13th Floor
Dallas, Texas 75202-2733

Dear Olga:

Arkansas' revised HSWA Statutory Checklist is enclosed. It is my understanding that EPA does not want the corresponding attorney general's statement until it is signed. As you know, I'll be on vacation the week of August 13 - 17, so I will have the A.G.'s statement signed and sent to you as soon as possible after my return.

Also enclosed for your information is a copy of the manifest form we use. You may remember that we talked about it during our discussion of item number six of the checklist.

Give me a call if you have any questions or comments.

Sincerely,

A handwritten signature in cursive that reads "Anne".

Anne Roberts Bobo

8. Authority to prohibit the land disposal of any hazardous waste. Land disposal includes, but is not limited to, landfills, surface impoundments, waste piles, deep injection wells, land treatment facilities, salt dome and bed formations and underground mines or caves. Deep injection well means a well used for the underground injection of hazardous wastes other than a well to which §7010(a) of RCRA applies.	§3004(b)-(p) [Sec. 201]	X	8-7-209(3), (5), (6), and (11) 8-7-215 8-7-216 8-7-218 8-7-303 8-7-308 8-4-101 through 8-4-229 ("Ark. Water and Air Pollution Control Act," Part I), specifically 8-4-203 and 8-4-202	

We believe that States already have this authority through their authority to regulate the treatment, storage and disposal of hazardous waste. However, if a State believes it needs new authority to ban a waste from land disposal, we strongly recommend that the State seek the broad statutory authority described above. This recommendation is based primarily on §3004(p) of RCRA; Section 3004(p) requires EPA to decide whether to prohibit one or more methods of land disposal for every listed or identified hazardous waste by 1990. Thus, unless a State has statutory authority to ban the land disposal of any such hazardous waste, it may need to amend its statute repeatedly as EPA decides the status of each waste.

If a State decides not to seek or cannot obtain such broad authority, the following list breaks down the various HSWA provisions relating to land disposal bans that States will need to adopt in the coming months and years:

- *A. Authority to prohibit the disposal of any hazardous waste in salt dome and bed formations, underground mines, or caves until a §3005(c) permit is issued. In addition, authority to prohibit disposal of any bulk liquid hazardous waste in salt dome and bed formations, underground mines, or caves until

* Authority over bulk liquid hazardous waste may be under a hazardous waste or underground injection control program as long as all RCRA requirements are met.

(1) It is determined, after notice and opportunity for hearings on the record in the affected area, that such placement is protective of health and the environment and
(2) performance and permitting standards for such facilities are adopted.

B. Authority to prohibit landfilling of bulk or non-containerized liquid hazardous waste.

\$3004(c)
[Sec. 2011]

N/A

C. Authority to promulgate regulations that minimize the landfilling of containerized liquid hazardous waste and free liquids in containerized hazardous wastes, and prohibit the landfilling of liquids absorbed in materials that biodegrade or release liquids when compressed.

\$3004(c)
[Sec. 2011]

N/A

*E. Authority to prohibit the land disposal, including underground injection into deep injection wells, of the following wastes (including the authority to set more stringent concentration levels for categories A-E):

\$3004(d), (e), (f)
[Sec. 2011]

N/A

- (A) Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing free cyanides at concentrations greater than or equal to 1000 mg/l.
- (B) Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing the following metals

* Authority regarding deep injection wells may be under the State's hazardous waste authority or its underground injection control authority as long as RCRA requirements are met.

(or elements) at concentrations greater than or equal to those specified below:

- (I) arsenic and/or compounds (as As) 500 mg/l
- (II) cadmium and/or compounds (as Cd) 100 mg/l
- (III) chromium VI and/or compounds (as Cr VI) 500 mg/l
- (IV) lead and/or compounds (as Pb) 500 mg/l
- (V) mercury and/or compounds (as Hg) 20 mg/l
- (VI) nickel and/or compounds (as Ni) 134 mg/l
- (VII) selenium and/or compounds (as Se) 100 mg/l
- (VIII) thallium and/or compounds (as Th) 130 mg/l
- (C) Liquid hazardous waste having a pH less than or equal to two (2.0)
- (D) Liquid hazardous wastes containing polychlorinated biphenyls at concentrations greater than or equal to 50 ppm
- (E) Hazardous wastes containing halogenated organic compounds in total concentration greater than or equal to 1000 mg/kg
- (F) solvents
- (G) dioxins

*F. Authority to prohibit the land disposal of any hazardous waste which is prohibited from land disposal under §3004(r) of RCRA.

