UNIT LOG		1. Incident Name Kalamazoo River/Enbridge Oil Spill	2. Date Prepared 02/09/2013	3. Time Prepared 1415
4. Unit Name/Designators Situation Unit		5. Unit Leader (Name and Position) Mindy Luetke, Planning Section Chief		6. Operational Period 0800, 02/09/13 – 1315, 02/09/13
7. Personnel Roster Assigned				
Name		ICS Position		Home Base
Karen Berecz		Situation Unit 2		Dallas, TX
8. Activity Log				
Time	Major Events			

<p>0800</p>	<p>Situation Unit Observations:</p> <ul style="list-style-type: none"> · Arrive at ICP. · Arrive at Morrow Lake Delta. Observed ice conditions. Delta predominantly covered in ice, small random areas of open water observed. · Arrive at E4 Boat Launch observed ice conditions in the Morrow Lake Neck/Morrow Lake Delta and Morrow Lake. Morrow Lake Neck/Delta observed shoreline ice, main channel through delta remains open. No flowing ice observed. Morrow Lake observed shoreline ice, main channel on lake remains open. No flowing ice observed. · Arrive at MP27.00, Shady Bend Campground, observed river ice conditions. Observed no ice flowing on river channel. Shoreline ice observed on downstream RDB of river channel. · Arrive at E2 Boat Launch observed river ice conditions. Observed no ice flowing on river channel. Minor shoreline ice observed on downstream RDB of river channel. · Arrive at MP21.50, observed river and oxbow ice conditions. Observed sizeable amount of ice flowing on river channel, and oxbow has ice flowing along back channel. · Arrive at Mill Ponds. Observed South Mill Pond river and back water area ice conditions. Observed considerable amount of ice flowing on river channel, and along back water channel of pond. Observed North Mill Pond river and back water area ice conditions. Observed considerable amount of ice flowing on river channel, and back water area remains covered in ice and snow. River channel at culverts remains open. · Arrive at C3.2 Boat Launch observed river ice conditions. Observed modest amount of ice flowing on river channel. Shoreline ice remains along LDB of river channel. · Arrive at Ceresco Dam impoundment observed river ice conditions. River channel remains open. Observed slight amount of ice flowing in river channel. · Arrive at C0.4 Boat Launch observed river ice conditions. Observed no ice flowing on river channel. Ice has advanced significantly along river channel as compared to yesterday · Arrive at MP2.25, Saylor’s Landing, observed river ice conditions. Observed no ice flowing on river channel. Marginal shoreline ice remains along LDB. · Arrive at the Confluence. Observed no bank ice along Talmadge Creek leading to the confluence. Observed ice at confluence area. Observed no ice flowing on river channel.
<p>1315</p>	<ul style="list-style-type: none"> · Arrive at ICP. End of field day.
