RCRA REVISION CHECKLIST 19

Burning of Waste Fuel and Used Oil Fuel
in Boilers and Industrial Furnaces
50 FR 49164-49211
November 29, 1985
as amended on April 13, 1987, at 52 FR 11819-11822
(HSWA Cluster I)

Special Note on the Use of This Checklist

Used oil fuel standards at §266.40-44 are delegable to State programs although used oil is not specifically listed as a hazardous waste pursuant to Section 3001 of RCRA. This is because these regulations are promulgated pursuant to (1) the Used Oil Recycling Act (§3014(a) of RCRA) which directs EPA to regulate recycled used oil even if it is not a hazardous waste, and (2) the Superfund Amendments and Reauthorization Act of 1986 (SARA §205(j) adding RCRA §3006(h)). SARA §205(j) provides for delegation to States for used oil recycling standards even if used oil is not a listed waste or identified as a hazardous waste.

A November 19, 1986 (51 FR 41900) Federal Register article did not affect the RCRA regulations. Instead it addressed issues surrounding the potential listing of disposed used oil as hazardous.
