

US EPA ARCHIVE DOCUMENT

Mar 29, 2011

Dear Charlotte Ely

This letter is in regards to the recharge project at Joshua Basin Water District. I've been a Board member for over five years, and a resident for 42 years. I have always voted against this project.

I am not against the recharging of the District's aquifers, but in a more efficient method.

I have asked for the nitrate levels from the Apartment complex next to the recharge site and have not received any answers from the District.

And beyond that problem, this project is not needed at this time, in my opinion.

Thank you for reading this statement.

Yours Sincerely
Gary H. Wilson
