

US EPA ARCHIVE DOCUMENT

Nitrogen Newsletter is a summary of recent publications, news and reports related to the cycling, effects and management of nitrogen. Prepared by Mary O'Brien, contractor with ASRC Federal Primus, and Jana Compton. Contact Jana Compton with any questions (Compton.jana@epa.gov)

Please note: Most of these links are available to EPA staff through library access – not all links will be available to folks outside EPA, depending on your access to specific websites.

Articles

Abdalla M, Osborne B, Lanigan G, Forristal D, Williams M, Smith P, Jones MB. 2013.

Conservation tillage systems: a review of its consequences for greenhouse gas emissions.

Soil Use Manage 29(2): 199-209. Available from: <http://dx.doi.org/10.1111/sum.12030>

Aronson EL, Dubinsky EA, Helliker BR. 2013. **Effects of nitrogen addition on soil microbial diversity and methane cycling capacity depend on drainage conditions in a pine forest soil.**

Soil Biol Biochem 62: 119-128. Available from: <http://dx.doi.org/10.1016/j.soilbio.2013.03.005>

Atkinson CL, Vaughn CC, Forshay KJ, Cooper JT. 2013. **Aggregated filter-feeding consumers alter nutrient limitation: consequences for ecosystem and community dynamics.** Ecology

94(6): 1359-1369. Available from: <http://dx.doi.org/10.1890/12-1531.1>

Bai E, Li SL, Xu WH, Li W, Dai WW, Jiang P. 2013. **A meta-analysis of experimental**

warming effects on terrestrial nitrogen pools and dynamics. New Phytol 199(2): 441-451.

Available from: <http://dx.doi.org/10.1111/nph.12252>

Barton L, Gleeson DB, Maccarone LD, Zuniga LP, Murphy DV. 2013. **Is liming soil a strategy for mitigating nitrous oxide emissions from semi-arid soils?** Soil Biol Biochem 62: 28-35.

Available from: <http://dx.doi.org/10.1016/j.soilbio.2013.02.014>

Blasko R, Hogberg P, Bach LH, Hogberg MN. 2013. **Relations among soil microbial community composition, nitrogen turnover, and tree growth in N-loaded and previously N-loaded boreal spruce forest.** Forest Ecol Manag 302: 319-328. Available from:

<http://dx.doi.org/10.1016/j.foreco.2013.02.035>

Boltersdorf S, Werner W. 2013. **Source attribution of agriculture-related deposition by using total nitrogen and N-15 in epiphytic lichen tissue, bark and deposition water samples in Germany.** *Isot Environ Health* 49(2): 197-218. Available from: <http://dx.doi.org/10.1080/10256016.2013.748051>

Chen YL, Xu ZW, Hu HW, Hu YJ, Hao ZP, Jiang Y, Chen BD. 2013. **Responses of ammonia-oxidizing bacteria and archaea to nitrogen fertilization and precipitation increment in a typical temperate steppe in Inner Mongolia.** *Appl Soil Ecol* 68: 36-45. Available from: <http://dx.doi.org/10.1016/j.apsoil.2013.03.006>

Clark CM, Morefield PE, Gilliam FS, Pardo LH. 2013. **Estimated losses of plant biodiversity in the United States from historical N deposition (1985–2010).** *Ecology* 94:1441–1448. Available from: <http://dx.doi.org/10.1890/12-2016.1>

Cochero J, Romani AM, Gomez N. 2013. **Delayed response of microbial epipelagic biofilm to nutrient addition in a Pampean stream.** *Aquat Microb Ecol* 69(2): 145-155. Available from: <http://dx.doi.org/10.3354/ame01630>

Dahnke K, Thamdrup B. 2013. **Nitrogen isotope dynamics and fractionation during sedimentary denitrification in Boknis Eck, Baltic Sea.** *Biogeosciences* 10(5): 3079-3088. Available from: <http://dx.doi.org/10.5194/bg-10-3079-2013>

Delgado V, Ederra A, Santamaria JM. 2013. **Nitrogen and carbon contents and delta N-15 and delta C-13 signatures in six bryophyte species: assessment of long-term deposition changes (1980-2010) in Spanish beech forests.** *Global Change Biol* 19(7): 2221-2228. Available from: <http://dx.doi.org/10.1111/gcb.12210>