§3004(r)
[Sec. 2011]

N /A

9. Optional: Authority to waive, until November 8, 1987, a prohibition on land disposal of certain hazardous wastes (i.e., those designated in #10E above) that might otherwise apply to the disposal of contaminated soil or debris from CERCLA §104 or §106 actions or RCRA corrective actions.

§3004(3)(A)
[Sec. 2011]

Y

8-7-211

*10. Authority to prohibit disposal of nonhazardous liquids in Subtitle C landfills unless (1) the only reasonable alternative is disposal in a landfill or unlined impoundment, whether or not subject to Subtitle C, that contains or may contain hazardous waste and (2) disposal will not endanger an underground source of drinking water.

§3004(c)(3)
[Sec. 2011]

Y

8-7-209(a) (5) Arkansas prohibit and the Hazardous disposal of any Waste Management liquids in any Code §13(a) (5) (i) of landfill, and (iii) 8-6-201 through 8-6-214, specifically 8-6-207, and the Solid Waste Management Code §XII(B) (7) (j) and §(C) (6) (g) 8-4-101 through 8-4-229

* Because of legal problems with incorporating future EPA regulations by reference, States pursuing this option should seek only the authority to ban wastes prohibited by EPA rather than seeking to incorporate by reference any EPA land disposal prohibition. As discussed above, we advise states to seek authority to ban the land disposal of any hazardous waste. However, some states may wish to seek authority to ban land disposal of only those hazardous wastes for which EPA has prohibited land disposal.

**States should particularly note this requirement. Since many State statutes pertain only to hazardous waste, States are likely to need new authority to regulate the disposal of nonhazardous waste at Subtitle C facilities.

**40. Optional: Authority to grant variances and exemptions that are no less stringent than allowed by Subtitle C of RCRA.

* Potential requirement: Depending on the result of reports EPA is required to prepare under §3018(a), EPA may impose regulations in the future addressing hazardous wastes passing through to a POTW. Such regulations, if adopted, may be under RCRA, the Clean Water Act or other authority, and may or may not be a State program requirement.

** Various HSWA provisions amend RCRA to allow EPA and the States if they wish - to grant variances and exemptions. In addition to those variances specifically authorized by statute, the HSWA allows EPA to develop regulations with variance provisions or to make case-by-case variance decisions. Unless a state is absolutely sure that it will never wish to grant a variance or exemption, we strongly recommend states obtain the above authority.

The States' variance procedures and decisions must be no less stringent than EPA's.

Statutory Element	RCRA (HSWA) Cite	FAVORABLE Y/N	Cite	Comment
41. Optional: Neither the State nor citizens may bring action against common carriers for imminent hazards arising after delivery of the shipment to the consignee, provided the carrier exercised due care when handling the work.	\$7002(g) \$7003(a)(B)(2)	N		
*42. Authority to regulate hazardous waste that is radioactive except to the extent that the waste is source, special nuclear, or byproduct material as defined by the Atomic Energy Act of 1954, as amended. (68 Stat. 923)	\$1004(27)	Y	8-7-203(6)	Statutory definition of hazardous waste includes "radioactive wastes"

* This is not a HSWA requirement. Until recently there had been some controversy about the scope of FPA's RCRA authority over radioactive waste. EPA has now determined that hazardous wastes are subject to RCRA if they are mixed with source, special nuclear or byproduct material even though source, special nuclear, or byproduct material itself is not subject to RCRA. Thus, States will need to review their authority to ensure that only source, special nuclear, or byproduct material is excluded from their hazardous waste jurisdiction.
