National Program Manager Comments SP-4b is a new measure starting in FY 08. Note: "Minimized risk" is achieved by the substantial implementation, as determined by the state, of actions in a source water protection strategy. The universe is the most recent SDWIS inventory of community water systems. FY 07 end-of-year adjusted data not from ACS.

	National Program Manager Comments	Measure revised for FY 09. Universe for FY 09 will be updated for the revised measure. Note: Measure will still set target and commitment and report results in both percent and number. "Sensitive ground water protection areas" are defined by the UIC primacy program director, but at a minimum must include ground water based community water system source water areas. This measure does not report all of the high priority wells that are being closed or permitted because some states do not distinguish between high priority wells in ground water based community water system source water areas and other areas.

	National Program Manager Comments	Universe changes annually. Per ACS, Region 9's FY 07 commitment reflects the inclusion of Guam, American Samoa, and the Northern Marianas for the first time. These territories have a higher percentage of beach season day closures resulting in a lower commitment at the regional and national levels. Universe equals the total number of beach season days that beaches were open.

	National Program Manager Comments	Measure revised for FY 08. FY 07 numbers are based on a slightly different definition. Beginning in FY 08, OECA and OWM agreed on common language and data collection procedures to streamline this measure. While the definition is slightly different for OWM, the past data is still valid for comparison with future data. We have included a revised baseline to demonstrate the real progress for FY 08. While national numbers are fairly stable, the Regional baselines did change.

National Program Manager Comments

Regional annual commitments and action items are confirmed by HQ action item database.
 *FY 05 and FY 06 end-of-year data not from ACS. (FY 07 measure slightly different than FY 05 and FY 06 measures.)
 Assessed programs include 45 authorized states, 5 unauthorized states (MA, NH, NM, AK, ID), 1 authorized territory (VI), 3 authorized territories (DC, PR, Pacific Island Territories), and 10 Regions (total of 64 programs) assessed through the Permits for Environmental Results (PER) program.
 Universe of 298 includes all follow-up actions for which a schedule was established. The universe increases as additional action items are identified by the Regions and through HQ program review. An updated universe will be available in March 2009.

National Program Manager Comments

Note: WQ-20 was a two part measure in FY 07; (a) was a Target measure until early FY 07, and has subsequently been dropped. Universe is the number of dischargers covered under an NPDES permit that allows trading. In FY 07, measure was: "Number of permits providing for trading....and the number of dischargers that carried out trades." ***FY 07 end-of-year results are based on the number of dischargers that carried out trades and are not from ACS.

*The trading measure counts all point source permitted facilities that have traded at least once using either individual or general permits that allow trading. Facilities covered under an overlay permit (sometimes called an 'aggregate,' 'watershed,' 'bubble,' or 'umbrella' permit) that set an enforceable cap on specific pollutant discharges are all automatically counted as having traded.

(Dollars in millions and rounded to nearest tenth of a percent). Note that "primary" leveraged dollars are those the National Estuary Program (NEP) played the central role in obtaining. An example of primary leveraged dollars would be those obtained from a successful grant proposal written by the NEP. FY 06 end-of-year data is not from ACS.

National Program Manager Comments FY 05 end-of-year data not from ACS. FY 06 result (estimated 64,000 acres) fell short based on simple extrapolation of most recent annual rate ('98-'04). The next Status and Trends Report (2011) should show a continuation of upward trends. Data source: U.S. DOI, U.S. Fish and Wildlife Service, 2010. Status and Trends of Wetlands in the Conterminous United States 2005-2009, Washington, DC.
Qualifying language: The 2005-2009 reporting period of this measure reflects that the data: a) are published in 5-year increments, which creates a fixed numerical target until the next report publication; and b) are already at least two years old upon publication. Thus, at any given time, reporting against this measure is never current.

