)-R01. All samples extracted starting on 10/1/2011 were prepared using this modified SOP.

Batch 45396A sample SBKR1200R510S121112S005 MS recovery for ORO was slightly below control limits. Both the MSD recovery and RPD met quality control criteria. No data requires qualification for ORO.

Batch 45358 sample SBKR1200R505S121112S007 MSD recovery for Tetrahydrofuran was slightly below control limits. Both the MSD recovery and RPD met quality control criteria. No data requires qualification for this compound. The MS/MSD recoveries for 1,2,3-TMB were below control limits. The corresponding reporting limit in the parent sample may be biased low for 1,2,3-TMB.

Batch 45367 samples 1212419-05 and1212419-06 PAH internal standard recoveries were below the lower control limit, but >20%. Per the client's request, the results associated with the IS are being reported and should be considered as estimated for the compounds marked with an asterisk.

Batch 45453 sample SBKR1200R505S121112S007 MS/MSD recoveries for Vanadium were above control limits. The corresponding result in the parent sample may be biased high for Vanadium.

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg-dry	Milligrams per Kilogram Dry Weight

Re: **Marshall KRRI 1175R 12/10/12** Work Order: **1212422**

Dear Bryan,

ALS Environmental received 8 samples on 12-Dec-2012 08:10 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 45.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston
Project Manager

ALS Group USA, Corp

Date: 19-Dec-12

Client: AECOM Environment
Project: Marshall KRRI 1175R 12/10/12
Work Order: 1212422

Case Narrative

The extraction procedure used to prepare the soil samples for DRO and PAH analyses in this work order was a modification of the standard 3541 procedure. At the request of the client, a 10 gram sample aliquot dried with hydromatrix is used for extraction as outlined in ALS SOP HN-EXT-003(EN)-R01. All samples extracted starting on 10/1/2011 were prepared using this modified SOP.

Batch 45453 MS/MSD data for Metals is not related to this project's samples. No data requires qualification.

Batch 45358 MS/MSD data for Volatiles is not related to this project's samples. No data requires qualification.

Batch 45395 sample 1212422-02 PAH reporting limit were elevated due to dilution for high concentrations of non-target analytes. Samples 1212422-04, 1212422-05, 1212422-06 and 1212422-07 PAH internal standard recoveries were below the lower control limit, but >20%. Per the client's request, the results associated with the IS are being reported and should be considered as estimated for the compounds marked with an asterisk.

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg-dry	Milligrams per Kilogram Dry Weight

Re: **Marshall KRRI 1150-1175R Sediment 12/10/12** Work Order: **1212423**

Dear Bryan,

ALS Environmental received 3 samples on 12-Dec-2012 08:10 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 18.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

Work Order: 1212423

Case Narrative

The extraction procedure used to prepare the soil samples for DRO and PAH analyses in this work order was a modification of the standard 3541 procedure. At the request of the client, a 10 gram sample aliquot dried with hydromatrix is used for extraction as outlined in ALS SOP HN-EXT-003(EN)-R01. All samples extracted starting on 10/1/2011 were prepared using this modified SOP.

Batch 45395 samples 1212423-01, 1212423-02, and 1212423-03 PAH internal standard recoveries were below the lower control limit, but >20%. Per the client's request, the results associated with the IS are being reported and should be considered as estimated for the compounds marked with an asterisk.

Batch 45396A MS/MSD data for DRO is not related to this project's samples. No data requires qualification.

Batch 45453 MS/MSD data for Metals is not related to this project's samples. No data requires qualification.

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
% of sample	Percent of Sample
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg-dry	Milligrams per Kilogram Dry Weight

Re: **Marshall KRRI 1250I,1250L 12/13/12** Work Order: **1212554**

Dear Bryan,

ALS Environmental received 10 samples on 14-Dec-2012 03:45 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 73.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

Work Order: 1212554

Case Narrative

The extraction procedure used to prepare the soil samples for DRO and PAH analyses in this work order was a modification of the standard 3541 procedure. At the request of the client, a 10 gram sample aliquot dried with hydromatrix is used for extraction as outlined in ALS SOP HN-EXT-003(EN)-R01. All samples extracted starting on 10/1/2011 were prepared using this modified SOP.

Batch 45493 sample SBKR1250I506S121312S004 MS recovery for ORO was below control limits. Both the MSD recovery and RPD met quality control criteria. No data requires qualification.

Batch 45473 LCS/LCSD recoveries for a few Volatile compounds were above control limits, but all samples in this quality control batch were ND for these compounds. No data requires qualification. Sample SBKR1250I506S121312S004 MS/MSD recoveries for a few Volatile compounds were above control limits. The parent sample was ND for these compounds. No data requires qualification. The MS/MSD recoveries for trans-1,40Dichloro-2-butene were below control limits. The corresponding reporting limit in the parent sample may be biased low for trans-1,4-Dichloro-2-butene.

Batch 45510 sample SBKR1250I506S121312S004 MS/MSD recoveries for Vanadium were above the upper control limit. The corresponding result in the parent sample may be biased high for Vanadium.

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg-dry	Milligrams per Kilogram Dry Weight

Re: **Marshall KRRI 1225-1250L,1225R 12/12/12** Work Order: **1212556**

Dear Bryan,

ALS Environmental received 9 samples on 14-Dec-2012 03:45 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 92.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

Ann Preston

Electronically approved by: Ann Preston

ALS Group USA, Corp

Date: 22-Dec-12

Client: AECOM Environment
Project: Marshall KRRI 1225-1250L,1225R 12/12/12
Work Order: 1212556

Case Narrative

The extraction procedure used to prepare the soil samples for DRO and PAH analyses in this work order was a modification of the standard 3541 procedure. At the request of the client, a 10 gram sample aliquot dried with hydromatrix is used for extraction as outlined in ALS SOP HN-EXT-003(EN)-R01. All samples extracted starting on 10/1/2011 were prepared using this modified SOP.

Batch 45493 MS/MSD data for ORO is not related to this project's samples. No data requires qualification.

Batches 49473 and 45482 LCS/LCSD recoveries for several Volatile compounds were above control limits, but all samples in this quality control batch were ND for these compounds. No data requires qualification. The MS/MSD data for Volatiles is not related to this project's samples. No data requires qualification.

Batch 45484 sample SBKR1250L501S121212S005 MS/MSD recoveries for Vanadium were above the upper control limit. The corresponding result in the parent sample may be biased high for Vanadium.

ALS Group USA, Corp

Date: 22-Dec-12

Client: AECOM Environment
Project: Marshall KRRI 1225-1250L,1225R 12/12/12
WorkOrder: **1212556**

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
SD	Serial Dilution
TDL	Target Detection Limit

Units Reported	Description
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg-dry	Milligrams per Kilogram Dry Weight