Doherty RM, Wild O, Shindell DT, Zeng G, MacKenzie IA, Collins WJ, Fiore AM, Stevenson DS, Dentener FJ, Schultz MG, et al. 2013. **Impacts of climate change on surface ozone and intercontinental ozone pollution: a multi-model study.** *J Geophys Res-Atmos* 118(9): 3744-3763. Available from: <http://dx.doi.org/10.1002/jgrd.50266>

Einheuser MD, Nejadhashemi AP, Wang LZ, Sowa SP, Woznicki SA. 2013. **Linking biological integrity and watershed models to assess the impacts of historical land use and climate changes on stream health.** *Environ Manage* 51(6): 1147-1163. Available from: <http://dx.doi.org/10.1007/s00267-013-0043-7>

Fang Y, Xun F, Bai WM, Zhang WH, Li LH. 2012. **Long-term nitrogen addition leads to loss of species richness due to litter accumulation and soil acidification in a temperate steppe.** *PLoS One* 7(10): e47369. Available from: <http://dx.doi.org/10.1371/journal.pone.0047369>

Fenn ME, Ross CS, Schilling SL, Baccus WD, Larrabee MA, Lofgren RA. 2013. **Atmospheric deposition of nitrogen and sulfur and preferential canopy consumption of nitrate in forests of the Pacific Northwest, USA.** *Forest Ecol Manag* 302: 240-253. Available from: <http://dx.doi.org/10.1016/j.foreco.2013.03.042>

Fernandes LFS, Seixas FJ, Oliveira PC, Leitao S, Moura JP. 2012. **Climate-change impacts on nitrogen in a hydrographical basin in the northeast of Portugal.** Fresen Environ Bull 21(12): 3643-3650. Summary only available from: http://www.psp-parlar.de/feb_auswahl.asp

Ferrant S, Laplanche C, Durbe G, Probst A, Dugast P, Durand P, Sanchez-Perez JM, Probst JL. 2013. **Continuous measurement of nitrate concentration in a highly event-responsive agricultural catchment in south-west of France: is the gain of information useful?** Hydrol Process 27(12): 1751-1763. Available from: <http://dx.doi.org/10.1002/hyp.9324>

Ferrant S, Durand P, Justes E, Probst JL, Sanchez-Perez JM. 2013. **Simulating the long term impact of nitrate mitigation scenarios in a pilot study basin.** Agr Water Manage 124: 85-96. Available from: <http://dx.doi.org/10.1016/j.agwat.2013.03.023>

Frosini S, Lardicci C, Balestri E. 2012. **Global change and response of coastal dune plants to the combined effects of increased sand accretion (burial) and nutrient availability.** PLoS One 7(10): e47561. Available from: <http://dx.doi.org/10.1371/journal.pone.0047561>

Garcia-Robledo E, Revsbech NP, Risgaard-Petersen N, Corzo A. 2013. **Changes in N cycling induced by Ulva detritus enrichment of sediments.** Aquat Microb Ecol 69(2): 113-122. Available from: <http://dx.doi.org/10.3354/ame01626>

Gilbert M, Needoba J, Koch C, Barnard A, Baptista A. 2013. **Nutrient loading and transformations in the Columbia River estuary determined by high-resolution in situ sensors.** Estuar Coast 36(4): 708-727. Available from: <http://dx.doi.org/10.1007/s12237-013-9597-0>

Golubyatnikov LL, Mokhov II, Eliseev AV. 2013. **Nitrogen cycle in the earth climatic system and its modeling.** Izv Atmos Ocean Phy 49(3): 229-243. Available from: <http://dx.doi.org/10.1134/S0001433813030079>

Gudmundsdottir R, Palsson S, Hannesdottir ER, Olafsson JS, Gislason GM, Moss B. 2013. **Diatoms as indicators: the influences of experimental nitrogen enrichment on diatom assemblages in sub-Arctic streams.** Ecol Indic 32: 74-81. Available from: <http://dx.doi.org/10.1016/j.ecolind.2013.03.015>

Huang XD, Grace P, Hu WB, Rowlings D, Mengersen K. 2013. **Spatial prediction of N₂O emissions in pasture: a Bayesian model averaging analysis.** PLoS One 8(6): e65039. Available from: <http://dx.doi.org/10.1371/journal.pone.0065039>

Huang XD, Grace P, Rowlings D, Mengersen K. 2013. **A flexible Bayesian model for describing temporal variability of N₂O emissions from an Australian pasture.** Sci Total Environ 454: 206-210. Available from: <http://dx.doi.org/10.1016/j.scitotenv.2013.02.013>
