RCRA REVISION CHECKLIST 52

Hazardous Waste Management System; Standards for Hazardous
Waste Storage and Treatment Tank Systems
53 FR 34079-34087
September 2, 1988
(Non-HSWA Cluster V and HSWA Cluster II)

Note: This checklist provides additional interpretation, clarification, and correction of typographical errors for the final rule issued for hazardous waste tank systems on July 14, 1986 (Revision Checklist 28). That rule was applicable to both non-HSWA Cluster III and HSWA Cluster I. HSWA is implemented only to the extent that the regulations apply to tank systems owned or operated by small quantity generators, establish leak detection requirements for all new underground tank systems, and establish permit standards for underground tank systems that cannot be entered for inspection. They also implement RCRA insofar as they apply to certain other tank systems. In this checklist, HSWA-related regulations are preceded by an asterisk; those not preceded by an asterisk are non-HSWA regulations. This present checklist is placed in both non-HSWA Cluster V and HSWA Cluster II. As was the case for Revision Checklist 28, States are encouraged to apply for this checklist under the non-HSWA Cluster.
