Re: DCP Midstream, LP
GHG PSD Permit Application
Jefferson County NGL Fractionation Plant
February 2013 Revised Application

Dear Mr. Robinson:

DCP Midstream, LP (DCP) submitted a Greenhouse Gas (GHG) Prevention of Significant Deterioration (PSD) Permit Application for the proposed Jefferson County Natural Gas Liquids (NGL) Fractionation Plant to the United States Environmental Protection Agency (USEPA) Region 6 on July 9, 2012. USEPA Region 6 responded to the GHG PSD Permit Application on November 14, 2012 with a letter stating that the application was incomplete and requested additional information. DCP personnel (Pete Stevenson, Sam Keen, and Lynn Ward) met with USEPA Region 6 personnel (Melanie Magee, Aimee Wilson, and Erica LeDoux) on January 22, 2013 to provide written responses to the USEPA Region 6 November 14, 2012 incompleteness letter and discuss removal of GHG emission sources from the permit application, which resulted in significant reductions in potential GHG emissions from the proposed project. During this meeting it was also discussed that DCP would be submitting a revised application to USEPA Region 6, mainly to remove GHG emission sources and include information from DCP's response to the USEPA Region 6 incompleteness letter. Please find enclosed a Compact Disc (CD) which contains a Portable Document Format (PDF) electronic copy of the revised GHG PSD Permit Application for the Jefferson County NGL Fractionation Plant. This PDF document will also be submitted via email to USEPA Region 6 at the following addresses: R6AirPermits@epa.gov; robinson.jeffrey@epa.gov.

Should you have any questions or need to discuss this information, feel free to contact me at (903) 694-4114, or via email at LCward@dcpmidstream.com. Thank you in advance for the efforts of you and your staff in reviewing this submittal.

Sincerely,
DCP Midstream, LP

Lynn C. Ward
Senior Environmental Specialist