PAM WT-2a is intended to allow us to track work of all states/tribes (those just starting to build wetland programs and those that are improving well developed programs). It tracks the number of states/tribes that have substantially built or increased capacity in wetland regulation, monitoring and assessment, water quality standards, and/or restoration and protection. Substantially built or increased capacity is defined as completing two or more of the actions found in the tables found at: www.epa.gov/owow/estp/. *This measure is evaluated annually and is an indicator of where states and tribes are focusing their wetland development effort, the baseline resets to zero annually and is not a cumulative measure. This measure has revised measure language beginning FY10, which means FY10 results cannot be compared to previous years.

PAM WT-2b is designed to track the number of states/tribes that have developed "to a functioning level" a core element (CE) of a wetlands program that they are "implementing". A subset of "core or essential" actions has been identified for each of the CEs and is tailored to ensure that a basic wetlands regulatory, monitoring and assessment, water quality standards, and/or restoration and protection program (CE) is being implemented. The essential actions can be found at: www.epa.gov/owow/estp/WT2b. *This is a cumulative measure with the baseline beginning in FY2010. This measure has revised measure language beginning FY10, which means FY10 results cannot be compared to previous years.

States may use either Level 1, 2, or 3 methods or the combined 3-Level approach. The state also has plans to re-survey for the purposes of evaluating trends. To maximize financial resources, states are encouraged to use a probability survey design for measuring baseline condition. Regions should coordinate with EPA HQ and reference the full definition for this measure to make a determination on whether a state is “on track” to meet this measure by 2013. 	National Program Manager Comments	The DO measure (SP-34) was first used in the Agency's Strategic Plan in 2008 (however, the Chesapeake Bay Program has been reporting results for this measure for many years). Annual commitments are not made due to the extreme variability in the annual results. Instead, EPA set a long term target of 40% goal achievement in 2011.

National Program Manager Comments	New measure starting in FY 08. *Measure will be tracked in lbs/day and Trade Equalized (TE) lbs/day. TE lbs/day are pounds of nitrogen adjusted by application of the equivalency factor assigned to each point source based on its proximity to the receiving water body (LIS). The TMDL established a Waste Load Allocation of 22,774 TE lbs/day from point sources, to be achieved over a 15 year period beginning in 1999. The annual commitments are calculated by dividing the difference between the 1999 baseline and 2014 target by 15 (the TMDL period), or 2,425 lbs/day per year. **The Baseline and 2014 Target have been updated from the 2006-2011 Strategic Plan. 	FY 2008 BASELINE		1,199 acres restored & protected											

National Program Manager Comments	New measures starting in FY 08. For SP-43: In September 2006, the LISS Policy Committee established the goal of restoring and protecting an additional 300 acres of coastal habitat above the baseline by 2011 – 50 acres per year for 6 years. *FY 06 and FY 07 end-of-year data not from ACS. **The 2011 targets were achieved in 2007. EPA will negotiate new 2011 targets with the LISS Management Conference partners.

Subobjective 4.3.7 Restore and Protect the South Florida Ecosystem

SP-45	Achieve 'no net loss' of stony coral cover (mean percent stony coral cover) in the Florida Keys National Marine Sanctuary (FKNMS) and in the coastal waters of Dade, Broward, and Palm Beach Counties, Florida, working with all stakeholders (federal, state, regional, tribal, and local). 	FY 2008 END OF YEAR RESULT		Small change				Small change							
	FY 2008 COMMITMENT (new measure in FY 08)		No Net Loss				No Net Loss							
	FY 2005 BASELINE		6.8% in FKNMS; 5.9% in SE Florida											

National Program Manager Comments	New measures starting in FY 08. *Strategic Plan baseline of 6.7% was revised to 6.8%. The Coral Reef Evaluation and Monitoring Project (CREMP) for the Florida Keys National Marine Sanctuary was modified in 2006 by dropping one hardbottom monitoring site because of the very small percentage of stony coral cover present (less than .2%), resulting in an increase of .1 percent in the mean percent stony coral cover for the entire Sanctuary. Statistical analyses of the CREMP indicated that sampling a reduced number of stations at sites with low stony coral cover would still produce statistically valid results.
