

US EPA ARCHIVE DOCUMENT

Lone Star NGL

February 11, 2014

Alfred C. Dumauual
U.S. EPA Region 6
Air Permits Section (6PD-R)
1445 Ross Avenue
Dallas, TX 75202

Dear Mr. Dumauual:

RE: Fractionator III
Lone Star NGL Fractionators, LLC
Chambers County, Texas

Lone Star NGL Fractionators, LLC (Lone Star NGL) submits this letter as additional information pertaining to the Fractionator III Project (Project) in Chambers County, Texas.

The Project will be located within the property boundaries that were previously approved by the Environmental Protection Agency (EPA), the U.S. Army Corps of Engineers (USACE), the U.S. Fish and Wildlife Service (USFWS), the Texas Historical Commission (THC), and other state and local agencies during reviews of Lone Star NGL's existing Fractionator I and II projects.

The footprint for the Project was addressed within the cultural resources report for Fractionator I, and the THC concurred that no historic properties would be affected on November 15, 2010 and accepted the report on January 10, 2011. During the Fractionator II project, the THC again concurred that no historic properties would be affected on October 4, 2011. Please see the attached cultural correspondence and cultural report.

The Biological Resources Report for Fractionator I covered the northern portion of the footprint for Fractionator III, and the Biological Resources Report for Fractionator II covered the lower portion. Both reports (attached) were submitted to the USACE for their respective projects, and were accepted by the USFWS and USACE during those permitting efforts. Also attached is the USACE permit (SWG-2010-00876) for Fractionator I, issued on September 13, 2011, and the amended permit issued for Fractionator II on August 2, 2012.

Although the emissions are increasing with the Project, no new air contaminants will be emitted. The Project is below the respective Significant Impact Level (SIL) for all criteria air pollutants with primary and secondary National Ambient Air Quality Standards [(NAAQS) (the vacated SIL was used for PM_{2.5})]. Therefore, the Action Area will not increase in size relative to the previous project.

The proposed Project will also tie into the existing Fractionators I and II utilities. No new linear facilities (utility lines, wastewater pipelines, water lines, etc.) will be required outside of the footprint of the previously approved facilities.

If you have any questions or need additional information, please contact me at 713-989-2844 or by email at buffy.thomason@energytransfer.com

Sincerely,

A handwritten signature in black ink, appearing to read "Buffy Thomason". The signature is fluid and cursive, with the first name "Buffy" being more prominent and stylized.
